Submit Your Bids By Fax | FAX HOTLINE: 214-409-1425

ALL INFORMATION MUST BE COMPLETED AND FORM SIGNED

NAME _____ CLIENT # (if known) _____ BIDDER # _____
ADDRESS _____ E-MAIL ADDRESS _____
CITY/STATE/ZIP _____ CELL PHONE _____
DAYTIME PHONE (_____) _____ EVENING PHONE (_____) _____

Would you like a FAX or e-mail confirming receipt of your bids? If so, please
print your FAX # _____

or e-mail address here: _____

I would like to limit my bidding to a total of \$ _____

at the hammer amount for all lots listed on this bid sheet. I am aware
that by utilizing the Budget Bidding feature all bids on this sheet will be
affected. If I intend to have regular bidding on other lots I will need to
use a separate bid sheet.

Payment by check may result in your property not being released until
purchase funds clear our bank. Checks must be drawn on a U.S. bank.
(Bid in whole dollar amounts only.)

All bids are subject to the applicable Buyer's Premium. See HA.com for details.

Non-Internet bids (including but not limited to, podium, fax, phone and mail
bids) may be submitted at any time and are treated similar to floor bids. These
types of bids must be on-increment or at a half increment (called a cut bid). Any
podium, fax, phone or mail bids that do not conform to a full or half increment
will be rounded up or down to the nearest full or half increment and will be
considered your high bid.

Dear Bidder:

Welcome to Dallas! After our successful events in Orlando and Long Beach, the U.S. Coin Signature® circuit returns to Heritage's World Headquarters in Dallas. About 150 consignors have contributed to this event, including continuations of two Featured Collections, The Teich Family Collection in our Non-Floor Session and The Atlanta Collection in both the live and online-only halves of the event. We would like to take this opportunity to introduce you to a few special lots in our Floor Sessions.

Session One covers Colonials through Trade dollars, including lot 3432, an 1893 quarter graded PR69 NGC that is one of the finest certified proof Barber quarters in existence, and an uncommonly strong group of Walking Liberty half dollars. Lot 3620, a 1935-S half graded MS67 PCGS, CAC, is one of three coins so graded by PCGS with none finer as of publication and a great Registry prize.

Session Two contains Morgan and later dollars as well as commemoratives. Lot 3756, a VAM-44 1878 Morgan dollar with Seven over Eight Tailfeathers Weak and Triple Blossoms, AU58 PCGS, CAC, is a great example of its seldom-offered Top 100 Variety.

Session Three finishes with patterns and gold coinage, including Territorials. Lot 4289, a 1929 half eagle graded MS63 PCGS, CAC, is a survivor of the mass meltings that destroyed the vast majority of the issue. Lot 4328, an 1861 eagle graded PR64 Cameo PCGS, CAC, is pedigreed to the famous Trompeter Collection of proof gold. Lot 4496, a Bechtler five dollar private coin of the very rare Kagin-21 variety with 128-grain weight and Colons obverse, is graded AU55 PCGS and rates third in our census of just six confirmed specimens.

These are just a few of the great coins available, and the full range of bidding methods is open to you. You can place pre-auction bids through HA.com, mail, fax, and e-mail. On the day of the auction, you can participate remotely via telephone and our award-winning online system, Heritage LIVE!™ Of course, if you can join us in Dallas, we hope to see you here. Heritage's Texas-born hospitality is waiting.

Happy bidding!

Sincerely,

Greg Rohan
President

COLONIALS

Pine Tree Threepence, Noe-34, VF30
Scarce Massachusetts Issue

- 3001** 1652 Pine Tree Threepence VF30 PCGS. CAC. Noe-34, W-630, Salmon 1-A, R.4. Pellets at trunk. A midgrade dove-gray example with even wear and pleasing detail on the tree, date, and denomination. Clipped (as issued) at the Boston mint to an oval shape; the ND in ENGLAND is off the flan, as are upper and left letters of the obverse legend. Listed on page 39 of the 2013 *Guide Book*.

Ex: Denver ANA. Auction (Al Overton, 8/1963), lot 3. PCGS# 21

XF45+ 1652 Pine Tree Sixpence
Noe-33, Pellets at Trunk

- 3002** 1652 Pine Tree Sixpence XF45+ PCGS. CAC. Noe-33, W-670, Salmon 2-B, R.3. 68.67 gn. Pellets at trunk. An unabraded walnut-brown and gunmetal-gray example. The tree, date, and denomination are sharp. Somewhat wavy, as coined by a rocker press. Diagnostic for the Noe variety, the obverse is misaligned several degrees toward 12 o'clock. The tops of the reverse peripheral letters are off the flan. Listed on page 39 of the 2013 *Guide Book*. PCGS# 22

Small Planchet Pine Tree Shilling
Choice Fine, Noe-29

- 3003** 1652 Pine Tree Shilling, Small Planchet Fine 15 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 68.1 gn. A circulated but unblemished olive-gray Pine Tree type coin. The centering favors the right obverse and lower reverse. The tree and central legends are complete, but portions of the upper and left peripheral legends are absent because of mint clips. Listed on page 39 of the 2013 *Guide Book*. PCGS# 24

Very Fine Pine Tree Shilling
Small Planchet, Noe-29

- 3004** 1652 Pine Tree Shilling, Small Planchet VF20 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 70.68 gn. A cream-gray piece with a bold tree and sharp definition across a majority of the peripheral letters. Wear is concentrated near 12 o'clock on each side. One minor edge flaw at 10:30. A late die state with crumbling near the N in AN DO and a break within the X in XII. Listed on page 39 of the 2013 *Guide Book*. PCGS# 24

XF St. Patrick Farthing, W-11500
Conditionally Scarce New Jersey Import

- 3005 (1670-75) St. Patrick Farthing XF40 PCGS. Breen-208, W-11500.** St. Patrick farthings are typically encountered well worn and/or corroded, but the present representative has pleasing definition and shows granularity only on the field above the harp angel. One roundish flan flaw on the upper reverse border. The brass splasher is well centered on the crown. Listed on page 41 of the 2013 *Guide Book*. Population: 15 in 40, 27 finer (2/13). PCGS# 42

AU Large Letters W-13800
1760 Voce Populi Farthing

- 3006 1760 Hibernia-Voce Populi Farthing, Large Letters AU50 PCGS. CAC. Breen-234, W-13800, R.5.** Though not as great a rarity as the Small Letters farthing, the Large Letters variety is far more elusive than the Voce Populi halfpenny type. The present mahogany-brown example is free from marks and has only a trace of wear. The surfaces are granular, as struck. The diagonal break above the portrait is usual for W-13800. Listed on page 49 of the 2013 *Guide Book*. PCGS# 256

- 3007 1787 Nova Eborac Copper, Seated Right VF20 PCGS. CAC. Breen-987, W-5760, R.4.** The present medium brown Nova Eborac has a full date though the upper portion of EBORAC is off the flan. Only trivial granularity is present, and marks are absent aside from a pair of thin lines on the waist of the seated Liberty. From late dies with a break on the reverse border at 4:30. Listed on page 68 of the 2013 *Guide Book*. PCGS# 475

- 3008 1787 New Jersey Copper, Small Planchet, Plain Shield — Environmental Damage — NGC Details. VF. Maris 43-d, W-5225, R.1.** Prominently double struck. For the initial strike, the reverse die was widely misaligned toward 5 o'clock. The alignment was corrected and the piece was struck again, with a moderate clockwise obverse rotation relative to the first impression. A small mint-made clip is at 9 o'clock. Walnut-brown and lightly marked with granular areas limited to the plow and the obverse border at 5 o'clock. Listed on page 66 of the 2012 *Guide Book*. PCGS# 506

- 3009 1786 Vermont Copper, VERMONTENSIVM VF30 PCGS. RR-8, Bressett 6-E, W-2030, R.4.** This medium brown Landscape copper is devoid of abrasions or planchet deficiencies. Nicely defined, though struck moderately off center toward 5 o'clock. Listed on page 72 of the 2013 *Guide Book*. PCGS# 545

- 3010 1783 Nova Constellatio Copper, Blunt Rays XF45 PCGS. Crosby 3-C, W-1875, R.3.** Traces of golden-brown outline design elements, though the open fields are steel-gray. Evenly struck and attractive with scattered hair-thin marks at the margins and near the S in US. Listed on page 54 of the 2013 *Guide Book*. PCGS# 807

- 3011 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 PCGS. N. 12-M, W-6800, R.3.** A conditionally scarce variety not found in quantity within the Bank of New York hoard. Toned chocolate-brown and evenly defined with prominent clash marks on the reverse. Lightly granular on portions of the obverse border. The obverse field displays several faint hair-thin marks. Listed on page 87 of the 2013 *Guide Book*. PCGS# 883

UNITED STATES 1787 Fugio Cent
MS63 Brown, Cinquefoils, N. 11-B

- 3012 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63 Brown NGC. N. 11-B, W-6785, R.4.** A smooth and evenly struck chocolate-brown representative without any of the flan striations that often frustrate specialists. The present die state of Newman 11-B exhibits the most prominent clash marks of the Fugio type, particularly near the date. Listed on page 87 of the 2013 *Guide Book*. PCGS# 889

XF45+ 1787 Immunis Columbia Copper
Eagle Reverse, W-5680

- 3013 1787 Immunis Columbia Piece, Eagle Reverse XF45+ PCGS. W-5680, High R.4.** A scarce late Federation-era issue probably struck at the Rahway Mills private mint in New Jersey. The present medium brown example displays traces of luster and has only two visible marks, on the obverse rim at 11:30 and near the profile of the Seated Justice. The bottom portion of the date is off the flan. Listed on page 55 of the 2013 *Guide Book*. PCGS# 841

1796 Copper Company of Upper Canada
Myddleton Token Mule, PR66 Brown
Tied for Finest Certified, W-8910

3014 1796 Copper Company of Upper Canada Token PR66 Brown PCGS. CAC. Breen-1076, W-8910, R.7. Boulton & Watt was the maker of the rare Myddleton token, as well as a store card for the Copper Company of Upper Canada. Dies for the two disparate token issues were muled together to create the present variety, likely in small number as part of a salesmen portfolio that demonstrated the quality of workmanship at the private mint. The present chocolate-brown proof appears pristine and features a razor-sharp strike. Listed on page 77 of the 2013 *Guide Book*. Population: 2 in 66 Brown, 0 finer (2/13). PCGS# 651

1817 New Spain (Texas) Jola, VF20
R. GARZA Dies

3015 1817 New Spain (Texas) Jola Half Real VF20 PCGS. Most American collectors are familiar with the 1818 New Spain (Texas) half real coins, called jolas, through their listing in *A Guide Book of United States Coins*, and in other colonial references. Although they were known to a small number of Texas collectors for several decades, the first widely publicized notice of the similar 1817 dated pieces appeared in *The Paper Republic* by James P. Bevill, published in 2009. Further details were published in "Lone Stars Rising, A Missing Numismatic Link," by Bevill and Alvin Stern in the May 2011 issue of *The Numismatist*.

Manuel Pardo was the acting Spanish Governor in New Spain in early 1817, and he received authorization from Mexico City to produce copper coins known as jolas, worth a half real each. Pardo chose a local merchant and public administrator, Manuel Barrera to produce 8,000 of those coins. A public notice was issued, announcing the new coins and identifying Barrera as the coiner. A copy of that notice survives in the original Bexar archives. Those coins have the initials MB above 1/2 and 1817 on the obverse, with an incuse single star on the reverse, considered the first appearance of the Texas Lone Star symbol. The 1817 MB jolas are similar to the 1818 JAG jolas in layout and design. The 1818 JAG pieces have been known since their discussion and first illustration in 1892 (L.E. Daniell, *Personnel of the Texas State Government, with Sketches of Representative Men of Texas*, San Antonio, Maverick Printing House, 1892).

In December 1818, Governor Antonio Maria Martinez recalled the Barrera coins in favor of a new issue produced by Jose Antonio de la Garza. The recall notice was dated December 6, 1818, stating that de la Garza would receive the Barrera coins and replace them with his own for a period of 12 days. The recall of the older coins was probably intended to supply the metal necessary for the new issue. There was apparently an additional issue later in 1817, produced by R. Garza.

Deep green and ebony patina appears on both sides of this crudely produced copper coin. Only the top half of the 1817 date appears on the out-of-round flan. The planchet is wavy, probably as struck, although the actual production method is unknown. PCGS# 559

- 3016** 1783 Washington & Independence Cent, Draped Bust, No Button, Silver Restrike PR58 PCGS. CAC. Baker-3A, W-10380, R.6. Engrailed edge. The Large 3 in the date identifies the mid-19th century dies by W.S. Lincoln. Rarer than its copper counterpart. The present specimen is well struck and shows minimal signs of handling. Toned sea-green and gunmetal-gray. Listed on page 80 of the 2013 *Guide Book*. PCGS# 688

HALF CENTS

Important Late-State C-1 1800 Half Cent Showing Cent Undertype, VF Details

- 3017** 1800 — Scratched — ANACS. VF20 Details. C-1, B-1, R.1. Manley Die State 5.0. Last die state of the sole die pair. Shows the remnants of an undertype from a previously struck coin, located near AME on the reverse. The undertype remains from a cut-down large cent, and includes the tops of NIT. Chocolate-brown, unevenly struck. Moderately worn surfaces have numerous scratches on each side, concentrated at the tip of the bust. Walter Breen opined that only the first 1800 half cents were struck on planchets cut down from large cents or various tokens, but this late-state coin is unique counterevidence. It has been studied by leading half cent specialists, including Ron Manley, author of *The Half Cent Die State Book*. Manley also wrote an article about this specific piece that appeared in the January 2001 issue of *Penny-Wise*. Another article in the same issue was written by Ed Fuhrman, who discovered this piece.

This late-state coin is one of fewer than a dozen known 1800 half cents of any die state with visible large cent undertype. Remember that all 1802 half cents were struck on cut-down large cents, to the best of our knowledge. It is almost certain that this piece was struck in 1802, not 1800. The supply of prepared half cent planchets was exhausted in December 1800 and the next supply did not arrive until the end of 1803. All half cents struck between those dates could only have been struck on cut-down cents. We believe that this piece and a few others were struck at the same time as the first 1802 half cents, those with the 1800 reverse. Our EAC grade Good 5. NGC ID# 222B, PCGS# 1051

Scarce Fine 1802/0 Half Cent C-2, Reverse of 1802

- 3018** 1802/0 Reverse of 1802 Fine 12 PCGS. C-2, B-2, R.3. Manley Die State 4.0. This deep brown example is evenly defined and nearly free from contact. The surfaces are mildly glossy. Cohen-2 is regularly available in AG or Good but is surprisingly challenging in problem-free Fine condition. Since Cohen-1 is a formidable rarity as well as a separate *Guide Book* variety, most collectors of the series are obliged to purchase the only other 1802-dated marriage, Cohen-2. Our EAC grade VG8. Population: 13 in 12, 33 finer (2/13). NGC ID# 222D, PCGS# 1057
- 3019** 1806 Small 6, No Stems MS62 Brown PCGS. C-1, B-3, R.1. A chocolate-brown representative whose unmarked surfaces display satin luster. The sole spot is minor and near the A in HALF. Cohen-1 is the only 1806 die marriage without wreath stems, though the 1804 and 1805 can also be found sans stems. Our EAC grade AU50. NGC ID# 222J, PCGS# 1093
- 3020** 1832 MS64+ Brown PCGS. CAC. C-3, B-3, R.1. Peach-red outlines the stars and letters, though open areas are toned brown. A carbon-free and minimally abraded high grade example of this underappreciated Classic Head date. Our EAC grade MS62. NGC ID# 222Y, PCGS# 1159
- 3021** 1854 MS65 Brown NGC. CAC. C-1, B-1, R.1. All 1854 proofs and business strikes were coined from a single die pair. Mahogany, sea-green, and fire-red undertones emerge when this fully struck Gem is rotated beneath a light. Carbon-free and nearly devoid of contact. Our EAC grade MS60. NGC ID# 26YY, PCGS# 1230

PROOF CLASSIC HEAD HALF CENT

1833 Half Cent, PR65 Brown C-1, B-1

- 3022** 1833 PR65 Brown NGC. C-1, B-1, R.5 as a Proof. Iridescent autumn-gold, sea-green, and rose-red shades emerge when this needle-sharp Gem is rotated beneath a light. A lens reveals only minute mint-made lintmarks on the left obverse field. A crack through stars 2 to 7, as seen on most specimens. Tied for the finest numerical grade at NGC with four other pieces, one of which is certified Red and Brown (2/13). Our EAC grade PR60. NGC ID# 2239, PCGS# 1198

LARGE CENTS

- 3023 1793 Chain AMERICA — Damaged — PCGS Genuine. Good Details. S-3, B-4, Low R.3.** The rims are crimped and a slender flan crack crosses the reverse between 4 and 10 o'clock. A slender counterstamp is entered vertically across the center of the portrait. Within the recessed counterstamp, the letters R CUTLER are raised and easily read. Brunk attributes the stamp as C-1188 from New Haven, and notes it is seen on a 1787 Connecticut copper and a 1793 large cent (likely the present coin). No EAC grade assigned. NGC ID# 223E, PCGS# 1341
- 3024 1793 Wreath Cent, Vine and Bars — Reverse Planchet Flaw, Corrosion — NGC Details. Fine. S-9, B-12, R.2.** A deep brown example of the briefly coined Wreath cent type. The surfaces are evenly granular and have a lamination near the first S in STATES. One thin curved mark noted beneath the bust truncation. Our EAC grade AG3. NGC ID# 223H, PCGS# 1347
- 3025 1794 Head of 1794 — Damage — PCGS Genuine. VF Details. S-65, B-51, R.1.** A well defined deep brown Liberty Cap cent with minor surface granularity and scattered minor abrasions, though only a thin scratch on the cheek merits individual mention. Our EAC grade Good 6. NGC ID# 223P, PCGS# 901374
- 3026 1794 Head of 1794 VF25 NGC. S-24, B-8, R.1.** A deep brown example of Sheldon's "Apple Cheek" variety. Die sinking (as coined) on the central reverse weakens much of ONE CENT. Mildly granular but there are no consequential marks. Our EAC grade Fine 12. NGC ID# 223P, PCGS# 901374
- 3027 1795 Plain Edge — Struck 15% Off Center — Good 4 NGC. S-76b, B-4b, R.1.** Fairly widely off center toward 10 o'clock. Much of LIBERTY and the fraction is off the flan. The chocolate-brown surfaces are void of relevant contact and are also free from any indication of corrosion. Our EAC grade Good 4. NGC ID# 223T, PCGS# 1380
- 3028 1796 Liberty Cap Fine 12 NGC. S-81, B-2, R.3.** A medium brown representative from the final year of the Liberty Cap design. The strike is consistent except for the C in CENT. A loupe shows infrequent moderate granularity and a small number of thin marks on the portrait. Our EAC grade Good 6. NGC ID# 223V, PCGS# 1392

1796 S-110, B-16 Cent, AU Details Low Condition Census

- 3029 1796 Draped Bust, Reverse of 1794 — Altered Surfaces — PCGS Genuine. AU Details. S-110, B-16, R.3.** This nicely detailed example is listed as sixth finest known in Del Bland's census with a grade of XF40, and tied for seventh finest in the Noyes census with a grade of VF30. Both sides exhibit deep olive and steel patina that is typical of the Governor and Company planchets supplied from England. Our EAC grade VF35.
Ex: Charles R. Mathewson (1955); Copley Coin Company; Dorothy Paschal; Robinson S. Brown, Jr. (Superior, 9/1986), lot 146; Dr. C.R. Chambers; Dennis Mendelson; Dr. Philip W. Ralls; Eric Streiner; Superior (10/1992), lot 78; Superior (9/1996), lot 1630; Scotsman (7/2003), lot 1512. NGC ID# 223W, PCGS# 1404

- 3030 1797 Reverse of 1796, Grippled Edge — Double Struck, Environmental Damage — NGC Details. VG. S-121b, B-3b, R.3.** The first strike was off center toward 6 o'clock, judging by the length of the dentils above LIBERTY from the first impression. The cent was fed between the dies again, rotated about 90 degrees counter-clockwise relative to the initial strike. The initial strike is prominent near 9 o'clock on both sides. Moderately granular but unabraded and well defined for the VG level. Our EAC grade Good 6. NGC ID# 223Y, PCGS# 1416
- 3031 1797 Reverse of 1797, Stems VF20 NGC. S-138, B-20, R.1.** A nicely detailed deep brown Bust cent whose only noticeable mark is a small reverse edge knock at 6:30. The reverse die is failing near OF, as usual for this collectible Sheldon variety. Our EAC grade Fine 12. NGC ID# 2242, PCGS# 1422
- 3032 1798 Second Hair Style VF35 NGC. S-171, B-30, R.4.** The rim die break at 10 o'clock attributes this better Sheldon marriage. Medium brown with rose and tan undertones. Evenly struck and with a wealth of detail on Liberty's curls. Lightly abraded and minutely granular. Our EAC grade Fine 15. NGC ID# 2244, PCGS# 1434

Choice XF S-212 1800 Cent

- 3033 1800 XF45 NGC. S-212, B-20, R.3.** The die breaks near the 00 in the date sometimes confuse collectors with the "Q" variety, S-197, which is seen more often than the conditionally scarce S-212. This medium brown representative displays luster within the curls and is smooth aside from a small reverse rim ding at 12 o'clock. The obverse border and central reverse field are occasionally glossy. Our EAC grade VF25. NGC ID# 2248, PCGS# 1449

**1800 S-204 Cent, AU58
Intermediate Die State
Census Level Specimen**

3034 1800 AU58 PCGS. CAC. S-204, B-25, R.4. Breen Die State VI with cracks and blurred dentils at the upper right obverse. This impressive piece is undoubtedly a census level specimen although we are unable to determine its provenance. Lovely golden-brown fields show charcoal patina on the obverse high points with pale blue inside the wreath. Light coppery-orange non-mint color appears just above the date. Traces of frosty cartwheel luster remain on both sides with a few scattered field marks, including those behind the head and above the hair ribbons that may aid further identification. Our EAC grade XF45. NGC ID# 2248, PCGS# 1449

3035 1801 1/000 — Environmental Damage — PCGS Genuine. VF Details. S-223, B-17, R.1. A blundered fraction Sheldon variety further attributed by a sharp extension from the left wreath stem. A richly detailed gunmetal-gray example with moderate pitting on each side. Marks are confined to a single thin line above the drapery. Our EAC grade VG8. NGC ID# 224D, PCGS# 1464

3036 1805 VF35 PCGS. S-267, B-1, R.1. This Choice VF Draped Bust cent provides consistent medium brown toning. A lens reveals minor obverse marks, but Liberty's curls are well defined and glimpses of luster remain. Our EAC grade VF20. NGC ID# 224K, PCGS# 1510

1810/09 S-281 Cent, XF40

3037 1810/09 XF40 PCGS. S-281, B-1, R.1. Rich mahogany surfaces with a patch of chocolate surrounding the first two stars. An attractive, lightly circulated example of this popular *Guide Book* issue that displays ruby-red and aqua undertones on the obverse device. Housed in a green label holder. Our EAC grade VF25. Ex: *Central States Signature* (Heritage, 4/2010), lot 70. PCGS# 1553

**1811 Classic Large Cent, AU53
S-287, B-1**

3038 1811 AU53 NGC. S-287, B-1, R.2. The intermediate die state, Breen State III, shows a few light die bulges on each side, with clash marks on the reverse, but without the narrow rim breaks of the later die state. This pleasing steel-brown example has glossy surfaces with sharp details. Our EAC grade XF45. NGC ID# 224U, PCGS# 1555

**1811 S-287, B-1 Cent, AU53
Normal Date**

3039 1811 AU53 PCGS. S-287, B-1, R.2. The Normal Date obverse appears on this pleasing AU 1811 cent. Both sides exhibit mottled dark olive and tan patina with attractive surfaces that show only trivial marks, including a small depression through the E of UNITED. Faint surface corrosion is only visible with magnification. An important cent for the date collector or variety enthusiast. Our EAC grade VF35. NGC ID# 224U, PCGS# 1555

3040 1817 13 Stars MS63 Red and Brown PCGS Secure. N-14, R.1. Likely once part of the Randall Hoard, though this Newcomb variety is scarcer in Mint State than the 1820 N-13 or 1818 N-10. The initial orange-red clings to the stars and legends though the motifs and open fields are brown. Our EAC grade MS60. NGC ID# 2252, PCGS# 1595

3041 1820 Large Date MS64 Brown PCGS. CAC. N-13, R.1. The well-known Randall Hoard variety, distinguished by a triple-punched L in LIBERTY and a number of heavy peripheral obverse die cracks. The present crisply-struck near-Gem is golden-brown and steel-blue. The fields are smooth and the cheek shows only minor contact. Our EAC grade MS60. NGC ID# 2256, PCGS# 1615

3042 1853 MS66 Brown NGC. CAC. N-10, R.1. Grellman Die State b. Considerable mint red is present, especially on the reverse, though the open fields and motifs are toned brown. Unabraded save for minor contact on the nose, and relevant carbon is confined to the C in CENT. Our EAC grade MS62. NGC ID# 226K, PCGS# 1901

3043 1853 MS63 Red NGC. N-13, R.1. Grellman Die State b. A fire-red Select example of the Mature Head type. Carbon is minimal and the lustrous surfaces show only minor peripheral carbon. The strike is good though a couple of stars have incomplete centers. Our EAC grade MS64. NGC ID# 226K, PCGS# 1903

3044 1855 Upright 5s MS65 Red and Brown PCGS. N-4, R.1. Grellman Die State a. Small die lumps on the portrait indicate the Newcomb variety. Brick-red illuminates the borders though the motifs and open fields are brown. Void of marks though scattered tan freckles are present. Our EAC grade MS63.
Ex: Dallas Signature (Heritage, 12/2005), lot 76, which realized \$805. NGC ID# 226M, PCGS# 1908

3045 1857 Small Date MS64 Red and Brown NGC. N-2, High R.1. Crimson iridescence outlines design elements. The cheek and obverse field are steel-gray. Nearly void of contact, and carbon is limited to a few pinpoint flecks. Our EAC grade MS62. PCGS# 1932

FLYING EAGLE CENTS

3046 1857 MS63 PCGS. The devices are sharply struck overall with almost complete tailfeather definition. The surfaces are light tan-gold with bright underlying mint luster. A few light spots explain the grade. NGC ID# 2276, PCGS# 2016

3047 1857 MS63 PCGS. A luminous mahogany example of the first regular-issue Flying Eagle cent date with occasional flashes of peach and gold color. Overall detail is excellent, though the tailfeathers are a touch soft at the ends. NGC ID# 2276, PCGS# 2016

3048 1857 MS64 PCGS. A caramel-gold near-Gem with vibrant luster and a consistently crisp strike. Neither side has any evident spots or other detractors. A handsome example of this briefly coined type. NGC ID# 2276, PCGS# 2016

Gem 1857 Flying Eagle Cent Uncommonly Vibrant Luster

3049 1857 MS65 PCGS. Uncommonly flashy for a Flying Eagle cent with richer peach and gold shadings than usually seen. The 1857 is the first regular small cent issue released to circulation, and this Gem example would make an excellent type coin or date representative in a comprehensive collection. PCGS has graded only 14 pieces as MS66 or finer (2/13). NGC ID# 2276, PCGS# 2016

1857 Flying Eagle Cent, MS65

3050 1857 MS65 PCGS. CAC. Variety enthusiasts may want to examine this piece closely, as the obverse resembles the Type of 1856. The obverse has faint lavender toning while the reverse is rich golden-tan. A lovely Gem with bold design motifs and excellent eye appeal. PCGS has only certified 14 finer examples (2/13). NGC ID# 2276, PCGS# 2016

3051 1858 Large Letters MS63 NGC. High Leaves, Closed E in ONE. An unabraded and satiny almond-gold cent whose grade is held back by moderate carbon. Well struck at the centers with selected softness on peripheral elements. NGC ID# 2277, PCGS# 2019

3052 1858 Large Letters MS64+ PCGS. High Leaves, Closed E in ONE. This coruscating and smooth wheat-gold near-Gem likely merits an even finer technical grade, but the strike is somewhat soft on peripheral elements. The centers are well brought up. NGC ID# 2277, PCGS# 2019

1858 Large Letters Flying Eagle Cent, MS65 Bright Mint Luster

3053 1858 Large Letters MS65 NGC. High Leaves Reverse. Closed E in ONE. Sometimes referred to as the Type of 1857 as the High Leaves design is common to all 1856 and 1857 Flying Eagle cents. This is a sharply struck piece that has bright, sparkling surfaces. Slight reddish patina is seen over each side with much of the original tan color visible as well. NGC ID# 2277, PCGS# 2019

PROOF FLYING EAGLE CENT

Select Proof 1857 Flying Eagle Cent

- 3054 1857 PR63 NGC. Snow-PR1.** Specialist Rick Snow identifies three proof varieties in his 2001 reference. PR-1 is distinguished by a diagonal die line beneath the beak. Though less famous than their 1856 predecessors, proof 1857 Flying Eagle cents are much rarer. Snow estimates only 50 proofs were struck. This is a well-made specimen with prominently mirrored fields and razor-sharp motifs. Toned orange-gold and powder-blue with the latter shade confined to the central reverse field. Tiny spots beneath the eagle determine the grade. NGC ID# 227B, PCGS# 2040

INDIAN CENTS

- 3055 1859 MS64 NGC.** Pale copper-pink overall with the faintest suggestion of blue at the right borders. A small nick on Liberty's jawline contributes to the grade but the surfaces are largely smooth otherwise. NGC ID# 227E, PCGS# 2052
- 3056 1859 MS64 PCGS. CAC.** A pleasing Choice example of the initial Indian cent design, a one-year type. Peach is the prevailing hue, though occasional apricot glints peek through the duskiness. NGC ID# 227E, PCGS# 2052
- 3057 1865 Plain 5 MS65 Red NGC.** Plain 5 in date. This sharply detailed Gem exhibits original copper-red surfaces, with vibrant mint luster and no trace of carbon. Eye appeal is extraordinary. Census: 1 in 65 Red, 0 finer (2/13). PCGS# 92084
- 3058 1867 MS63 Red NGC.** A sharply detailed Select specimen, with blazing original red surfaces that show few signs of contact. One reverse carbon spot is the only blemish of note. Census: 4 in 63 Red, 28 finer (2/13). NGC ID# 227R, PCGS# 2090
- 3059 1869/69 MS64 Red and Brown NGC. CAC. Snow-3c, FS-301.** A number of years ago, the present variety was considered an overdate. It is listed in the *Guide Book* with a substantial premium over the regular issue. The present chestnut-gold and lilac near-Gem is well struck and satiny with carbon-free and minimally marked surfaces. PCGS# 37475
- 3060 1873 Open 3 MS65 Brown PCGS. CAC.** Although designated brown, with pale blue overtones, this Gem retains splashes of original orange mint color that gathers near the borders. Population: 6 in 65 Brown, 1 finer (2/13). NGC ID# 227Y, PCGS# 2106
- 3061 1873 Open 3 MS64 Red NGC.** This sharply detailed Choice specimen features the Open 3 in the date, and the lustrous original red surfaces show a few hints of crimson. Census: 14 in 64 Red, 7 finer (2/13). NGC ID# 227Y, PCGS# 2108

1873 Snow-1, FS-101 Cent, AU53 Boldly Doubled LIBERTY

- 3062 1873 Doubled LIBERTY, Closed 3 AU53 PCGS. Snow-1, FS-101.** Ex: Eagle Eye Photo Seal. Every letter of LIBERTY is boldly doubled on this pleasing AU specimen. Other signs of the obverse doubled die are also visible, including the profile, and Longacre's initial L. This example is lightly worn with pleasing medium brown surfaces. Population: 6 in 53, 43 finer (2/13). PCGS# 2115

- 3063 1876 MS64 Red NGC.** The original red surfaces of this attractive Choice specimen show a few accents of lilac and some microscopic carbon spots can be detected with a loupe. Vibrant mint luster and well-detailed design elements add to the outstanding eye appeal. Census: 11 in 64 Red, 15 finer (2/13). NGC ID# 2283, PCGS# 2126

1877 Indian Cent, AU55 Sought-After Key Date

- 3064 1877 AU55 PCGS. CAC.** A Choice AU example of the sought-after key to the Indian cent series, from a mintage of 852,500 pieces. This attractive specimen offers well-detailed design elements and lightly abraded medium brown surfaces, with traces of glossy mint luster clinging to the devices. NGC ID# 2284, PCGS# 2127

**Gem Red and Brown 1877 Cent
Noteworthy Mint State Key**

3065 1877 MS65 Red and Brown PCGS. Every 1877 Indian cent, from the humblest cull to the best-preserved example, is some collector's treasure. For most enthusiasts, a fully Red Mint State coin is out of the question, but an attractive Red and Brown piece is more accessible. The obverse of this Gem is copper-orange and mellowed little despite the presence of a carbon spot at the right obverse rim. The reverse shows mahogany attributes more plainly but still is appealing and more Red than Brown. Decently struck overall, if a little soft on the tips of the feathers, with few significant abrasions. Population: 60 in 65 (1 in 65+) Red and Brown, 3 finer (2/13). NGC ID# 2284, PCGS# 2128

3066 1884 MS65 Red NGC. The obverse is orange-gold while the reverse is primarily lilac-red. Unabraded, boldly struck, lustrous, and virtually void of carbon. In a prior generation holder. Census: 23 in 65 Red, 5 finer (2/13).
Ex: New York Signature (Heritage, 11/2003), lot 5190. NGC ID# 228B, PCGS# 2150

3067 1894 MS65 Red NGC. This sharply detailed Gem displays even, original orange-red surfaces, with vibrant mint luster and incredible eye appeal. Census: 32 in 65 Red, 8 finer (2/13). NGC ID# 228N, PCGS# 2189

3068 1899 MS66 Red NGC. Olive-green and cherry-red adorn this lustrous and nicely struck Premium Gem. Essentially devoid of carbon, and housed in a prior generation holder. Census: 49 in 66 Red, 11 finer (2/13).
Ex: Ft. Lauderdale FUN Signature (Heritage, 1/2005), lot 5118. NGC ID# 228U, PCGS# 2204

Red Superb Gem 1902 Cent

3069 1902 MS67 Red NGC. This highly lustrous Superb Gem is orange-red with obverse glimpses of ice-blue. Well struck and minimally abraded with carbon limited to the reverse near 5:30. Housed in a former generation holder. Census: 18 in 67 Red, 1 finer (2/13).
Ex: New York Signature (Heritage, 6/2005), lot 5077. NGC ID# 228X, PCGS# 2213

3070 1903 MS66 Red PCGS. Both sides of this Premium Gem exhibit light orange color with frosty luster and sharp design motifs. Trivial marks are invisible to the unaided eye. An impressive specimen and rarely encountered in finer grades. Population: 71 in 66 (3 in 66+) Red, 5 finer (2/13). NGC ID# 228Y, PCGS# 2216

3071 1903 MS66 Red PCGS. CAC. A few minuscule carbon flecks limit the grade of this Premium Gem. Both sides are highly lustrous with brilliant orange mint color and bold design motifs. Population: 71 in 66 (3 in 66+) Red, 5 finer (2/13). NGC ID# 228Y, PCGS# 2216

3072 1909 MS66 Red PCGS. The final year of issue for James Longacre's iconic design. This Premium Gem has a strong strike with satiny light orange luster and exceptional eye appeal. PCGS has only certified four finer Red specimens (2/13). NGC ID# 2297, PCGS# 2237

PROOF INDIAN CENTS

3073 1873 Closed 3 PR64 Red PCGS. Pumpkin-gold throughout except for deep fire-red on portions of the portrait. The preservation is outstanding for the PR64 level since the lint mark on the T in CENT is as made. Certified in an old green label holder. Population: 43 in 64 Red, 29 finer (2/13). NGC ID# 229S, PCGS# 2308

**Red and Brown PR63 1877 Cent
Coveted Series Key**

3074 1877 PR63 Red and Brown PCGS. Variegated cherry-red, apple-green, and orange-gold enrich this precisely struck Select proof. The key date 1877 cent is a collector favorite in any grade, but examples with full design detail provide the best value, and the attractive toning further ensures the quality. NGC ID# 229W, PCGS# 2319

**1877 Cent, Red and Brown Gem Proof
Popular Proof Date**

3075 1877 PR65 Red and Brown PCGS. CAC. Bold N reverse, characteristic of the known proof dies. This Gem proof has a lighter color than most but is thoroughly attractive, with yellow-gold fields contrasting with orange devices tinged with rose and lime-green. The sharp strike has produced four diamonds on the ribbon and bold feathers and tips on the headdress. A beautiful coin. Population: 71 in 65 Deep Cameo Red and Brown, 5 finer (2/13). NGC ID# 229W, PCGS# 2319

3076 1880 PR66 Red and Brown PCGS. CAC. A hint of lilac toning appears on the brilliant red surfaces with boldly defined satin devices and lightly mirrored fields. A borderline full Red Gem. Population: 28 in 66 (3 in 66+) Red and Brown, 4 finer (2/13). NGC ID# 229Z, PCGS# 2328

3077 1881 PR66 Red and Brown NGC. CAC. The design elements of this spectacular Premium Gem show razor-sharp definition throughout and the mostly brown surfaces retain hints of original red color. From a proof mintage of 3,575 pieces. Census: 36 in 66 Red and Brown, 7 finer (2/13). NGC ID# 22A2, PCGS# 2331

3078 1882 PR66+ Brown PCGS Secure. CAC. Iridescent cherry-red, apple-green, and lavender patina endows this fully struck and flashy high grade specimen. Those in search of maximum eye appeal need look no further. NGC ID# 22A3, PCGS# 2333

3079 1882 PR65 Red PCGS. Remarkable apricot-to-peach hues are time-appropriate yet still vibrant and entirely Red. Well-defined and glossy with two small carbon spots at the hair ribbon and the left obverse field. Population: 16 in 65 Red, 18 finer (2/13). Ex: *FUN Signature (Heritage, 1/2004), lot 4501*. NGC ID# 22A3, PCGS# 2335

3080 1885 PR66 Red and Brown PCGS. CAC. Fire-red and olive-green embrace both sides of this needle-sharp and satiny specimen. Carbon is minimal and the eye appeal is outstanding. Collectors are gaining appreciation for colorful Red and Brown cents. NGC ID# 22A6, PCGS# 2343

**1891 Indian Cent, PR65 Red Cameo
None Finer at PCGS**

3081 1891 PR65 Red Cameo PCGS. The frosty devices stand out boldly against the mirrored fields of this delightful Gem, providing dramatic cameo contrast. The design elements are sharply detailed and the original red surfaces are free of mentionable distractions. Eye appeal is terrific. Population: 4 in 65 Cameo, 0 finer (2/13). PCGS# 82362

**1892 Indian Cent, Brightly Mirrored
PR65 Red Cameo**

3082 1892 PR65 Red Cameo PCGS. A few trivial, microscopic carbon flecks are evident on each side, limiting the grade of this Gem Cameo proof. Both sides have fully mirrored fields around lustrous devices with fiery orange surfaces and extraordinary eye appeal. Population: 5 in 65 Cameo, 5 finer (2/13). PCGS# 82365

3083 1899 PR65 Red PCGS. Deep orange coloration fills the peripheries. The centers display lighter olive-gold. Intricately struck and void of contact. Encapsulated in an old green label holder. Population: 41 in 65 Red, 33 finer (2/13). NGC ID# 22AM, PCGS# 2386

3084 1901 PR66 Red and Brown PCGS. An exquisite Premium Gem, this deeply toned piece combines brilliant blue and violet patina over mirrored fields with a splash of orange mint color on the reverse. Population: 30 in 66 (3 in 66+) Red and Brown, 9 finer (2/13). NGC ID# 22AP, PCGS# 2391

3085 1903 PR65 Red PCGS. CAC. A gorgeous orange-red Gem that displays glimpses of sun-gold in design recesses. Well struck, flashy, and devoid of contact. The right-side obverse margin has minute carbon. Housed in a green label holder. Population: 41 in 65 Red, 42 finer (2/13). NGC ID# 22AS, PCGS# 2398

3086 1904 PR65 Red and Brown PCGS. Copper-gold and pumpkin-orange are the main colors on this Gem proof, though the lower right obverse has a clear zone of mahogany-to-brown. Quality detail and eye appeal. Population: 42 in 65 (1 in 65+) Red and Brown, 6 finer (2/13). NGC ID# 22AT, PCGS# 2400

LINCOLN CENTS

3087 1909 VDB MS67 Red PCGS. This lime-green and sun-gold introductory year VDB cent offers booming luster and a sharp strike. Unabraded save for a hair-thin mark on the chin, and carbon is limited to flecks around the T in CENT. Housed in a green label holder. Ex: *Davis Conway Collection (Heritage, 9/2008), lot 333, which realized \$2,185*. NGC ID# 22AZ, PCGS# 2425

3088 1909-S VDB VF35 NGC. Only light to moderate wear is noted on this Choice VF example with VDB initials that remain bold. The surfaces are still-glossy brown with only minor abrasions. NGC ID# 22B2, PCGS# 2426

3089 1909-S VDB — Recolored — ANACS. AU58 Details. Though the fields still show cartwheel sheen, light friction on the cheekbone indicates a momentary stint in circulation. The unabraded surfaces display jade-green and peach-gold shades. NGC ID# 22B2, PCGS# 2426

3090 1909-S VDB AU58 NGC. CAC. Nearly full olive-brown luster remains on each side of this pleasing, lightly worn key Lincoln cent. The famous S-VDB is undoubtedly the single most highly recognized Lincoln cent in the 100+ year history of the series. NGC ID# 22B2, PCGS# 2426

3091 1909-S VDB MS63 Brown ANACS. A well-detailed example of this famous key date, with designer's initials bold and bright mint luster, under streaky light brown and original red patina. No mentionable distractions are evident. NGC ID# 22B2, PCGS# 2426

- 3092 1909-S VDB MS64 Red and Brown PCGS. CAC. Delicate blue overtones only slightly subdue the orange mint color of this lovely near-Gem. A few trivial marks and carbon flecks fail to detract from the exceptional eye appeal. NGC ID# 22B2, PCGS# 2427

**Red Near-Gem 1909-S VDB Cent
Great Key-Date Coin**

- 3093 1909-S VDB MS64 Red PCGS. Subtle facet-frost lends life to the surfaces of this key-date cent, which has attractive gold and peach colors that remain fresh and unmellowed yet appropriate for the age of a century-old coin. Well-defined devices are an asset, though minor carbon scattered in the fields contributes to the grade. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Lincoln Cent, MS65
Important Key With Red Surfaces**

- 3094 1909-S VDB MS65 Red PCGS. CAC. The original orange-red surfaces of this delightful Gem show few signs of contact and no trace of carbon. The design elements are well-detailed and both sides radiate vibrant mint luster. The all-important designer's initials are bold and eye appeal is outstanding. A memorable example of this important key.. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS66 Red
An Enduringly Popular Lincoln Cent**

- 3095 1909-S VDB MS66 Red PCGS. The 1909-S VDB cents were destined to become rarities from the day they were minted. The design galvanos of engraver Victor David Brenner, as submitted to the Mint, had BRENNER spelled out in small letters at the bottom rim on the reverse. This was abbreviated to V.D.B. at the Mint, without the designer's knowledge. When the coins debuted in August 1909, Treasury Secretary Franklin MacVeagh remarked that he thought the designer's initials would be an incused B, in the manner of the B for Charles Barber on the bust truncation of the Barber coinage. However, this would have caused confusion with the older series: The initials were removed on both the P- and S-mint cents, for the remainder of the 1909 production and until 1918, when they would reappear on the obverse in tiny letters on Lincoln's shoulder. The small San Francisco production of 484,000 pieces ensured instant rarity and popularity. This piece has blazing red mint luster with a significant touch of the yellowish color this issue is so well known for. The strike is strong throughout and there are no obvious abrasions on either side of this superior example. NGC ID# 22B2, PCGS# 2428

Full Red Premium Gem 1909-S VDB Cent
One of the Finest of This Popular Subtype

- 3096 1909-S VDB MS66 Red PCGS.** Long before the phenomenon of coin certification and third-party grading, the 1909-S VDB was far and away the most-desired Lincoln cent, with the 1914-D second, the 1909-S third, and the 1931-S a distant fourth, based on its low mintage but much-hoarded status. With the advent of certified grading, the scales have been tipped away from the 1909-S VDB toward some other branch mint issues in Gem Red condition — but the 1909-S VDB will remain an object of desire—and affection and nostalgia—for many collectors. The large number of certified 1909-S VDB cents in Gem Red grade at NGC and PCGS combined does not, however, necessarily translate into wide availability; many collectors who might buy a 1909-S VDB in high grade would never consider purchasing another Lincoln cent. At the Premium Gem Red level, the certified populations thin markedly, and only a handful are finer. This is a remarkable coin that displays even red mint luster with just a bit of underlying yellow. The strike is boldly brought up in all areas, including the designer's initials on the lower reverse rim, and there are just the tiniest specks of carbon evident with the aid of a loupe. NGC ID# 22B2, PCGS# 2428

Superb Gem 1909 Lincoln Cent
First-Year Specimen With Red Surfaces

- 3097 1909 MS67 Red PCGS.** This magnificent Superb Gem, from the first year of the Lincoln design, is among the finest examples certified at PCGS. The well-preserved original red surfaces are brightly lustrous, with no trace of carbon. The design elements are sharply rendered and eye appeal is terrific. Population: 66 in 67 (1 in 67+) Red, 0 finer (2/13). NGC ID# 22B3, PCGS# 2431
- 3098 1911-D MS65 Red PCGS.** Delicate pinkish-orange mint color appears on both sides of this Gem, with sharp design definition and excellent eye appeal. PCGS has only certified 20 submissions finer than this piece (2/13). NGC ID# 22B8, PCGS# 2446
- 3099 1914-D AU55 PCGS.** An appealing and relatively high-grade example of a desirable date that shows minimal wear. The fields are uneven with areas of granularity around the bust from die wear. The reverse shows visible "ghosting" of Lincoln's back and shoulder. Overall brown is suffused with subtle hints of faintest red. NGC ID# 22BH, PCGS# 2471

Key 1914-D Lincoln Cent
MS63 Red and Brown

- 3100 1914-D MS63 Red and Brown NGC.** A blush of soft violet covers the obverse luminous surfaces of this Select key-date representative, while the reverse displays a more orange-violet palette. All design features are well brought up, including the lines and grains of the wheat ears. A bluish toning spot is visible in the upper-right obverse field. NGC ID# 22BH, PCGS# 2472

**1914-D Cent, Full Red MS64
Scarce, Low-Mintage Key**

- 3101 1914-D MS64 Red PCGS.** Only 1.1 million 1914-D cents were struck, yet few noticed at the time how low this year's mintage was. They were abundantly evident of the design subtype represented by the VDB on the lower reverse of the cents in 1909, but few equated low mintage with low availability in 1914. Contrast this with the public's overreaction only two years later of low mintage equaling low availability with the 1916-D dime. This cent is about as red as any we have ever seen for the issue: even, solid color throughout and unmellowed. The 1914-D is never bright and flashy like one of the 1909 issues, but deeper and richer in color. The strike is strong throughout and there are only tiny specks of carbon evident with a loupe. NGC ID# 22BH, PCGS# 2473

**1914-D Cent, MS64+ Red
Third Lowest Regular Issue Mintage**

- 3102 1914-D MS64+ Red PCGS. CAC.** Most collectors and especially younger collectors begin with Lincoln cents, and are keenly aware of the key issues in the series, such as the 1914-D that had the third lowest mintage of any regular issue in the series. This impressive near-Gem has a sharp strike and frosty mint luster with delicate olive and gold toning over its pinkish-orange mint color. PCGS has only certified 63 finer Red specimens (2/13). NGC ID# 22BH, PCGS# 2473

- 3103 1915-D MS65 Red PCGS.** This sharply struck early branch mint Red Gem exhibits an orange-gold obverse. The reverse is peach-gold and ruby-red. The obverse margin has two small flecks. Certified in a green label holder.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 5482, which realized \$1,121.25. NGC ID# 22BL, PCGS# 2482

- 3104 1918-S MS65 Red and Brown NGC.** A lovely Gem with virtually full orange mint brilliance on the obverse, and almost entirely olive-brown on the reverse. Sharply struck with satin luster. This issue is rare with full mint color on both sides. Census: 39 in 65 Red and Brown, 2 finer (2/13). NGC ID# 22BX, PCGS# 2511

- 3105 1922 No D Strong Reverse XF40 ANACS. FS-401. Die Pair 2.** The "big money" version of the 1922 No D cent combines a weak obverse with a strong reverse. As illustrated here, the reverse detail is two grades finer than the obverse detail. Minor corrosion appears on the olive-brown surfaces. NGC ID# 22C9, PCGS# 3285

**AU53 1922 No D Cent
Strong Reverse, Die Pair 2**

- 3106 1922 No D Strong Reverse AU53 PCGS. FS-401. Die Pair 2.** Sharp definition on the reverse confirms the high circulated grade, though the obverse appears to have greater wear, as is diagnostic for the variety. Chocolate-brown to medium brown with a couple of moderate marks on the reverse exergue and a tiny struck-in object (as made) near the profile. NGC ID# 22C9, PCGS# 3285

**MS62 Brown Strong Reverse FS-401
1922 No D Cent**

- 3107 1922 No D Strong Reverse MS62 Brown NGC. FS-401.** Die Pair 2. 1922 is the only date other than 1815 without a cent production at Philadelphia. This was undoubtedly due to the unprecedented mintage of more than 51 million silver dollars struck in 1922 at Philadelphia. Nonetheless, collectors occasionally encountered 1922 cents without a mintmark, and the variety has since become a key to the series. Only a single die pair, FS-401, is known without ever showing a trace of a mintmark. It is identified by a sharp reverse and soft definition on the portrait and most of the obverse legends, though TRUST and the second 2 in the date are bold. The typical example grades VF, and Uncirculated pieces are very rare relative to the number of Lincoln cent collectors. This is a satiny chocolate-brown cent with sea-green and lilac undertones. Carbon is absent and there are no noticeable marks. NGC ID# 22C9, PCGS# 3285

**Strong Reverse MS62 Brown
1922 No D Cent, FS-401**

- 3108 1922 No D Strong Reverse MS62 Brown PCGS. CAC. FS-401.** Die Pair 2. A satiny medium brown key date cent. TRUST and the second 2 in the date are bold, as is the reverse. Unabraded except for a mark near the O in ONE. As always for this coveted variety, the portrait appears indistinct due to die wear prior to striking. Only the Denver Mint struck cents in 1922, but collectors have long noticed that some cents of that date do not show a distinct mintmark. Specialists eventually described three die pairs with weak or absent mintmarks. Die Pairs 1 and 3 have a mushy reverse and usually exhibit a faint mintmark. However, Die Pair 2 never exhibits any trace of a D, as it was lapped from the die prior to installation. NGC ID# 22C9, PCGS# 3285
- 3109 1923-S MS64 Red and Brown PCGS.** The well-preserved surfaces of this sharply detailed Choice specimen are mostly original red, with just a few areas of light brown. Housed in a green label holder. PCGS has graded 16 numerically finer examples (2/13). NGC ID# 22CB, PCGS# 2547
- 3110 1923-S MS64 Red NGC.** The mint luster remains strong and the design elements are sharply detailed. A few hints of light tan and orange are found on this Choice piece, while the reverse has several small areas of carbon. Census: 14 in 64 Red, 2 finer (2/13). Ex: *Central States Signature* (Heritage, 4/2012), lot 3316; *Heritage Signature* (10/2012), lot 3275. NGC ID# 22CB, PCGS# 2548
- 3111 1929 MS67 Red PCGS. CAC.** Vibrant mint luster and well-preserved original red surfaces are the calling cards of this spectacular Superb Gem. Razor-sharp definition is apparent on the design elements and eye appeal is terrific. Population: 48 in 67 Red, 0 finer (2/13). NGC ID# 22CU, PCGS# 2596

1929-S Cent, MS66 Red, None Finer at PCGS

- 3112 1929-S MS66 Red PCGS.** A beautiful coin that has a suitable strike and desirable peach-red color throughout. One minor lamination (as coined) is present at 9:30 on the reverse and Lincoln's shoulder displays a faint slender diagonal mark. Among the finest Red examples at PCGS. Population: 21 in 66 Red, 0 finer (2/13).

Ex: Kendall Marie PCGS Registry Collection (Heritage, 4/2006), lot 526, which realized \$4,600. NGC ID# 22CW, PCGS# 2602

-
- 3113 1930 MS67 Red PCGS. CAC.** The wheat-gold centers are framed by broad, vibrant bands of orange-red. Well struck and lustrous with exceptional surfaces. Population: 77 in 67 Red, 1 finer (2/13). NGC ID# 22CX, PCGS# 2605

1931 Lincoln Cent, MS67 Red Among the Finest Certified

- 3114 1931 MS67 Red PCGS.** A mintage of nearly 19.4 million Lincoln cents was accomplished at the Philadelphia Mint in 1931, but few survivors can match the technical quality and eye appeal of this magnificent Superb Gem. The well-preserved surfaces maintain their original fiery red color, and the design elements show razor-sharp definition throughout. Population: 16 in 67 Red, 0 finer (2/13). NGC ID# 22D2, PCGS# 2614

1933 Lincoln Cent, MS67 Highest Quality Red Example

- 3115 1933 MS67 Red PCGS. CAC.** This incredible Superb Gem displays original red surfaces, with hints of lilac and no trace of carbon. The design elements are sharply rendered and vibrant mint luster is evident on both sides. As expected, the surfaces reveal no mentionable distractions and eye appeal is terrific. Population: 37 in 67 Red, 0 finer (1/13). NGC ID# 22D7, PCGS# 2629

-
- 3116 1955 Doubled Die Obverse AU53 PCGS. FS-101.** All obverse legends exhibit remarkable die doubling. The present chocolate-brown cent shows slight wear on the cheekbone and a hint of granularity above the date, but some mint gloss remains and there are no consequential marks. NGC ID# 22FG, PCGS# 2825

MS64+ Red Doubled Die 1955 Cent

- 3117 1955 Doubled Die Obverse MS64+ Red PCGS. FS-101.** The spectacular 1955 doubled die obverse variety is a mainstay of auction catalogs, but a majority of certified pieces are in XF or AU grades, and among those seen in Mint State, most exhibit minimal if any original Red. The present smooth and lustrous near-Gem provides an exception as it is orange-gold throughout aside from glimpses of blue and lilac above LIBERTY and a blush of sea-green at the reverse exergue. NGC ID# 22FG, PCGS# 2827

-
- 3118 1968 MS67 Red PCGS.** Rich and satiny orange luster appears on both sides of this sharply defined cent. Fiery surfaces are free of carbon flecks or other imperfections. Population: 14 in 67 Red, 0 finer (2/13). NGC ID# 22GC, PCGS# 2905

- 3119 1968 MS67 Red PCGS.** Tied with a few others as finest certified, this Superb Gem exhibits pristine original orange surfaces with satin luster. A glass is required to see the scattered flecks that prevent a higher grade. Population: 14 in 67 Red, 0 finer (2/13). NGC ID# 22GC, PCGS# 2905

- 3120 1972 Doubled Die Obverse MS66 Red PCGS. FS-101.** A beautiful orange-red high grade example of this dramatic and well known doubled die variety. Well struck and lustrous with a pristine reverse and only minute obverse marks. NGC ID# 22GU, PCGS# 2950

- 3121 1983-D MS68 Red PCGS.** This resplendent Superb Gem exhibits lovely cherry-red luster with a couple nearly invisible blemishes that prevent a perfect MS70 grade. Population: 21 in 68 Red, 0 finer (2/13). NGC ID# 22HX, PCGS# 3051

PROOF LINCOLN CENT

- 3122 1913 PR65 Red and Brown PCGS.** Lustrous and boldly detailed with a remarkable array of gold, purple, green, and bluish-purple toning. A few flecks are scattered across each side. Population: 77 in 65 Red and Brown, 19 finer (1/13). NGC ID# 22KW, PCGS# 3316

TWO CENT PIECE

- 3123 1870 MS65+ Red and Brown NGC.** Rich rose-orange hues enrich the reverse and outer obverse, while the reverse has violet shadings that put the "Brown" in the color designation. Luminous and impressively preserved. Census: 39 in 65+ Red and Brown, 4 finer (2/13). NGC ID# 22NE, PCGS# 3607

PROOF TWO CENT PIECES

- 3124 1865 PR65 Red and Brown PCGS.** Plain 5. This razor-sharp Gem displays various tints of orange, gold, rose, and olive. A trace of peripheral obverse carbon is all that limits the grade. Just 500+ proofs were coined.

Ex: Denver Signature (Heritage, 8/2006), lot 461, which realized \$1,035. NGC ID# 274U, PCGS# 3628

1873 Two Cent Piece, PR65 Red and Brown Closed 3, Proof-Only Issue

- 3125 1873 Closed 3 PR65 Red and Brown PCGS.** From a proof mintage of just 600 pieces, this attractive Gem is sharply detailed, with deeply reflective surfaces that show a mix of original red and light brown patina. Housed in an old green label holder. Population: 89 in 65 (1 in 65+) Red and Brown, 19 finer (2/13). NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

- 3126 1851 MS66 NGC.** Full flowing luster underlies moderate multicolored toning with patches of russet and olive. Well struck for the type and attractive in its obvious originality. Census: 72 in 66 (3 in 66+), 8 finer (2/13). NGC ID# 22YX, PCGS# 3664

Pristine MS67 1851 Three Cent Silver

- 3127 1851 MS67 PCGS.** Delicate olive-gold toning adorns this lustrous and virtually immaculate Superb Gem. The shield is fully struck, as are the legends, though the small stars show slight inexactness. The 1851 was struck in great quantity to replace hoarded Seated coinage, but examples with the present preservation are nonetheless very rare. Population: 13 in 67 (1 in 67+), none finer (2/13). NGC ID# 22YX, PCGS# 3664

- 3128 1852 MS66 PCGS.** CAC. Swirling luster is subtly frosted, though this feature shows up most prominently when contrasted with its occasional windows of brilliance. Well-defined for the type with hints of peach toning. NGC ID# 22YZ, PCGS# 3666

- 3129 1853 MS65 PCGS.** This example of the Type One three cent silver design, silvery on the obverse with just a touch of peach while the reverse has more overt blue and violet shadings. A satin-frosted Gem. NGC ID# 22ZZ, PCGS# 3667

- 3130 1862 MS65 NGC.** CAC. Peach-gold and aquamarine toning encompasses this lustrous and well preserved Civil War Gem. The centers show a typical strike. Housed in an old pre-hologram NGC holder. NGC ID# 22ZB, PCGS# 3680

- 3131 1862 MS66 NGC.** CAC. Ocean-blue and rose-red toning adorns this lustrous and razor-sharp Premium Gem. Pristine and moderately prooflike. Struck from prominently clashed dies. Encased in a former generation holder. NGC ID# 22ZB, PCGS# 3680

Beautifully Toned 1862 Three Cent Silver

- 3132 1862 MS67 PCGS.** CAC. A magnificently toned Superb Gem. Both sides display rich swaths of forest-green, golden-brown, and ruby-red toning, though the obverse toning is especially dramatic. Essentially pristine, and limited in grade only by an incomplete strike at the centers. An unimprovable Civil War example. Population: 11 in 67, 0 finer (2/13). NGC ID# 22ZB, PCGS# 3680

Gem 1863 Trime Low-Mintage Civil War Issue

- 3133 1863 MS65 PCGS.** Gold CAC. Only 21,000 silver three cent pieces were struck in 1863 at the height of the Civil War era. This spectacular Gem exhibits well-detailed design elements and partially prooflike fields, with few signs of contact. A few hints of green and lavender toning enliven the peripheries. Housed in a first generation holder with a gold CAC sticker. Population: 13 in 65, 19 finer (2/13). NGC ID# 22ZD, PCGS# 3682

1871 Three Cent Silver, MS66 Low-Mintage Late-Series Issue

- 3134 1871 MS66 PCGS.** CAC. Only 3,400 business-strike trimes were struck in 1871, making the issue quite rare in high grade today. This delightful Premium Gem displays prooflike reflectivity in the fields, with a few wisps of pale gold toning. The design elements are well-detailed, with just a touch of softness on the central reverse. Population: 19 in 66, 11 finer (2/13). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

- 3135 1860 PR64 PCGS.** This sharply detailed Choice proof has light silver surfaces with splashes of iridescent toning on the obverse. The reverse is untoned. Population: 43 in 64, 11 finer (2/13). NGC ID# 27C7, PCGS# 3709
- 3136 1861 PR65 NGC.** Offered here is a gorgeous Gem proof example of the diminutive three cent silver denomination. Both sides are deeply mirrored with light contrast beneath pale blue-gray toning. Census: 16 in 65, 10 finer (2/13). NGC ID# 27C8, PCGS# 3710
- 3137 1868 PR66 PCGS.** Sea-green and cerulean are the most visible hues on this glossy Premium Gem proof. Like most post-Civil War issues, the 1868 is far more accessible in proof format than as a business strike, despite a proof mintage of just 600 specimens. Population: 10 in 66, 2 finer (2/13). NGC ID# 27CE, PCGS# 3718
- 3138 1873 Closed 3 PR64 NGC.** A toned-over but still-reflective Choice example of the three cent silver's proof-only final issue. Blue-gray patina overall gives way to golden-brown at parts of the margins, more visibly to the right. NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKELS

Premium Gem 1866 Three Cent Nickel Heavily Clashed Dies

- 3139 1866 MS66 PCGS. CAC.** Heavy clash marks show on both sides of this well-detailed Premium Gem, with vibrant satiny mint luster and outstanding eye appeal. No post-striking defects are evident to the naked eye, even on close inspection. From a mintage of 4.8 million pieces. Population: 23 in 66 (2 in 66+), 2 finer (2/13). NGC ID# 22NK, PCGS# 3732
- 3140 1868 MS66 PCGS.** Delicate chestnut-gold overtones grace this lustrous and fully struck Premium Gem. Struck from multiply clashed dies and housed in a green label holder. A few pinpoint flecks are noted near STATES. Population: 30 in 66, 1 finer (2/13). NGC ID# 2756, PCGS# 3734

1874 Three Cent Nickel, MS66 Only One Finer Example at PCGS

- 3141 1874 MS66 PCGS. CAC.** The 1874 three cent nickel was the only coin of this denomination produced that year, as the silver series was discontinued in 1873. A substantial mintage of 790,000 business strikes was produced, but few were saved for numismatic purposes. This impressive Premium Gem displays well-detailed design elements and bright mint luster under shades of champagne-gold and nickel-gray toning. Population: 11 in 66, 1 finer (2/13). NGC ID# 2759, PCGS# 3742
- 3142 1887 MS65 PCGS.** Prominent clash marks appear on both sides of this Gem. All design elements are bold, and the surfaces are fully brilliant with satiny light gray luster. Population: 30 in 65 (1 in 65+), 10 finer (2/13). NGC ID# 22NU, PCGS# 3755

PROOF THREE CENT NICKELS

Gem Proof 1865 Three Cent Nickel Key Proof Date

- 3143 1865 PR65 NGC.** The 1865 is the rarest proof issue of the three cent nickel type, though it is more affordable than the proof-only 1877. Most specimens exhibit a repunched date, with traces of a 6 and 5 located west of the their counterparts from the second logotype impression. The present Gem is fully struck and nearly immaculate with light to medium wheat-gold toning. NGC ID# 275K, PCGS# 3761
- 3144 1866 PR66 NGC.** The deeply reflective fields of this impressive Premium Gem are toned in light shades of blue, green, and lavender. The design elements are sharply detailed and eye appeal is terrific. Census: 17 in 66, 1 finer (2/13). NGC ID# 275L, PCGS# 3762
- 3145 1867 PR66 NGC.** Although not designated as a Cameo, this spectacular Premium Gem shows definite elements of contrast between the deeply mirrored fields and the richly frosted design elements. Light shades of pale gold and lavender toning accent the pristine surfaces. Census: 18 in 66, 2 finer (2/13). NGC ID# 275M, PCGS# 3763
- 3146 1868 PR65 NGC.** Lightly toned in shades of champagne-gold and lavender, this sharply detailed Gem displays deeply mirrored fields with no mentionable distractions. From a tiny proof mintage of 600 pieces. Census: 64 in 65, 19 finer (2/13). NGC ID# 275N, PCGS# 3764

3147 1868 PR66+ ★ Cameo NGC. CAC. This spectacular high-end Premium Gem displays brilliant reflective fields that contrast with the frosty portrait and wreath. The central reverse displays parallel roller marks, as produced. Census: 2 in 66+ ★ Cameo, 1 finer with a Star designation (2/13). PCGS# 83764

3148 1870 PR66 NGC. The reflective fields of this spectacular Premium Gem display light accents of champagne-gold toning. The design elements are sharply rendered and eye appeal is outstanding. Census: 18 in 66, 0 finer (2/13). NGC ID# 275R, PCGS# 3766

3149 1871 PR66 NGC. Only 960 proof three cent nickels were struck in 1871. This delightful Premium Gem is sharply detailed, with reflective fields that show no mentionable distractions. Census: 32 in 66, 8 finer (2/13). NGC ID# 275S, PCGS# 3767

3150 1873 Closed 3 PR66 PCGS. CAC. The 1,100 proof three cent nickels minted in 1873 all show the Closed 3 in the date. This sharply detailed Premium Gem exhibits moderately reflective fields under shades of champagne-gold toning. Population: 14 in 66 (1 in 66+), 0 finer (2/13). NGC ID# 275U, PCGS# 3769

3151 1874 PR66 Cameo NGC. Excellent device frost leads to a cameo effect in spite of the uneven reflectivity in minimally toned fields. Well-preserved and a pleasing coin overall. Census: 29 in 66 (1 in 66+) Cameo, 5 finer (2/13). PCGS# 83770

3152 1875 PR65 NGC. Shades of pale blue and green toning enliven the unmarked surfaces of this impressive Gem, with sharply detailed design elements and brightly reflective fields. Census: 72 in 65, 9 finer (2/13). NGC ID# 22NV, PCGS# 3771

3153 1875 PR66 NGC. Not so well-contrasted as usually seen but carefully preserved. The obverse has a partial cameo effect, while the reverse is strenuously polished with loss of detail and prominent diagonal die lines behind the III in the denomination. NGC ID# 22NV, PCGS# 3771

1877 Three-Cent Nickel, PR65 Rarest Proof-Only Date

3154 1877 PR65 NGC. The 1877 is the earliest and rarest of the three proof-only dates in the three cent nickel series. The *Guide Book* lists a mintage of just 900 pieces. The present intricately struck Gem exhibits flashy fields and medium straw-gold and ice-blue toning. No detractors are evident despite inspection beneath a lens. NGC ID# 275X, PCGS# 3773

3155 1878 PR65 NGC. The design elements of this attractive Gem are sharply detailed and the reflective fields are blanketed in shades of lavender and champagne-gold toning. From a proof mintage of 2,350 pieces. NGC ID# 275Y, PCGS# 3774

3156 1879 PR66+ Cameo PCGS. CAC. A splendid Premium Gem Cameo proof, this 1879 has light nickel-gray surfaces with deeply mirrored fields around its lustrous and sharply defined devices. Population: 63 in 66 (1 in 66+) Cameo, 36 finer (2/13). PCGS# 83775

3157 1880 PR66+ PCGS. CAC. A sensational Premium Gem proof, this 1880 three cent piece has delicate gold toning over light nickel-gray surfaces. Both sides are sharply detailed and exceptionally appealing. PCGS has certified 37 finer examples (2/13). NGC ID# 2762, PCGS# 3776

1880 Three Cent Nickel, PR67 Cameo Among the Finest Known

3158 1880 PR67 Cameo PCGS Secure. CAC. When it comes to a type coin for this unusual denomination, this proof would be hard to beat. Each side is completely brilliant. The fields are deeply reflective and fully mirrorlike, and the devices are significantly frosted. The result is strong cameo contrast on each side. Predictably, this is one of the finest examples known of this date. Only nine total Superb Gem Cameo coins have been certified by both services combined, just three others have been so graded by PCGS (1/13). PCGS# 83776

3159 1881 PR67 NGC. Pale nickel-white surfaces have watery reflectivity and modest frost, though the squareness of the rims is a point in this Superb Gem proof's favor. Impressively preserved. NGC ID# 2763, PCGS# 3777

3160 1882 PR67 PCGS. CAC. More luminous than flashy on the obverse but with squared-off rims to go with the satin. Light pink and gold-green tints settle across much of each side. Population: 86 in 67, 7 finer (2/13). NGC ID# 2764, PCGS# 3778

3161 1885 PR66 Cameo PCGS. CAC. The design elements of this spectacular Premium Gem are sharply detailed and frosty, providing bold contrast with the reflective fields. Shades of lavender-gray and champagne-gold toning enhance the considerable eye appeal. Population: 38 in 66 Cameo, 8 finer (2/13). PCGS# 83781

3162 1886 PR67 NGC. A stunning Superb Gem, this 1886 three cent nickel piece has brilliant light gray surfaces with lustrous devices and satiny fields. Census: 37 in 67, 0 finer (2/13). NGC ID# 2768, PCGS# 3782

3163 1887 PR66 NGC. Light shades of lavender-gray and champagne-gold toning enhance the unmarked surfaces of this well-detailed Premium Gem. The fields are reflective and free of mentionable distractions. Census: 29 in 66, 1 finer (2/13). NGC ID# 2769, PCGS# 3783

SHIELD NICKELS

3164 1866 Rays — Repunched Date and Obverse Die Clash — MS64 PCGS. The date is lightly but widely repunched south. The obverse displays crisp clash marks, as made, with CENTS readable beneath the motto. The obverse die is the same as FS-901 but the reverse die differs. A well struck stone-gray near-Gem with no visible marks. NGC ID# 22NX, PCGS# 3790

3165 1866 Rays MS65 PCGS. A lovely Gem marking the debut of the Shield nickel series, this piece has faint gold toning over satin luster with a splash of orange on the obverse. Heavy arcing die lines are evident in the upper and lower parts of the obverse device, with a prominent die crack at the upper left. NGC ID# 22NX, PCGS# 3790

3166 1866/1866 Rays AU50 PCGS. FS-301. The date is widely and clearly repunched. The secondary digits are northeast of the prominent date. Numerous bold die cracks attest to the difficulties experienced by the Mint while striking the Rays type. PCGS# 93790

Gem 1867 Shield Nickel
Popular Rays Design

- 3167 1867 Rays MS65 PCGS.** Always popular as a representative of the short-lived Rays design, this impressive Gem displays some of the striking problems that caused the change in design later in the year. The design elements show the touch of softness usually seen on this issue, along with satiny mint luster and attractive shades of powder-blue and pale gold toning. Population: 35 in 65 (1 in 65+), 5 finer (2/13). NGC ID# 22NY, PCGS# 3791

- 3168 1873 Open 3 MS65 PCGS.** Faint rose and lavender overtones visit pale pearl-gray surfaces that swirl with understated luster. The obverse displays well, though the reverse has a few spots and uneven detail on the stars. Population: 37 in 65 (1 in 65+), 7 finer (2/13). NGC ID# 276C, PCGS# 3800

Premium Gem 1873 Shield Nickel
Popular Open 3 Variant

- 3169 1873 Open 3 MS66 PCGS. CAC.** This magnificent Premium Gem is tied with a handful of other examples for the title of "Finest Certified" at either of the leading grading services. The design elements are sharply detailed, with some stars showing evidence of recutting. The nickel-gray surfaces are lustrous and well-preserved, with an extensive network of die cracks on the obverse. Population: 7 in 66, 0 finer (2/13). NGC ID# 276C, PCGS# 3800

1873 Shield Nickel, MS65
Earlier Closed 3 Variant

- 3170 1873 Closed 3 MS65 PCGS.** This delightful Gem is a representative of the earlier variety of Shield nickel produced in 1873, with a Closed 3 in the date. The design elements are sharply detailed, and an extensive network of die cracks is evident on the obverse. The surfaces are well-preserved and lustrous. Population: 20 in 65, 3 finer (2/13). PCGS# 3801

- 3171 1874 MS65 PCGS. CAC. FS-101.** The obverse is die doubled, and as usual for the Shield nickel series, the annulet is the pickup point. The variety is undesignated on the holder. Satiny and unabraded with glimpses of honey-gold and lime-green toning. Population: 34 in 65 (1 in 65+), 5 finer (2/13). NGC ID# 22P9, PCGS# 3803

- 3172 1876 MS65 PCGS.** Potent luster, a sharp strike, and a smooth appearance combine to confirm the Gem status of this Centennial-year Gem. Light rose, aqua, and cream-gray toning. The date is lightly repunched north. Population: 39 in 65, 8 finer (2/13). Ex: *Central States Signature (Heritage, 5/2004)*, lot 6081, which realized \$1,121.25. NGC ID# 22PB, PCGS# 3805

1879 Shield Nickel, MS65
Elusive in Mint State

- 3173 1879 MS65 PCGS.** Three Shield nickel issues, 1879, 1880, and 1881, are extremely rare in Mint State grades as nearly every survivor is a proof. This lovely Gem is fully lustrous with brilliant light gray surfaces hosting subtle gold toning. Population: 30 in 65 (1 in 65+), 23 finer (2/13). NGC ID# 276D, PCGS# 3808

1880 Shield Nickel, XF40
Rare Circulation Strike

- 3174 1880 XF40 PCGS.** The low mintage of only 16,000 circulation strikes makes this a key to the Shield nickel series. All too often, mishandled proofs are substituted for the rare business strikes. There is no question about this piece's status. The dove-gray surfaces have no trace of reflectivity in the fields. There is also a die crack above the motto on the obverse, and it may extend even further but the plastic lip of the encasement prevents positively stating so. No untoward marks are seen on either side. Population: 5 in 40, 42 finer (2/13). NGC ID# 276E, PCGS# 3810

- 3175 1881 MS64 PCGS.** A scarce date from a modest mintage of 68,800 coins, the 1881 is usually seen in lower grades. This Choice Mint State specimen has lustrous light gray surfaces with slightly reflective fields and delicate champagne toning. Population: 27 in 64, 54 finer (2/13). NGC ID# 276F, PCGS# 3811

- 3176 1882 MS66 PCGS.** One of only few high-grade survivors from a substantial mintage of more than 11 million coins, this Premium Gem has light gray surfaces with brilliant mint luster, reflective fields, and sharp design elements. Population: 75 in 66 (3 in 66+), 5 finer (2/13). NGC ID# 22PC, PCGS# 3812

- 3177 1883 MS66 PCGS.** Numerous minor die cracks appear on the both sides of this final-year Shield nickel. The surfaces are brilliant and include hues of rose, gold, and peach. This is a pleasing, well-struck example. PCGS has only certified nine finer specimens (2/13). NGC ID# 22PE, PCGS# 3813

PROOF SHIELD NICKELS

Famously Rare Proof 1867 Rays Nickel

- 3178 1867 Rays — Environmental Damage — NGC Details. Proof.** The most famous rarity of the Shield nickel series, the proof 1867 Rays has a *Guide Book* mintage of 25+ pieces. Recent research concludes that 25 originals were struck, in addition to a small but unknown quantity of restrikes. John Dannreuther has written extensively on this issue, and three different obverse dies have been identified. The present specimen has Obverse 1 with a high date and light repunching on the 7 in the date. Dannreuther believes that examples of this variety are originals struck early in 1867. This lot is fully struck, unabraded, and exhibits reflective fields. The borders display moderately granular gray patina, perhaps from long-term storage in a humid climate. NGC ID# 276H, PCGS# 3818
- 3179 1872 PR66 Cameo PCGS. CAC.** Both sides of this Premium Gem Cameo proof exhibit delicate gold toning over its gray surfaces, creating exceptional eye appeal. Population: 22 in 66 Cameo, 2 finer (2/13). PCGS# 83826
- 3180 1875 PR65 PCGS.** A wonderful Gem proof, this Shield nickel has deeply mirrored fields and lustrous devices beneath delicate gold toning. Population: 62 in 65, 11 finer (2/13). NGC ID# 276S, PCGS# 3829

- 3181 1876 PR66+ Cameo PCGS Secure. CAC.** A brilliant and sharply struck Centennial-year Premium Gem. Icy motifs and legends confirm the Cameo designation. Population: 24 in 66 (4 in 66+) Cameo, 5 finer (2/13). PCGS# 83830

Choice Proof 1877 Shield Nickel

Proof-Only Mintage

- 3182 1877 PR64 NGC.** The Shield nickel was produced only in proof format in 1877, with a modest mintage of 900 pieces. This attractive Choice example offers sharply detailed design elements and reflective fields, with deeper mirrors on the obverse. Shades of pale green, champagne-gold, and lavender toning enliven the well-preserved surfaces. NGC ID# 276U, PCGS# 3831

Superb Gem Proof 1877 Shield Nickel

Rare Cameo Example

- 3183 1877 PR67 Cameo NGC.** A key date in the Shield nickel series, the 1877 is a proof-only mintage, with a small total of 900 pieces struck. This magnificent Superb Gem is among the finest survivors, with sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. Census: 4 in 67 Cameo, 0 finer (2/13). PCGS# 83831
- 3184 1878 PR64 NGC.** Typical of the proof-only 1878 Shield nickels, this gently toned near-Gem has satiny luster and reflective fields on both sides. NGC ID# 276V, PCGS# 3832
- 3185 1878 PR65 NGC.** A delightful proof with fully mirrored fields and delicate gold toning. This piece is unlike the typical proof that has satiny luster. Both sides exhibit bold design motifs. NGC ID# 276V, PCGS# 3832
- 3186 1881 PR67 NGC.** A stunning Superb Gem proof, this 1881 Shield nickel has excellent contrast with pale ice-blue and iridescent toning on its light gray surfaces. Census: 24 in 67, 1 finer (2/13). NGC ID# 276X, PCGS# 3836
- 3187 1881 PR67 Cameo NGC.** This delightful Superb Gem Cameo proof Shield nickel exhibits delicate violet, blue, and gold toning near the borders with champagne toning at the centers. Both sides have fully mirrored fields that frame the lustrous devices. Census: 28 in 67 Cameo, 1 finer (2/13). PCGS# 83836

PR67 Cameo 1882 Nickel
Medium Chestnut Toning

- 3188 1882 PR67 Cameo PCGS.** Dappled chestnut-gold toning visits this satiny and fully struck Superb Gem. Traces of gunmetal-blue are confined to the upper obverse margin. A tiny lint mark near the C in CENTS is of mint origin. A pristine specimen from the penultimate date of the introductory nickel type. Population: 13 in 67 Cameo, 1 finer (2/13). PCGS# 83837

LIBERTY NICKELS

1883 Liberty Nickel, MS64
With Cents, Rare FS-302 Overdate

- 3189 1883 With Cents MS64 PCGS. FS-302.** An underlying 2 is evident just left of the final digit in the date, identifying the very rare FS-302 overdate. The *Cherrypickers' Guide* indicates the FS-302 is URS-4, meaning only five to eight specimens are known. The FS-302 also carries the highest interest and liquidity factors awarded by the *Guide* and examples always sell for a substantial premium. This attractive Choice example is well-detailed and lustrous. NGC ID# 22PH, PCGS# 3844

- 3190 1883 With Cents MS66 PCGS.** A popular first-year type coin, from the second design including CENTS on the reverse. Sharply detailed on the obverse, a touch of softness shows on the lower wreath. Vibrant mint luster adds to the outstanding eye appeal. Population: 56 in 66 (2 in 66+), 1 finer (2/13). NGC ID# 22PH, PCGS# 3844

- 3191 1885 XF45 PCGS. CAC.** A lightly worn but still luminous example of the popular key date. Olive overtones visit blue-gray surfaces that show a few stray flyspecks in the portrait area. NGC ID# 2773, PCGS# 3846

- 3192 1886 MS63 PCGS.** A semi-key Liberty nickel, the 1886 is elusive in Mint State grades as the typical survivor is well-worn, or a proof. Strike weakness appears at the upper left obverse and lower left reverse, with bold details elsewhere. The surfaces are brilliant and highly lustrous with frosty light gray and no evidence of toning. NGC ID# 22PK, PCGS# 3847

1886 Liberty Nickel, MS64+
Second Rarest Date

- 3193 1886 MS64+ PCGS. CAC.** Only the 1885 Liberty nickel is more elusive in Mint State grades than the 1886, and this Choice Mint State specimen of the latter issue is a remarkable piece with brilliant light gray surfaces and only a few trivial spots. Both sides are lightly prooflike. NGC ID# 22PK, PCGS# 3847

- 3194 1892 MS65 PCGS.** While the upper obverse and lower reverse are a trifle weak, the balance of the design elements are boldly defined. Both sides exhibit frosty light gray luster with only trivial blemishes. PCGS has only certified 17 finer examples (2/13). NGC ID# 2777, PCGS# 3853

1892 Liberty Nickel, MS66
None Numerically Finer at PCGS

- 3195 1892 MS66 PCGS. CAC.** A large mintage of nearly 11.7 million Liberty nickels was accomplished at the Philadelphia Mint in 1892, but only a handful of survivors have been awarded the MS66 designation. This delightful Premium Gem displays well-preserved lustrous surfaces under a light champagne-gold patina. Population: 17 in 66 (2 in 66+), 0 finer (2/13). NGC ID# 2777, PCGS# 3853

Premium Gem 1898 Liberty Nickel

- 3196 1898 MS66 PCGS. CAC.** The hair details, stars, and wreath details are all bold on this Premium Gem, including some detail in the left ear of corn. Both sides have frosty light gray luster with brilliant surfaces that display faint champagne and powder-blue toning. Population: 23 in 66, 1 finer (2/13). NGC ID# 22PP, PCGS# 3859

- 3197 1904 MS66 PCGS. CAC.** Uncommonly bold cartwheel luster is the calling-card of this minimally toned Premium Gem. The strike is close to average, soft on the left ear of corn and in several of the obverse stars, though the interior lines on the latter are almost uniformly present. Population: 70 in 66 (3 in 66+), 0 finer (2/13). NGC ID# 277F, PCGS# 3865

- 3198 1909 MS65+ PCGS.** Medium intensity gold and rose toning appear on both sides of this Gem 1909 Liberty nickel. The surfaces have satin luster with bold design motifs. Population: 63 in 65 (2 in 65+), 24 finer (2/13). NGC ID# 277K, PCGS# 3870
- 3199 1912-D MS65 PCGS. CAC.** A luminous and moderately toned peach-to-gold example of the first five cent issue struck at the Denver Mint. Details are uneven on peripheral stars and the bottom of the wreath, but the overall appearance is pleasing. PCGS has graded just 29 examples as MS66 or better (2/13). NGC ID# 277P, PCGS# 3874
- 3200 1912-S XF40 NGC.** Light, even wear is seen over the devices on each side, and there is slight darkening around the perimeters with gray-rose dominant in the centers. The mintmark is boldly impressed. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65
Low-Mintage Final Date**

- 3201 1912-S MS65 PCGS.** The Liberty design was officially retired after 1912, making this low-mintage date doubly important to mintmark type collectors. The present coin is a well-detailed Gem, with vibrant mint luster that shines through light shades of champagne-gold and lavender-gray patina. PCGS has certified only 10 numerically finer specimens (2/13). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3202 1883 No Cents PR66 Cameo PCGS. CAC.** A spectacular first-year type coin from the famous No Cents design, this impressive Premium Gem offers sharply detailed design elements and deeply mirrored fields with few signs of contact. Population: 72 in 66 (5 in 66+) Cameo, 11 finer (2/13). PCGS# 83878
- 3203 1883 With Cents PR66 Cameo PCGS. CAC.** Pastel sky-blue and almond-gold toning embraces this flashy and fully struck high grade proof type coin. The 1 in the date is lightly repunched. Population: 32 in 66 (2 in 66+) Cameo, 2 finer (2/13). PCGS# 83881
- 3204 1884 PR66 Cameo NGC. CAC.** The richly frosted design elements of this spectacular Premium Gem provide dramatic cameo contrast with the moderately reflective fields. Attractive shades of champagne-gold and lavender toning enliven the unmarked surfaces. Census: 32 in 66 Cameo, 17 finer (2/13). PCGS# 83882
- 3205 1885 PR65 NGC.** This beautifully toned key date Gem has rose-red, powder-blue, and lemon-gold toning. The strike is crisp and the fields display both reflectivity and cartwheel sheen. NGC ID# 277T, PCGS# 3883
- 3206 1886 PR65 NGC.** Sharply detailed in most areas, a touch of softness shows on the lower stars and lower wreath. The fields show hazy reflectivity, under shades of champagne-gold toning. From a proof mintage of 4,290 pieces. NGC ID# 277U, PCGS# 3884

**1886 Liberty Nickel, PR67
Tied for Finest Certified**

- 3207 1886 PR67 PCGS. CAC.** The sharp strike and pristine surfaces suggest that this lightly mirrored nickel-gray Superb Gem is a proof example. Every detail, including the left ear of corn, is boldly defined. The surfaces are lustrous with satin mint brilliance and reflective fields. Both sides are attractive and untoned. Population: 19 in 67, 0 finer (2/13). NGC ID# 277U, PCGS# 3884
- 3208 1890 PR66 Cameo PCGS.** An incredible Premium Gem proof with lovely Cameo contrast, this piece has a bold strike with fully mirrored fields and lustrous devices. Wisps of champagne and gold toning add to the eye appeal. Population: 15 in 66 Cameo, 0 finer (2/13). PCGS# 83888
- 3209 1899 PR66 PCGS. CAC.** A sharply detailed Premium Gem, with deeply reflective surfaces that display attractive champagne-gold and lavender patina. From a proof mintage of 2, 031 pieces. Population: 60 in 66, 12 finer (2/13). NGC ID# 2789, PCGS# 3897

PR67 Cameo 1902 Nickel

- 3210 1902 PR67 Cameo PCGS.** Lemon-gold and ice-blue patina graces the flashy and undisturbed fields. The wreath and portrait are radiant, consistent with the Cameo designation. A razor-sharp representative that boasts full definition on the kernels of the left ear of corn. Population: 9 in 67 Cameo, none finer (2/13). PCGS# 83900

**Lightly Toned PR67+ Cameo
1903 Liberty Nickel**

- 3211 1903 PR67+ Cameo PCGS. CAC.** Excellent detail with a touch of swirl to the strong reflectivity in the fields. The contrast is notable on both sides but particularly the reverse. Touches of orange and gold appear along parts of the borders. The obverse interior is close to nickel-gray, while the reverse has a distinctly blue tint. Population: 11 in 67 (2 in 67+) Cameo, 0 finer (2/13). PCGS# 83901

1907 Nickel, PR67 Cameo
One of Only Three So Graded, None Finer

3212 1907 PR67 Cameo PCGS. This is a type coin with something for everyone. The centers will please those who like brilliance, toning enthusiasts will appreciate the delicate peripheral color, and those type collectors who require only the finest will recognize the conditional rarity of this Cameo coin. Post-1901 Cameo coins of all denominations are seldom seen, and this is one of only three such pieces certified by PCGS with none finer (2/13). Even when the net is widened to include non-Cameo Liberty nickels of this date, only eight such pieces have been certified by PCGS, underlining how few were set aside and preserved in the ultimate grade. Extraordinary eye appeal. PCGS# 83905

3213 1908 PR66 Cameo NGC. CAC. The sharply detailed frosty design elements contrast boldly with the deeply reflective fields of this spectacular Premium Gem. A few hints of pale gold and lavender toning enliven the pristine surfaces. Census: 6 in 66 Cameo, 6 finer (2/13). PCGS# 83906

Premium Gem Proof 1908 Liberty Nickel
Bold Cameo Example

3214 1908 PR66 Cameo PCGS. CAC. At a mere 1,620 pieces, the mintage of proof Liberty nickels was the second-lowest of the series in 1908. This well-detailed Premium Gem shows bold cameo contrast between the frosty devices and the deeply mirrored fields. Eye appeal is exceptional. Population: 14 in 66 Cameo, 4 finer (2/13). PCGS# 83906

3215 1909 PR67 Cameo NGC. Green-to-gold toning graces the rims, while nickel-frost and pearl elements prevail at the centers. This Superb Gem specimen has clear contrast on both sides, though the obverse is more obvious with its cameo effect. Census: 25 in 67 (1 in 67+) Cameo, 5 finer (2/13). PCGS# 83907

1909 Liberty Nickel, PR68 Cameo
Pale Toning, Strong Field-Device Contrast

3216 1909 PR68 Cameo NGC. CAC. Over the years we have noticed the 1909 is one of the better-produced, perhaps best-produced Liberty nickel. This extraordinary coin is at the pinnacle of perfection with its deeply mirrored fields and pale pastel toning. The mint frost over the devices gives the coin the cameo effect that is so desirable for a type coin, and so rarely located. Census: 5 in 68 Cameo, 0 finer (1/13). PCGS# 83907

Superb Gem Proof 1910 Liberty Nickel
Only Two Numerically Finer Coins at PCGS

3217 1910 PR67 PCGS. CAC. A spectacular Superb Gem from a proof mintage of just 2,405 pieces, this coin possesses sharply detailed design elements and moderately reflective fields, with attractive shades of champagne-gold and lavender toning. Housed in a green label holder. Population: 34 in 67 (1 in 67+), 2 finer (2/13). NGC ID# 278L, PCGS# 3908

3218 1912 PR66 NGC. A sharply detailed Premium Gem proof, from the last official year of the design, this coin displays hazy, reflective fields and frosty design elements, with attractive shades of champagne-gold toning. Census: 80 in 66, 19 finer (2/13). NGC ID# 278N, PCGS# 3910

BUFFALO NICKELS

3219 1913-D Type Two MS66 PCGS. Always popular with first-year type collectors, this delightful Premium Gem represents the famous Type Two design. The devices are well-detailed and the lustrous surfaces show hints of champagne-gold and lavender toning. Population: 52 in 66, 10 finer (2/13). NGC ID# 22R2, PCGS# 3922

3220 1914-D MS65 PCGS. Remarkable frosty luster with excellent texture on the obverse. This minimally toned Gem has a sharp strike and an appearance more reminiscent of a silver coin than a copper-nickel one.
Ex: *FUN Signature* (Heritage, 1/2009), lot 790. NGC ID# 22R5, PCGS# 3925

3221 1914-S MS65 PCGS. The light yellow-gold and lilac shadings that drape the lustrous obverse cede to orange and lavender on the reverse. A pleasingly well-defined Gem, housed in a green label holder.
Ex: *FUN Signature* (Heritage, 1/2009), lot 792. NGC ID# 22R6, PCGS# 3926

3222 1916-D MS65 PCGS. Wisps of champagne, ice-blue, and lavender patina adhere to the lustrous surfaces of this lovely Gem. Generally well-struck on the devices. A few light flecks are visible over each side. PCGS has seen only 12 numerically finer coins (2/13). NGC ID# 22RB, PCGS# 3932

Gem 1917-S Buffalo Nickel Sharply Detailed Example

3223 1917-S MS65 PCGS. This early-series Gem exhibits razor-sharp definition on all design elements and vibrant mint luster on both sides. A few wisps of ice-blue and pale gold toning add to the considerable visual appeal. From a mintage of nearly 4.2 million pieces. Population: 82 in 65 (1 in 65+), 23 finer (2/13). NGC ID# 22RF, PCGS# 3936

1918 Buffalo Nickel, MS66

3224 1918 MS66 PCGS. More than 32 million were struck, but few survive in high grades. This Premium Gem exhibits pale gold toning on its brilliant light gray surfaces with satin luster and bold design elements. An extraordinary specimen for a top Registry collection. Population: 46 in 66, 7 finer (2/13). NGC ID# 22RG, PCGS# 3937

3225 1918-D MS64 NGC. Soft, pleasing luster characterizes this well-defined Choice coin. Each side is luminous beneath subtle pink, gold-orange, and peach patina. Excellent eye appeal for the grade.
Ex: *Long Beach Signature* (Heritage, 5/2008), lot 1274. NGC ID# 22RH, PCGS# 3938

3226 1918-S MS63 PCGS. This well-detailed Select example shows a touch of softness on the braid and the bison's shoulder. Satiny mint luster shows beneath pleasing bluish-gray and pale gold patina. NGC ID# 22RK, PCGS# 3940

1918-S Buffalo Nickel, MS65 Sharply Defined for This Usually Weak Issue

3227 1918-S MS65 NGC. Specialists have long recognized the 1918-S as the rarer of the two mintmarked issues from this year. It is rarely seen with complete definition on each side. This piece shows well above-average sharpness on the reverse, while the obverse is typically a bit soft on the Indian's hair above the knot. Bright mint frost covers each side with an overlay of attractive pale champagne-gold and ice-blue patina. Just a couple of minor bagmarks are seen, none worthy of singular mention. The "beard" clash mark below the Indian's chin is from the motto on the reverse, an interesting foible that several early S-mint Buffalo issues show. An elusive and in-demand Gem. Census: 14 in 65, 1 finer (2/13). NGC ID# 22RK, PCGS# 3940

3228 1919 MS66 NGC. A captivating Premium Gem nickel with lovely, variegated rose and mint-green coloration over both sides. Satiny and well struck, with smooth, blemish-free surfaces. Census: 38 in 66, 7 finer (2/13).
Ex: *Summer FUN Signature* (Heritage, 6/2008), lot 429. NGC ID# 22RL, PCGS# 3941

3229 1919-D MS64 PCGS. Attractive yellow-gold and steel-blue colors intermingle on the surfaces of this well-struck near-Gem. Careful inspection reveals only a few minor flecks and abrasions. Captivating satiny luster glistens throughout the fields. The 1919-D can be challenging in high grades and sharply defined examples such as the present coin are particularly elusive. NGC ID# 22RM, PCGS# 3942

3230 1919-S MS63 NGC. An attractive Select representative of this early series branch-mint issue, with well-detailed design elements, satiny mint luster, and a few hints of pale gold toning. NGC ID# 22RN, PCGS# 3943

3231 1920 MS66 PCGS. CAC. Delicate powder-blue and caramel-gold shades endow this virtually pristine Premium Gem. An above-average strike despite a hint of softness on the tail curl and the hair above the braid. Only eight numerically finer pieces certified by PCGS (2/13).
Ex: *Central States Signature* (Heritage, 4/2009), lot 1502. NGC ID# 22RP, PCGS# 3944

Better-Date 1920-D Nickel, MS64

- 3232 1920-D MS64 PCGS. CAC.** Light walnut-brown and pale gray toning embraces this lustrous and minimally unabraded branch mint near-Gem. The strike is generally good, although the curve of the tail is soft. A better date in all grades, and desirable in the present quality.

Ex: *West Palm Beach Signature* (Heritage, 7/2009), lot 256. NGC ID# 22RR, PCGS# 3945

1920-S Nickel, MS65 Important Condition Rarity

- 3233 1920-S MS65 NGC.** The year 1920 saw the second highest coinage of Buffalo nickels at the San Francisco Mint during the first two decades of the design with nearly 10 million pieces struck. However, few high grade specimens survived due to poor production quality. The usual flat strike meant the coins were susceptible to handling marks, and slight wear would substantially reduce the remaining design definition. This Gem has a bold strike, far better than usual, with satiny luster and full mint brilliance shining through reddish-gold and pale blue toning. Census: 15 in 65, 2 finer (2/13). NGC ID# 22RS, PCGS# 3946
-

- 3234 1921 MS66 PCGS.** A spectacular Premium Gem Buffalo nickel, with sharply detailed design elements and slightly subdued satiny mint luster, under light shades of pale gold and nickel-gray patina. PCGS has graded 18 numerically finer specimens (2/13). NGC ID# 22RT, PCGS# 3947

- 3235 1923 MS66 NGC.** Beautiful golden, mint-green, and lilac toning appears in a variegated fashion over the satiny, lustrous surfaces. Boldly struck, save for slight flatness over the centers, with expertly preserved surfaces that are nearly mark-free on both sides. Census: 40 in 66, 9 finer (2/13).

Ex: *Summer FUN Signature* (Heritage, 6/2008), lot 440. NGC ID# 22RV, PCGS# 3949

- 3236 1923-S MS64 NGC.** A luminous Choice Mint State example with subtle gold-orange and nickel-gray shadings over well-preserved surfaces. Pleasingly detailed for the issue and attractive in all respects. NGC ID# 22RW, PCGS# 3950
-

1923-S Nickel, MS65 Unusual Bold Strike

- 3237 1923-S MS65 PCGS. CAC.** Gem or finer grade Buffalo nickels are rare and enjoy great demand from Registry collectors. This 1923-S is a remarkable example that features a bold strike and brilliant light gray surfaces with satin luster. Delicate champagne and rose toning adds to the eye appeal. Population: 41 in 65 (1 in 65+), 2 finer (2/13). NGC ID# 22RW, PCGS# 3950
-

- 3238 1924 MS66 NGC.** This satiny Premium Gem has brilliant light gray surfaces with hints of gold toning over frosty luster. The central design motifs are boldly detailed. Census: 33 in 66, 4 finer (2/13). NGC ID# 22RX, PCGS# 3951

- 3239 1924 MS66 PCGS. CAC.** Brilliant gold and delicate bluish-violet toning appear on both sides of this sharply detailed Premium Gem. Population: 79 in 66, 4 finer (2/13). NGC ID# 22RX, PCGS# 3951

- 3240 1924 MS66 PCGS. CAC.** This exceptional nickel has pristine surfaces with wisps of champagne toning over frosty mint luster. While shy of a full strike, the design elements are boldly defined. A conditionally scarce issue that is rare in finer grades. Population: 79 in 66, 4 finer (2/13). NGC ID# 22RX, PCGS# 3951

- 3241 1925-D MS64 PCGS.** Blended shades of violet, gray, and golden-brown toning grace the surfaces of this attractive Choice example. Well-detailed devices and vibrant mint luster add to the outstanding eye appeal. NGC ID# 22S3, PCGS# 3955

**Choice 1925-S Buffalo Nickel
Toned and Lustrous**

- 3242 1925-S MS64 NGC.** A few hints of ice-blue and champagne-gold toning enhance the appeal of this well-preserved Buffalo nickel. The design elements show a touch of softness on the bison's shoulder and some of the Indian's hair strands, as usually seen on this issue. Satiny mint luster is evident on both sides. NGC ID# 22S4, PCGS# 3956

Lightly Toned 1925-S Nickel, MS64+

- 3243 1925-S MS64+ PCGS. CAC.** The 1925-S issue is among a small herd of S-mint Buffalos that are quite elusive at the Gem level, a group that also includes the 1921-S, 1923-S, and 1924-S. The usual problems are eroded dies, weak strikes, and poor planchet quality — frequently seen in combinations — that preclude a Gem grade. This near-Gem is struck from dies that are mildly fatigued, a bit more so on the reverse, but still having delivered a decent strike. The few marks on either side and light pastel blue and pink patina contribute to the good eye appeal. Population: 3 in 64+, 25 finer (2/13). NGC ID# 22S4, PCGS# 3956

- 3244 1927-S MS63 PCGS. CAC.** Quicksilver luster filters through nickel-lavender and gray-gold patina. Well-defined for the issue with only trifling central softness and few abrasions for the grade. Ex: *FUN Signature (Heritage, 1/2009)*, lot 842. NGC ID# 22SA, PCGS# 3962

**1928-D Nickel, MS66
Tied for Finest Certified**

- 3245 1928-D MS66 PCGS.** A fantastic Premium Gem, this Denver Mint nickel is boldly defined with brilliant and frosty mint luster beneath light gold toning with a single deeper gold toning spot on the reverse. This piece is tied for the finest certified at PCGS or NGC. Population: 42 in 66, 0 finer (2/13). NGC ID# 22SC, PCGS# 3964

**1930 Buffalo Nickel, MS67
None Finer at PCGS**

- 3246 1930 MS67 PCGS.** Minuscule doubling is visible on the 9 but no other digits. This Superb Gem is an amazing specimen with brilliant gold and pale blue toning over frosty mint luster. The design motifs are exceptionally bold. An impressive Buffalo for the connoisseur. Population: 25 in 67, 0 finer (2/13). NGC ID# 22SH, PCGS# 3969

- 3247 1937-D Three-Legged AU53 PCGS. FS-901.** A golden-gray key date nickel with ample luster and an absence of relevant marks. All attributes for FS-901 are present, such as the granular bag leg and the trail of minute die dots beneath the bison's flank. NGC ID# 22SX, PCGS# 3982

- 3248 1937-D Three-Legged MS62 NGC. FS-901.** This well defined key date example is devoid of visible marks and displays satin sheen throughout the richly blended olive-gold and chestnut-gold surfaces. Though several issues are known with 3 1/2 Legs, none threaten the status of the more dramatic Three-Legged variety. NGC ID# 22SX, PCGS# 3982

**1937-D Buffalo Nickel, MS64
Sought-After Three-Legged Variant**

- 3249 1937-D Three-Legged MS64 PCGS. FS-901.** Excessive die polishing obliterated the lower part of the bison's foreleg on some examples of the 1937-D Buffalo nickel, creating one of the most famous and sought-after varieties of the 20th century. This well-detailed Choice example is lustrous and appealing, with hints of ice-blue and champagne-gold toning. NGC ID# 22SX, PCGS# 3982

1937-D Nickel, MS65
Famous Three-Legged Buffalo

- 3250 1937-D Three-Legged MS65 PCGS. CAC.** The 1937-D Three-Legged Buffalo has been crudely counterfeited for decades. Its popularity became widespread in the late 1930s, soon after its release and publication in *Numismatic Scrapbook Magazine*. But such counterfeits are an exercise in futility, and most of them are little more than crude attempts to efface the fourth leg. Any numismatist worth his/her salt would spot such shams in a moment. Although the crucial diagnostics lie on the reverse, only one die pair was used to produce the variety. There are so many authenticating diagnostics on both sides of the coin that a seasoned professional should be able to identify a Three-Legged Buffalo merely by examining the obverse. Those diagnostics are described in great detail on some of the examples in our Permanent Auction Archives. This is a lovely example of this popular variety. The surfaces are satiny, and even, light golden toning covers both sides. The only grade-limiting marks are on the bison's upper back. Population: 51 in 65 (2 in 65+), 6 finer (2/13). NGC ID# 22SX, PCGS# 3982

PROOF BUFFALO NICKELS

1915 Buffalo Nickel, PR67
Low-Mintage Proof Issue

- 3251 1915 PR67 PCGS.** A magnificent Superb Gem from a tiny proof mintage of 1,050 pieces, this coin displays razor-sharp definition on all design elements and reflective, matte-textured fields. A few hints of pale gold and ice-blue toning add to the outstanding eye appeal. Population: 53 in 67 (2 in 67+), 2 finer (2/13). NGC ID# 278U, PCGS# 3992
- 3252 1936 Type Two—Brilliant Finish PR64 PCGS. CAC.** Two distinct surface qualities are known for the 1936 proof cents and nickels. The satin finish proofs are designated Type One, and the brilliant finish proofs like this near-Gem are called Type Two. This piece has brilliant light gray surfaces with myriad scattered spots. NGC ID# 278Y, PCGS# 3995

1936 Type Two Nickel, PR67
Brilliant Finish

- 3253 1936 Type Two—Brilliant Finish PR67 NGC.** A stunning Superb Gem with exceptionally deep mirrored fields, this piece also exhibits reflective devices with bold detail. Hints of delicate gold toning complete a pretty picture. NGC has only certified 15 finer examples (2/13). NGC ID# 278Y, PCGS# 3995
- 3254 1937 PR65 NGC.** An exceptional Gem proof, this 1937 Buffalo nickel has brilliant light gray surfaces with mirrored fields and satiny devices. A loupe reveals a few scattered spots. NGC ID# 278Z, PCGS# 3996
- 3255 1937 PR66 NGC.** This impressive Premium Gem exhibits razor-sharp definition on all design elements, with deeply mirrored surfaces and light shades of champagne-gold and ice-blue toning. The 1937 issue was the last proof Buffalo nickel. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

- 3256 1939 Reverse of 1940 MS67 Full Steps PCGS.** The "Straight Steps" reverse, seldom seen with a sharp central strike. However, the best attribute of this lustrous Premium Gem is its magnificent two-sided lemon-gold, cherry-red, powder-blue, and lilac toning. Population: 30 in 67 Full Steps, 0 finer (2/13). PCGS# 894003
- 3257 1939 Doubled MONTICELLO MS66 PCGS. FS-801.** MONTICELLO and FIVE CENTS are widely die doubled on this popular Reverse of 1940 *Guide Book* variety. Lustrous and lightly toned with a good strike and smooth surfaces. Population: 32 in 66, 5 finer (2/13). PCGS# 4004

PROOF JEFFERSON NICKELS

1954 Jefferson Nickel, PR68 Virtually Perfect Deep Cameo Example

3258 1954 PR68 Deep Cameo PCGS. This magnificent Jefferson nickel borders on technical perfection, with sharply struck frosty design elements that contrast profoundly with the deeply mirrored fields to produce a startling cameo effect. The brilliant surfaces show no defects to the naked eye. Population: 6 in 68 Deep Cameo, 0 finer (2/13). NGC ID# 27A7, PCGS# 94186

3259 1959 PR68 Deep Cameo PCGS. An extraordinary Superb Gem with brilliant nickel-gray surfaces, combining deep mirrored fields and highly lustrous devices. Seldom encountered so fine. Population: 14 in 68 Deep Cameo, 1 finer (2/13). NGC ID# 27A9, PCGS# 94191

1960 Jefferson Nickel, PR69 Deep Cameo None Certified Finer

3260 1960 PR69 Deep Cameo PCGS. A magnificent proof Jefferson nickel, with incredible mint frost and deeply mirrored fields that produce a stunning cameo effect when the coin is tilted in the light. The surfaces are just one tick from technical perfection. Population: 6 in 69 Deep Cameo, 0 finer (2/13). NGC ID# 22YJ, PCGS# 94192

3261 1961 PR69 Deep Cameo PCGS. A nearly perfect proof, and tied for the finest certified, this amazing Deep Cameo specimen has highly lustrous devices over deeply mirrored fields. NGC ID# 22YK, PCGS# 94193

3262 1971 No S PR68 Cameo PCGS. A single proof nickel die in 1971 missed the step where mintmarks were added, and that die produced a small number of proofs before the error was detected. Surviving examples are seldom encountered. This Superb Gem Cameo proof has excellent contrast with light gray surfaces. Population: 56 in 68 Cameo, 8 finer (2/13). NGC ID# 22YN, PCGS# 84204

1971 Jefferson Nickel, PR69 Deep Cameo Rare No S Variant

3263 1971 No S PR69 Deep Cameo PCGS. A fully struck, virtually perfect example of this important error, with richly frosted devices that contrast profoundly with the pristine mirrored fields. A reported 1,655 proof Jefferson nickels were struck in 1971 from dies that inadvertently omitted the S mintmark. Population: 3 in 69 Deep Cameo, 0 finer (2/13). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

Choice VF 1795 Half Dime V-5, LM-8

3264 1795 VF35 NGC. V-5, LM-8, R.3. Flowing Hair specialists are familiar with LM-8, distinguished by a prominent die crack from Liberty's nose to the rim. The present stone-gray example has smooth, pleasing surfaces despite faint mint-made adjustment marks on the portrait. The stars and letters are bold and Liberty's lower curls are well defined. NGC ID# 22ZV, PCGS# 4251

Bold AU53 1800 Half Dime V-1, LM-1

3265 1800 AU53 PCGS. V-1, LM-1, R.3. The rare late die state with a break across the dentils beneath the 00 in the date. This is an evenly struck example with impressive sharpness on the stars, curls, plumage, and shield. Luster emerges from protected areas, and the gunmetal-gray surfaces are unabraded aside from a few faint and hair-thin obverse marks. NGC ID# 2326, PCGS# 4264

BUST HALF DIMES

Lustrous Gem 1829 Half Dime
Lightly Toned, V-4, LM-7.1

- 3266** 1829 MS65 PCGS. V-4, LM-7.1, R.4. A lightly toned and lustrous Gem with powder-blue and golden-russet toning along the margins. The strike is sharp except on the left shield border, and both sides appear pristine aside from a single hair-thin line above the cap. Though 18 die pairs are identified, the date is surprisingly rare as a Gem. Population: 23 in 65, 11 finer (2/13). NGC ID# 232B, PCGS# 4276

Clamshell Split Planchet on an
1835 Half Dime, V-10, LM-5
Large Date, Small 5C

- 3267** 1835 Large Date, Small 5C — Clamshell Split Planchet — MS64 PCGS. V-10, LM-5, R.3. In a newer PCGS holder that shows the edge. Careful rotation reveals that the edge is partially separated near the reverse rim, with the gap widest near 12 o'clock. This edge separation is typically caused by an improper alloy mixture during the formation of the strip from which the planchets are punched. Well struck, smooth, and satiny with light to medium stone-gray and chestnut-tan toning. PCGS# 4283

1835 Half Dime, MS67
Small Date, Small 5C, V-7, LM-10

- 3268** 1835 Small Date, Small 5C MS67 PCGS. CAC. V-7, LM-10, R.1. Jade-green dominates the centers, though the obverse border is rose-red and the reverse periphery is almond-gold. Liberty's cheek displays glimpses of plum-mauve and russet. Lustrous and sharply struck with a pristine reverse and only trivial obverse contact. LM-10 is among the more prevalent 1835 die marriages but, along with LM-11, is one of just two Small Date, Small 5C varieties. Since LM-11 is conditionally rare, those who collect by *Guide Book* listing usually select an example of LM-10. The die pair is identified by a die break within the upper loop of the second S in STATES. Population: 5 in 67, 1 finer (2/13). PCGS# 4285

SEATED HALF DIMES

Rare Gem V-2 Small Stars 1838 Half Dime

- 3269 1838 Small Stars MS65 PCGS. CAC. V-2.** V-2 is most desirable die state of the Small Stars variety. Star 4 is nearly invisible, a crack passes through star 13, and die rust is advanced on Liberty's raised arm. V-1 and V-1a share the same obverse but in an earlier, less lapped die state. Lustrous and beautifully preserved with delicate tan-gold toning. Encased in an old green label holder. Population: 2 in 65, 0 finer (2/13). NGC ID# 232R, PCGS# 4318

Colorful Mint State 1844-O Dime

- 3270 1844-O MS61 NGC. CAC. Medium O.** A nicely struck Uncirculated example of this underappreciated New Orleans issue. Dusky golden-brown and apple-green toning dominate. One faded thin mark left of the mintmark. Certified in a former generation holder. Census: 2 in 61, 2 finer (2/13).
Ex: ANA Sale (Heritage, 8/1996), lot 6906; Long Beach Signature (Heritage, 2/2003), lot 6163. NGC ID# 2336, PCGS# 4334
- 3271 1854-O Arrows MS62 PCGS.** A well-detailed MS62 example of this popular branch-mint type coin, with vibrant satiny mint luster under shades of lavender-gray, sea-green, and amber toning. Population: 5 in 62, 24 finer (2/13). NGC ID# 2343, PCGS# 4359
- 3272 1857 MS66+ PCGS. CAC.** Peripheral weakness is typical of this issue and others from the same era. This amazing Premium Gem exhibits frosty luster shining through lilac and iridescent toning. Population: 28 in 66 (5 in 66+), 3 finer (2/13). NGC ID# 233S, PCGS# 4365
- 3273 1859-O MS65+ NGC.** Though the 1859 Philadelphia issue was from a new hub with hollow-centered stars, the 1859-O continued the prior design subtype. The present Gem is bold and lustrous with medium lavender, peach-gold, rose-red, and jade-green toning. Census: 12 in 65 (1 in 65+), 4 finer (2/13). NGC ID# 233X, PCGS# 4370

- 3274 1868 MS64 PCGS.** Hints of gunmetal-blue and honey-gold visit this satiny low mintage Reconstruction-era half dime. The strike is good, and there are no detracting marks. Struck from clashed dies, and certified in an old green label holder. Population: 10 in 64, 23 finer (2/13). NGC ID# 234N, PCGS# 4392

- 3275 1871 MS65 NGC. CAC.** Rose-red and jade-green patina endows this flashy and nicely struck Gem. No detractions are evident beneath the vibrant toning. Certified in a prior generation holder. Census: 31 in 65, 21 finer (2/13). NGC ID# 234V, PCGS# 4398

PROOF SEATED HALF DIMES

- 3276 1858 PR64 PCGS.** Although earlier proof half dimes were available to those with close connections to the Mint, widespread distribution to contemporary collectors began in 1858, and continued for just one additional year before the Mint abandoned the Stars obverse half dime design. This Choice proof is deeply toned with mottled iridescence over lightly mirrored surfaces. Population: 17 in 64, 13 finer (2/13). NGC ID# 235N, PCGS# 4437

Superb Gem Proof 1859 Half Dime Paquet Obverse Subtype

- 3277 1859 PR67 PCGS. CAC.** True, the date is repunched south, but the most notable feature of the proof 1859 half dime is its hollow-centered stars. They are the handiwork of engraver Anthony C. Paquet, best known today for a rare and briefly coined design subtype of double eagles. Paquet also revamped the seated Liberty motif, which has a different face and hairstyle than Gobrecht's more familiar effort. The 1860 transition to a legend obverse limited Paquet's design to the 1859 half dime and rare 1859 and 1860 patterns. This is a pristine and fully struck specimen with rich peach-gold, lilac-red, ocean-blue and olive-green toning. Population: 4 in 67, 0 finer (2/13). NGC ID# 235P, PCGS# 4438
- 3278 1861 PR65 NGC.** Deep navy-blue, lavender, and peach-gold toning encompass this fully struck Civil War Gem. A better proof date since much of the mintage of 1,000 pieces was Mint-melted. Census: 21 in 65, 15 finer (2/13). NGC ID# 235W, PCGS# 4444
- 3279 1862 PR66 PCGS.** An impressive Premium Gem with brilliant silver on the obverse and iridescent toning on the reverse. Population: 15 in 66, 2 finer (2/13). NGC ID# 235X, PCGS# 4445
- 3280 1865 PR64 Cameo NGC.** Plainly contrasted with a thin glittering veil of green-gold patina visiting each side. A few light hairlines through the fields contribute to the grade but are hard to spot with the unaided eye. Census: 13 in 64 Cameo, 17 finer (2/13). PCGS# 84448

**Superb Gem Proof 1867 Half Dime
Only 625 Examples Struck**

3281 1867 PR67 NGC. Only 625 proof Seated Liberty half dimes were struck in 1867, to accompany a tiny business-strike mintage of 8,000 pieces. This incredible Superb Gem is sharply detailed throughout, with deeply mirrored fields and attractive shades of cobalt-blue and champagne-gold toning. Census: 6 in 67, 1 finer (2/13). NGC ID# 2364, PCGS# 4450

3282 1868 PR65 PCGS. From a mintage of just 600 pieces, this proof Seated Liberty half dime displays moderately reflective surfaces and sharply detailed design elements, with light blue and green toning. Population: 20 in 65, 11 finer (2/13). NGC ID# 2365, PCGS# 4451

EARLY DIMES

Good 1796 Dime, JR-4

3283 1796 Good 4 PCGS. JR-4, R.4. Cream-white motifs contrast with deep dove-gray fields. All legends are readable and only the tops of the UNI in UNITED are merged into the rim. This introductory date dime presumably served in early American commerce for many years before its numismatic significance was recognized. However, there are no relevant marks, though a lens reveals scattered trivial abrasions. NGC ID# 236B, PCGS# 4461

Moderately Prooflike MS63, JR-4 1796 Dime

3284 1796 MS63 NGC. JR-4, R.4. A moderate number of Mint State 1796 dimes survive from a *Guide Book* mintage of 22,135 pieces. Walter Breen was fond of stating they were saved as “first of their kind.” No documentation exists to support his statement, although the 1797 is significantly rarer in Uncirculated grades. High grade 1796 dimes tend to be from either JR-1 or JR-4 dies. The present Select Mint State piece has excellent eye appeal. Both sides have mirrored fields and mostly sharp details except for the centers. The obverse has delicate gold with peripheral iridescence and the reverse has light champagne toning. Census: 23 in 63 (1 in 63+), 38 finer (2/13). NGC ID# 236B, PCGS# 4461

**1798/97 JR-1 Dime, AU53
16 Reverse Stars**

3285 1798/97 16 Stars on Reverse AU53 NGC. JR-1, R.3. All four die varieties of 1798-dated dimes receive separate *Guide Book* listings due to distinctive differences in the date logotype or a different star count on the reverse. JR-1 is curious in that it has 13 obverse and 16 reverse stars. The reverse die was presumably made prior to the obverse die, despite the fact that no 1797 varieties have a Heraldic Eagle reverse. This is a lavender-gray and almond-gold example with minor inexactness of strike at the centers and one faded slender mark on the right obverse field. NGC ID# 236F, PCGS# 4468

Uncirculated 1800 Dime
Scarcer JR-2 Variety

- 3286** 1800 MS60 NGC. JR-2, R.5. The two varieties of the year share the same obverse die but the reverses, though similar, differ. JR-2, the present and rarer variety, depicts the eagle “biting” a point of a star. The star is separate from the beak on JR-1. The present lightly toned example has a hint of chestnut patina near the borders while the centers remain brilliant. The strike is crisp aside from the eagle’s breast feathers. The reverse is essentially unabraded, though the obverse has thin marks beneath the ear and through serifs of the IB in LIBERTY. Census: 1 in 60, 5 finer (2/13).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1004, which realized \$25,300. NGC ID# 236H, PCGS# 4470

- 3287** 1803 — Corroded, Cleaned — ANACS. VF20 Details. JR-2, R.6. Most 1803 dimes are either JR-3 or JR-4. JR-2 is very rare, though not as rare as JR-1 or JR-5. Remarkably, Ed Price managed to obtain every Draped Bust dime variety, each auctioned at our Baltimore ANA Signature in July 2008. The present slate-gray piece is sharper than expected for the VF20 level but is a bit bright and granular. NGC ID# 236L, PCGS# 4473

Near-Gem 1805 Dime
JR-2, Four Berries

- 3288** 1805 4 Berries MS64 PCGS. JR-2, R.2. The slightly more accessible of two reverses sharing a common obverse, with four berries on the olive sprig instead of five on the scarce JR-1. Both varieties are available in circulated grades and even into the lower reaches of Mint State, but a near-Gem example such as this is another story. Subtly glimmering luster is light silver and peach overall with tan and blue-violet elements along parts of the margins, the last hue most notably at the eagle’s right (facing) wingtip. A few outer design elements are soft, such as the first couple of obverse stars, but the interior detail is better. For the Four Berries variety, Population: 32 in 64 (2 in 64+), 19 finer (2/13). NGC ID# 236S, PCGS# 4477

BUST DIMES

1821 Capped Bust Dime, JR-8, MS64

- 3289** 1821 Small Date MS64 PCGS. JR-8, R.2. This satiny near-Gem is deeply toned in gunmetal-gray and cobalt-blue. A minimally abraded example. The strike is precise aside from a few left-side stars. JR-8 is plentiful in well circulated grades but is surprisingly rare in Mint State. Population: 3 in 64, 1 finer (2/13). NGC ID# 236Y, PCGS# 94496

Satiny MS64+ 1832 Dime, JR-1

- 3290** 1832 MS64+ PCGS. CAC. JR-1, R.2. Lime-green and cream-gray toning endows this well struck near-Gem. The satiny surfaces display only scattered moderate marks. The relatively plentiful JR-1 is perhaps best identified by the repunched C in AMERICA. Population: 29 in 64 (1 in 64+), 22 finer (2/13). NGC ID# 237C, PCGS# 4521

1834 Capped Bust Dime, MS65 Large 4, JR-1 Variety

- 3291** 1834 Large 4 MS65 PCGS. CAC. JR-1, R.1. From a large mintage of 635,000 pieces, the 1834 Capped Bust dime employed four different obverse dies and six different reverses to strike a total of seven known die varieties for the date. This delightful Gem represents the JR-1 Variety, with a Large 4 in the date and a double arrow shaft on the top arrow. The design elements are sharply detailed, with evidence of recutting on some of the stars and a die crack uniting stars 1-5. Vibrant mint luster adds to the terrific eye appeal. Population: 6 in 65, 6 finer (2/13). PCGS# 4526

Colorful Gem 1835 Dime, JR-5

- 3292** 1835 MS65 NGC. JR-5, R.1. Though the obverse field and eagle are brilliant, the remainder of this unabraded Gem is draped in iridescent aquamarine, lilac-red, and gunmetal-gray shades. The strike is close to complete but the claws and the curl beneath the B exhibit slight softness. Census: 20 in 65, 7 finer (2/13). NGC ID# 237F, PCGS# 4527

Patinated Premium Gem 1835 Dime, JR-1

- 3293** 1835 MS66 NGC. CAC. JR-1, R.1. Sea-green, powder-blue, and orange-gold embraces this needle-sharp and coruscating Premium Gem. Study beneath a lens reveals only infrequent trivial flecks. Ideal for the type collector who prefers richly patinated silver. The reverse die was used only to coin JR-1 and is identified by a widely spaced STAT in STATES. Census: 7 in 66, 0 finer (2/13). NGC ID# 237F, PCGS# 4527

- 3294** 1836 MS63 PCGS. JR-1, R.3. The 0 in 10 C leans left, a pick-up point for attribution of this moderately scarce die variety. Well struck and coruscating with attractive preservation. Golden-brown and blue-green freckles overlie cream-gray surfaces. NGC ID# 237G, PCGS# 4528

PROOF BUST DIME

Cameo Gem Proof JR-2 1831 Dime

- 3295 1831 PR65 Cameo NGC. JR-2, R.7 as a proof.** *Early United States Dimes*, published in 1984 by the John Reich Collectors Society stated that JR-2 “is clearly scarce and difficult to locate in EF condition. Finest seen is EF-40 ... At least three proofs have been seen from this pair of dies.” In the 1992 Stack’s auction of the legendary Floyd T. Starr collection, the cataloger noted for lot 356, “fewer than 10 proofs are believed to survive. Missing from the Bareford, Hawn, and Garrett sales.” The Eliasberg collection also lacked a proof 1831 dime.

This is a magnificent Gem proof with full definition on the portrait and eagle. The denticles are sharply squared off, unlike on business strikes which tend to show a slope between the denticle edge and the field. The flashy fields display light lavender toning, while the borders exhibit medium forest-green shades. The toning pattern must identify the specimen, since there are no visible detractors. NGC ID# 27D3, PCGS# 4553

SEATED DIMES

- 3296 1837 No Stars, Small Date AU58 PCGS. CAC.** Variegated golden-brown, forest-green, and lavender toning encompasses this unmarked and satiny near-Mint dime. The No Stars subtype was struck at Philadelphia only in 1837, though New Orleans briefly continued the design the following year. NGC ID# 237R, PCGS# 4562
- 3297 1838-O No Stars AU53 NGC.** A well-detailed AU53 example from the first year of the New Orleans Mint, the pleasing surfaces are toned in attractive shades of champagne-gold and powder-blue. The short-lived No Stars design is always popular with type collectors. Census: 6 in 53, 64 finer (2/13). NGC ID# 237T, PCGS# 4564
- 3298 1842-O AU55 NGC.** Medium O. Despite a reported mintage of more than 2,000,000 pieces, the 1842-O is surprisingly rare at the Choice AU level. Most survivors are well worn. The present untuned example is well defined and minimally abraded. NGC ID# 2387, PCGS# 4582
- 3299 1853 Arrows MS65 PCGS.** Arrows were placed by the date to signify a weight change in 1853, and the short-lived design is extremely popular with type collectors. This is a nicely struck Gem. A lightly speckled gray patina appears on both sides of this example along with champagne and copper colors. Population: 75 in 65 (2 in 65+), 53 finer (2/13). NGC ID# 2398, PCGS# 4603

1859 Dime, MS66

Highly Lustrous, Evenly Toned

- 3300 1859 MS66 PCGS. CAC.** A spectacular Premium Gem representative of this popular antebellum issue, this coin displays sharply detailed design elements and vibrant satiny mint luster, under attractive shades of champagne-gold toning. Eye appeal is outstanding. Population: 16 in 66, 16 finer (1/13). NGC ID# 2394, PCGS# 4619

1860-O Dime, XF40

Key, Low-Mintage Issue

- 3301 1860-O XF40 NGC.** New Orleans struck the Cereal Wreath subtype only on the first and last years of the design, 1860 and 1891. Apart from early Carson City issues, the 1860-O is key to the Seated dime series, since the mintage of only 40,000 pieces was little saved. The present olive-gray XF example is mildly granular but highly collectible. Census: 4 in 40, 12 finer (2/13). NGC ID# 239E, PCGS# 4632

**1874 Arrows Dime, MS66
Slanted Date**

3302 1874 Arrows MS66 NGC. Lovely color and exemplary surface preservation exist in equal portion on this Premium Gem 1874 Arrows dime, a nice representative of the two-year type. The date is slanting downward running from left to right, but we cannot match it to any of the varieties in www.SeatedDimeVarieties.com. Some interesting die lumps and a crack appear at Liberty's right (facing) elbow and left thigh. The obverse shows a silver center complementing copper-aqua rim tones, with the reverse a more-consistent deep copper. Marks are unworthy of mention. A nice example of the type. NGC ID# 23BK, PCGS# 4668

3303 1876 MS65 PCGS. CAC. Type One Reverse. Brilliant and lustrous with a suitable strike and only wispy field grazes. Prominently clashed, as made, and noteworthy for an area of prooflike surface on the upper left reverse. NGC ID# 23AH, PCGS# 4679

3304 1889-S MS64 NGC. Fortin-104. Small S. A large die lump on the E in ONE attributes the Fortin variety. The speckled golden-russet and apple-green toning is moderately more prominent on the reverse. Unmarked and lustrous. NGC ID# 23BA, PCGS# 4703

Toned MS66 1891-S Dime

3305 1891-S MS66 NGC. CAC. Medium S. Iridescent sea-green, peach-gold, and plum-mauve toning dominates this lustrous and fully struck Premium Gem. Virtually void of contact, and ideal for the competitive Registry collector. The ear of coin is partial due to a lapped die, and the mintmark appears repunched within the lower loop. Census: 8 in 66, 5 finer (2/13). NGC ID# 23BF, PCGS# 4708

PROOF SEATED DIMES

**1846 Seated Liberty Dime, PR65
Ex: Pittman; Kaufman**

3306 1846 PR65 NGC. The 1846 Seated dime issue is popular and sought-after even in Mint State, where grade-for-grade it is more elusive than the 1844 "Little Orphan Annie." The present 1846 dime, which we last offered as part of the Phil Kaufman Collection, at one time formed part of the John Jay Pittman complete 10-piece 1846 proof set, half cent through eagle, including the gold pieces.

Cataloging this piece for the Pittman sale, David Akers wrote:

"Numismatic Gallery (1949). Probably from Ed Frossard's November 4, 1892 sale which contained a complete 1846 Proof set with gold, the only such set known to have been offered at auction in the past. Part of a complete original cased set."

Graded PR65 by NGC, it is either the finest known or tied for the finest, depending on whether the second NGC example in the same grade is a resubmission or a different coin. In addition to the two Gem proof dimes, NGC has certified a PR64, two PR63, and a PR62. PCGS has seen two PR64, five PR63, and three PR62 examples (2/13). It is almost a certainty that a number of these 16 "grading events" are duplications. PCGS CoinFacts estimates that only 12 examples survive in all.

Attractive medium russet, gold, and cobalt-blue toning adorns both sides of this wonderful Gem proof. The impeccably preserved surfaces display mirrorlike fields that accentuate the motifs. The strike is full throughout, including full separation of Liberty's foot and sandal, and crispness on the star centrils and leaf venation. Prominent recutting is visible on the 46 of the date, and a lint mark touches both stars 6 and 7 as well as a denticle. There is a long, raised die line in the field from the bottom of the cap to the drapery. Both the technical quality and eye appeal are outstanding.

Ex: John Jay Pittman (David Akers, 5/1998), lot 1712; Phil Kaufman Collection (Central States Signature, Heritage, 4/2008), lot 2384. NGC ID# 23C2, PCGS# 4733

1847 Seated Dime, PR66 Cameo
Ex: Eliasberg-Kaufman

3307 1847 PR66 Cameo NGC. This impressive high-grade 1847 dime, certified PR66 Cameo, resided in the J.M. Clapp Collection and estate for nearly 50 years from 1894 until 1942, in the famous Eliasberg Collection and estate for more than half a century from 1942 to 1996, and in the Kaufman Collection for a dozen years. Just three owners held this beauty for 115 years of its history.

We are only aware of five proof 1847 dimes in all grades, and this piece from the Clapp, Eliasberg, and Kaufman collections remains the finest of those five coins, including one in the Smithsonian Institution. It is the finest certified, the only one designated with Cameo contrast, and the only 1847 Seated Liberty dime that NGC has graded proof.

Delightful field-device contrast appears on both sides of this marvelous Premium Gem proof, each of which is delicately toned with occasional wisps of cobalt-blue, pale purple, and golden-brown. An attentive strike brings out strong definition on the mildly frosted design features, none of which reveal even a hint of weakness. A few wispy handling marks visible under high magnification in the fields likely preclude an even higher grade! This coin possesses great overall appeal.

Ex: George Crawford Collection Sale; Charles Steigerwalt (7/1894); J.M. Clapp; Clapp estate, 1942; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1134; Phil Kaufman Collection (Heritage, 7/2008), lot 1812, \$51,750; Dallas Signature (Heritage, 10/2012), lot 3946, \$36,719. PCGS# 84734

1855 Arrows Dime, PR67 Cameo
Ex: Phil Kaufman Collection

3308 1855 Arrows PR67 Cameo NGC. The mintage of 1855 Arrows proof dimes remains unknown, but was probably in the range of 50 to 75 coins, based on current population data. In all grades, NGC has certified 14 submissions and PCGS has certified 13 submissions. For issues in the 1860s, the grading services have certified a little less than half the original proof mintage of Seated Liberty dimes. The 27 submissions include just five pieces assigned a Cameo designation, with none described as Deep Cameo.

Minor but obvious doubling appears on the date and a few stars, likely the result of machine doubling, although Breen described his variety 3290 as an "Obvious double date" and continued to state that it is a very rare variety. Of course, all 1855 proof dimes can be called very rare. We disagree with Breen's Doubled Date assessment.

The finest certified pieces include this Superb Gem specimen from the Phil Kaufman Collection, and another that NGC grades PR67 ★ Cameo. Stunning cameo contrast is evident on this coin, regardless of the angle from which the piece is viewed. The surfaces are fully struck, except for minor softness on the ribbing of the uppermost leaves. A few stray, inoffensive hairlines on the untuned, nicely preserved surfaces should not be confused with the faint die polish lines visible in the fields. Census: 1 in 67 Cameo, 1 in 67 ★ Cameo, 0 finer (2/13).

Ex: Phil Kaufman Collection (Central States Signature, Heritage, 4/2008), lot 2395, \$48,875; Los Angeles Signature (Heritage, 7/2009), lot 1073, \$46,000; Philadelphia Signature (Heritage, 8/2012), lot 5098, \$41,125; FUN Signature (Heritage, 1/2013), lot 5586. PCGS# 84744

**1856 Seated Dime, PR64
Small Date**

- 3309 1856 PR64 PCGS. CAC.** The Small Date 1856 dime has a slanted or italic 5 in the date, while the scarcer Large Date much more nearly fills the exergue beneath Liberty's rock and has an upright 5. The proofs are all struck from the Small Date dies, of which perhaps three dozen survive today. This near-Gem shows boldly struck surfaces with copper-amber color prevailing against olive-sage accents in the fields. Die doubling shows most plainly on the lower rock and shield. Population: 7 in 64, 4 finer (2/13). NGC ID# 23CA, PCGS# 4745

- 3310 1867 PR64 Cameo PCGS.** Reflective surfaces and light toning contrast beautifully with the central designs on both sides when the coin is rotated. A few small depressions appear on Liberty's cheek. Population: 14 in 64 Cameo, 11 finer (2/13). PCGS# 84760

1872 Seated Dime, PR66 Cameo

- 3311 1872 PR66 Cameo PCGS.** This fully brilliant Premium Gem Cameo proof has no evidence of toning on either side, with exquisite, complete design motifs. Few survivors from the 950 coin proof mintage can equal the eye appeal of this specimen. Population: 5 in 66 Cameo, 1 finer (2/13). PCGS# 84765

- 3312 1879 PR65 NGC.** A generously toned, still-gleaming Gem. The obverse has green-gold outer toning and amber-to-amethyst inner patina. The reverse is cerulean at the margins and rose-violet at its center. Census: 43 in 65, 37 finer (2/13). NGC ID# 23D4, PCGS# 4776

- 3313 1879 PR65 PCGS.** Aquamarine and peach-gold toning consumes this flashy and well struck Gem. Much scarcer than suggested by its proof mintage of 1,100 pieces. Certified in a first generation holder. NGC ID# 23D4, PCGS# 4776

High-End Superb Gem Proof 1879 Dime

- 3314 1879 PR67 PCGS. CAC.** A mildly contrasted and pleasantly reflective Superb Gem with two-track toning. The obverse displays gold-orange outer toning and a pale blue center, while the reverse is more subdued with peach and sky iridescence that appears at certain angles to the light. Population: 8 in 67, 0 finer (2/13). NGC ID# 23D4, PCGS# 4776

- 3315 1879 PR66 Cameo PCGS.** Light champagne toning appears within a cobalt-blue toning frame. Both sides have fully mirrored surfaces that contrast nicely with the lustrous and sharply detailed devices of this Premium Gem Cameo proof. Population: 4 in 66 Cameo, 2 finer (2/13). PCGS# 84776

- 3316 1880 PR66+ PCGS. CAC.** A high-end Premium Gem, from a proof mintage of 1,355 pieces, this attractive example displays well-detailed design elements and deeply mirrored fields, under shades of champagne-gold and lavender-gray toning. Population: 28 in 66 (1 in 66+), 10 finer (2/13). NGC ID# 23D5, PCGS# 4777

- 3317 1881 PR65 PCGS.** Green, blue, and peach shadings enrich each side of this Gem proof Seated dime. The obverse has a loosely concentric pattern to the hues, while the reverse is more dappled. Population: 48 in 65, 18 finer (2/13). NGC ID# 23D6, PCGS# 4778

- 3318 1881 PR66 Cameo PCGS. CAC.** A sharply detailed Premium Gem, with frosty devices and boldly contrasted reflective fields. Attractive champagne-gold patina adds to the visual appeal. Population: 9 in 66 Cameo, 5 finer (2/13). PCGS# 84778

**Premium Gem Proof 1882 Seated Dime
Rare Cameo Specimen**

- 3319 1882 PR66 Cameo PCGS. CAC.** The rich mint frost of the devices provides bold cameo contrast with the deeply mirrored fields of this stately Premium Gem. The design elements are sharply detailed and the surfaces are free of mentionable distractions. A thin patina of champagne-gold hues graces the surfaces of both sides. Population: 13 in 66 (1 in 66+) Cameo, 4 finer (2/13). PCGS# 84779

**1882 Dime, PR67+ Cameo
Borderline Deep Cameo**

- 3320 1882 PR67+ Cameo PCGS. CAC.** A thin crescent of sky-blue and gold toning appears at the right obverse border, while the balance of the obverse and the entire reverse of this Superb Gem are brilliant without toning. A splendid specimen with exceptional contrast on the obverse and deep contrast on the reverse. Population: 4 in 67 (1 in 67+), 0 finer (2/13). PCGS# 84779

**1883 Seated Dime, PR67
Borderline Cameo Proof**

- 3321 1883 PR67 NGC.** The date appears to slant down slightly to the right on this Superb Gem proof. Both sides have gorgeous lavender, amber, sea-green, and bright blue toning with lustrous devices. Cameo contrast remains evident beneath the toning, but insufficient for a Cameo designation. Census: 18 in 67, 1 finer (2/13). NGC ID# 23D8, PCGS# 4780
- 3322 1883 PR66 Cameo PCGS. CAC.** The obverse exhibits only a hint of honey toning near the rims. The reverse is medium orange-gold with traces of lilac near the ribbon. The flashy fields are devoid of detractions. Population: 8 in 66 Cameo, 7 finer (2/13). PCGS# 84780
- 3323 1884 PR65 Cameo NGC.** Watery fields host pleasingly frosted devices on this later-date Cameo Gem proof. Toning is minimal, limited to a hint of green-gold most prominent at the right reverse. PCGS# 84781

**Cameo PR67 1884 Dime
Stone-White Surfaces**

- 3324 1884 PR67 Cameo NGC.** A brilliant Superb Gem whose thick frost on the portrait, wreath, and legends ensures Cameo status. The glassy fields are pristine, through a small strike-through (as produced) is above the left ribbon loop of the wreath. Census: 18 in 67 (2 in 67+) Cameo, 4 finer (2/13). PCGS# 84781

**1884 Seated Dime, PR68 Cameo
Exceptional Eye Appeal**

- 3325 1884 PR68 Cameo NGC.** While possibly not perceptibly different to the casual observer from a PR67 Cameo, this PR68, as with any coin in any denomination at that grade level, will show something extra that sets it apart from a 67. In this case, the surfaces are suffused with pale reddish, blue, and light green patina. The toning is light enough that it does not impair the viewability of the coin's thick mint frost over the devices or the depth of the mirrors in the fields. An exceptional Seated dime for type purposes. Census: 4 in 68 Cameo, 0 finer (10/12). PCGS# 84781

**Superb Gem Proof 1885 Dime
Great Mix of Flash and Patina**

- 3326 1885 PR67 PCGS.** A colorful specimen with complete eye appeal from the bold field reflectivity to the bright and blended hues across each side. Greens, golds, and blue prevail in roughly concentric patterns. The central obverse is notable for its deep toning, the reverse for a pale wash relative to the margins. Population: 9 in 67 (1 in 67+), 2 finer (2/13). NGC ID# 23DA, PCGS# 4782
- 3327 1888 PR66 PCGS.** The pumpkin-gold, aquamarine, and ruby-red toning is especially prominent on the obverse. A splendidly preserved high grade Seated proof type coin. Liberty's hair shows incompleteness but the remainder of the design is crisp. NGC ID# 23DD, PCGS# 4785
- 3328 1889 PR66 NGC.** High-reflectivity surfaces show just a touch of frost on the devices. A colorful Premium Gem with golden hues at center and right and blue-to-green shadings to the left on each side. Census: 35 in 66, 8 finer (2/13). Ex: FUN Signature (Heritage, 1/2004), lot 5656. NGC ID# 23DE, PCGS# 4786

BARBER DIMES

1895-S Dime, Rim-Toned MS65 Attractive and Underrated

- 3329 1895-S MS65 PCGS. CAC.** Gem and near-Gem Barber dimes with good eye appeal such as the present Gem 1895-S are among the most underrated areas of the numismatic market today, in our opinion. Only 1.1 million pieces were made of this issue, and PCGS has seen only six in this grade with two finer (2/13). This piece boasts silvery centers with attractive russet and blue original patina near the rims and no mentionable distractions, as expected of the grade. NGC ID# 23DX, PCGS# 4808

- 3330 1898 MS66 PCGS. CAC.** Partial peach and sage patina adds color to otherwise silver surfaces on this dusky but lustrous Premium Gem. Excellent detail and preservation. Population: 37 in 66 (2 in 66+), 4 finer (2/13). NGC ID# 23000000, PCGS# 4815

- 3331 1903-O MS64 NGC.** The minimally toned centers are framed by rich peripheral shades of fire-red and blue-green. Well struck and needle-sharp with minuscule planchet chatter on the chin. Census: 29 in 64, 6 finer (2/13). NGC ID# 23EN, PCGS# 4831

Premium Gem 1903-S Barber Dime Elusive 20th Century Issue

- 3332 1903-S MS66 NGC. CAC.** Rich sea-green, rose-red, and electric-blue intermingle across this well preserved and lustrous Premium Gem. The strike is intricate save for the uppermost grains of the cereal wreath. A high grade example of the rarest 20th century Barber issue. Certified in a prior generation holder. Census: 7 in 66, 2 finer (2/13). NGC ID# 23EP, PCGS# 4832

- 3333 1907-D MS64 PCGS.** Pewter, gold, russet, and iridescent green are among the colors this near-Gem dime displays. The toning and satin luster combine for an attractive example and the piece displays only a few minor marks. Population: 16 in 64, 16 finer (2/13). NGC ID# 23F4, PCGS# 4843

- 3334 1910-D MS65 PCGS. CAC.** The 1910-D has a fairly high mintage but was little saved in Mint State. A majority of survivors are in Very Good or lower grades. The present fully struck Gem is smooth and lustrous throughout the autumn-brown, apple-green, and stone-gray surfaces. Population: 12 in 65, 8 finer (2/13). NGC ID# 23FG, PCGS# 4855

- 3335 1914-S MS66 PCGS.** Surprisingly flashy luster with a generally silver-blue appearance but several prominent splashes of deeper color at the margins. The obverse has crimson-gold at upper left, while the reverse has rose-violet elements at the right and echoed elsewhere. Population: 14 in 66, 1 finer (2/13). NGC ID# 23FV, PCGS# 4867

PROOF BARBER DIMES

- 3336 1892 PR65 Cameo PCGS. CAC.** This minimally toned first-year Barber dime proof has crisp and attractive contrast. A curved depression (as struck) is prominent to the right of Liberty's nose. Population: 19 in 65 (1 in 65+) Cameo, 20 finer (2/13). PCGS# 84875

- 3337 1893 PR64 NGC.** Light cream-gray toning envelops sharply impressed and unabraded surfaces. One tiny spot on the reverse rim at 1 o'clock. A charming proof Barber type coin. NGC ID# 23G4, PCGS# 4877

- 3338 1893 PR65 PCGS. Ex: Teich Family Collection.** This impressive Gem proof Barber dime exhibits sharply detailed design elements and deeply reflective fields, but the most obvious visual attribute is the spectacular toning. Vivid shades of golden-brown, champagne-gold, and violet patina blanket the surfaces of both sides, with exceptional eye appeal. Population: 29 in 65, 38 finer (2/13). NGC ID# 23G4, PCGS# 4877

1895 Dime, Delightfully Toned PR68 ★

- 3339 1895 PR68 ★ NGC.** The Star designation derives from the delightful toning, portions of the obverse showing pinkish-silver contrasting against the prevailing pastel aqua tones, while the reverse offers much deeper cobalt-blue and purple with a silver area in the center. The PR68 grade level is accounted for by the excellent preservation and razor-sharp strike. The low mintage of 690,000 business strikes for the 1895 dime makes it popular in both formats. Census: 9 in 68 (1 in 68+, 1 in 68 ★), 0 finer (2/13). NGC ID# 23G8, PCGS# 4879

- 3340 1896 PR65 NGC.** Deep ruby-red, cobalt-blue, and gunmetal-gray toning blankets this razor-sharp Gem. Evaluation beneath a loupe reveals only trivial imperfections. A scant 762 proofs were produced. NGC ID# 23G9, PCGS# 4880

- 3341 1896 PR66 Cameo NGC.** Sharply detailed and richly frosted, the design elements of this spectacular Premium Gem contrast boldly with the deeply reflective fields. A light patina of champagne-gold toning enhances the considerable eye appeal. Census: 15 in 66 Cameo, 12 finer (2/13). PCGS# 84880

Patinated PR67 1897 Dime

- 3342 1897 PR67 PCGS.** Dusky but pleasing shades of caramel-gold, fire-red, sea-green, and steel-gray blanket this needle-sharp and immaculate Superb Gem. A small window of brilliance remains at the obverse center. A magnificent multicolor specimen from the meager mintage of 731 proofs. NGC ID# 23GA, PCGS# 4881

**Superb Gem Proof 1899 Barber Dime
High-Quality Cameo Example**

3343 1899 PR67 Cameo PCGS. Elements of champagne-gold and lavender toning enhance the well-preserved surfaces of this spectacular Superb Gem, and the richly frosted devices contrast boldly with the deeply reflective fields. The design elements are sharply rendered and eye appeal is extraordinary. Population: 6 in 67 Cameo, 0 finer (2/13). PCGS# 84883

3344 1901 PR66 PCGS. CAC. Mahogany-red and cobalt-blue adorns the borders. Although 1901 proof coinage seldom exhibits significant cameo contrast, the present fully struck specimen has frosty motifs and legends despite the substantial (but attractive) toning. NGC ID# 23GE, PCGS# 4885

3345 1904 PR64 Cameo PCGS. CAC. Variegated blue-green and tobacco-brown toning encompasses this precisely struck and undisturbed near-Gem. The portrait is brilliant, the better to demonstrate the radiant mint frost. Population: 11 in 64 Cameo, 8 finer (2/13). PCGS# 84888

**1907 Barber Dime, PR67
None Certified Finer at NGC**

3346 1907 PR67 NGC. Only 575 proof Barber dimes were struck in 1907 and few survivors can match the quality and appeal of this magnificent Superb Gem. The design elements are sharply detailed throughout and the fields are deeply mirrored, under attractive shades of lime-green, cerulean-blue, and lavender toning. Census: 18 in 67, 0 finer (2/13). NGC ID# 23GM, PCGS# 4891

3347 1907 PR66 Cameo PCGS. Dappled russet and deep blue toning coats much of the obverse, while splashes of milky-tan color accent the reverse. Sharply struck with no mentionable distractions, a lovely Premium Gem. Population: 2 in 66 Cameo, 2 finer (1/13). *Ex: Dallas Signature (Heritage, 12/2005), lot 508.* PCGS# 84891

MERCURY DIMES

3348 1916-D VF20 PCGS. Attractive shades of cerulean-blue and champagne-gold toning enhance the moderately worn surfaces of this important key date. Traces of mint luster remain in selected areas. NGC ID# 23GY, PCGS# 4906

Key 1916-D Mercury Dime, XF45

3349 1916-D XF45 NGC. CAC. Natural surfaces exhibit a combination of light silver-gray on the high points with gray-brown patina in the fields. Careful examination with a loupe reveals the usual microscopic scratches and ticks associated with the grade. This is a pleasing example of the key-date Mercury dime. NGC ID# 23GY, PCGS# 4906

**1916-S Mercury Dime, MS67+
None Finer at PCGS**

3350 1916-S MS67+ PCGS. CAC. A high-end Superb Gem from the first year of the Mercury design, this coin displays vibrant mint luster and well-detailed design elements, with shades of light purple and champagne-gold toning. Eye appeal is terrific and no mentionable distractions are evident. Population: 11 in 67 (1 in 67+), 0 finer (2/13). NGC ID# 23GZ, PCGS# 4908

**1918-S Mercury Dime, MS66 Full Bands
None Finer at NGC**

3351 1918-S MS66 Full Bands NGC. This sharply detailed Premium Gem exhibits Full Bands definition on the fasces and the well-preserved surfaces display vibrant mint luster on both sides. A few wisps of ice-blue and champagne-gold toning add to the considerable visual appeal. Census: 5 in 66 Full Bands, 0 finer (2/13). NGC ID# 23H7, PCGS# 4921

**Superb Gem 1919 Mercury Dime
Elusive Full Bands Example**

- 3352 1919 MS67 Full Bands PCGS.** This spectacular Superb Gem Mercury dime has few peers among surviving examples, and neither PCGS nor NGC has graded a numerically finer specimen (2/13). The design elements are sharply detailed throughout, with Full Bands definition on the fasces. Vibrant mint luster and well-preserved surfaces add to the extraordinary eye appeal. Population: 11 in 67 (1 in 67+) Full Bands, 0 finer (1/13). NGC ID# 23H8, PCGS# 4923

**1919-D Dime, MS64 Full Bands
Conditionally Rare**

- 3353 1919-D MS64 Full Bands PCGS. CAC.** Both sides of this boldly defined near-Gem exhibit splashes of apple-green, golden-brown, and iridescent toning over frosty silver surfaces. The Denver Mint coined a substantial production of 9.9 million 1919-D dimes, yet few were sharply struck, and the issue is an important condition rarity. Just two dozen finer Full Bands examples are certified by PCGS and NGC (2/13). NGC ID# 23H9, PCGS# 4925

- 3354 1920-D MS64 Full Bands PCGS.** This well-detailed Mercury dime exhibits Full Bands definition on the fasces, with satiny mint luster and few signs of contact. The peripheries show areas of gray and amber toning, while the centers remain mostly brilliant. Population: 93 in 64 (1 in 64+) Full Bands, 63 finer (2/13). NGC ID# 23HC, PCGS# 4931

**1924 Mercury Dime, MS67 Full Bands
None Finer at PCGS**

- 3355 1924 MS67 Full Bands PCGS. CAC.** Pale green, lavender, and gold toning visit the obverse and reverse surfaces of this outstanding Superb Gem. Both sides are brilliant with frosty silver luster and exceptional eye appeal. This is an important condition rarity among Philadelphia Mint Mercury dimes. Population: 17 in 67 Full Bands, 0 finer (2/13). NGC ID# 23HJ, PCGS# 4943

**1929-S Mercury Dime, MS67
High-Quality Example With Full Bands**

- 3356 1929-S MS67 Full Bands PCGS. CAC.** The brilliant surfaces of this magnificent Superb Gem radiate vibrant satiny mint luster, with just the slightest hint of pale gold toning on the reverse. The design elements are sharply detailed throughout, with Full Bands definition on the fasces. Population: 30 in 67 Full Bands, 0 finer (2/13). NGC ID# 23J4, PCGS# 4977

- 3357 1930-S MS66+ Full Bands PCGS.** A few scattered marks are consistent with the grade of this brilliant and sharply defined Premium Gem. Both sides have frosty silver luster. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3358 1930-S MS66 Full Bands PCGS. CAC.** A frosty Premium Gem exhibiting brilliant silver surfaces, this splendid Mercury dime is highly appealing. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3359 1930-S MS66 Full Bands PCGS. CAC.** Fully white and thoroughly lustrous. The strike is complete aside from the tops of the LI in LIBERTY. A pristine Premium Gem with glimpses of prooflike surface near the portrait. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3360 1930-S MS66 Full Bands PCGS. CAC.** This stone-white high grade dime is well struck and has essentially immaculate fields. A wispy vertical graze near the profile is all that limits the grade. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3361 1930-S MS66 Full Bands PCGS. CAC.** A hint of gold toning appears on the brilliant and highly lustrous surfaces of this frosty Premium Gem. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3362 1930-S MS66 Full Bands PCGS. CAC.** This boldly defined Premium Gem 1930-S Mercury dime exhibits exceptional eye appeal, with frosty and brilliant silver luster. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3363 1930-S MS66 Full Bands PCGS. CAC.** An exceptional Premium Gem, this 1930-S dime is highly lustrous with frosty and untuned silver surfaces. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3364 1930-S MS66 Full Bands PCGS. CAC.** Both sides of this frosty Premium Gem have bold design motifs with brilliant silver luster. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

- 3365 1930-S MS66+ Full Bands PCGS. CAC.** This frosty Premium Gem has brilliant silver luster with bold design motifs and minimal surface marks. Population: 70 in 66 (2 in 66+) Full Bands, 11 finer (2/13). NGC ID# 23J6, PCGS# 4981

**1935 Mercury Dime, MS68 Full Bands
None Certified Finer**

- 3366 1935 MS68 Full Bands PCGS.** This incredible Mercury dime exhibits razor-sharp definition on all design elements and has been awarded the Full Bands designation by PCGS. The pristine brilliant surfaces show a few hints of gray and golden-tan toning, with no visible signs of contact. Vibrant mint luster adds to the tremendous eye appeal. Population: 10 in 68 Full Bands, 0 finer (1/13). NGC ID# 23JC, PCGS# 4993
- 3367 1936-D MS67 Full Bands PCGS.** A lovely Superb Gem, this Mercury dime exhibits brilliant satin luster at the central obverse inside a ring of gold and iridescent toning. The reverse has subdued luster with minimal golden splashes. PCGS has only certified nine finer Full Bands examples (2/13). NGC ID# 23JG, PCGS# 5001
- 3368 1939 MS67+ Full Bands PCGS. CAC.** This high-end Superb Gem is sharply detailed throughout and exhibits Full Bands definition on the fascies. Vibrant mint luster and attractive pale gold patina add to the considerable appeal. PCGS has graded six numerically finer examples (2/13). NGC ID# 23JR, PCGS# 5017
- 3369 1942/1 AU55 NGC. FS-101.** A briefly circulated representative of this famous *Guide Book* overdate. Unabraded and close to brilliant with luster obvious at the margins. The bands and curls exhibit minor wear. NGC ID# 23K4, PCGS# 5036
- 3370 1942-D MS68 Full Bands NGC.** Forest-green and autumn-brown freckles adorn the margins though the centers remain brilliant. Lustrous and immaculate with a bold strike. Certified in a prior generation holder. Census: 11 in 68 Full Bands, 0 finer (2/13). NGC ID# 23K5, PCGS# 5039

PROOF MERCURY DIMES

- 3371 1936 PR64 PCGS.** Jade-green, caramel-gold, and lilac-red toning graces much of the obverse, though the reverse remains brilliant. Fully struck and highly attractive despite a few wispy hairlines. The low mintage key of the brief proof run of the Mercury type. NGC ID# 27DG, PCGS# 5071
- 3372 1936 PR66 NGC.** A delightful Premium Gem from the first proof mintage in two decades, this coin is sharply detailed throughout, with deeply mirrored surfaces and a few hints of champagne-gold toning. NGC ID# 27DG, PCGS# 5071
- 3373 1942 PR68 NGC.** The borders have attractive rainbow patina, formed with bands of cobalt-blue, crimson, gold, and green color. The centers display milky-lavender gray patina. Well struck and seemingly perfect with outstanding eye appeal.
Ex: Central States Signature (Heritage, 5/2000), lot 7271; FUN Signature (Heritage, 1/2002), lot 6712; Central States Signature (Heritage, 4/2002), lot 5675. NGC ID# 27DN, PCGS# 5077

- 3374 1942 PR68 PCGS. CAC.** Dappled pastel lime-green, russet-gold, and plum-mauve tints encompass this coruscating and needle-sharp specimen. Evaluation beneath a loupe fails to yield imperfections. 1942 ended the seven-year run of proof set coinage, since the Mint was too busy during wartime for such luxuries. Population: 42 in 68 (1 in 68+), 0 finer (2/13). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIME

**1965 Roosevelt Dime, MS68 Full Bands
Single Finest Certified at PCGS**

- 3375 1965 MS68 Full Bands PCGS.** The U.S. Mint discontinued silver coinage on most issues in 1964 and began issuing Roosevelt dimes with a copper-nickel clad composition the following year. This magnificent MS68 Full Bands specimen has realistic claims to the title of 'Finest Known' and is certainly the single finest certified specimen at PCGS (2/13). The design elements show razor-sharp definition throughout and both sides radiate vibrant mint luster, with a few hints of pale gold toning. Eye appeal is tremendous and technical quality approaches perfection. NGC ID# 23M4, PCGS# 85130

PROOF ROOSEVELT DIME

No S 1983 Dime, PR70 Ultra Cameo
Tied with One Other as Finest Certified

- 3376** 1983 No S PR70 Ultra Cameo NGC. No S proof dimes were inadvertently issued in 1968, 1970, 1975, and 1983. The 1968 and (especially) 1975 varieties are very rare, but the 1970 and 1983 No S are collectible. However, in the ultimate grade, the 1983 No S is as rare as any Roosevelt dime. Immaculate and brilliant with thick frost throughout the motifs. Census: 2 in 70 Ultra Cameo (2/13). NGC ID# 27FJ, PCGS# 95265

TWENTY CENT PIECES

- 3377** 1875-CC AU58 NGC. Dusky steel-gray and caramel-gold embrace this satiny and minimally abraded near-Mint example. The reverse has a few small carbon spots. A requisite issue for Carson City type collectors. NGC ID# 23R6, PCGS# 5297

1875-CC Twenty Cent Piece, MS62
Only Collectible CC Issue

- 3378** 1875-CC MS62 PCGS. This only-collectible-CC-Mint twenty cent piece is better struck than most, with strong definition on Liberty's head and the top of the eagle's wing. The lustrous surfaces are partially subdued by deep gray-rose toning that covers each side. There are no obvious or detracting abrasions on either side. NGC ID# 23R6, PCGS# 5297

Multicolor Gem 1875-S Twenty Cent
FS-302, Repunched Mintmark

- 3379** 1875-S MS65 PCGS. FS-302. This *Cherrypickers'* variety is sometimes called the "dollar sign variety" due to the double set of serifs on the repunched mintmark. The top of a date digit, perhaps a 5, is embedded in the dentils beneath the 7 in the date, one of several misplaced date varieties for this type issue. A lustrous and well struck Gem with lovely orange-red and navy-blue toning. NGC ID# 23R7, PCGS# 5298

Fully Struck Near-Gem 1876 Twenty Cent

- 3380** 1876 MS64 NGC. The plentiful 1875-S diverts the type collectors, but specialists of the series know that the 1876 has a vastly lower mintage and provides better value. This fully struck Choice representative provides exemplary preservation and medium rose-gold and olive-green toning. NGC ID# 23R8, PCGS# 5299

1876 Twenty Cent Piece, MS65

- 3381** 1876 MS65 NGC. This impressive Gem features ivory surfaces with satiny silver luster. The obverse has visible field reflectivity while the reverse field is fully mirrored. The top of the left wing and the eagle's head lack detail, while the remaining design elements are bold. Census: 38 in 65, 19 finer (2/13). NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

1876 Twenty Cent, PR65
Underrated Issue

- 3382 1876 PR65 PCGS.** The Centennial proof twenty-cent piece had a proof mintage of 1,260 coins, less than half that of the 1875, but typically brings a similar price as the 1875, suggesting that it is underrated. A lovely Gem, this specimen has mottled original iridescence over fully mirrored fields with underlying cameo contrast. Population: 24 in 65, 10 finer (2/13). NGC ID# 27H3, PCGS# 5304

1878 Twenty Cent Piece, PR61
Only 600 Pieces Struck

- 3383 1878 PR61 NGC.** Like most examples seen, this 1878 proof twenty cent piece is sharply detailed on the obverse, but the reverse shows some incomplete detail due to die lapping. Attractive shades of lavender and champagne-gold toning enhance the visual appeal of the deeply mirrored fields. The twenty cent piece was only produced in proof format in 1878, with a small mintage of 600 pieces. NGC ID# 27H5, PCGS# 5306

1878 Twenty Cent Piece, PR62
Light Cameo Contrast

- 3384 1878 PR62 PCGS.** The final issue of the short-lived 20-cent piece, coined only in proof format, with a total production of just 600 coins. Perhaps half that number survive today, including this Select proof that exhibits brilliant silver surfaces and a solitary splash of toning on the reverse border. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

1796 B-1 Quarter, Fine 15
Scarcer of Two Varieties

- 3385 1796 Fine 15 PCGS. B-1, R.4.** The scarcer variety with the 6 approximately centered between the drapery and border, and with the highest hair wave centered below the upright of the E in LIBERTY. The other variety, seen about twice as often, has the top of the 6 appearing to touch the drapery, and the highest hair wave right of center below the E. This Choice Fine specimen is extremely pleasing, with light pewter-gray devices, and deeper bluish-gray patina in the fields. An important opportunity is offered to specialized collectors of the early quarters. NGC ID# 23RA, PCGS# 5310

- 3386 1805 VF30 PCGS. B-3, R.1.** Tompkins Die State 5/2. Deep dove-gray and golden-brown patina encompasses this problem-free midgrade quarter. Wear is obvious on the portrait but the shield lines are sharp. A conditionally challenging type. NGC ID# 23RC, PCGS# 5313

Patinated AU55 1806 Quarter, B-9

- 3387 1806 AU55 NGC. B-9, R.1.** Tompkins Die State 2/2. Sea-green and tan-brown alternate across this better grade Draped Bust type coin. One thin diagonal mark beneath the chin, but otherwise unabraded. The centers lack an incomplete impression, usual for the variety, but the wing and feather detail is bold. NGC ID# 23RD, PCGS# 5314

BUST QUARTERS

- 3388 1822 XF40 NGC. B-1, R.2.** One of only two 1822 Browning varieties. The other, B-2, has a blundered denomination, and thus B-1 receives its own *Guide Book* listing. This medium gray representative has pleasing sharpness on the eagle. A lens reveals wispy obverse field marks. NGC ID# 23RN, PCGS# 5332

1831 Capped Bust Quarter, MS65 Reduced Diameter, B-2 Variety

- 3389 1831 Small Letters MS65 PCGS. CAC. B-2, R.2.** Close collar technology was used on the quarter denomination for the first time in 1831. The size of the planchet was modified, with the diameter reduced and the thickness increased to maintain the standard weight. The scroll with the motto E PLURIBUS UNUM was removed and some minor stylistic design changes were implemented. A large mintage of 398,000 pieces was accomplished, with seven die varieties known for the date. This coin represents the B-2 variety, with the small flat base 2 in the denomination and star 13 distant from the curl. The B-2 variety is readily available in lower grades, but examples in Gem condition are rare.

This delightful Gem displays well-detailed design elements, with just the usual touch of softness on the denomination. The lustrous surfaces are blanketed in attractive shades of lavender-gray and golden-brown toning. Vibrant mint luster shines through the patina. Population: 16 in 65 (1 in 65+), 4 finer (2/13). NGC ID# 23RW, PCGS# 5348

- 3390 1834 AU58 PCGS. B-2, R.4.** A much scarcer Browning variety identified by a repunched star 7 and a defect at the base of the C in 25 C. This intricately struck near-Mint example has ample mint flash. The steel-blue and almond-gold surfaces display only faint hairlines. NGC ID# 23RZ, PCGS# 5353

- 3391 1838 AU55 PCGS. B-1, R.1.** A trace of golden-gray toning visits the borders of this otherwise brilliant Choice AU example. No marks are noticeable and luster brightens design elements. The end of the line for the Bust quarter, as its turn came to be replaced by the Seated type. NGC ID# 23S5, PCGS# 5357

SEATED QUARTERS

- 3392 1840-O No Drapery AU53 NGC. Large O.** Iridescent orange-gold, powder-blue, and lilac toning dominates this typically struck but lightly worn first-year New Orleans quarter. Scarcer than its 1840-O Drapery successor despite a suspiciously higher mintage. NGC ID# 23SG, PCGS# 5393

- 3393 1840-O No Drapery AU55 PCGS. CAC. Large O.** An untuned and well defined early New Orleans quarter with noticeable luster and only a few faint field marks. Very scarce in better circulated grades. Population: 8 in 55, 31 finer (2/13). NGC ID# 23SG, PCGS# 5393

- 3394 1842 Large Date AU53 PCGS.** Deep violet and blue toning appears on pewter-gray surfaces with satin luster still evident in the fields. This pleasing example has excellent design definition and trivial marks. Population: 2 in 53, 19 finer (2/13). NGC ID# 23SM, PCGS# 5401

1842-O Seated Liberty Quarter, VF30 Elusive Small Date Variant

- 3395 1842-O Small Date VF30 PCGS.** Briggs Die State 1-A. The 1842-O Seated Liberty quarter is a scarce-to-rare issue in all grades, with an unrecorded mintage included in the 769,000 piece production total for the year. This attractive VF30 specimen represents the rare die state with a depression on the eagle's neck and shield that is only seen on about 10% of the Small Date coins. A pleasing patina of sea-green and bluish-gray hues blankets the lightly abraded surfaces. Population: 6 in 30, 10 finer (2/13). NGC ID# 23SN, PCGS# 5403

- 3396 1853/4 Arrows and Rays AU50 PCGS. FS-301.** A lightly circulated dove-gray example of this popular and conditionally scarce overdate. Smooth save for a small strike-through (as coined) on the right obverse field. A single year type. Population: 4 in 50, 21 finer (2/13).

Ex: Atlanta Signature (Heritage, 4/2006), lot 7601, which realized \$488.75. NGC ID# 23U4, PCGS# 5427

- 3397 1854 Arrows MS63 PCGS. CAC.** The light golden-gray toning cedes to olive-green tints near the rims. A sharply struck and coruscating Select quarter that lacks any consequential marks. A popular two-year design subtype. NGC ID# 23U6, PCGS# 5432

- 3398 1854 Arrows MS64 NGC.** Blues, lavenders, and golds are prominent over each side of this dappled near-Gem. Light reed marks and scrapes appear in the fields, though planchet striations on the center-right obverse should not be mistaken for damage. Census: 72 in 64, 24 finer (2/13). NGC ID# 23U6, PCGS# 5432

- 3399 1854-O Huge O — Cleaning — PCGS Genuine. VF Details. Briggs 1-A, FS-501.** Very scarce in all grades, the Huge O variety is popular due to its crude, thick, and high relief mintmark. A mildly bright example with a narrow granular area between the knees and star 11. NGC ID# 23U7, PCGS# 5434

Richly Toned Gem 1857 Quarter

- 3400 1857 MS65 PCGS. CAC.** Peach patina of varying intensity is prominent on this pre-Civil War Gem. The color approaches sage at the right obverse border. Despite a degree of all-around striking softness, which is most visible on the obverse stars and the eagle's neck, the coin has great all-around eye appeal. Population: 42 in 65 (1 in 65+), 39 finer (2/13). NGC ID# 23TE, PCGS# 5442

**Superb Gem 1857 Seated Liberty Quarter
One Numerically Finer at NGC**

- 3401 1857 MS67 NGC.** Attractive shades of golden-brown and violet toning blanket the well-preserved surfaces of this spectacular Superb Gem, with most of the color at the peripheries. The design elements are sharply detailed throughout and vibrant mint luster shines through the patina. Census: 19 in 67 (1 in 67+), 1 finer (2/13). NGC ID# 23TE, PCGS# 5442

**1858-S Seated Quarter, XF40
Rare in Higher Grades**

- 3402 1858-S XF40 PCGS.** Seated Liberty quarters were not a big priority at the San Francisco Mint in the years before the Civil War, and a typically small mintage of 121,000 pieces was accomplished in 1858. This attractive XF example retains most of its original design detail, with no large or distracting surface marks, and pleasing dove-gray patina. Population: 12 in 40, 13 finer (2/13). NGC ID# 23TK, PCGS# 5447

**1860-S Seated Liberty Quarter, VF30
Low Mintage, Low Survival Rate**

- 3403 1860-S VF30 PCGS.** Only 56,000 Seated Liberty quarters were struck at the San Francisco Mint in 1860, and it is unlikely that any were saved for numismatic purposes. Most coins seen today are in the Good to Fine grade range, and many survivors display significant problems. This attractive VF30 example retains much of its original design detail and is lightly abraded for the grade, with attractive champagne toning on both sides. Population: 5 in 30, 5 finer (2/13). NGC ID# 23TS, PCGS# 5453
- 3404 1863 MS62 PCGS.** Unlike other silver denominations during the Civil War, the Philadelphia Mint produced a substantial number of quarter dollars in 1863. While 191,600 pieces were minted, survivors remain rare due to hoarding and melting activities at an uncertain time. This satiny Mint State piece has pale lilac and iridescent toning over full mint luster with scattered marks expected for the grade. Population: 5 in 62, 43 finer (2/13). NGC ID# 23TX, PCGS# 5458
- 3405 1869 VF35 PCGS.** Quarter dollar mintages were low in 1869, including just 16,000 in Philadelphia and 76,000 in San Francisco. The perfect obverse die and high date that is slightly above center are both characteristics of the scarce Philadelphia Mint quarter. This piece has light gray surfaces with splashes of blue and iridescent toning. Population: 3 in 35, 22 finer (2/13). NGC ID# 23UH, PCGS# 5474
- 3406 1869-S XF45 PCGS.** A diagonal die line in the lower loop of the mintmark identifies this reverse as the same die that was also used in 1866 and 1867, but not in 1868. This lovely Choice XF has pleasing surfaces that show only trivial marks expected for the grade. Both sides are light gray with hints of gold toning. A lovely example for the advanced collector. Population: 9 in 45, 12 finer (2/13). NGC ID# 23UJ, PCGS# 5475
- 3407 1872-S Good 6 PCGS.** The Seated quarter series has many semi-key and key-date issues, such as the 1872-S that is scarce in all grades. This lovely example has natural pewter-gray surfaces with hints of toning. Some would grade this piece VG as the obverse shield shows five letters in LIBERTY. NGC ID# 23UT, PCGS# 5483
- 3408 1876-S MS64 PCGS. CAC.** Type Two Reverse. Dappled autumn-gold and stone-gray toning encompasses this lustrous and well struck Seated type coin. Only delicate obverse field grazes deny an even finer grade. NGC ID# 23V4, PCGS# 5503

3409 1878-S XF40 PCGS. While the 1878-S half dollar is a famous rarity, the quarter dollar is a scarce issue as well. This lightly worn specimen has pewter gray surfaces with mottled iridescent toning. The pleasing surfaces show trivial, grade-consistent handling marks. Population: 3 in 40, 25 finer (2/13). NGC ID# 23VA, PCGS# 5510

**1878-S Quarter, MS65
Softly Frosted and Extraordinarily Clean**

3410 1878-S MS65 PCGS. The 1878-S Seated quarter was struck to the extent of 140,000 coins, a meager total when one stops to consider that San Francisco in that same year struck nearly 10 million 1878-S Morgan dollars and more than 4 million Trade dollars. Most survivors of the issue are well-circulated today. This Gem is the only one in this grade at PCGS, although there are two submissions in MS66 — possibly the same coin (2/13). This is a coin of remarkable aesthetic and technical appeal, a frosty silver-white piece, well-struck throughout and essentially mark-free. NGC ID# 23VA, PCGS# 5510

**1879 Quarter Dollar, MS67+
Conditionally Elusive**

3411 1879 MS67+ PCGS. Microscopic doubling appears on a few reverse letters on this amazing Superb Gem quarter. As the Philadelphia Mint ramped up Morgan dollar production, mintages of smaller silver denominations dwindled, with only 13,600 circulation strike quarters produced in 1879. Superb Gem survivors from that production are quite rare. This piece exhibits full satin brilliance with pristine surfaces, bold design motifs, and delicate gold toning. Population: 22 in 67 (1 in 67+), 2 finer (2/13). NGC ID# 23VB, PCGS# 5511

3412 1880 MS64 PCGS. A lovely Choice Mint State specimen, this elusive quarter has lightly mirrored fields around satin devices with no evidence of toning on either side. NGC ID# 23VC, PCGS# 5512

**1888-S Seated Liberty Quarter, MS66
Extremely Rare in Higher Grades**

3413 1888-S MS66 NGC. CAC. Attractive shades of cerulean-blue, greenish-gold, and lavender-gray toning enliven the well-preserved surfaces of this spectacular Premium Gem. The design elements are well-detailed and vibrant mint luster shines through the patina. The 1888-S is seldom encountered in Premium Gem condition. Census: 6 in 66, 2 finer (1/13). NGC ID# 23VN, PCGS# 5521

**Final-Year 1891 Seated Quarter
Faintly Toned Premium Gem**

3414 1891 MS66 PCGS. After more than half a century, the Liberty Seated design concluded with the dime, quarter, and half dollar issues of 1891. This Premium Gem from the middle denomination has swirling luster and hints of pink patina at the margins. A touch of frost appears on the high points of the devices. Population: 24 in 66 (1 in 66+), 3 finer (2/13). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

1863 Seated Liberty Quarter, PR66 Vivid Multicolor Toning

- 3415 1863 PR66 NGC.** Only 460 proof Seated Liberty quarters were struck in 1863, with the mintage being limited by the financial and social upheaval of the Civil War. This well-detailed Premium Gem displays deeply mirrored fields, under dark shades of golden-brown and cobalt-blue toning. Census: 10 in 66, 1 finer (2/13). NGC ID# 23WR, PCGS# 5559

- 3416 1869 PR64 Cameo PCGS.** Frosty devices and darkly reflective fields confirm the Cameo status of this fully struck Reconstruction-era proof. Blushes of straw-gold toning preclude brilliance. The shield and LIBERTY are lightly die doubled. Population: 11 in 64 (1 in 64+) Cameo, 6 finer (2/13). PCGS# 85568

PR67+ ★ 1882 Quarter Double-Sided Concentric Toning

- 3417 1882 PR67+ ★ NGC. CAC.** Both sides display remarkable toning, perhaps from long-term storage within a Kraft envelope. Apple-green, cherry-red, and lemon-gold alternate in concentric bands across both sides. The strike is unimprovable, and study beneath a loupe fails to locate any imperfections. NGC ID# 23XE, PCGS# 5583

Fully Struck 1884 Quarter, PR66 Cameo

- 3418 1884 PR66 Cameo PCGS.** Generous field-device contrast is the hallmark of this Premium Gem proof 1884 Seated quarter, one of the finest survivors of the production of 875 proofs. Only 8,000 circulation strikes were made of the 1884 quarter, exerting upward price pressure on proofs. Ample silver-on-black contrast complements the trace of pinkish patina more perceptible on the reverse of this fully struck proof. Population: 9 in 66 (1 in 66+) Cameo, 5 finer (2/13). PCGS# 85585

1886 Quarter, PR66 Hidden Cameo Contrast

- 3419 1886 PR66 PCGS.** Wisps of pale yellow and gunmetal-blue toning appear on both sides of this lovely golden-brown Premium Gem proof. Deeply mirrored fields surround the lustrous and sharply detailed devices with underlying cameo contrast. Population: 28 in 66, 7 finer (2/13). NGC ID# 23XJ, PCGS# 5587

1890 Quarter, PR66 Cameo Rim Toned, Deeply Mirrored

- 3420 1890 PR66 Cameo NGC.** An eye-catching Cameo from late in the proof Seated quarter series. Blue and violet toning over the mirrors stops at the devices, which are frosted silver-white. Scattered light hairlines contribute to the grade. Census: 10 in 66 (1 in 66+) Cameo, 17 finer (2/13). PCGS# 85591

BARBER QUARTERS

- 3421 1892 MS65 PCGS. CAC.** Type One Reverse. Attractive russet-brown, ocean-blue, lemon-gold, and ruby-red embrace both sides of this lustrous and intricately struck Gem. The reverse exhibits minor die doubling, perhaps most evident on the I in UNITED. NGC ID# 23XT, PCGS# 5601

- 3422 1894-S MS64 PCGS. CAC.** The smooth and coruscating surfaces of this well struck early San Francisco Barber quarter are patinated in rich lavender-gray and forest-green shades. Population: 50 in 64 (1 in 64+), 20 finer (2/13). NGC ID# 23Y3, PCGS# 5609

- 3423 1894-S MS65 PCGS.** Splashes of orange-red, mahogany, lavender, and blue-green dominate the obverse. The reverse displays similar shades but their extent is primarily limited to the lower right. An excellent value relative to the few graded finer. Population: 15 in 65, 5 finer (2/13). NGC ID# 23Y3, PCGS# 5609

- 3424 1896-S Good 6 PCGS.** Blue-gray and gold-gray are the main hues on this well-worn key-date quarter, though a dot of mustard-crimson appears at the left reverse. The portrait shows the Y and a corner of the T in LIBERTY. NGC ID# 23Y9, PCGS# 5615

Multicolor Gem 1897-S Quarter

- 3425 1897-S MS65 NGC.** The 1897-S is a better date in all grades. A majority of PCGS-graded examples are in AG3 to Good 6 holders, but this is a precisely struck, lustrous, and mark-free Gem. Both sides are patinated in mottled plum-red, navy-blue, and peach-gold shades. Housed in a former generation holder. Census: 8 in 65, 4 finer (2/13).
Ex: Glenn J. Church Collection (*Heritage*, 1/2001), lot 6949. NGC ID# 23YC, PCGS# 5618

- 3426 1908 MS65 PCGS.** Wheat-gold and gunmetal-blue grace most of this lustrous Gem, though the obverse periphery is dark russet-brown. Fully struck and smooth. Population: 30 in 65, 21 finer (2/13). NGC ID# 23ZC, PCGS# 5649

- 3427 1911-S MS64 PCGS. CAC.** Light peach tints visit pale pearl-gray surfaces on this luminous S-mint near-Gem. Slight striking softness is as usual for this issue of just under a million pieces. NGC ID# 23ZR, PCGS# 5661

- 3428 1916-D MS65 PCGS. CAC.** A stone-white Gem that boasts vibrant luster and a nearly pristine appearance. The strike is sharp and the reverse periphery exhibits a number of spindly die cracks. NGC ID# 2426, PCGS# 5674

- 3429 1916-D MS65 PCGS. CAC.** The mostly brilliant surfaces of this well-detailed Gem exhibit vibrant satiny mint luster, with a few hints of golden-tan toning. The 1916-D is especially popular with mintmark type collectors, as the last issue of the design. Housed in a green label holder. NGC ID# 2426, PCGS# 5674

- 3430 1916-D MS66 PCGS. CAC.** Eye-catching luster is the greatest asset of this final-year Denver Barber quarter. The obverse has peach-to-gold interior toning and blue borders, while the reverse has similar hues dotting the margins but a largely silver center that is softly struck but brims with luster. NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

- 3431 1892 PR64 PCGS.** Type Two Reverse. Dusky powder-blue, sea-green, and steel-gray shades embrace this fully struck and unblemished Choice proof type coin. An affordable yet high quality specimen. NGC ID# 2427, PCGS# 5678

1893 Barber Quarter, Magnificent PR69 Deeply Mirrored, Attractively Toned

- 3432 1893 PR69 NGC.** Even though collector interest had substantially diminished by 1893 to the point that “only” 792 proofs were produced, a substantial percentage of that original mintage was set aside by collectors of the day. So many in fact, that certified proofs of this date now represent approximately 75% of the mintage (minus an uncertain number of resubmissions). So, it should come as no surprise that there might be a coin or two of this date that have been preserved in near-perfect condition. This is a truly breathtaking coin. As stated, the surfaces are nearly perfect. Additionally, however, the fields show illimitable depth of mirrored reflectivity that serve to lighten and brighten the rich multicolored toning on each side. Deep sea-green toning is seen over most of each side with a slight but visually interesting accent of rose coloration scattered around the margins. The devices on each side appear to have a significant amount of mint frost, perhaps enough to warrant a Cameo designation, but in fairness to the grading services this is not immediately apparent; in fact, it is not even the second or third item of visual interest when one views this magnificent coin. Census: 1 in 69, (1 in 69 ★), 0 finer (2/13).
Ex: Central States Signature (*Heritage*, 5/2004), lot 7041. NGC ID# 2428, PCGS# 5679

**Superb Gem Proof 1894 Barber Quarter
Dramatic Multicolor Toning**

- 3433 1894 PR67 NGC.** A generous mintage of 972 proof Barber quarters was accomplished in 1894, making the date a popular one for type purposes. This spectacular Superb Gem is toned in shades of emerald-green, violet-blue, and gray, with deeply mirrored fields shining through the toning. The design elements are sharply detailed throughout. Census: 23 in 67, 4 finer (2/13). NGC ID# 2429, PCGS# 5680

- 3434 1895 PR66 NGC.** Broadly toned-over blue, green, and violet with a window of silver on Liberty's cheek, ear, and middle-crown. Underlying reflectivity is strong on this well-preserved Premium Gem. Census: 31 in 66, 29 finer (2/13). NGC ID# 242A, PCGS# 5681

**1905 Barber Quarter, PR67 Cameo
Rare Contrasted Proof**

- 3435 1905 PR67 Cameo PCGS.** Contrasting proofs from the first few years of the 20th century, including Cameo and Deep Cameo pieces, are rarely encountered. The obverse of this Superb Gem shows nearly full silver brilliance with a crescent of cobalt-blue toning to the left and above, while the reverse has light iridescent toning over more than half its surface. Population: 4 in 67, 0 finer (2/13). PCGS# 85691

Colorful Superb Gem Proof 1909 Quarter

- 3436 1909 PR67 PCGS.** This virtually unmarked Superb Gem proof 1909 quarter displays a melange of colors ranging from pink to gold and jade. The strike is full save for the usual area at the right reverse shield corner, and one only tiny mark on Liberty's cheek possible precludes an even finer grade. Population: 15 in 67, 3 finer (2/13). NGC ID# 242R, PCGS# 5695

**Cameo PR66 1909 Quarter
Clear Contrast**

- 3437 1909 PR66 Cameo PCGS Secure.** Both sides are appreciably contrasted, the reverse more so, with only a hint of golden patina against otherwise silver-white surfaces. The cameo effect is far less common on post-1901 Barber quarters than their predecessors, and this Premium Gem Cameo coin is a rarity as such. Population: 13 in 66 Cameo, 4 finer (2/13). PCGS# 85695

**Deeply Contrasted 1910 Quarter
PR67 Cameo**

- 3438 1910 PR67 Cameo PCGS. CAC.** The obverse of this Superb Gem proof 1910 Barber quarter shows just the slightest hint of pinkish patina around the margins, while the remainder of the coin (almost all of it) is untuned. Both sides show much field-device contrast, jet-black, reflective fields against ice-white devices, a coin that verges on a Deep Cameo designation. An excellent representative for type or date purposes. Population: 6 in 67 Cameo, 3 finer (2/13). PCGS# 85696

**1911 Quarter, PR67 Deep Cameo
Third Lowest Proof Mintage**

- 3439 1911 PR67 Deep Cameo PCGS.** This stunning Superb Gem has amazing Deep Cameo contrast on both sides. Delicate champagne toning is barely visible on the brilliant silver surfaces. At just 543 proofs, this issue had the third lowest proof production of any Barber quarter, and Deep Cameo survivors are rare. Population: 2 in 67 (1 in 67+), 1 finer (2/13). PCGS# 95697

**Cameo PR66 1912 Quarter
Solid Contrast**

3440 1912 PR66 Cameo PCGS. CAC. An unusual post-1901 contrasted Barber quarter with a cameo effect that persists through partial green-gold and blue toning. Underlying reflectivity in the fields is excellent, as is the preservation. All-in-all, a 1912 specimen that looks as if it were struck 20 years earlier. Population: 8 in 66 Cameo, 5 finer (2/13). PCGS# 85698

3441 1913 PR64 PCGS. Deep butter-gold shades fill the fields and devices while the margins provide fire-red and gunmetal-blue patina. Boldly struck and flashy with undeniable eye appeal.
Ex: Philip G. Straus Collection (Stack's, 5/1959), lot 1804; Teich Family Collection (Stack's-Bowers, 11/2011), lot 5276, which realized \$1,495. NGC ID# 242V, PCGS# 5699

**PR66+ Cameo 1914 Quarter
Lowest Proof Mintage of Type**

3442 1914 PR66+ Cameo PCGS. CAC. Proof mintages of the Barber types generally declined throughout the series, and reached their nadir in 1914. Only 380 proofs were struck that year, the lowest quantity since 1858. The present stone-white Premium Gem features icy motifs and glassy fields. No Deep or Ultra Cameos have been certified. Population: 9 in 66 (2 in 66+) Cameo, 3 finer (2/13). PCGS# 85700

**1915 Barber Quarter, PR67
Second Lowest Proof Mintage**

3443 1915 PR67 PCGS. CAC. The 1915 proof Barber quarter was struck in the amount of 450 proofs, not the absolute lowest of the series but much lower than most, an indication of waning collector interest in the long-lived Charles Barber design. This Superb Gem proof offers delicate gold and iridescent toning enveloping the obverse, contrasting with pale blue and iridescent toning over the reverse. The light contrast is insufficient for a Cameo designation, but this splendid example of the final proof Barber quarter issue is highly appealing. Population: 10 in 67, 2 finer (2/13).
Ex: New York Signature (Heritage, 12/2011), lot 3538, which brought \$13,800; Philadelphia Signature (Heritage, 8/2012), lot 5127, which brought \$11,750. NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

Rare 1916 Standing Liberty Quarter VF Sharpness

3444 1916 — Graffiti — PCGS Genuine. VF Details. A collector celebrated the circulation find of the key date 1916 Standing Liberty quarter by lightly pinscratching "9/8/17", presumably representing the day of discovery, on the lower right quadrant of each side. This coin also has a small rim ding on the reverse at 7 o'clock, and a minor pinscratch near the tip of the front wing. Toned deep cream-gray with peripheral freckles of tan and navy-blue. NGC ID# 242Y, PCGS# 5704

3445 1917 Type One MS66 Full Head PCGS. CAC. Satin-gray, peach, and crimson toning of varying intensity drapes this Type One Standing Liberty quarter. An elegant Premium Gem for the type enthusiast who prefers patina. NGC ID# 242Z, PCGS# 5707

3446 1917 Type One MS66 Full Head PCGS. CAC. A Premium Gem example of the popular type issue with gold-orange and rose-umber toning around much of the margins that extends almost to the central devices in places. Quality all-around detail goes beyond the Full Head. NGC ID# 242Z, PCGS# 5707

1917 Type One Quarter, MS67 Full Head Tied for Finest Certified

3447 1917 Type One MS67 Full Head PCGS. CAC. This lovely Superb Gem exhibits bold design elements as usual for the issue. However, the eye appeal and quality is atypical, and this example exhibits brilliant and frosty silver luster with pristine surfaces. A remarkable specimen for a specialized collection or type set. Population: 68 in 67 (4 in 67+) Full Head, 0 finer (2/13). NGC ID# 242Z, PCGS# 5707

1917-S Quarter, MS66 Full Head Popular Type One Example

3448 1917-S Type One MS66 Full Head PCGS. A spectacular Premium Gem from the second year of this popular two-year design type, this coin is sharply detailed throughout, with Full Head details and vibrant mint luster. A few wisps of pale gold toning accent the well-preserved surfaces. Population: 70 in 66 (2 in 66+) Full Head, 9 finer (2/13). NGC ID# 2433, PCGS# 5711

1920-S Standing Liberty Quarter Lustrous Premium Gem

3449 1920-S MS66 PCGS. CAC. The well-detailed design elements of this delightful Premium Gem fall just short of Full Head definition, and some rivets on the shield are lightly impressed, but the strike is well above average. Vibrant mint luster adds to the outstanding visual appeal. Population: 15 in 66, 3 finer (2/13). NGC ID# 243G, PCGS# 5738

1921 Quarter, MS66 Tied For Finest at PCGS An Important Key Issue

3450 1921 MS66 PCGS. An impressive and fully original Premium Gem, this frosty Mint State specimen has brilliant silver luster with splashes of iridescent toning on each side. The 1921 is a key date in the Standing Liberty quarter dollar series. Population: 20 in 66, 0 finer (2/13). NGC ID# 243H, PCGS# 5740

3451 1923-S VF25 NGC. A midrange example of this popular lower-mintage issue, one of just 1.36 million pieces struck. The date is largely worn away, common on pre-1925 Standing Liberty quarters, but the 3 confirms the date — 1923 was the only year ending with that digit in the Standing Liberty quarter series — and the mintmark is bold. NGC ID# 243K, PCGS# 5744

3452 1923-S XF40 PCGS. A stone-gray representative with hints of darker russet toning in design recesses. Visible marks are absent, and ample design detail remains. A lower mintage and little-saved semikey. NGC ID# 243K, PCGS# 5744

Gem 1924-S Standing Liberty Quarter Full Head Details

3453 1924-S MS65 Full Head PCGS. This delightful Gem displays Full Head details, with only a few shield rivets lacking complete definition. Especially vibrant mint luster radiates from both sides, adding to the considerable eye appeal. No mentionable flaws are noted. Population: 31 in 65 Full Head, 10 finer (2/13). NGC ID# 243N, PCGS# 5751

3454 1927-D MS64 Full Head PCGS. CAC. Though overshadowed by its San Francisco cousin, the 1927-D is scarce in all grades relative to its common date successors. This untoned near-Gem exhibits potent luster and only minor imperfections. NGC ID# 243V, PCGS# 5763

3455 1928 MS65 Full Head PCGS. CAC. Deep crimson dots appear at the upper obverse and lower reverse margins. The rest of the piece is light pearl-gray with suggestions of blue and gold. This coin is well-defined on the shield as well as Liberty's head. NGC ID# 243X, PCGS# 5767

3456 1928-S MS66 Full Head PCGS. Especially vibrant mint luster and terrific eye appeal are the calling cards of this delightful Premium gem. The design elements are well-detailed, with Full Head definition, and the pristine surfaces are brilliant and untuned. NGC ID# 243Z, PCGS# 5771

1930 Quarter, MS66 Full Head Ideal Final-Year Type Coin

3457 1930 MS66 Full Head PCGS Secure. CAC. An attractive Premium Gem from the last year of the design, this issue is always in demand for type purposes. The design elements are well-defined, with Full Head details and only minor incompleteness on the shield rivets. Vibrant mint luster shines through spotty green and pale lavender toning. NGC ID# 2445, PCGS# 5779

3458 1930-S MS66 Full Head PCGS. CAC. Vibrant mint luster shines through attractive shades of pale pink toning on this well-detailed Premium Gem. Full definition is evident on Liberty's head, but a few shield rivets are incomplete. Population: 86 in 66 (1 in 66+) Full Head, 19 finer (2/13). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

3459 1932-D MS61 NGC. Lustrous silver-gray with a skiff of gold. Overall detail is quality. Though Washington's face has several light abrasions, a few close to pinscratch territory, the arm's-length eye appeal is solid. NGC ID# 2448, PCGS# 5791

3460 1932-D MS62 PCGS. An attractive example of this first-year key, with sharply detailed design elements and bright mint luster. Accents of sea-green toning are evident on both sides and a few minor contact marks on Washington's cheek explain the grade. NGC ID# 2448, PCGS# 5791

3461 1932-D MS64 PCGS. This elusive, key issue had only 436,800 pieces produced, and very few were set aside at the time of issue, making this a condition rarity as well as an absolute rarity. This is an original coin that has pleasing satiny luster and a fully brilliant appearance. A couple of small milling marks are seen on the obverse that limit the grade.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 6707. NGC ID# 2448, PCGS# 5791

3462 1932-D MS64 PCGS. This key issue features bold luster radiating from the untuned, silver-white surfaces that have just a glimmer of copper-gold color. The die polish near the date on this example is a diagnostic for one genuine D-mint die, as is the mintmark's squared serifs and its appearance of resting in a small depression. A few small abrasions on Washington's cheek and neck are noted, but they are undistracting.
Ex: Denver Signature (Heritage, 8/2006), lot 1355. NGC ID# 2448, PCGS# 5791

1932-D Quarter, MS64+ Key First-Year Issue

3463 1932-D MS64+ PCGS. CAC. This splendid near-Gem exhibits dusky gold toning splashes over frosty silver luster with bold design definition throughout. This piece is entirely original and highly attractive, a wonderful representative of the key first-year issue. PCGS has only certified 64 finer examples (2/13). NGC ID# 2448, PCGS# 5791

3464 1932-S MS64 PCGS. The light golden patina across each side is more insistent and has tinges of apricot on the reverse. Well-defined overall with a single abrasion on Washington's forehead the main obstacle to a Gem grade. NGC ID# 2449, PCGS# 5792

3465 1932-S MS64 PCGS. Light satin-silver across much of the obverse with areas of opaque reddish-gray at the upper-left obverse and the left reverse. A pleasing near-Gem example of this first-year key. NGC ID# 2449, PCGS# 5792

3466 1932-S MS64 PCGS. A boldly struck and satiny near-Gem that has a bit of mottled golden-russet patina. The lowest mintage business strike issue of this increasingly popular series. NGC ID# 2449, PCGS# 5792

**1932-S Quarter Dollar, MS65
The San Francisco Key**

- 3467 1932-S MS65 PCGS.** The San Francisco Mint key to the Washington quarter series, struck at the height of the Great Depression. These pieces were intended as commemoratives, but were struck at a time when few could even afford to keep a single quarter. The mintage was limited and the survival rate was low. This Gem is fully brilliant with frosty silver luster. NGC ID# 2449, PCGS# 5792

**Gem 1932-S Washington Quarter
Only Four Numerically Finer Coins at PCGS**

- 3468 1932-S MS65 PCGS. CAC.** An impressive Gem representative of this important first-year key, with well-detailed design elements and vibrant mint luster. A few hints of sea-green toning visit the well-preserved surfaces. Although not quite as rare as its Denver Mint counterpart in high grade, the 1932-S claims the lowest mintage of the series. PCGS has graded only four numerically finer coins (2/13). NGC ID# 2449, PCGS# 5792

- 3469 1934 Doubled Die Obverse MS63 PCGS. FS-101.** IN GOD WE TRUST exhibits a blatant spread to the southeast. The date and LIBERTY have thick letters. A *Guide Book* variety, and very scarce in Uncirculated grades relative to the number of Washington quarter collectors. One small obverse dab of multicolor toning at 3 o'clock. Population: 16 in 63, 55 finer (2/13). PCGS# 5795

- 3470 1934-D Medium Motto MS66 PCGS.** Ex: Patrick Mullen Collection. Both Medium and Heavy Motto varieties are known for this low mintage Denver issue. This lustrous Premium Gem displays light to medium caramel-gold toning. The major devices are well struck. Ex: *Orlando FUN Signature* (Heritage, 1/2004), lot 6329, which realized \$4,830. NGC ID# 244C, PCGS# 5796

- 3471 1934-D Medium Motto MS66 PCGS. CAC.** Honey-gold and aquamarine tints ensure the originality of this lustrous and sharply impressed Premium Gem. Essentially immaculate and an excellent value relative to the few graded finer. Population: 80 in 66 (3 in 66+), 4 finer (2/13). NGC ID# 244C, PCGS# 5796

- 3472 1935-D MS66+ PCGS. CAC.** Slight machine doubling is evident at the mintmark and elsewhere on the reverse of this Premium Gem Denver Mint quarter. Both sides have frosty and brilliant silver luster with peripheral rainbow toning on the obverse. PCGS has only certified 14 finer examples (2/13). NGC ID# 244E, PCGS# 5798

- 3473 1936-D MS65 PCGS.** The original mintage of this issue is 5.3 million coins, a total that is not unusually low for a branch mint Washington quarter from this era. Nevertheless, the 1936-D is known to be among the scarcest issues in the series in better Mint State grades. This undisturbed cream-gray Gem offers strong mint luster and a crisp strike, and would be a splendid contribution to an advanced collection.

Ex: *New York Signature* (Heritage, 7/2004), lot 6271. NGC ID# 244H, PCGS# 5801

- 3474 1936-D MS66 PCGS.** The original mintage of this issue is a substantial 5.3 million coins. Nevertheless, the 1936-D is a well-known semikey date that becomes progressively more difficult to locate with grade. Golden tinged, both the obverse and reverse are awash in scintillating mint luster. There do not appear to be any abrasions that would bar this coin from an even higher grade.

Ex: *Long Beach Signature* (Heritage, 9/2004), lot 6507; *Palm Beach Signature* (Heritage, 3/2005), lot 5688. NGC ID# 244H, PCGS# 5801

- 3475 1936-D MS66 PCGS. CAC.** Frosty with just a hint of canary-yellow color visiting each side. This earlier D-mint Washington quarter issue is rare any finer, with just 11 coins graded MS67 or better by PCGS (2/13). NGC ID# 244H, PCGS# 5801

**1936-S Quarter, MS67
None Certified Finer**

- 3476 1936-S MS67 PCGS.** Ex: Michael Fuller Collection. A fair number of 1936-S quarters have been certified at the near-Gem and Gem levels by PCGS and NGC. There is a moderate decrease in MS66 coins, and only 36 examples are known in MS67. No specimens have been graded higher to date. Glowing luster exudes from golden-tan surfaces accented with peripheral reverse rainbow coloration. The strike is uniformly sharp, and both sides are immaculately preserved.

Ex: *Houston Signature* (Heritage, 11/2007), lot 60849. NGC ID# 244J, PCGS# 5802

- 3477 1938-S MS67 PCGS.** This scarce mintmarked quarter is rarely found in superior condition such as this piece. The surfaces on this coin are exceptionally lustrous and brilliant with a clean overall appearance. Population: 37 in 67 (2 in 67+), 0 finer (1/13).

Ex: *Long Beach Signature* (Heritage, 6/2004), lot 8301; *Denver Signature* (Heritage, 8/2006), lot 1382. NGC ID# 244P, PCGS# 5807

- 3478 1940-S MS67+ PCGS. CAC.** A splendid Superb Gem, this 1940-S quarter is boldly defined and highly lustrous with frosty and untuned silver surfaces. Population: 53 in 67 (3 in 67+), 1 finer (2/13). NGC ID# 244W, PCGS# 5813

3479 1941-D MS67 PCGS. The 1941-D quarter, with a mintage approaching 17 million pieces, is a popular and readily available issue. Coins in the lofty grade of MS67, such as this attractive coin, are more challenging. Its radiantly lustrous surfaces display hints of orange-gold color, which deepens on the upper obverse border. Nicely struck and well-preserved. Population: 24 in 67 (4 in 67+), 1 finer (1/13).

Ex: *Dallas Signature (Heritage, 11/2007), lot 693; FUN Signature (Heritage, 1/2008), lot 2056.* NGC ID# 244Y, PCGS# 5815

3480 1942-S MS67 PCGS. Ex: Michael Fuller Collection. Trumpet tail S. The blazing white luster that encompasses this Superb Gem is next to blemish-free, thus the grade. Hard to come by in this grade, this extremely attractive coin has seen only one example graded higher by PCGS (1/13).

Ex: *Orlando FUN Signature (Heritage, 1/2004), lot 6390, which realized \$2,415.* NGC ID# 2454, PCGS# 5819

3481 1943-S MS67 PCGS. Ex: Omaha Bank Hoard. Large S. Booming luster sweeps this virtually untuned and carefully preserved Superb Gem. The strike is crisp save for occasional minor softness on the peripheral legends. Population: 38 in 67 (2 in 67+), 1 finer (2/13). NGC ID# 2457, PCGS# 5822

3482 1943-S MS67 PCGS. Large S. Booming luster sweeps this smooth, light gold Superb Gem. The borders show slight fadeaway, but the major devices are crisp. Population: 38 in 67 (2 in 67+), 1 finer (1/13). Ex: *FUN Signature (Heritage, 1/2007), lot 4277.* NGC ID# 2457, PCGS# 5822

3483 1944-D MS67 PCGS. A hint of canary-yellow patina settles over each side of this frosty and bright Superb Gem. Uncommonly strong detail for this World War II-era issue. Population: 86 in 67 (7 in 67+), 1 finer (2/13). NGC ID# 2459, PCGS# 5825

3484 1954-S MS67 PCGS. Golden-orange patina graces most of the obverse margins and the lower left part of the reverse, the remainder being largely silver. Swirling luster makes up for a degree of detail weakness. Population: 43 in 67 (1 in 67+), 1 finer (2/13). NGC ID# 22FU, PCGS# 5857

3485 1955 MS67 PCGS. CAC. Dappled blue-green and golden-tan tints grace a medium-silver base on this Superb Gem with gorgeous cartwheel luster on the obverse. Great eye appeal for this issue of 18.1 million pieces. Population: 26 in 67, 0 finer (2/13). NGC ID# 2469, PCGS# 5858

1963 Quarter, Satiny MS67

3486 1963 MS67 PCGS. This amazing Superb Gem has satiny silver luster on both sides, intermingled with considerable rainbow iridescence, including gold, lilac, and blue. The fields appear to be slightly reflective, especially on the obverse. Population: 7 in 67, 0 finer (1/13).

Ex: *Houston Signature (Heritage, 12/2008), lot 1422.* NGC ID# 246S, PCGS# 5874

1964 Washington Quarter, MS67 Tied for Finest Certified

3487 1964 MS67 PCGS. This is a stunning Superb Gem that represents the final silver issue of the Washington quarter series, prior to certain modern and Statehood quarter issues. This piece exhibits intense green-gold and pink toning on both sides with underlying frosty luster. Population: 9 in 67, 0 finer (2/13). NGC ID# 246U, PCGS# 5876

PROOF WASHINGTON QUARTERS

3488 1936 PR65 NGC. The first proof Washington quarters were struck in 1936, with a mintage of 3,837 pieces. This delightful Gem displays sharply detailed design elements and moderately reflective fields, with a few accents of pale gold toning. NGC ID# 27HN, PCGS# 5975

3489 1942 PR67+ PCGS. CAC. The reflectivity through the fields is partial yet undeniable, and squared rims leave little doubt as to this impressively preserved specimen's proof status. Gold and violet outer toning gives way to near-brilliant centers. PCGS has graded only six examples as PR68 or finer (2/13). NGC ID# 27HV, PCGS# 5981

3490 1952 PR68 ★ Cameo NGC. Icy devices provide blatant contrast with glassy fields. A pristine stone-white specimen of a proof issue infrequently encountered in Cameo format. Census: 2 in 68 ★ Cameo, none finer as Cameo although 2 are 68 Ultra Cameo and 2 are 68 ★ Ultra Cameo (2/13).

Ex: *Orlando FUN Signature (Heritage, 7/2012), lot 4119, which realized \$2,070.* NGC ID# 248X, PCGS# 85984

1953 Washington Quarter, PR68 Rare Deep Cameo Specimen

3491 1953 PR68 Deep Cameo PCGS. Few 1953 Washington quarters exhibit Deep Cameo surfaces, but this magnificent PR68 specimen displays profound field/device contrast. The design elements are sharply detailed and richly frosted, while the deeply mirrored fields reveal no visible imperfections. Population: 8 in 68 Deep Cameo, 0 finer (2/13). NGC ID# 248Y, PCGS# 95985

3492 1954 PR68 Deep Cameo PCGS. Intensely contrasted with generous frost on the portrait in particular. A minimally toned specimen with a couple of shallow planchet flaws behind Washington's head. Population: 15 in 68 Deep Cameo, 0 finer (2/13). NGC ID# 27HY, PCGS# 95986

3493 1956 PR69 Ultra Cameo NGC. Extremely deep mirrors contrast well with snow-white devices. Light gold at the rims with a few bluish dots at the lower right reverse but next-to-no toning elsewhere. Census: 47 in 69 Ultra Cameo, 0 finer (2/13). NGC ID# 27J2, PCGS# 95988

EARLY HALF DOLLARS

3494 1803 Large 3, Small Reverse Stars — Repaired — NGC Details. XF. O-101, R.3. The right obverse field and Liberty's chin and neck are whizzed. Portions of the shield lines are strengthened. Moderately cleaned, and the reverse has a small rim ding at 4 o'clock. Much design detail remains. NGC ID# 24EF, PCGS# 6066

3495 1806 Pointed 6, No Stem XF40 PCGS. CAC. O-109a, R.4. The scarce late die state with a prominent crack from star 12 to Liberty's neck. The present lightly abraded example has traces of luster along with rich golden-brown, gunmetal-blue, and apple-green toning. PCGS# 6073

3496 1806 Pointed 6, Stem — Improperly Cleaned — NGC Details. AU. O-115, R.1. Though its obverse has a slightly cloudy appearance from a cleaning, the present Draped Bust half displays only minor wear and has just a single mentionable mark, a thin line through the horizontal shield lines. NGC ID# 24EJ, PCGS# 6071

3497 1807 Draped Bust — Improperly Cleaned — NGC Details. AU. O-110a, R.3. This stone-gray Draped Bust type coin is faintly hairlined but exhibits substantial luster. The motifs have a few minor marks and the strike is incomplete near the eagle's beak and Liberty's neck curls. NGC ID# 24EM, PCGS# 6079

BUST HALF DOLLARS

Patinated MS62 1810 Half, O-105

3498 1810 MS62 NGC. O-105, R.2. Dusky powder-blue, caramel-gold, and stone-gray shades enrich this coruscating and unmarked Bust half. The strike is bold except on the left-side stars. An important example of this collectible variety. O-105 is attributed by a pair of die scratches within the horizontal shield lines. NGC ID# 24ET, PCGS# 6095

Toned Near-Gem 1811 Half O-109, Reverse Die Break

3499 1811 Small 8 MS64 PCGS. O-109, R.2. The heavy radial die crack on the reverse at 10 o'clock causes field displacement and is diagnostic for this distinctive Overton variety. Rich jade-green and rose-red adorn this lustrous and sharply struck Choice Bust half. A few small marks near the left scroll end are all that limit the third party grade. PCGS# 6097

3500 1822 AU55 PCGS. CAC. O-109, R.2. Though the top of the eagle's head and wings shows light wear, this dusky cream-gray example displays satin luster and is only faintly abraded. A die lump atop the right leg of the R in AMERICA confirms the Overton pairing. NGC ID# 24FG, PCGS# 6129

1823 O-106a Half Dollar, MS64+ Tampered 3 Variant

3501 1823 MS64+ PCGS. CAC. O-106a, R.2. The obverse is known as the Tampered 3, with a distinctive shape unlike any others. This piece rivals the finest known examples of the variety, with lustrous and frosty silver surfaces that host delicate gold and iridescent toning. Population: 42 in 64 (1 in 64+), 5 finer (2/13). NGC ID# 24FJ, PCGS# 6131

Lightly Toned Select 1824/1 Half, O-101

3502 1824/1 MS63 PCGS. O-101, R.2. Dazzling cartwheel luster illuminates this chestnut-gold and sky-blue Select Bust half dollar. The strike is bold throughout, and there are no remotely noticeable marks. The more available of the two Overton varieties of this popular overdate. Population: 9 in 63, 10 finer (2/13). PCGS# 6139

3503 1826 AU58 NGC. O-116a, R.1. Dappled lavender and golden-brown encompass this well defined and lightly abraded Borderline Uncirculated half dollar. The lengthy reverse die crack allows for ready attribution by Overton variety. NGC ID# 24FM, PCGS# 6143

1826 O-104 Half, Richly Toned MS64

- 3504** 1826 MS64 PCGS. O-104, R.3. A deeply toned golden-brown half dollar with peripheral steel patina. This example is sharply struck and exhibits excellent luster. The toning is lighter on the reverse and the overall look is pleasing. PCGS has only certified 43 finer examples, including all varieties (2/13). NGC ID# 24FM, PCGS# 6143

1832 Half Dollar, MS64 O-118, Small Letters, Among Finest

- 3505** 1832 Small Letters MS64 NGC. O-118, R.1. Dr. Glenn Peterson refers to O-118 as the “laced lips” variety, due to a vertical die line through the profile. The present unmarked example is condition census quality, since the Stephen J. Herrman Autumn 2012 listing consists of several MS64 pieces. Richly toned with orange-gold throughout the fields, steel-blue on the high points, and glimpses of aquamarine and violet at the borders. NGC ID# 24FW, PCGS# 6160

- 3506** 1833 MS61 NGC. O-105, R.2. Readily attributed by the widely repunched second S in STATES. Deeply toned in rose-gold, dove-gray, and forest-green shades. The lustrous surfaces are unmarked. Well struck at the centers though border elements show selected softness. NGC ID# 24FX, PCGS# 6163

Near-Gem Large Date O-105 1834 Small Letters Half

- 3507** 1834 Large Date, Small Letters MS64 NGC. O-105, R.1. Deep golden-tan and jade-green patina enriches this satiny Choice half dollar. Essentially free from contact, though the right obverse field displays minute die rust, as coined and unusual for O-105. The strike is good, though the junction of the left (facing) wing is incomplete, as are the forehead curls. PCGS# 6165

- 3508** 1834 Small Date, Small Letters MS63 NGC. CAC. O-111, R.1. Repunching on stars 6 and 7 distinguishes O-111 from the similar O-112. The present satiny and evenly struck half dollar displays peach-gold, aquamarine, and stone-gray toning. Both sides are mark-free aside from a single thin line behind the eagle's neck. PCGS# 6166

Lustrous Gem 1834 Half Dollar O-116, Small Date, Small Letters

- 3509** 1834 Small Date, Small Letters MS65 NGC. O-116, R.1. Dynamic luster and medium butter-gold toning ensures the eye appeal of this well preserved Gem. The strike is crisp on the major motifs, though the stars and the R in PLURIBUS are without a full impression. Exceptionally void of contact. Tied for the finest graded of the variety in Stephen J. Herrman's auction survey. PCGS# 6166

REEDED EDGE HALF DOLLARS

- 3510** 1836 Reeded Edge — Improperly Cleaned — NGC Details. XF. GR-1, R.2. Glimpses of tan toning adorn protected areas of the reverse, but most of this low mintage half dollar is slate-gray. Minutely granular and mildly subdued but nicely defined. NGC ID# 2U28, PCGS# 6175

Patinated Choice AU Reeded Edge 1836 Half Dollar

- 3511** 1836 Reeded Edge AU55 NGC. GR-1, R.2. There is only one documented die variety of the low mintage 1836 Reeded Edge half dollar. This example is a late die state with a short die crack from the dentils right of the final S in STATES. A popular issue because of the first year of issue of the 50 CENTS subtype and the first half dollar produced on the new steam-powered press. Deep gunmetal-gray toning embraces both sides of this Choice AU example. The design elements are well brought up and there are no mentionable marks. NGC ID# 2U28, PCGS# 6175

SEATED HALF DOLLARS

1849 Half Dollar, MS64

Lightly and Evenly Toned, Strongly Struck

- 3512 1849 MS64 PCGS. CAC.** Close examination of coins struck during the 1840s and 1850s will reveal many die punching errors, a result of James Longacre's shortcomings as a die sinker. This coin shows minimal such errors, the most obvious being sinking the right-side stars too deeply into the die, or so-called "Longacre Doubling." The devices are strongly brought up on each side, as usually found, and there are no obvious or mentionable abrasions. Light gray patina is intermixed with pale golden throughout. Population: 12 in 64, 1 finer (1/13). NGC ID# 24HE, PCGS# 6262

- 3513 1853 Arrows and Rays MS61 PCGS.** Light almond-gold patina enriches this unblemished and well detailed single year type coin. Struck from clashed dies, though collectors may find the heavy die cracks on the left reverse to be of greater interest. NGC ID# 24JJ, PCGS# 6275

- 3514 1853-O Arrows and Rays AU58 NGC. CAC.** This attractive branch mint single-year type coin shows only light wear on Liberty's legs. Luster shimmers across the motifs, and the medium sea-green and autumn-gold toning is attractive. Census: 14 in 58, 32 finer (2/13). NGC ID# 24JK, PCGS# 6276

1856-O Half Dollar, Brilliant MS64

Distinctly Doubled Date, WB-102

- 3515 1856-O MS64 PCGS. WB-102, FS-301.** Doubled Date. Attractive satin luster adds to the eye appeal of this bright, untuned near-Gem example. The date is obviously repunched. The initial logotype was entered with a pronounced upward slant, then partially effaced and correctly re-entered. This is an earlier die state and is very scarce as such. The variety is undesignated on the PCGS insert. Minor surface marks appear on both sides. Population: 39 in 64 (3 in 64+), 9 finer (1/13). NGC ID# 24HP, PCGS# 6288

1856-O Half Dollar, MS64+

Bright, Lustrous No Motto Type Coin

- 3516 1856-O MS64+ PCGS. CAC. WB-103.** Recut 56. Paired with two reverses, this piece lacks the heavy die striations under the eagle's wing seen on the other pairing. A surprising 2.6 million pieces were struck of this issue, making it one of the more obtainable No Motto type coins after 1855. The mint luster is remarkably bright and vibrant for a New Orleans product. Each side is mostly brilliant with just a hint of color present over the rims. The strike is also strong, except at the top of the obverse. A slightly rippled effect is seen in the fields, evidence of an overused die. Population: 39 in 64 (3 in 64+), 9 finer (1/13). NGC ID# 24HP, PCGS# 6288

Gem 1856-O Seated Liberty Half Branch Mint Condition Rarity

- 3517 1856-O MS65 PCGS. CAC.** A rare Gem specimen of this popular branch-mint issue, with well-detailed design elements and strong satiny mint luster, under attractive shades of lavender-gray and golden-brown toning. The 1856-O is a prime condition rarity in the series, despite a large mintage of 2.6 million pieces. Population: 7 in 65, 2 finer (2/13). NGC ID# 24HP, PCGS# 6288

Colorful Gem 1858 Half Dollar

- 3518 1858 MS65 PCGS. CAC.** Type One Reverse. Despite a plentiful mintage of 4,225,700 pieces, the 1858 is very scarce in Mint State, and Gems are rare. The present satiny and intricately struck representative is deeply patinated in plum-mauve, aquamarine, cobalt-blue, and orange-gold shades. Population: 14 in 65, 5 finer (2/13). NGC ID# 24HV, PCGS# 6293

**1859-S Half Dollar, Scarce MS64
'Spiked Foot' Variety**

- 3519 1859-S MS64 PCGS. WB-7, R.3.** Large S. This is the so-called "Spiked Foot" variety, showing a clear die line below Liberty's foot. While the mintage was a hefty 566,000 pieces for the 1859-S, it is seldom located in better grades. This is a lustrous, well-struck example that is covered with golden-brown toning over each side. Minimally abraded. Population: 11 in 64, 3 finer (2/13). NGC ID# 24J2, PCGS# 6298

- 3520 1863-S MS62 NGC. WB-102.** Small wide broken S. A Civil War and Old West half dollar that boasts vibrant cartwheel luster and only a hint of wheat-gold toning. Void of bagmarks though a few field hairlines are noted. A crisp strike except on the upper stars. Census: 13 in 62, 20 finer (2/13). NGC ID# 24JC, PCGS# 6310

**1866-S Half Dollar, XF45
No Motto Reverse**

- 3521 1866-S No Motto XF45 PCGS.** Light gray surfaces host splashes of dark gold toning on the obverse of this green-label PCGS holdered No Motto half dollar. A pleasing Choice XF example, the attractive surfaces show only trivial handling marks consistent with the grade. Population: 12 in 45, 12 finer (2/13). NGC ID# 24JH, PCGS# 6315

1869 Seated Half Dollar, MS64

- 3522 1869 MS64 PCGS. CAC.** This delightful near-Gem Seated Liberty half dollar exhibits gold, sea-green, and iridescent toning over satiny mint brilliance and sharp design motifs. Delicate peripheral die cracks are noted on the reverse of this beauty. Population: 10 in 64, 7 finer (2/13). NGC ID# 24JX, PCGS# 6325

**1874 Arrows Half Dollar, MS64+
Concentrically Toned**

- 3523 1874 Arrows MS64+ PCGS. CAC.** Large Arrowheads. The 1874 was generously minted to the extent of 2.3 million pieces, making this two-year type available in a wide range of grades. This example displays rich bulls-eye toning on each side with strong underlying mint luster. The strike is strong throughout and the few small abrasions that are present are not immediately apparent because of the toning. Population: 66 in 64 (1 in 64+), 19 finer (1/13). NGC ID# 24LA, PCGS# 6346

- 3524 1874-CC Arrows Good 6 NGC.** A well-worn but appealing example of a seldom-offered Carson City half dollar issue, one of just 59,000 pieces struck. The gold-to-gray obverse has the L and Y of LIBERTY faintly visible. NGC ID# 24LB, PCGS# 6347

- 3525 1879 MS64 PCGS.** Well struck with mottled earth tones on the obverse, and a semi-prooflike, essentially untoned reverse. A scrape in the right obverse field is the only notable distraction. A minuscule mintage of only 4,800 business strikes makes this a very desirable date in the Seated Liberty half dollar series. NGC ID# 24KS, PCGS# 6361

- 3526 1880 MS64 PCGS.** The otherwise frosty finished surfaces reveal pleasing reflectivity in the fields. Both sides are crisply defined, the right obverse field reveals a few grade-limiting abrasions. One of only 9,755 Half dollars produced this year. Population: 20 in 64, 37 finer (2/13). NGC ID# 24KT, PCGS# 6362

**1884 Half Dollar, MS66 Prooflike
Remarkably Low Mintage**

- 3527 1884 MS66 Prooflike NGC.** Only 4,400 business-strike Seated Liberty half dollars were struck in 1884 and some of the rare high-grade examples, like the present coin, show deeply reflective prooflike fields. The design elements are sharply detailed and the untuned surfaces show few signs of contact. Census: 18 in 66 Prooflike, 10 finer (2/13). NGC ID# 24KX, PCGS# 6366

- 3528 1891 MS63 PCGS.** Lustrous surfaces, particularly on the reverse, provide this near-Gem with substantial eye appeal. Subtle hints of color appear on both sides in shades of lavender, ice-blue, gold, and russet, with the reverse being particularly attractive. Population: 39 in 63 (1 in 63+), 79 finer (2/13). NGC ID# 24L6, PCGS# 6373

PROOF SEATED HALF DOLLARS

- 3529 1859 PR63 NGC.** Type Two Reverse. Medium golden-brown toning graces this moderately mirrored and well struck specimen. There are no obvious detractors. From a proof mintage of 800 pieces though, per Breen, only 450 sets were sold and the remainder melted by the Mint. NGC ID# 27TJ, PCGS# 6413

- 3530 1865 PR63 PCGS.** A semicontrasted Select specimen with light gold-to-green color that is more obvious on the reverse. The grade comes from two shallow but prominent hairlines that extend top-to-bottom along the right obverse field. NGC ID# 27TS, PCGS# 6419

**1866 Seated Half, PR64 Cameo
Popular With Motto Type Issue**

- 3531 1866 Motto PR64 Cameo PCGS.** Razor-sharp definition shows on the frosty design elements of this Choice proof Seated Liberty half, with boldly contrasting deeply mirrored fields. A few hints of pale gold toning around the rims add to the outstanding eye appeal. Population: 14 in 64 (2 in 64+) Cameo, 7 finer (2/13). PCGS# 86424

**1866 Motto Half, PR66 Cameo
Lightly Toned and Well-Contrasted**

- 3532 1866 Motto PR66 Cameo PCGS.** Beautiful orange-pink patina circles the rims of both sides of this fully struck Premium Gem proof 1866 Motto Seated half. The 1866 coins are popular for type purposes and were the first of the Motto series, precipitated by the bloody Civil War. This piece is quite well-contrasted, showing thorough, even mint frost against considerable field reflectivity. Only partial drapery shows under Liberty's elbow, apparently from die lapping. This piece is pictured on PCGS CoinFacts. Population: 2 in 66 Cameo, 1 finer (2/13). PCGS# 86424

**1868 Seated Liberty Half, PR66+ Cameo
Only One Finer Coin at NGC**

- 3533 1868 PR66+ Cameo NGC.** Hints of silver-gray and lime-green toning enhance the appeal of both sides of this high-end Premium Gem, with an added dash of cerulean-blue on the reverse. The deeply mirrored fields contrast boldly with the richly frosted design elements to produce a dramatic cameo effect. Census: 1 in 66 (1 in 66+) Cameo, 1 finer (2/13). PCGS# 86426

**Superb Gem Proof 1871 Seated Half
Recut First 1 in Date**

- 3534 1871 PR67 NGC. WB-103** In 1988 Walter Breen identified four minor varieties of the proof 1871 half dollars in his *Proof Encyclopedia* from among the 960 pieces struck for the issue; this example appears to be his "weak incomplete stripes [reverse] die of 1870" with the 71 on the obverse apart. His classification was later debunked by Wiley-Bugert who found no variation in the types to justify separate variety listings. The present specimen is an unmarked Superb Gem that is close to a Cameo designation on the obverse, which shows lavish mint frost on silvery centers, although the reverse falls a bit short of the required contrast level. The rims on each side display accents of copper-amber color, and the strike is uniformly bold throughout. There are no contact marks of any import. Census: 2 in 67, 1 finer (2/13). NGC ID# 27U6, PCGS# 6429

**1874 Arrows Half, PR65
Undesignated Cameo Proof**

- 3535 1874 Arrows PR65 NGC.** Slight weakness is evident at the upper obverse and lower reverse. Although undesignated, this piece is clearly a Cameo proof with nice field-to-device contrast. The ivory-white surfaces show a hint of gray, with peripheral blue and iridescent toning on both sides. Census: 16 in 65, 7 finer (2/13). NGC ID# 27UV, PCGS# 6435

- 3536 1877 PR64 NGC.** Type Two Reverse. A proof mintage of 510 pieces ensures the scarcity of this richly patinated and well struck half dollar. The fields are flashy and display deep cobalt-blue, wheat-gold, and lilac-red toning. NGC ID# 27UC, PCGS# 6438

- 3537 1879 PR64 PCGS.** Gold, peach, and blue shadings prevail to varying degrees on each side of this Choice proof. Quality reflectivity and crisp all-around detail are key to the eye appeal. NGC ID# 27UE, PCGS# 6440

- 3538 1881 PR64 NGC.** Both sides have primarily brilliant silver centers with peripheral toning, leading to a very pleasing appearance. The colors include pink, red, steel blue, and green. Census: 84 in 64, 66 finer (2/13). NGC ID# 27UG, PCGS# 6442

- 3539 1882 PR64 PCGS.** Orange-red and ocean-blue encompass this fully struck and flashy near-Gem. Only 4,400 business strikes and 1,100 proofs were issued, due to the legislated need to produce silver dollars. NGC ID# 27UH, PCGS# 6443

**1882 Half Dollar, PR66
Misplaced Date**

- 3540 1882 PR66 NGC.** Another low total-mintage date from the 1880s with only 1,100 proofs struck plus another 5,500 circulation strikes. Proofs of this date are found with and without errant numerals in the denticles below the date. This particular coin shows two lunules of the top of the two 8s. The fields are deeply mirrored and each side shows attractive, multicolored toning. Census: 19 in 66, 4 finer (2/13). NGC ID# 27UH, PCGS# 6443

1883 Half Dollar, PR65

- 3541 1883 PR65 PCGS.** A captivating Gem, this deeply toned half dollar displays intermingled violet and blue patina over pewter-gray surfaces with fully mirrored fields framing the lustrous devices. Both sides exhibit full design definition and exceptional eye appeal. Population: 31 in 65, 13 finer (2/13). NGC ID# 27UJ, PCGS# 6444

**Untoned 1887 Half, PR66+ Deep Cameo
Sole Finest at PCGS**

- 3542 1887 PR66+ Deep Cameo PCGS.** CAC. Stark, deep white-on-black contrast is the hallmark of this stunning Premium Gem Deep Cameo 1887 proof Seated half, the sole finest certified at PCGS (2/13). In fact, the finest Cameo of this issue at PCGS is a PR66 piece. A squiggly, curving strike-through appears on Liberty's lower gown, and the strike is needle-sharp. The quota of proof half dollars struck in 1887 was 710 coins, complementing a skimpy contingent of only 5,000 business strikes. For collectors seeking a Seated half with untuned surfaces showing silver-white mint frost against jet-black field reflectivity, this piece is certain to satisfy. PCGS# 96448

1888 Seated Half, PR66 Cameo
Tied for Finest Certified at PCGS

- 3543** 1888 PR66 Cameo PCGS. Light golden-brown patina enlivens the surfaces of this spectacular Premium Gem, with most of the color at the peripheries. The design elements are sharply detailed and richly frosted, ensuring bold cameo contrast with the deeply reflective fields. From a proof mintage of 832 pieces. Population: 2 in 66 Cameo, 0 finer (2/13). PCGS# 86449

1889 Half Dollar, PR65 Cameo

- 3544** 1889 PR65 Cameo PCGS. Mintages dwindled near the end of the Seated Liberty half dollar series. For example, just 12,000 circulation strikes and 711 proofs were struck in 1889. This survivor is an impressive Gem with brilliant, untuned silver surfaces and amazing field-to-device contrast. Population: 7 in 65 (1 in 65+) Cameo, 2 finer (2/13). PCGS# 86450

Deep Cameo PR67 1890 Half Dollar
Tied for Finest Deep Cameo at PCGS

- 3545** 1890 PR67 Deep Cameo PCGS. There are coins that barely qualify as Deep Cameo, and then there is this no-questions black-and-white Superb Gem specimen. Rich and intricate frost enhances sharply struck devices that stand out against a backdrop of reflective silver-black with only the faintest suggestions of patina. This is easily one of the finest imaginable survivors from the penultimate proof Seated half dollar issue, which saw a depressed mintage of just 590 specimens, the lowest such figure for the denomination since 1877. Population: 2 in 67 Deep Cameo, 0 finer (2/13). PCGS# 96451

BARBER HALF DOLLARS

Rare Micro O 1892-O Half Dollar Good 6, FS-501

3546 1892-O Micro O Good 6 PCGS. FS-501. In circulated grades, the 1892-O is the key regular issue of the Barber half series, but it is common relative to the rare Micro O variety. The die engraver incorrectly used a mintmark punch intended for a quarter. The mistake is more easily understood when one realizes that 1892 was the first year of New Orleans half dollar production since 1861. This example has distinct stars and bold peripheral legends. All letters in E PLURIBUS UNUM are at least partly present. The obverse is a bit bright when compared with the deeper dove-gray reverse. PCGS# 6463

3547 1892-S AU53 NGC. Richly patinated in shades of lavender-gray, champagne-gold and amber, this attractive specimen shows minimal surface wear and abrasions for the grade. Census: 6 in 53, 98 finer (2/13). NGC ID# 24LJ, PCGS# 6464

3548 1893-O MS63 ANACS. Vibrant satiny mint luster shines through vivid shades of pink and lime-green toning, giving this attractive Select example considerable eye appeal. The design elements show the usual softness on the reverse. Both sides show dramatic clash marks. NGC ID# 24LL, PCGS# 6466

3549 1893-S AU50 NGC. The 1893-S Barber half dollar claims a low mintage of 740,000 pieces, making high grade examples quite elusive today. This lightly circulated specimen retains significant amounts of original mint luster, under shades of sea-green and lavender toning. Census: 3 in 50, 61 finer (2/13). NGC ID# 24LM, PCGS# 6467

3550 1894-O MS63 NGC. Vibrant gold, rose-red, and violet toning embraces both sides of this highly lustrous Barber half. Scattered abrasions limit the grade, but all are insignificant. An attractive and fully struck representative. Census: 23 in 63 (1 in 63+), 57 finer (2/13).
Ex: Long Beach Signature (Heritage, 9/2008), lot 2290. NGC ID# 24LP, PCGS# 6469

3551 1895 MS62 NGC. A blanket of champagne-gold and lavender-gray toning enlivens the lightly marked surfaces of this sharply detailed Barber half dollar. Frosty mint luster is evident beneath the toning. Census: 27 in 62, 61 finer (2/13). NGC ID# 24LS, PCGS# 6471

3552 1896 MS62 NGC. The 1896 Barber half dollar is a low-mintage issue, seldom encountered in high grade. This sharply detailed MS62 example displays vibrant mint luster, with a hint of light gold toning and excellent eye appeal for the grade. A few scratches on Liberty's cheek prevents a higher evaluation. NGC ID# 24LV, PCGS# 6474

3553 1896-O XF45 PCGS. A better date in all grades, the 1896-O has a respectable mintage but few were saved. This lightly worn representative features dove-gray motifs and forest-green fields. There are no detrimental abrasions. NGC ID# 24LW, PCGS# 6475

3554 1896-S — Cleaning — PCGS Genuine. AU Details. A still-attractive example of this popular date that shows a few traces of circulation and partially prooflike fields that are retoning after a long-ago cleaning. NGC ID# 24LX, PCGS# 6476

3555 1897-O XF45 PCGS. A lightly worn example of this popular branch-mint issue, from a mintage of 632,000 pieces. The surfaces are lightly abraded for the grade, under pleasing lavender-gray patina. Population: 8 in 45, 59 finer (2/13). NGC ID# 24LZ, PCGS# 6478

3556 1898 MS64+ NGC. Richly toned peach, blue, and violet across each side with duskier hues on the satiny obverse. Marks are generally wispy and hidden by patina. Census: 29 in 64 (2 in 64+), 16 finer (2/13). NGC ID# 24M3, PCGS# 6480

3557 1898-O AU53 PCGS. From a mintage of just 874,000 pieces, the 1898-O Barber half is an elusive issue in high grade. This lightly circulated specimen shows just a trace of wear on the well-detailed design elements, under dark gray and amber patina. Population: 8 in 53, 68 finer (2/13). NGC ID# 24M4, PCGS# 6481

1900 Barber Half Dollar, MS66 Only One Finer Coin at NGC

3558 1900 MS66 NGC. CAC. Vibrant satiny mint luster shines through shades of champagne-gold and lavender-gray patina on this incredible Barber half dollar. The design elements are sharply detailed throughout and eye appeal is outstanding. The 1900 Barber half dollar is very rare at the Premium Gem level. Census: 6 in 66, 1 finer (2/13). NGC ID# 24M9, PCGS# 6486

3559 1900-O AU55 PCGS. A faintly luminous Choice AU example from the turn of the century, gold and blue over modestly worn surfaces. The 1900-O is a borderline condition rarity at this level despite a mintage of more than 2.7 million pieces. Population: 9 in 55, 41 finer (2/13). NGC ID# 24MA, PCGS# 6487

3560 1901 MS63 PCGS. Exquisite autumn-brown, navy-blue, and plum-mauve toning dominates much of this lustrous and well-preserved Barber type coin. The strike is good despite some merging on the right (facing) claw and fletchings. NGC ID# 24MC, PCGS# 6489

1903 Half Dollar, MS64 Swirling Mint Luster, Partial Toning

3561 1903 MS64 PCGS. CAC. The swirling luster is largely light gray with a faint undercurrent of blue. Deeper steel shadings appear as spots and splashes, most notably at the lower obverse and upper reverse. An uncommonly well-preserved example of a little-saved Philadelphia issue. Population: 28 in 64, 8 finer (2/13). NGC ID# 24MJ, PCGS# 6495

3562 1904-S VF20 PCGS. A subtly luminous midrange example of this lower-mintage issue. Green-gold and peach peripheral touches affect otherwise light gray surfaces with wear just starting to reach the letters in LIBERTY. NGC ID# 24MP, PCGS# 6500

3563 1906 MS63 PCGS. Attractive shades of champagne-gold and pink patina blanket the surfaces of this pleasing Select example, with well-detailed design elements and vibrant mint luster under the toning. NGC ID# 24MU, PCGS# 6504

3564 1906-D MS64 PCGS Secure. This delightful Choice specimen displays vibrant mint luster and sharply detailed design elements throughout, with a light patina of pale gold toning. Population: 58 in 64, 22 finer (2/13). NGC ID# 24MV, PCGS# 6505

1906-D Half Dollar, MS65 First Denver Mint Issue

3565 1906-D MS65 PCGS. Sharply detailed in most areas, this attractive Gem shows just a touch of softness on the upper-right shield tip on the reverse. Satiny mint luster shines through shades of lavender-gray, sea-green, and violet toning on the lightly marked surfaces. Population: 14 in 65, 8 finer (2/13). NGC ID# 24MV, PCGS# 6505

1906-O Barber Half, Brilliant MS64

3566 1906-O MS64 PCGS. The 1906-O Barber half dollar is much more difficult to locate in high grade than its mintage of nearly 2.5 million pieces would suggest. This impressive Choice example displays sharply detailed design elements and vibrant mint luster. The surfaces are brilliant, with just a hint of pale gold toning and few signs of contact. Population: 23 in 64, 14 finer (2/13). NGC ID# 24MW, PCGS# 6506

3567 1907 MS63 PCGS. Despite a few obverse contact marks, a very attractive and presentable specimen of this date, with well-detailed design elements and vibrant mint luster under accents of light gold and pink toning. NGC ID# 24MY, PCGS# 6508

3568 1907-O MS64 PCGS. Pleasingly lustrous beneath rich patina, dappled blue and gold-orange on the obverse with silver-white replacing the blue on the reverse. Slight striking softness on the devices is typical for this O-mint issue. Population: 40 in 64, 21 finer (2/13). NGC ID# 24N2, PCGS# 6510

3569 1908-O MS64 PCGS. Well struck with shimmering luster and appealing olive and gold patina near the obverse and reverse peripheries. Carefully preserved with just a couple of minor marks that preclude a higher grade. NGC ID# 24N6, PCGS# 6514

1908-O Barber Half, Richly Toned MS66

3570 1908-O MS66 NGC. Produced in large numbers, the 1908-O Barber half dollar is an available date in lower grades, but the issue is a formidable rarity in Premium Gem condition. Like most New Orleans issues of the era, this coin shows a touch of softness on the central devices. The well-preserved surfaces radiate vibrant mint luster, under attractive shades of natural blue, gray, and golden-brown toning. Census: 9 in 66, 7 finer (1/13). NGC ID# 24N6, PCGS# 6514

3571 1908-S MS62 NGC. Rich golden and steel-gray toning covers each side of this satiny half dollar. Just a bit softly struck in the usual places on the reverse. Census: 10 in 62, 24 finer (2/13). NGC ID# 24N7, PCGS# 6515

3572 1909 MS64 PCGS. CAC. A well-detailed Choice example of this popular Barber issue, with satiny mint luster on both sides and only a few minor contact marks. Attractive hints of light gold toning add to the visual appeal. NGC ID# 24N8, PCGS# 6516

Multicolor Gem 1909-O Half

3573 1909-O MS65 NGC. The final New Orleans issue is plentiful in Good but surprisingly scarce in Fine or better grades. Gems are decidedly rare. The present lustrous example is splendidly toned in blended sea-green, chestnut-gold, and lilac-red. Housed in an early pre-hologram holder. Census: 19 in 65, 4 finer (2/13). NGC ID# 24N9, PCGS# 6517

3574 1909-S MS62 PCGS. This attractive MS62 specimen displays well-detailed design elements and vibrant mint luster, with a few minor slide marks on Liberty's cheek that explain the grade. Population: 10 in 62, 58 finer (2/13). NGC ID# 24NA, PCGS# 6518

3575 1910 MS64 PCGS. CAC. Light wheat-gold and powder-blue toning. A lower mintage Barber half that boasts cartwheel luster and well-preserved fields. One tick on the cheek is all that limits the grade. Population: 34 in 64, 27 finer (2/13). NGC ID# 24NB, PCGS# 6519

3576 1910-S MS62 PCGS. A lustrous example, lightly slide-marked on the obverse, that is the "tale of two coins." The obverse is minimally toned save for gold-orange at the borders, while deep violet to mauve shadings consume the reverse. Housed in a green label holder. Population: 13 in 62, 49 finer (2/13). NGC ID# 24NC, PCGS# 6520

3577 1911 MS63 PCGS. The 1911 Barber half dollar is a scarce issue in MS63 condition. This attractive specimen is well-detailed and lustrous, with attractive shades of light gold and lavender toning. NGC ID# 24ND, PCGS# 6521

3578 1911-D MS64 PCGS. Rich pink, peach, and blue overtones across the obverse, while the reverse has similar colors but a more silvery overall appearance. The strike is uneven at the margins but the interior definition is more solid. Population: 36 in 64, 33 finer (2/13). NGC ID# 24NE, PCGS# 6522

3579 1912 MS64 PCGS. This well-detailed Choice example exhibits just a touch of the usual softness on the central reverse, with vibrant mint luster and attractive shades of gold and lavender toning. Population: 88 in 64, 21 finer (2/13). NGC ID# 24NG, PCGS# 6524

3580 1912-S MS63 PCGS. The 1912-S was not heavily saved by contemporary collectors, making it a scarce date in high grade. This attractive Select specimen offers sharply detailed design elements and satiny mint luster under a light gold patina. Population: 30 in 63, 92 finer (2/13). NGC ID# 24NJ, PCGS# 6526

1912-S Barber Half Dollar, MS64 Very Scarce in This Grade

3581 1912-S MS64 PCGS. CAC. Vibrant satiny mint luster shines through attractive shades of champagne-gold toning on this attractive Choice specimen. The design elements are well-detailed, with a touch of softness on the stars and shield point. No large or distracting marks are present and eye appeal is outstanding. Population: 62 in 64 (4 in 64+), 30 finer (2/13). NGC ID# 24NJ, PCGS# 6526

3582 1914-S MS64 NGC. Orange-gold, rose-red, ice-blue, and lime-green patina embraces this satiny and well preserved Choice San Francisco half dollar. Well struck for the issue. Census: 40 in 64, 19 finer (2/13). NGC ID# 24NP, PCGS# 6531

3583 1915 AU58 NGC. The Philadelphia Mint series of Barber halves ends with three popular low mintage issues. This caramel-gold and stone-gray near-Mint example has an unabraded appearance with much satin luster. Census: 13 in 58, 37 finer (2/13). NGC ID# 24NR, PCGS# 6532

3584 1915-D MS63 PCGS. CAC. Dusky shades of champagne-gold and lavender-gray toning enhance the appeal of this attractive Select example, with well-detailed design elements and satiny mint luster under the patina. NGC ID# 24NS, PCGS# 6533

3585 1915-D MS64 PCGS. The Denver and San Francisco Mint issues of this final Barber half dollar year are plentiful, while the Philadelphia pieces are rare. This Choice Mint State Denver half dollar has full frosty mint luster with champagne and iridescent toning. NGC ID# 24NS, PCGS# 6533

3586 1915-D MS64 PCGS. CAC. Vibrant satiny mint luster shines through a light patina of champagne-gold and lavender hues on this attractive Choice example. The design elements are well-detailed and few signs of contact are evident. NGC ID# 24NS, PCGS# 6533

1915-D Half Dollar, MS66 Final Denver Mint Issue

3587 1915-D MS66 NGC. One-a-year collectors will be pleased with the opportunity to acquire this Premium Gem Denver Mint half dollar, the most easily obtained Barber half dollar of the year. This impressive piece has peripheral gold and iridescent toning around brilliant silver luster on the obverse and delicate champagne toning on the reverse. Census: 7 in 66, 1 finer (2/13). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

Patinated Gem Proof 1893 Barber Half

3588 1893 PR65 PCGS. A blanket of blended lavender and forest-green toning embraces this satiny and pristine Gem. The fletchings are fully struck, though the right shield corner shows incompleteness of impression. Proof mintages were significantly lower in 1893 than the preceding year, since type collector demand had been sated. NGC ID# 24NV, PCGS# 6540

3589 1893 PR64+ Cameo PCGS. A second-year Barber specimen that has smooth eye appeal and almost Deep Cameo contrast. A faint veil of gold-to-gray patina partly obscures the few faint hairlines that affect the grade. Population: 19 in 64 (1 in 64+) Cameo, 39 finer (2/13). PCGS# 86540

1893 Half Dollar, PR66+ Cameo All-Brilliant and Deeply Mirrored

3590 1893 PR66+ Cameo PCGS. CAC. The number of proofs produced in the second year of Charles Barber's design dropped significantly to 792 pieces, down from 1,245 pieces the previous year. This is an all-brilliant proof with deep mirroring in the fields. The devices are strongly contrasted with significant mint frost that provides the cameo effect. The surfaces are immaculately preserved, as one would expect from the grade. Population: 17 in 66 (3 in 66+) Cameo, 3 finer (1/13). PCGS# 86540

**Superb Gem Proof 1896 Barber Half
Only Six Numerically Finer Coins at NGC**

- 3591 1896 PR67 NGC.** A modest proof mintage of 762 Barber half dollars was achieved in 1896 and few survivors can match the technical quality and visual appeal of the present coin. This magnificent Superb Gem is sharply detailed throughout, except for a touch of softness on the shield point. The brilliant mirrored fields add to the incredible eye appeal. Census: 16 in 67 (1 in 67+), 6 finer (2/13). NGC ID# 24NY, PCGS# 6543

**1899 Barber Half Dollar, PR65
Underlying Cameo Contrast**

- 3592 1899 PR65 PCGS.** An impressive, deeply toned Gem, this lovely proof exhibits dark blue-green and gold toning over mirrored fields and lustrous devices. Considerable cameo contrast is evident beneath the toning on each side, although that toning also prevents a cameo designation. Population: 19 in 65, 13 finer (2/13). NGC ID# 24P3, PCGS# 6546

**1901 Barber Half Dollar, PR65
Light Contrast Evident**

- 3593 1901 PR65 PCGS.** This delightful Gem proof marks the opening of the third Philadelphia Mint building, and the end of cameo proof coinage. Light contrast is noted between the sharply defined devices and the mirrored fields on this iridescent toned specimen. Population: 31 in 65, 38 finer (2/13). NGC ID# 24P5, PCGS# 6548

**1902 Barber Half Dollar, PR67+
Rare Example With Cameo Surfaces**

- 3594 1902 PR67+ Cameo NGC. CAC.** A small mintage of 777 proof Barber half dollars was accomplished in 1902, when the Mint switched to an all-brilliant finish for silver proof coins. This measure largely eliminated the cameo effect collectors prized so much in previous years. The present coin is one of the few examples to show any degree of mint frost on the devices, an essential element of the cameo effect. The well-detailed design elements stand out boldly against the deeply mirrored fields in true cameo contrast. Vivid rings of cobalt-blue and golden-brown toning frame the brilliant centers in a dazzling play of colors. Eye appeal is tremendous. Census: 1 in 67 (1 in 67+) Cameo, 1 finer (2/13). PCGS# 86549

**Gem Proof 1906 Barber Half Dollar
Sharply Struck and Deeply Mirrored**

3595 1906 PR65 NGC. Only 675 proof Barber half dollars were struck in 1906. The present coin is an attractive Gem, with razor-sharp definition on all design elements and deeply mirrored fields that show a few wisps of pale gold toning. Eye appeal is quite strong. Census: 48 in 65 (1 in 65+), 54 finer (2/13). NGC ID# 24PA, PCGS# 6553

3596 1907 PR64 PCGS. Brilliant aside from a wisp of golden patina on Liberty's cheek. The strike is good and only faint hairlines determine the grade. The moderate cameo contrast is undeniable, though undesignated as such by PCGS. Only 575 proofs were produced. NGC ID# 24PB, PCGS# 6554

**Superb Gem Proof 1907 Barber Half
Only 575 Pieces Struck**

3597 1907 PR67 PCGS. Darkly patinated in shades of violet, cobalt-blue, and grayish-gold, this spectacular Superb Gem displays deeply mirrored surfaces with outstanding eye appeal. The design elements are sharply detailed on the obverse, but the reverse shows a touch of the usual softness on the shield point and eagle's claw. Population: 5 in 67, 1 finer (2/13). NGC ID# 24PB, PCGS# 6554

3598 1913 PR62 NGC. Only 627 proof Barber half dollars were struck in 1913. This attractive PR62 example is sharply detailed throughout, with deeply mirrored fields and pleasing light gold patina. A few minor hairlines in the fields explain the grade. NGC ID# 24PH, PCGS# 6560

**1913 Barber Half Dollar, PR67 Cameo
None Finer at PCGS**

3599 1913 PR67 Cameo PCGS. This sharply detailed Superb Gem shows unusually rich mint frost for a coin from this period, creating bold cameo contrast with the deeply reflective fields. The well-preserved surfaces show a few hints of blue and green toning at the peripheries. Population: 3 in 67 Cameo, 0 finer (2/13). PCGS# 86560

WALKING LIBERTY HALF DOLLARS

**1916 Half Dollar, MS65
New Walking Liberty Design**

3600 1916 MS65 PCGS. CAC. The first year of production for the Walking Liberty design, marking a new plan of divergent designs for the different denominations. Prior to 1916, the subsidiary silver coins carried similar designs that only varied in size with the denomination. This delightful Gem has frosty ivory luster with traces of pale gold toning. NGC ID# 24PL, PCGS# 6566

**1916-D Walking Liberty Half, Superb Gem
A Spectacular Example**

- 3601 1916-D MS67 NGC.** The 1916-D Walking Liberty half dollar is the most commonly seen mintmarked early issue in the series, and certainly the most available of the D-mint coins before 1934. Even Gems are available with little difficulty. The pieces were produced with strong strikes and usually bold eye appeal, leading to the relative abundance of high-grade survivors. Premium Gem examples, however, are conditionally scarce, and Superb Gems such as the present piece are just downright rare. This piece is only a tad shy of a full strike, showing most of a partial split thumb and only minor weakness on the lower leg feathers of the eagle. The centers are ice-white, while the rims display a color palette ranging from copper-russet to saffron and pale jade. There are simply no abrasions worthy of mentioning. NGC has certified eight in the top MS67 grade including one MS67 ★ piece (2/13). A spectacular example of this well-produced issue. NGC ID# 24PM, PCGS# 6567

1916-S Half Dollar, MS65

- 3602 1916-S MS65 PCGS. CAC.** Fully brilliant silver surfaces host frosty luster and dusky gold toning along the borders. This impressive Gem offers an above average strike and exceptional eye appeal. PCGS has only certified 14 finer examples of this low mintage issue and NGC has graded just 13 finer submissions (2/13). NGC ID# 24PN, PCGS# 6568

- 3603 1917 MS65 PCGS.** This delightful Gem displays sharply detailed design elements for an early series issue, with satiny mint luster and a few hints of gold and amber toning. Eye appeal is outstanding. NGC ID# 24PP, PCGS# 6569

1917 Walking Liberty Half, MS66

- 3604 1917 MS66 PCGS.** A splendid Premium Gem, this second-year issue has splashes of gold and iridescent toning over brilliant silver surfaces with frosty mint luster and above average design definition. The combined population data of PCGS and NGC shows just seven finer submissions. Population: 78 in 66, 3 finer (2/13). NGC ID# 24PP, PCGS# 6569

**1917-S Half Dollar, MS64
Reverse Mintmark**

- 3605 1917-S Reverse MS64 PCGS. CAC.** A wonderful near-Gem, this satiny specimen has pale gray-gold and light blue toning over its ivory surfaces. Both sides exhibit exceptional eye appeal. The strike is lacking at the centers as usual, and that strike likely prevented a higher grade. NGC ID# 24PU, PCGS# 6573

MS67 1917-S Reverse Mintmark Half
The Finest Example Certified

- 3606 1917-S Reverse MS67 NGC.** The movement of the mintmark from the obverse to the reverse of the Walking Liberty half was apparently recommended by Mint Director F.J.H. von Engelken as a matter of personal objection. Curiously, it was not until after von Engelken left the Mint that the mintmark change was ordered and completed. According to a *Coin World* article, Mint Superintendent Adam Joyce wrote to the new Mint director about the mintmark change on April 6, 1917:

“In looking over our files, I find that former Director von Engelken failed to confirm his verbal instructions with regard to the change in the position of the of the mint mark on the new design half dollar. I would therefore thank you to have this confirmation sent me, as of February 14th.”

It had been von Engelken’s belief that the mintmark was too prominently placed on the obverse and appeared like a die defect. The change was swiftly completed, but not before one lot of dies had been made to the San Francisco facility with the obverse mintmark. A massive 5.55 million pieces were struck with the new reverse mintmark dies, but few were set aside. Most survivors are circulated and even low-end Uncirculated coins are difficult to locate. This piece is the finest certified at both of the major services (2/13).

The surfaces are brilliant, with the slightly fine-grained texture seen on all Walking Liberty halves from this decade. The design elements are sharp for the issue, with nearly complete definition on each side. The surfaces are exceptionally well preserved and show no obvious defects. NGC ID# 24PU, PCGS# 6573

- 3607 1918-S MS63 PCGS.** A well-detailed Select specimen of this early series issue, with the softness on the central devices almost always seen on the 1918-S. The lightly marked surfaces display satiny mint luster and dusky golden-tan toning. NGC ID# 24PX, PCGS# 6576

Choice Mint State 1919-D Half Dollar
Rare Any Finer

- 3608 1919-D MS64 NGC.** From a smallish mintage of less than 1.2 million pieces, the 1919-D Walking Liberty half dollar is the most challenging issue of the series in grades above the Choice level. The present coin is an attractive Choice example that shows some of the usually seen softness on the central devices. That being said, some emerging detail is evident on Liberty’s thumb and head, and the feathers on the eagle’s leg show more definition than the average specimen. The lustrous surfaces display a few hints of light gold toning, with no mentionable distractions. Census: 82 in 64, 4 finer (2/13). NGC ID# 24PZ, PCGS# 6578

**1919-S Walking Liberty Half, MS64
Lightly Toned Early Series Issue**

- 3609 1919-S MS64 PCGS. CAC.** The 1919-S Walking Liberty half dollar claims a smallish mintage of 1.5 million pieces. Examples in MS64 condition are very scarce in today's market. This attractive Choice specimen is well-detailed, with satiny mint luster under shades of greenish-gold and lavender toning. Population: 96 in 64 (7 in 64+), 51 finer (1/13). NGC ID# 24R2, PCGS# 6579

**Select 1920-D Walking Liberty Half
Attractive Toning, Strong Eye Appeal**

- 3610 1920-D MS63 NGC.** The 1920-D is not a great rarity in the Walking Liberty series in absolute terms, but it is one of the scarcer issues in high grade. This attractive Select example displays vibrant mint luster and well-detailed design elements, under a pleasing pale gold patina. Eye appeal is outstanding. NGC ID# 24R4, PCGS# 6581

1920-D Half Dollar, Brilliant MS64+

- 3611 1920-D MS64+ PCGS. CAC.** Liberty's thigh and branch hand show the usual weakness associated with this issue, while all remaining design elements are sharply defined. This impressive Choice Mint State specimen has fully brilliant and beautiful silver surfaces with no evidence of toning. NGC ID# 24R4, PCGS# 6581

**Lustrous Gem 1920-D Half Dollar
Underrated Issue, Well-Struck Example**

- 3612 1920-D MS65 PCGS. CAC.** The 1920-D Walking Liberty half dollar is not an issue that comes to the forefront when one ponders the rarest dates in the set, but it is nonetheless among the few rarest, a fact not widely appreciated outside of series specialists. In Gem condition it is the fifth-rarest out of the 65 coins that constitute the series. Soft luster complements surfaces that still present as largely untuned, despite the slight presence of golden and pinkish hues. This is a well-struck coin overall, showing a partial split thumb as well as decent detail on Liberty's head. This Gem should become a prized member of a fine Walking Liberty half set. Population: 43 in 65, 6 finer (1/13). NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, MS64

- 3613 1920-S MS64 PCGS.** A weak central strike is probably the reason that PCGS limited the grade of this piece that otherwise has the eye appeal of a Gem or finer example. Both sides have brilliant ivory luster with a few splashes of gold and iridescent toning. The surfaces have trivial marks as expected for the grade. NGC ID# 24R5, PCGS# 6582

- 3614 1921-D VF20 PCGS. CAC.** This stone-gray key-date half dollar has bold legends and an unmarked appearance. Two tiny obverse color spots are visible near 3 and 11 o'clock. The lowest mintage issue of the series. Housed in a green label holder. NGC ID# 24R7, PCGS# 6584

**1921-S Half Dollar, MS62
Attractive Collector-Grade Coin**

- 3615 1921-S MS62 PCGS.** This 1921-S Walking Liberty half dollar in a medium Mint State grade might represent an excellent potential acquisition for a collector working on a Mint State set, even if most of the coins in the set are of slightly higher grade. Full mint luster covers both sides of this silvery MS62 example, complementing the light pinkish-golden accents. The strike is somewhat weak through the obverse center, accounting for the grade, with a lack of detail on Liberty's branch hand and the head. The reverse is better-struck overall, both on the high points of the eagle and the peripheral details as well. A nice, attractive collector-grade example of this key date. Population: 12 in 62, 97 finer (1/13). NGC ID# 24R8, PCGS# 6585

- 3616 1934-S MS64 PCGS.** Attractively lustrous example with gold color on the obverse center. Bold, especially on the reverse and free of most distraction. NGC ID# 24RH, PCGS# 6594

- 3617 1935-D MS65 PCGS. CAC.** Impressive mint luster resides on both sides of this brilliant and untoned Gem, with bold design motifs, save for the central obverse. NGC ID# 24RK, PCGS# 6596

- 3618 1935-S MS65 PCGS.** Faint almond-gold toning denies full brilliance, but this lustrous Great Depression Gem is magnificently preserved. The high points display definition consistent with its San Francisco origin. NGC ID# 24RL, PCGS# 6597

**1935-S Walking Liberty Half, MS66+
Lustrous Brilliant Surfaces**

- 3619 1935-S MS66+ PCGS. CAC.** Sharply detailed in most areas, this high-end Premium Gem shows just a touch of the usual softness on the central obverse. Vibrant mint luster radiates from the pristine brilliant surfaces and eye appeal is tremendous. PCGS has graded only three numerically finer specimens (2/13). NGC ID# 24RL, PCGS# 6597

**Superb Gem 1935-S Walking Liberty Half
Registry Set Prize, One of Three at PCGS**

- 3620 1935-S MS67 PCGS. CAC.** Among the Walking Liberty half dollars struck between 1934 and 1940, the 1935-S in high grade is second in rarity only to the 1934-S. This Superb Gem 1935-S Walking Liberty half is one of only three such certified at PCGS with none finer, making it a standout potential acquisition for a top-notch Registry Set (1/13). A touch of golden patina complements surfaces that otherwise are largely untuned silver-white. Radiant luster beams from each side, and only a couple of tiny marks on the lower eagle's feathers bear passing mention. The sharp strike accounts for the overall bold detail, including a partial split thumb. NGC ID# 24RL, PCGS# 6597

3621 1937-D MS66 PCGS. CAC. Light blue and green-gold overtones are faint on both sides of this Premium Gem. A few freckles of crimson toning on the obverse become more evident at the peripheral reverse, especially the bottom and right. NGC ID# 24RS, PCGS# 6602

3622 1937-D MS66+ PCGS. CAC. Frosty silver luster is bright and beautiful. All-around preservation is impressive on this Depression-era D-mint half dollar that falls just shy of Superb Gem status. PCGS has graded only 40 numerically finer pieces (2/13). NGC ID# 24RS, PCGS# 6602

**1937-D Half Dollar, MS67
Tied for Finest at PCGS**

3623 1937-D MS67 PCGS. A scarce Walking Liberty issue, the 1937-D is rarely encountered so fine. This piece has subtle pinkish toning over frosty silver surfaces with above average design definition. Tied for the finest that PCGS has certified, with only one numerically finer example graded by NGC (2/13). NGC ID# 24RS, PCGS# 6602

3624 1938-D MS66+ PCGS. CAC. This high-end Premium Gem is sharply detailed in most areas, but a touch of softness shows in the usual spots on the wreath hand and eagle's leg. Vibrant mint luster illuminates both sides, with a trace of pale gold toning. NGC ID# 24RV, PCGS# 6605

**1938-D Walking Liberty Half Dollar, MS67
Low-Mintage Late-Series Issue**

3625 1938-D MS67 PCGS. CAC. From a small mintage of 491,600 pieces, the 1938-D Walking Liberty half dollar is quite rare in Superb Gem condition. This spectacular example offers sharply detailed design elements and vibrant mint luster, with no mentionable signs of contact. Population: 30 in 67 (2 in 67+), 0 finer (1/13). NGC ID# 24RV, PCGS# 6605

3626 1939-S MS67 PCGS. CAC. The central design features are typically weak, with the peripheral elements showing nearly full details. This Superb Gem is tied for the finest certified (2/13). Both sides have delicate gold toning over silver brilliance. NGC ID# 24RY, PCGS# 6608

3627 1939-S MS67 NGC. CAC. A sensational Superb Gem, this 1939-S half dollar exhibits fully brilliant and untuned silver surfaces with frosty luster and bold design motifs. No finer pieces have been certified at NGC or PCGS. NGC ID# 24RY, PCGS# 6608

3628 1940 MS67 NGC. Iridescent olive-green and apricot-gold shades intermingle throughout this lustrous, well struck, and unmarked Superb Gem. As of (2/13), just 13 pieces have received a higher numerical grade from NGC.
Ex: Boston ANA Signature (Heritage, 8/2010), lot 9798. NGC ID# 24RZ, PCGS# 6609

3629 1940-S MS66 PCGS. CAC. Usually poorly struck, this 1940-S Walker is far sharper than most, with brilliant silver surfaces and frosty luster. An exceptional Premium Gem. PCGS has only certified six finer specimens (2/13). NGC ID# 24S2, PCGS# 6610

3630 1941-D MS67 PCGS. CAC. Liberty's wreath hand and the eagle's leg show the usual softness, but other areas are sharply detailed. Vibrant mint luster and highlights of pale gold and lavender toning add to the considerable visual appeal. PCGS has certified a single example in higher numeric grades (1/13). NGC ID# 24S4, PCGS# 6612

3631 1941-S MS66 PCGS. CAC. Ice-blue and caramel-gold tints alternate across lustrous and mark-free surfaces. A good strike except on the branch hand. An inconspicuous spot on the crest of the front wing. The well-known short-set key. NGC ID# 24S5, PCGS# 6613

3632 1942 MS67+ PCGS. CAC. Sharply detailed in most areas, this high-end Superb Gem displays just a touch of the typical softness on Liberty's wreath hand. The pristine surfaces radiate vibrant mint luster, with spectacular accents of golden-brown and violet-blue toning. PCGS has graded only four coins in higher numeric grades (1/13). NGC ID# 24S6, PCGS# 6614

3633 1942-S MS66 PCGS. CAC. Small S. This virtually immaculate wartime Walker provides booming luster and only a wisp of golden patina. Liberty's head and skirt lines are well impressed, though the branch hand shows softness. NGC ID# 24S8, PCGS# 6617

3634 1942-S MS66+ PCGS. CAC. Trumpet tail S. A stone-white and highly lustrous representative with exemplary preservation and the expected minor inexactness of strike on the high points of Liberty. NGC ID# 24S8, PCGS# 6617

**1943 Walking Liberty Half Dollar, MS68
Among the Finest Certified**

3635 1943 MS68 PCGS. CAC. The 1943 Walking Liberty half dollar claims a large wartime mintage of more than 53 million pieces, but neither grading service has certified any examples in a higher numeric grade than the present coin. This magnificent MS68 specimen displays sharply detailed design elements throughout, with vibrant mint luster and pristine brilliant surfaces. Population: 6 in 68, 0 finer (2/13). NGC ID# 24S9, PCGS# 6618

3636 1945 MS67 PCGS. An amazing Superb Gem, this 1945 Walking Liberty half dollar is highly lustrous with frosty silver surfaces and a high degree of eye appeal. This piece is tied for the finest certified. NGC ID# 24SF, PCGS# 6624

3637 1945 MS67 PCGS. CAC. Shades of pale gold and lavender toning grace the lustrous pristine surfaces of this well-detailed Superb Gem. PCGS has graded no coins in higher numeric grades (1/13). NGC ID# 24SF, PCGS# 6624

3638 1945-D MS67 PCGS. CAC. The 1945-D Walking Liberty half dollar can only be called scarce in MS67 condition, but finer coins are virtually unobtainable. This spectacular Superb Gem is well-detailed and brightly lustrous, with pleasing champagne-gold patina. PCGS has graded no coins in higher numeric grades, with three in MS67+ (2/13). NGC ID# 24SG, PCGS# 6625

3639 1945-D MS67 PCGS. CAC. Ex: Charles Schultz. The famous cartoonist spelled his name Schulz, so this coin is from the "other" Charles Schultz. It is a stunning Superb Gem with frosty silver luster and pale champagne toning. PCGS has never certified a finer piece (2/10). NGC ID# 24SG, PCGS# 6625

3640 1945-D MS67+ ★ NGC. CAC. Rich russet-orange and apple-green toning encompasses portions of the obverse. The reverse is brilliant. Coruscating and well preserved with an above average strike. Census: 198 in 67+ ★, 1 finer as 68, 1 finer as 68 ★ (2/13). NGC ID# 24SG, PCGS# 6625

3641 1945-S MS66+ PCGS. CAC. Knob S. Golden-brown and blue-green patina invigorates the borders of this lustrous and well preserved wartime Walker. The strike is sharp for a San Francisco issue, though the branch hand lacks full detail. NGC ID# 24SH, PCGS# 6626

**1945-S Half Dollar, Almost Completely Struck Up
Silver-White MS67
Tied for Finest Graded**

3642 1945-S MS67 PCGS. CAC. This 1945-S Walking Liberty half dollar is one of only 11 submissions in this ultimate grade at PCGS, and there are none finer (2/13). This is a thoroughly frosted silver-white example of this late-series S-mint semikey issue with no trace of discernible color otherwise. The exposed right field on the obverse is a problem area for most Walking Liberty halves, as one of the first areas to show mentionable contact. That area is mark-free here, and the coin as a whole shows only minuscule contact. Only the slightest weakness appears on the skirt lines in the center of the obverse, and the reverse is even better struck. This is one of the strike rarities from the 1940s, and this particular coin would be a cornerstone to a sharply struck S-mint set. A similarly graded PCGS example in our FUN Signature (Heritage, 1/2013), lot 4960, brought \$21,150. NGC ID# 24SH, PCGS# 6626

3643 1946 MS67 NGC. A splendid Superb Gem that gets high marks for technical merit as well as great visual appeal. Well struck, lustrous, and essentially pristine, with lovely sea-green, mauve, and yellow-gold toning intermingled across the untouched surfaces. Census: 40 in 67, 0 finer (2/13). NGC ID# 24SJ, PCGS# 6627

3644 1946 MS67 PCGS. Soft champagne-gold color adheres to the radiantly lustrous surfaces of this Superb Gem. A well executed strike imparts strong definition to the design elements, including sharp detail on the thumb of the branch hand. Impeccably preserved throughout. Population: 42 in 67 (1 in 67+), 0 finer (2/13). NGC ID# 24SJ, PCGS# 6627

1946 Half Dollar, MS67+

3645 1946 MS67+ PCGS. CAC. An exquisite Superb Gem, this 1946 Walking Liberty half dollar exhibits brilliant silver luster with lovely pastel iridescence on the obverse. The reverse is brilliant and untoned. Both sides are boldly defined and highly appealing. Population: 42 in 67 (1 in 67+), 0 finer (2/13). NGC ID# 24SJ, PCGS# 6627

3646 1947 MS67 PCGS. Spectacular shades of ice-blue and golden-brown toning blanket the well-preserved surfaces of this magnificent Walking Liberty half dollar. The design elements are well-detailed and vibrant mint luster shines through the patina. The 1947 is definitely rare at the Superb Gem level, and the issue is unknown in finer grades. Population: 38 in 67 (1 in 67+), 0 finer (2/13). NGC ID# 24SM, PCGS# 6630

**PROOF WALKING LIBERTY
HALF DOLLARS**

**First-Year Proof 1936 Walking Liberty Half
Lightly Toned PR64+**

3647 1936 PR64+ NGC. The 1936 revival of proof coinage was little-noted at the time and only 3,901 of the proof half dollars were sold. This higher-end near-Gem has quality flash under a thin layer of gold patina that richens to peach and sage along parts of the margins. Liberty's branch hand has a fully rounded thumb. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR67
Tied for Finest at NGC**

3648 1936 PR67 NGC. This magnificent Superb Gem represents the first proof issue of the Walking Liberty series. Only 3,901 examples were struck, and NGC has graded no coins in higher numeric grades (2/13). The design elements are sharply detailed throughout and the immaculate reflective surfaces show a few wisps of violet and light gold toning. NGC ID# 27V4, PCGS# 6636

**Lightly Toned 1936 Walker, PR67
One Finer at PCGS**

3649 1936 PR67 PCGS. CAC. The 1936 Walking Liberty half dollar is the first issue of the series available in proof format. With such a popular and beautiful design, the first-year proof Walking Liberties are under intense demand. Few survivors from the original mintage of 3,901 pieces achieve the Superb Gem proof level of the present example, which also boasts the CAC green sticker. As is usual for the issue, this piece shows a somewhat uniform reflectivity with little obvious contrast between fields and devices. The preservation is remarkable, the surfaces throughout showing a prevailing lilac patina with gold accents. Population: 25 in 67, 1 finer (1/13). NGC ID# 27V4, PCGS# 6636

3650 1937 PR67 NGC. Razor-sharp definition is present on most design elements, but a few rays of the sun show a little softness. The deeply reflective surfaces show traces of champagne-gold and lavender toning, with terrific eye appeal. NGC has graded 18 numerically finer examples (2/13). NGC ID# 27V5, PCGS# 6637

3651 1937 PR67 PCGS. A spectacular Superb Gem proof example from a mintage of 5,728 pieces, this coin displays sharply detailed design elements and deeply mirrored surfaces, under shades of champagne-gold and violet toning. PCGS has graded 10 numerically finer examples (2/13). NGC ID# 27V5, PCGS# 6637

3652 1939 PR67 PCGS. Splashes of apple-green, peach-gold, and plum-mauve endow this boldly struck and undisturbed Superb Gem. Only traces of the designer's monogram are present. A better proof date. NGC ID# 27V7, PCGS# 6639

3653 1940 PR67 NGC. Pumpkin-gold and silver-blue patina invigorates this flashy and well struck Superb Gem. The designer's monogram was lapped from the working die and replaced with a crude hand-engraved version, as made. NGC ID# 27V8, PCGS# 6640

3654 1941 PR67 PCGS. CAC. This spectacular Superb Gem displays mottled lime-green and lavender toning, with more color at the peripheries. The design elements are sharply detailed and the surfaces are deeply mirrored. PCGS has graded 15 numerically finer examples (1/13). NGC ID# 24SP, PCGS# 6641

3655 1942 PR67 PCGS. Faint honey-gold toning and an intricate strike combine with immaculate mirrored fields to provide exceptional eye appeal. The proof Walker series was coined for only seven years. NGC ID# 27V9, PCGS# 6642

3656 1942 PR67 PCGS. CAC. A gleaming Superb Gem specimen from the last year of proof Walking Liberty half dollar strikings with minimal patina. Overzealous die polishing on the reverse has removed some of the lines between wing feathers. NGC ID# 27V9, PCGS# 6642

3657 1942 PR67 PCGS. CAC. Last of the wartime proof issues, this sharply detailed Walking Liberty half dollar displays deeply mirrored surfaces with incredible visual appeal. PCGS has graded only 36 specimens in higher numeric grades (1/13). NGC ID# 27V9, PCGS# 6642

3658 1942 PR67+ NGC. CAC. Wartime production demands curtailed the Mint's proof offerings after 1942, but this high-end Superb Gem is a worthy representative of this final mintage. The design elements are sharply detailed throughout, with deeply reflective surfaces that show just a hint of pale green toning. NGC ID# 27V9, PCGS# 6642

1942 Walking Liberty Half Dollar, PR68 Only Three Numerically Finer at NGC

3659 1942 PR68 NGC. Crescents of cerulean-blue and golden-brown toning accent the peripheries on both sides of this magnificent Walking Liberty half dollar. The design elements display razor-sharp definition throughout and the surfaces are deeply reflective. NGC has graded only three numerically finer examples (2/13). NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

3660 1948-D MS66 Full Bell Lines PCGS. CAC. Both sides of this sharply defined Premium Gem exhibit frosty silver luster beneath delicate obverse toning and deep golden iridescent reverse toning. No finer examples are certified at PCGS or NGC. NGC ID# 24SS, PCGS# 86652

3661 1949-S MS65 Full Bell Lines Prooflike NGC. The flashy fields display myriad vertical die polish lines (as made) when inspected beneath a lens. Brilliant aside from one small spot on the bell, and virtually free from contact. Census: 11 in 65 (1 in 65+) Full Bell Lines Prooflike, 2 finer (2/13).
From The Atlanta Collection. NGC ID# 24SV, PCGS# 86655

3662 1952-S MS66 Full Bell Lines PCGS. A well-defined and satiny example with generous patina, primarily medium-gray but with elements of deep sage and gold, more prominently toward the right on each side. Population: 36 in 66 Full Bell Lines, 0 finer (2/13). NGC ID# 24T5, PCGS# 86663

1953-S Half Dollar, MS64 Full Bell Lines A Significant 20th Century Rarity

3663 1953-S MS64 Full Bell Lines PCGS. The 1953-S is clearly the rarest Franklin half dollar with a full strike, and examples rarely appear in the market regardless of grade. This Choice Mint State specimen exhibits the required complete bell lines on the reverse. Brilliant, untuned examples of this date are frequently encountered from original rolls, but they are rarely well struck. Rick Tomaska has described the 1953-S Full Bell Line Franklin half dollars as one of the most significant rarities in 20th century U.S. coinage. Population: 14 in 64 (1 in 64+) Full Bell Lines, 23 finer (2/13). NGC ID# 24T8, PCGS# 86666

3664 1957-D MS67 NGC. Dark lavender-gray and greenish-gold toning adorns the surfaces of this well-detailed Superb Gem. Vibrant mint luster is apparent, under the toning. Census: 5 in 67, 0 finer (2/13). NGC ID# 24TF, PCGS# 6673

3665 1958-D MS67 Full Bell Lines NGC. Deep cherry-red, orange-gold, and forest-green dominate the obverse. The reverse displays exquisite ocean-blue and lilac centers framed by a peripheral band of rich peach-red. Census: 15 in 67 Full Bell Lines, 3 finer as 67 ★
From The Atlanta Collection. NGC ID# 24TH, PCGS# 86675

**1960 Franklin Half Dollar, MS66
Full Bell Lines**

3666 1960 MS66 Full Bell Lines PCGS. CAC. The 1960 Franklin half dollar was a well-produced issue, and specimens often display the sharp strike and vibrant luster of the present coin. However, this delightful Premium Gem shows no mentionable signs of contact, which is not typical for this date. Shades of golden-brown and violet toning accent both sides. Population: 41 in 66 Full Bell Lines, 0 finer (2/13). NGC ID# 24TL, PCGS# 86678

3667 1962 MS65 Full Bell Lines NGC. Dappled wheat-gold and lime-green toning adorns this highly lustrous and crisply struck Gem. The fields are immaculate and the motifs exhibit only trivial contact. Census: 13 in 65 Full Bell Lines, 1 finer (2/13). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

3668 1950 PR67 NGC. A nearly brilliant Superb Gem that boasts dazzling luster and a pristine appearance. The cheek retains traces of the planchet surface, as coined. The lowest proof mintage of the type. NGC ID# 27VA, PCGS# 6691

**1951 Franklin Half Dollar, PR67
Rare Cameo Specimen**

3669 1951 PR67 Cameo NGC. CAC. The sharply detailed design elements of this spectacular Superb Gem show an unusual amount of mint frost for a 1951 Franklin, creating distinct cameo contrast with the deeply mirrored fields. A few wisps of champagne-gold toning can be seen on the well-preserved surfaces. Census: 21 in 67 Cameo, 0 finer (2/13).
From The Atlanta Collection. NGC ID# 27VB, PCGS# 86692

3670 1953 PR68 NGC. Stone-white and flawless with noticeable contrast between the darkly reflective fields and the radiant motifs, though no corresponding Cameo designation appears on the NGC insert. NGC ID# 27VD, PCGS# 6694

3671 1953 PR68 NGC. CAC. Tan-gold, jade-green, rose-red, and powder-blue endow the margins of this otherwise brilliant specimen. The pristine surfaces compare favorably with the typical 1953 proof half, which grades PR64 to PR65. Encapsulated in a former generation holder. NGC ID# 27VD, PCGS# 6694

3672 1953 PR66 Ultra Cameo NGC. The contrast on both sides, especially the obverse, is stronger than the frost layers might suggest. Great reflectivity enhances fields that show only a few wispy areas of patina.
From The Atlanta Collection. PCGS# 96694

3673 1954 PR69 NGC. A brilliant and pristine specimen whose precise strike, flashy fields, and satin luster ensure outstanding eye appeal. Census: 13 in 69, 0 finer (2/13).
Ex: St. Louis Central States Signature (Heritage, 5/2007), lot 8703, which realized \$1,495. NGC ID# 27VE, PCGS# 6695

3674 1954 PR67 Deep Cameo PCGS. The deeply mirrored fields provide nice contrast with the frosty and highly lustrous devices of this Superb Gem Deep Cameo proof. Both sides are brilliant and untuned. At certain light angles, the fields appear pitch black against the white devices, leading to the "black-and-white" term often applied to these beauties. Population: 33 in 67 (1 in 67+) Deep Cameo, 4 finer (2/13). PCGS# 96695

Ultra Cameo PR68 1955 Half Dollar

3675 1955 PR68 Ultra Cameo NGC. The frost draping both Franklin's portrait and the Liberty Bell is striking, and when the moderate-strength mirrors are tilted to just the right angle, the effect is black-and-white. An attractive example of an issue that is largely unavailable in finer Ultra/Deep Cameo grades. Census: 33 in 68 Ultra Cameo, 5 finer (2/13).
From The Atlanta Collection. NGC ID# 27VF, PCGS# 96696

3676 1956 Type One PR69 NGC. Breen-5241. According to Breen, only about 5% of the 1956 proofs feature a Type One reverse, which has low relief on the eagle's feathers. A brilliant Superb Gem, the strike is exquisite and the preservation is exemplary. NGC ID# 24TV, PCGS# 6686

3677 1956 Type One PR68 ★ Cameo NGC. Four feathertips left of the perch confirms the scarce Type One variety. Brilliant and pristine with frosty devices and glassy fields. Census: 2 in 68 ★ Cameo, 2 finer as Cameo with a Star designation (2/13).
From The Atlanta Collection. NGC ID# 24TV, PCGS# 86686

3678 1956 Type Two PR69 Ultra Cameo NGC. The intricately detailed eagle on the reverse defines this variety, the more common of two proof Franklin half dollar designs on the year. This near-perfect specimen's portrait-frost has a tiny area of brilliance on the lock to the right of Franklin's ear.
From The Atlanta Collection. NGC ID# 24TW, PCGS# 96697

3679 1957 PR68 Ultra Cameo NGC. Luminous devices and legends loom above brilliant and glassy fields. A pristine specimen, seldom encountered in such high grade with dramatic contrast. Census: 38 in 68 Ultra Cameo, 5 finer (2/13).
From The Atlanta Collection. NGC ID# 24TX, PCGS# 96698

3680 1957 PR68 Ultra Cameo NGC. An incredible cameo example. The darkly mirrored fields are free of all but a tiny lint mark in the left reverse field. The devices are covered with nearly uniform frost and present superb contrast to the viewer. Census: 38 in 68 Ultra Cameo, 5 finer (1/13).
Ex: Long Beach Signature (Heritage, 6/2001), lot 987; Long Beach Signature (Heritage, 2/2002), lot 797; Baltimore Signature (Heritage, 7/2003), lot 8089.
From The Atlanta Collection. NGC ID# 24TX, PCGS# 96698

**1958 Franklin Half Dollar, PR68 Deep Cameo
None Certified Finer at PCGS**

3681 1958 PR68 Deep Cameo PCGS. CAC. An amazing Franklin half dollar, with stunning black-on-white cameo flash, due to the incredible mint frost of the devices and the deeply mirrored fields. No distractions are visible to the naked eye, even on close inspection. Population: 21 in 68 Deep Cameo, 0 finer (2/13). NGC ID# 27VH, PCGS# 96699

3682 1959 PR68 Cameo PCGS. Radiant devices provide favorable contrast with the dramatically mirrored fields. Completely devoid of contact, the surfaces are completely brilliant. Housed in a green label holder. Population: 33 in 68 Cameo, 0 finer (1/13). *From The Atlanta Collection.* NGC ID# 27VJ, PCGS# 86700

3683 1959 PR68 Cameo NGC. Moderately contrasted with just a few tiny milk spots. The gleam of the fields is as impressive as their preservation. A quality later-date specimen. *From The Atlanta Collection.* NGC ID# 27VJ, PCGS# 86700

3684 1960 PR68 Ultra Cameo NGC. The contrast is particularly bold on the obverse of this later-date proof Franklin half. A few tiny "milk spots" in the fields stand out from an otherwise black-and-white appearance. Impressively preserved. *From The Atlanta Collection.* NGC ID# 24TY, PCGS# 96701

**1961 PR66 Half Dollar, FS-801
Strongly Doubled Reverse Motto**

3685 1961 Doubled Die Reverse PR66 NGC. FS-801. Few examples of this rarity are known and when offered they are very popular. It is rare when such a minting snafu occurs on proof coinage, as these pieces are subjected to close inspection before packaging. This is an intensely mirrored piece and brilliant throughout with no obvious or detracting contact marks. *From The Atlanta Collection.* PCGS# 6689

**1961 Doubled Die Reverse Half, PR66
Dramatically Doubled, FS-801**

3686 1961 Doubled Die Reverse PR66 NGC. FS-801. Profoundly doubled north on E PLURIBUS UNUM and UNITED. The Fivaz-Stanton guide states: "This is by far the strongest doubled die in the series, and is easily sold. ... Very few have been uncovered." This is a thoroughly brilliant coin with little or no contrast. The surfaces are essentially perfect, as indicated by the grade. Census: 32 in 66, 24 finer (1/13). *From The Atlanta Collection.* PCGS# 6689

**1961 Doubled Die Half, PR67
FS-801, None Certified Finer**

3687 1961 Doubled Die Reverse PR67 NGC. FS-801. Of the three Doubled Die Reverse proof halves known from 1961, this reverse shows the most significant spread on the lettering on the upper reverse. The opportunity to choose between multiple examples of this rarity is seldom offered to the collector. This is an all-brilliant example with deeply mirrored fields. Slight contrast can also be made out between the devices and fields. Distinguished by a couple of milky-white specks behind the lower hair of Franklin. Census: 23 in 67, 0 finer (1/13). *From The Atlanta Collection.* PCGS# 6689

3688 1962 PR68 Deep Cameo PCGS. CAC. Though the mintage of proof Franklin halves reached its summit in 1962, only a minute percentage of those specimens demonstrate the ultimate white-on-black contrast expected of modern proofs. Immaculate and virtually brilliant. NGC ID# 27VK, PCGS# 96703

EARLY DOLLARS

1795 B-5, BB-27 Silver Dollar, VG10 Three Leaves Reverse

- 3689** 1795 Flowing Hair, Three Leaves VG10 PCGS. B-5, BB-27, R.1. The plentiful variety with the diagonal bar in the left obverse field, the B-5 die marriage is seen more often than every other 1795 variety combined. This pleasing specimen shows considerable wear but few handling marks on either side. The light gray surfaces host traces of pale gold toning. NGC ID# 24WZ, PCGS# 6852

Problem-Free XF B-1, BB-21 1795 Flowing Hair Dollar

- 3690** 1795 Flowing Hair, Two Leaves XF40 PCGS. B-1, BB-21, R.2. Medium cream-gray, caramel-gold, and powder-blue toning blends throughout this lightly abraded and attractive XF silver dollar. The initial silver type, the Flowing Hair design was struck for only two years, and since the first year 1794 is a coveted rarity, type collectors are compelled to select a 1795. The Two Leaves subtype carries a modest premium, since the Three Leaves B-5 constitutes a majority of 1795 examples. The present B-1, Two Leaves example displays wear on Liberty's breast feathers but the wings and hair exhibit considerable definition. NGC ID# 24WZ, PCGS# 6853

- 3691** 1795 Draped Bust, Centered — Environmental Damage — NCS. Fine Details. B-15, BB-52, R.2. Bowers-Borckardt Die State III. This pearl-gray representative is somewhat glossy and displays occasional small dark spots. Noticeable abrasions are absent aside from small reverse rim dings at 5:30 and 7:30. Adjustment marks (as made) are relegated to the area near the UNI in UNITED. NGC ID# 24X2, PCGS# 6858

XF Sharpness B-15, BB-52 1795 Centered Draped Bust Dollar

- 3692** 1795 Draped Bust, Centered — Repaired — ANACS. XF40 Details. B-15, BB-52, R.2. Whizzing is evident on Liberty's neck, the right obverse field, near the ER in LIBERTY, and on open areas of the reverse field. Nonetheless a sharp example of this early Draped Bust variety. Toned chestnut-gold and stone-gray. NGC ID# 24X2, PCGS# 6858

AU Centered Draped Bust 1795 Dollar
Ex: Hesselgesser, B-15, BB-52

- 3693** 1795 Draped Bust, Centered AU50 PCGS. CAC. B-15, BB-52, R.2. Ex: Hesselgesser. Bowers-Borckardt Die State V. Dappled autumn-gold and forest-green toning embraces this lightly circulated and minimally abraded first-year Draped Bust dollar. Luster outlines design elements. Since even die engravers learn from mistakes, BB-52, with Liberty's bust balanced on the obverse, was probably struck after BB-51, which had the portrait entered too far to the left. In recent years, Dr. Hesselgesser has formed the best known high grade collection of Bolender die varieties.
Ex: Dr. Hesselgesser Collection (Ira & Larry Goldberg, 2/2009), lot 1047. NGC ID# 24X2, PCGS# 6858

- 3694** 1796 Small Date, Small Letters — Cleaning — PCGS Genuine. VF Details. B-1, BB-66, R.4. Mahogany-brown fields contrast moderately with olive-gray devices. No marks are noticeable on either side, though a planchet flaw is present at the obverse border near 5 o'clock. NGC ID# 24X3, PCGS# 6859

- 3695** 1796 Small Date, Small Letters — Plugged — ANACS. VF30 Details. B-2, BB-63, R.4. A roundish plug is faintly evident beneath the right ribbon end, and opposite near the ER in LIBERTY, which is re-engraved. Harshly cleaned with evidence of smoothing behind Liberty's eye. NGC ID# 24X3, PCGS# 6859

- 3696** 1797 10x6 Stars, Large Letters — Graffiti — ANACS. Fine 12 Details. B-3, BB-71, R.2. Bowers-Borckardt Die State III. The reverse exergue has a few light pinscratches, some of which form a capital H. Toned light golden-tan with blushes of sky-blue on the high points. Mildly glossy but the wings and curls offer pleasing detail. NGC ID# 24X4, PCGS# 6865

1797 Draped Bust Dollar, AU58
9x7 Stars, Large Letters, B-1, BB-73

- 3697** 1797 9x7 Stars, Large Letters AU58 PCGS. CAC. B-1, BB-73, R.3. Bowers-Borckardt Die State III. The 1797 Draped Bust dollar claims a low mintage of 7,776 pieces, with three die varieties known for the date. This coin represents the BB-73 variety, identified by the 9x7 obverse stars arrangement and the large letters in the reverse legend. The date is not as hard to locate as the low production total suggests, and die evidence indicates that the BB-73 coins were actually struck in 1798. The obverse die was used previously to coin the 1797 BB-72 variety, and the reverse was also used to strike the 1798 BB-82. Although the BB-73 is available in lower grades, it is surprisingly challenging above the XF grade level.

The present coin is a delightful near-Mint example that retains much of its original mint luster. The central design elements show a touch of softness, as usual, with just a trace of actual wear. A few faint adjustment marks are evident on the bust. Population: 5 in 58, 1 finer (2/13). NGC ID# 24X4, PCGS# 6863

- 3698** 1798 Large Eagle, Pointed 9 — Scratched — NCS. VF Details. B-9, BB-121, R.4. Bowers-Borckardt Die State IV. This better Bolender variety is sometimes designated as 10 Arrows but a lens reveals an additional three tiny arrows. Moderately cleaned with a scratch in front of the forehead and a less conspicuous scratch on each side of the N in UNITED. NGC ID# 24X6, PCGS# 6873

**Toned Midgrade VF30 1798 Dollar
Heraldic Eagle, B-27, BB-113**

- 3699** 1798 Large Eagle, Pointed 9 VF30 PCGS. CAC. B-27, BB-113, R.2. Dove-gray and golden-brown encompass this minimally abraded and attractive early dollar. Traces of luster fill design crevices, but the third party grade may be held back by a soft impression on portions of LIBERTY and the stars above the eagle. The portrait, wings, and shield are bold. NGC ID# 24X6, PCGS# 6873

**Bold Choice XF 1798 Dollar
Large Eagle, B-8, BB-125**

- 3700** 1798 Large Eagle, Pointed 9, Four Berries XF45 PCGS. B-8, BB-125, R.2. Bowers-Borckardt Die State I-II with a faint slender vertical die break on the lower left obverse field. Richly blended apple-green and autumn-gold toning embraces this sharply defined and unmarked Choice XF early silver type coin. Moderate wear on the cheek and shoulder is consistent with the grade. NGC ID# 24X6, PCGS# 6873

**1798 B-13, BB-108 Dollar, VF35
10 Arrows Reverse**

- 3701** 1798 Large Eagle, 10 Arrows VF35 PCGS. CAC. B-13, BB-108, R.2. Bowers-Borckardt Die State II with a die crack through the right wing tip to the top of AM and the border over E. The reverse die is lapped with a noticeable gap between clouds 7 and 8. Light tan high points are noted on pewter gray surfaces with hints of blue, gold, and lighter silver. A pleasing example with nice surfaces for the grade, showing only trivial handling marks. PCGS# 6876

**Choice VF 1798 Heraldic Eagle Dollar
Better B-20, BB-102 Variety**

- 3702** 1798 Large Eagle, Wide Date, Pointed 9 VF35 PCGS. B-20, BB-102, R.5. Bowers-Borckardt Die State IV. Struck near the end of the run for BB-102, with a large rim die break beneath the tail and a die break above the 79 in the date. This cream-gray and walnut-brown better variety example is refreshingly unabraded and still has hints of luster within the wings and curls. PCGS# 6877

- 3703** 1799 Irregular Date, 15 Stars Reverse Fine 15 PCGS. B-4, BB-153, R.4. Bowers-Borckardt Die State I. The famous blundered reverse die with 15 stars instead of the proper 13. The engraver tried to conceal his error by expanding the first and final clouds, but telltale star points emerge nonetheless. The stone-gray surfaces are smooth aside from faint hairlines and a single pinscratch on the central reverse. PCGS# 6879

- 3704** 1799 7x6 Stars VF20 PCGS. B-22, BB-168, R.4. Bowers-Borckardt Die State III. This scarce Bolender variety is immediately attributed by the heavy horizontal die crack across the central reverse. The present example is free from bagmarks and displays dusky cream-gray and ice-blue toning. Faintly hairlined near the profile. NGC ID# 24X7, PCGS# 6878

- 3705** 1799 7x6 Stars — Repaired — ANACS. VF20 Details. B-10, BB-163, R.2. Bowers-Borckardt Die State IV. A late die state with many reverse cracks. A loupe reveals obverse swirling metal movement characteristic of whizzing and smoothing. The reverse is cleaned and mildly granular. Light to medium golden-gray toning. NGC ID# 24X7, PCGS# 6878

**Very Fine 1799 Dollar, 7x6 Stars
B-7, BB-156**

- 3706** 1799 7x6 Stars VF20 PCGS. CAC. B-7, BB-156, R.4. Bowers-Borckardt Die State III. An evenly circulated Very Fine example with cream-gray high points and rich sea-green and plum-mauve toning throughout the fields. A small rim nick near the E in AMERICA will identify the present example in any future auction appearances. NGC ID# 24X7, PCGS# 6878

7x6 Stars 1799 Silver Dollar
Choice VF, B-5, BB-157

- 3707** 1799 7x6 Stars VF35 PCGS. CAC. B-5, BB-157, R.2. Bowers-Borckardt Die State III. Deep lavender-gray and olive-brown toning embraces this Choice VF Bust dollar. Nicely defined with mostly bold letters in E PLURIBUS UNUM. A few small ticks are noted on the field near Liberty's chin, and the reverse rim has tiny dings, including one at 5 o'clock. NGC ID# 24X7, PCGS# 6878

Partially Lustrous 1799 Dollar
XF45, B-21, BB-169

- 3708** 1799 7x6 Stars XF45 NGC. B-21, BB-169, R.3. Bowers-Borckardt Die State IV. Glimpses of tobacco-brown and forest-green endow the margins of this otherwise cream-gray representative. Luster shimmers from design elements and there are no detrimental abrasions. Ex: Jules Reiver Collection (Heritage, 1/2006), lot 23593, which realized \$5,750. NGC ID# 24X7, PCGS# 6878

1799 Draped Bust Dollar, XF45
B-5, BB-157 Variety, Scarce Die State IV

- 3709** 1799 7x6 Stars XF45 PCGS. B-5, BB-157, R.2. Bowers-Borckardt Die State IV. The BB-157 variety is recognized by the indented top of the 1 in the date and the point of the star touching the lower point of the eagle's beak. This lightly worn specimen retains most of its original design detail and the pleasing silver-gray surfaces display traces of mint luster. An extensive network of die cracks on the reverse identifies the scarce late die state. NGC ID# 24X7, PCGS# 6878

- 3710** 1800 — Cleaned — ANACS. XF40 Details. B-16, BB-187, R.2. Bowers-Borckardt Die State III. Moderately hairlined and mildly glossy, but some luster remains and most of E PLURIBUS UNUM is clear. Marks are absent except for a faint pinscratch from the hair ribbon to star 11. NGC ID# 24X9, PCGS# 6887

Smooth 1801 Silver Dollar, VF25
B-3, BB-213

- 3711** 1801 VF25 PCGS. B-3, BB-213, R.3. Bowers-Borckardt Die State II. Delicate straw-gold toning visits the fields, though the high points display ice-blue. The mildly bright surfaces are refreshingly devoid of abrasions. Much of the eagle's plumage is evident, and all letters in E PLURIBUS UNUM are at least partly readable. NGC ID# 24XA, PCGS# 6893

- 3712** 1801 — Cleaned — ANACS. XF40 Details. B-2, BB-212, R.3. Bowers-Borckardt Die State II. Hairlined and somewhat bright but rotation reveals pockets of luster. The peripheries display golden-tan toning. Marks are inconsequential aside from a small obverse rim ding at 7:30. NGC ID# 24XA, PCGS# 6893

- 3713** 1802 Narrow Date — Cleaned — ANACS. VF30 Details. B-6, BB-241, R.1. Bowers-Borckardt Die State III. The hairlined surfaces are mostly stone-gray, though golden-brown and violet-blue toning embraces the borders. Small rim dings are noted at 4 o'clock on the reverse and at 12 and 1 o'clock on the obverse. NGC ID# 24XB, PCGS# 6895

- 3714** 1803 Large 3 — Cleaned — ANACS. VF30 Details. B-6, BB-255, R.2. Bowers-Borckardt Die State II. This midgrade Bust dollar type coin may have been part of the early 1804 delivery that led, more than three decades later, to the production of the famous proof 1804 dollars. The present piece is gunmetal-blue and almond-gold with smooth but mildly bright surfaces. PCGS# 6901

GOBRECHT DOLLAR

1836 Judd-60, Die Alignment I Gobrecht Dollar
Remarkably Strong Strike and Clean Surfaces

- 3715** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Altered Surfaces — PCGS Genuine. Proof AU Details. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (the center of Liberty's head is opposite the O in DOLLAR). The angling die scratch above the eagle's wing is very faint, requiring strong magnification to discern. This places the striking period for this coin in the second batch believed to have been struck in the last week of December. The surfaces have obviously been cleaned, and the obverse displays a deeper, dull gray patina than the reverse. Still, the fields display significant original brightness from the proof finish. Detailing on the figure of Liberty and the eagle are remarkably strong and just a touch of high-point friction shows. Each side is also notably free from any detracting contact marks. PCGS# 11225

SEATED DOLLARS

- 3716 1843 AU53 NGC.** A briefly circulated and typically struck representative of the scarce No Motto type. The margins offer light sun-gold toning. Faintly hairlined but without any obtrusive abrasions. NGC ID# 24YD, PCGS# 6929
- 3717 1844 AU55 NGC.** The low commercial mintage of 20,000 pieces came from a single pair of dies. On the obverse, LIBERTY and the shield are die doubled. The central reverse displays numerous die lines. This lightly circulated and minimally toned example is well defined and has no relevant marks. Census: 24 in 55, 62 finer (2/13). NGC ID# 24YE, PCGS# 6930

1844 Seated Dollar, MS61 Doubled Obverse Die

- 3718 1844 MS61 NGC.** A very scarce date with a mintage of just 20,000 pieces. Circulation strikes are identified by prominent die doubling on Liberty's shield and coarse die lines on the reverse field near the center. The present representative is satiny and displays milky cream-gray, lime-green, and rose-gold toning. The fields display scattered small marks consistent with the grade. Census: 8 in 61, 12 finer (2/13). NGC ID# 24YE, PCGS# 6930
- 3719 1845 XF45 PCGS.** This better date No Motto silver dollar has minimal wear though the fields are typically abraded and a bit bright. A scant 24,500 pieces were issued. Housed in an old green label holder. NGC ID# 24YF, PCGS# 6931

Near-Mint 1846-O Dollar Introductory New Orleans Issue

- 3720 1846-O AU58 NGC.** The 1846-O is the first silver dollar issue at New Orleans and has a mintage of just 59,000 pieces. Unlike the 1859-O and 1860-O, no Uncirculated bags were found, and near-Mint examples are rare. This pearl-gray, tan-gold, and steel-blue representative is well defined and satiny with a few delicate field marks near the eagle's beak. Census: 28 in 58, 19 finer (2/13). Ex: Orlando FUN Signature (Heritage, 1/2004), lot 7174. NGC ID# 24YH, PCGS# 6933
- 3721 1846-O — Improperly Cleaned — NGC Details. Unc.** Chestnut-gold and stone-gray alternate across this satiny silver dollar. Surprisingly unabraded, though delicate vertical hairlines are noted on the right obverse field. The 1846-O is the first New Orleans issue of the denomination, and is rarely encountered with the present sharpness. NGC ID# 24YH, PCGS# 6933
- 3722 1847 AU55 NGC.** Sea-green, lilac-gray, and tan-brown toning alternate across this boldly defined No Motto Philadelphia dollar. No marks are consequential. Liberty's waist displays granularity. NGC ID# 24YJ, PCGS# 6934

- 3723 1859 XF45 PCGS.** This attractive Seated Liberty dollar has peripheral gold and blue toning on the obverse with no toning on the reverse. Scattered marks are consistent with the Choice XF grade. Population: 23 in 45, 77 finer (2/13). NGC ID# 24YX, PCGS# 6946
- 3724 1859-O MS60 NGC.** Undoubtedly from the Treasury release of 1859-O and 1860-O dollars in 1962. The mint luster is brightly frosted and each side is nearly brilliant. Lightly abraded except for a long scrape in the left obverse field. NGC ID# 24YY, PCGS# 6947
- 3725 1860-O MS61 PCGS.** The mostly brilliant surfaces of this impressive Mint State specimen show a scattering of minor, grade-consistent contact marks on both sides, with traces of greenish-gold toning. Vibrant mint luster and well-detailed design elements enhance the visual appeal. NGC ID# 24Z3, PCGS# 6950
- 3726 1860-O MS61 PCGS.** This attractive Mint State specimen is well-detailed in most areas, with just a touch of softness on the upper stars and Liberty's head. The partially prooflike, mostly brilliant surfaces show only minor contact marks, with a trace of pale gold toning. NGC ID# 24Z3, PCGS# 6950

1860-O Seated Liberty Dollar, MS64 Conditionally Very Scarce at This Level

- 3727 1860-O MS64 NGC.** The 1860-O Seated Liberty dollar claims a substantial mintage of 515,000 pieces, making the issue reasonably available in lower grades. However, high grade examples are elusive. This attractive Choice example is well-detailed in many areas, but some softness shows on Liberty's foot and the stars. Frosty mint luster shines through a pleasing patina of lavender-gray and pale gold. Census: 36 in 64, 11 finer (2/13). NGC ID# 24Z3, PCGS# 6950

Choice 1860-O Seated Dollar Attractive Multicolor Toning

- 3728 1860-O MS64 PCGS.** Dusky shades of lavender, blue, gray, and golden-brown patina mingle on the lustrous surfaces of this well-preserved Choice specimen. The design elements are well-detailed, with a touch of the usual softness on the stars. Eye appeal is outstanding. Population: 31 in 64, 9 finer (2/13). NGC ID# 24Z3, PCGS# 6950
- 3729 1871 AU53 NGC.** Lightly rubbed across the high points, a touch moreso on the obverse. Scattered small abrasions visit still-lustrous surfaces; the antique-gold-accented reverse in particular still gleams. NGC ID# 24ZG, PCGS# 6966

- 3730 1871 MS61 NGC.** The lightly marked surfaces of this Mint State Seated Liberty dollar are toned in attractive shades of lavender-gray and gold. Prooflike reflectivity is evident in many areas and the design elements are well-detailed. NGC ID# 24ZG, PCGS# 6966

PROOF SEATED DOLLARS

Underrated 1853 Restrike 'Novodel' Seated Dollar, PR61

- 3731 1853 Restrike PR61 PCGS.** So far as is known, no original proofs were struck in 1853 of the Seated dollar, although for collectors' sakes the situation was apparently rectified a decade later, when perhaps a dozen restrike proofs were made either from a new obverse die or one previously unused. As here, the obverse of all these restrikes shows diagonal, raised file marks just below Liberty's rock, beginning at the 8 and continuing to the right side of the 3. The obverse also shows a combination of raised die lines in the fields and many short hairline scrapes, most prominent on Liberty's thighs, shield, and foot. Notable strike softness appears on the reverse, especially on the eagle's left (facing) wing and neck feathers.

The 1853 proof dollars are extremely rare, even though they are likely underrated due to the broad availability of business strikes of this year. The proof 1853s are also overshadowed by the Seated dollar issues of 1851 and 1852, which are rare in any grade. The *Bowers Buyer's Guide* to the series calls the 1853 restrikes "novodels" due to the absence of known originals. Population: 2 in 61, 3 finer (2/13). NGC ID# 2527, PCGS# 6996

1867 Seated Dollar, PR64

- 3732 1867 PR64 NGC.** This deeply toned Choice proof possesses exceptional eye appeal with mirrored fields and lustrous devices hidden beneath violet, sea-green, and gold toning on both sides. The devices are boldly detailed as expected on this fully original specimen. Census: 59 in 64, 9 finer (2/13). NGC ID# 252N, PCGS# 7015

1871 Silver Dollar, PR64 Underlying Cameo Contrast

- 3733 1871 PR64 PCGS.** This Seated Liberty silver dollar is a splendid Choice proof specimen that features fully mirrored fields around its satin devices, with pale gold and iridescent toning on both sides that prevent a Cameo designation. Population: 49 in 64 (1 in 64+), 20 finer (2/13). NGC ID# 252T, PCGS# 7019

TRADE DOLLARS

- 3734 1873-S Chop Mark MS62 PCGS.** A single chop mark is entered beneath the eagle's right (facing) wing. The punch causes a granular texture on Liberty's lower forearm. The fields exhibit moderate chatter. Population: 7 in 62, 2 finer (2/13). PCGS# 87033

- 3735 1873-SMS62 PCGS.** All 1873-dated Trade dollars are scarce, as most were exported to the Orient. In Uncirculated grades, the 1873-S is approximately eight times rarer than the 1877-S. This crisply struck and lustrous representative exhibits light to medium caramel-gold toning and is only lightly abraded. Housed in a green label holder. *Ex: Palm Beach Signature (Heritage, 11/2004), lot 7632, which realized \$1,437.50.* NGC ID# 252Y, PCGS# 7033

**1874-CC Trade Dollar, MS63
Rare Issue in High Grade**

- 3736 1874-CC MS63 PCGS. CAC. Micro CC.** The 1874-CC Trade dollar fulfilled its intended purpose admirably, and most examples of the substantial mintage were heavily circulated in the China trade. Accordingly, high-grade specimens are elusive today, but this well-detailed Select example is lustrous and appealing, with only minor contact marks and pleasing silver-gray patina. Population: 45 in 63 (2 in 63+), 20 finer (2/13). NGC ID# 2532, PCGS# 7035

**1874-S Trade Dollar, MS64
Heavily Exported Issue**

- 3737 1874-S MS64 PCGS. Large S, no period after FINE.** The 1874-S Trade dollar was produced in large numbers, but most of the mintage was heavily circulated in the China trade, and few high-grade examples have survived. This attractive Choice specimen displays well-detailed design elements and bright mint luster, with hints of light gold toning. Population: 22 in 64 (1 in 64+), 2 finer (2/13). NGC ID# 2533, PCGS# 7036

**1875-CC Trade Dollar, MS64
Variegated Toning, Sharply Defined**

- 3738 1875-CC MS64 PCGS. Type One Reverse with a berry under the claw.** The thick mint frost is abundantly evident even beneath the multiple layers of golden, gray, rose, and lilac that are spread over each side. Surprisingly well struck, the only areas of softness are at the top of the eagle's left wing and right (facing) claw. Light abrasions are peppered through the fields, but largely invisible because of the toning. NGC ID# 2535, PCGS# 7038

**White Mint State Chop Mark
1876-CC Trade Dollar**

- 3739 1876-CC Chop Mark MS61 PCGS. Type One Obverse. Type Two Reverse.** Tall CC. Three chop marks are noted, on the field above the knees, near star 9, and and near the arrowheads. An untuned Carson City Trade dollar with pleasing sharpness and bright luster surrounding design elements. PCGS# 87042

- 3740 1876-S MS62 PCGS. Type One Obverse. Type Two Reverse.** Minute S. Medium wheat-gold toning graces this lustrous and unmarked Old West Trade dollar. The strike is crisp despite minor blending on the eagle's claws. NGC ID# 253B, PCGS# 7043

- 3741 1877 MS63 PCGS. CAC. Dazzling cartwheel sheen and medium peach-gold toning** ensure the eye appeal of this appealing example. Apparent marks are limited to a few small ticks beneath the extended arm. NGC ID# 253C, PCGS# 7044

**Brilliant 1877-CC Trade Dollar
MS62 Chop Mark**

- 3742 1877-CC Chop Mark MS62 PCGS. CAC.** A single large chop mark is located near Liberty's lap. The chop mark causes a moderate bend at the centers. Brilliant and lustrous with a good strike and only minor field abrasions. Interesting clash marks (as coined) are located near the eagle. Population: 5 in 62, 1 finer (2/13). PCGS# 87045

- 3743 1877-S MS61 PCGS. Large S. Cream-gray and orange-gold patina** embraces this satiny and sharply struck silver type coin. Only minor marks are detected beneath a loupe. The Act of July 22, 1876 revoked legal tender status for the Trade dollar, a Congressional blunder that left many workers saddled with such pieces in their pay. NGC ID# 253E, PCGS# 7046

- 3744 1877-S MS62 PCGS. Large S.** A wisp of chestnut-gold toning is confined to the margins. Lustrous and semiprooflike with a smooth reverse and minor obverse field grazes. Encapsulated in a green label holder. NGC ID# 253E, PCGS# 7046

3745 1877-S MS63 PCGS. CAC. Large S. Dusky multicolor swaths of powder-blue, lavender, fire-red, and lemon-gold endow this satiny Select Trade dollar. The strike is bold except on the eagle's left (facing) claw. NGC ID# 253E, PCGS# 7046

3746 1878-S MS61 ANACS. This lovely Trade dollar was the last circulation strike issue of the series, as all of the Mints began production of Morgan dollars. The Trade dollar became a needless commodity. This piece has reflective fields with light cameo contrast and hints of gold toning, mostly on the reverse. NGC ID# 253G, PCGS# 7048

3747 1878-S MS62 PCGS. Caramel-gold and cream-gray embrace this mildly prooflike example. The strike is exemplary and moderate marks are limited to the left obverse field. GRAINS and TRADE are lightly die doubled, though to a lesser degree than on FS-801. NGC ID# 253G, PCGS# 7048

3748 1878-S MS62 PCGS. Rich golden-brown and sea-green toning encompasses this coruscating and crisply struck type coin. A lens locates only wispy field abrasions. The Bland-Allison Act of February 28, 1878, ended business strike production of the Trade dollar. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

1874 Trade Dollar, PR65 Only 700 Examples Struck

3749 1874 PR65 PCGS. A blanket of champagne-gold and cerulean-blue toning enlivens the well-preserved and deeply mirrored surfaces of this rare Gem. The design elements are well-detailed, with just a touch of softness on the stars and Liberty's head. From a small proof mintage of only 700 pieces. Population: 9 in 65, 1 finer (2/13). NGC ID# 27YK, PCGS# 7054

PR64+ Cameo 1874 Trade Dollar

3750 1874 PR64+ Cameo NGC. Intermingled shades of golden-brown, ruby-red, and cobalt-blue patina enliven the surfaces of this high-end Choice example. The design elements are sharply detailed throughout and the reflective fields provide evident contrast with the luminous motifs. Census: 18 in 64 (2 in 64+) Cameo, 11 finer (2/13). PCGS# 87054

1879 Trade Dollar, PR64 Hidden Cameo Contrast

3751 1879 PR64 PCGS. CAC. A stunning Choice proof, this 1879 Trade dollar features gorgeous gold, russet, and blue toning over deeply mirrored fields and lustrous devices that combine to form excellent contrast. The depth of toning prevents a cameo designation to this beauty. PCGS has graded just 64 finer proofs (2/13). NGC ID# 27YR, PCGS# 7059

1880 Trade Dollar, PR64 Variegated Obverse Toning

3752 1880 PR64 PCGS. The obverse of this Choice proof Trade dollar exhibits variegated iridescent toning while the reverse has evenly distributed sky-blue and gray patina. A lovely example from the third proof-only Trade dollar issue. PCGS has graded 87 finer proof examples of this issue (2/13). NGC ID# 27YS, PCGS# 7060

Cameo PR64 1880 Trade Dollar Contrasted Through Toning

3753 1880 PR64 Cameo PCGS. The 1880 Trade dollar arguably was more popular after it was taken out of regular production, as proof mintages spiked over 1,500 pieces in 1879 and 1880, when no business strikes were issued. This well-contrasted example from the latter year has bold blue, violet, and gold-to-orange patina, the latter color echoed at the margins on the reverse of an otherwise silver side. Population: 53 in 64 (1 in 64+) Cameo, 37 finer (2/13). PCGS# 87060

MORGAN DOLLARS

3754 1878 8TF MS65 PCGS. VAM-6. Die doubling on PLURIBUS helps to identify this collectible 8TF VAM variety. Stone-white and lustrous with a bold strike and an immaculate reverse. The cheek displays light grazes. NGC ID# 253H, PCGS# 7072

3755 1878 8TF MS65+ PCGS. CAC. VAM-14.1A. Mingled shades of violet, gray, and golden-brown toning create a spectacular play of colors when this high-end Gem is tilted in the light. The design elements are well-detailed and vibrant mint luster shines through the patina. NGC ID# 253H, PCGS# 7072

**1878 Morgan Dollar, AU58
Weak 7/8 Tailfeathers
Rare and Popular VAM-44**

3756 1878 7/8F AU58 PCGS. CAC. VAM-44, Triple Blossoms, 7/8 Tailfeathers Weak. A Top 100 Variety. A tremendously popular variety, with the obverse die tripled and the reverse doubled. The leaves and cotton balls are pick up points for the obverse tripling, while the reverse doubling is most apparent on the eagle's legs. The "Weak" tailfeathers designation was awarded because only the tips of three feathers show beneath the primary seven-feathers motif. This variety has been called the "King of VAMs" and collectors prize examples in all grades and conditions. VAMWorld estimates only about 70 specimens survive in all grades.

The present coin is an attractive near-Mint example with the tripled blossoms easily visible and just a trace of wear on the other devices. The lightly abraded surfaces show prooflike reflectivity in most areas, with a scattering of minor hairlines and contact marks that explain the grade. Population: 6 in 58, 5 finer (2/13). PCGS# 133829

3757 1878 7TF Reverse of 1879 MS65 PCGS. Pleasing peach-gold, plum-red, and cobalt-blue toning embraces much of the peripheries. This lustrous Gem is well struck and virtually void of contact. Pinpoint carbon is relegated to the upper left reverse quadrant. NGC ID# 253L, PCGS# 7076

3758 1878-CC MS65 PCGS. CAC. A sharply detailed Gem, with vibrant cartwheel mint luster and virtually pristine surfaces. The 1878-CC is an important issue for first-year mintmark type collectors. NGC ID# 253M, PCGS# 7080

3759 1878-CC MS64 Deep Mirror Prooflike NGC. A sharply detailed, deeply mirrored Morgan dollar from the first year of the design, this coin is doubly attractive because of its charismatic Carson City mintmark. A few hints of gold and turquoise toning accent the peripheries. NGC ID# 253M, PCGS# 97081

3760 1878-S MS66+ PCGS. CAC. This sensational Premium Gem exhibits fully brilliant and frosty silver luster with pristine surfaces displaying only traces of peripheral gold toning. PCGS has only certified 21 finer examples (2/13). NGC ID# 253R, PCGS# 7082

Smooth MS62 1879-CC Dollar

3761 1879-CC MS62 PCGS. Light chestnut-gold toning visits the peripheries of this satiny semikey Carson City silver dollar. The cheek and fields are uncommonly unabraded for the MS62 level. The strike is good with moderate blending on the eagle's breast and the hair above the ear. Encased in a green label holder. NGC ID# 253T, PCGS# 7086

1879-CC Silver Dollar, MS64+ Normal Mintmark

3762 1879-CC MS64+ PCGS. The 1879-CC Morgan dollar is one of the "big three" among Carson City issues, with two major varieties known. This example is the Normal Mintmark variety that is scarcer and in greater demand than the so-called Capped Die variety. Both sides of this brilliant and beautiful near-Gem have reflective fields with wisps of reddish-gold toning along the borders. NGC ID# 253T, PCGS# 7086

**Near-Gem 1879-CC Dollar
Top 100 'Capped Die' VAM-3**

3763 1879-CC Capped Die MS64 PCGS. CAC. VAM-3. A Top 100 Variety. The "Capped Die" variety is better described as a Medium over Small CC mintmark. The minute die chips within the mintmark area were likely caused by the die worker attempting to conceal incorrect use of the Medium CC punch. The present lustrous near-Gem is much nicer than the typical Mint State example. The cheek and fields are impressively smooth and the lustrous surfaces exhibit original golden-brown, dove-gray, and blue-green toning. NGC ID# 253T, PCGS# 7088

3764 1880-CC MS65 PCGS. The tiny dash below the second 8 is a frequently encountered die characteristic. This lovely Gem has light gold toning over satiny silver surfaces with excellent eye appeal. NGC ID# 2542, PCGS# 7100

3765 1880-CC MS66 PCGS. A frosty and highly lustrous Premium Gem, this Third Reverse specimen is fully brilliant without toning on either side. Just 28 finer examples are PCGS certified (2/13). NGC ID# 2542, PCGS# 7100

**1880-CC Morgan Dollar, MS66+
Usual Third Reverse**

3766 1880-CC MS66+ PCGS. CAC. An extraordinary example from a moderate mintage of 591,000 coins, this Premium Gem exhibits brilliant silver surfaces with frosty luster and bold design motifs. The 1880-CC has the seventh lowest Carson City certified population out of 13 issues. Only 28 examples are PCGS graded finer than this piece (2/13). NGC ID# 2542, PCGS# 7100

3767 1880-CC MS64 Deep Mirror Prooflike PCGS. The usual Third Reverse design, here with deeply mirrored fields that provide a nice frame around the frosty silver devices. A few trivial dark spots and wisps of toning are noted on each side of this Choice Mint State specimen. NGC ID# 2542, PCGS# 97101

3768 1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4. A Top 100 Variety. Beautiful orange-gold and lilac toning consumes the obverse. The reverse is close to brilliant. Lustrous and crisply struck with a clean reverse and moderate obverse contact. NGC ID# 253Z, PCGS# 7108

3769 1880-O MS64 PCGS. CAC. Sharply detailed for a New Orleans issue, this delightful Choice example displays smooth brilliant surfaces, with vibrant mint luster and a number of thin die cracks through the reverse legend. PCGS has graded 32 numerically finer coins (2/13). NGC ID# 2543, PCGS# 7114

Multicolor MS66 1880-S Dollar

3770 1880-S MS66 PCGS. CAC. Large S. Spectacular cherry-red, aquamarine, and canary-gold toning alternates across the obverse. The reverse is mostly brilliant but does have narrow bands of powder-blue and lemon near the rim. Lustrous and nicely struck with minor grazes on the left obverse. The lower reverse displays faint fingerprint fragments. NGC ID# 2544, PCGS# 7118

3771 1880-S MS67+ PCGS. CAC. An eye-catching and semicontrasted 1880-S dollar with partial reflectivity in fields that remain resolutely silver-white with just a hint of patina at certain angles. Amply frosted and crisply struck, a great type coin. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68
Brilliant, Semiprooflike, Fully Struck**

3772 1880-S MS68 PCGS. The term "ultimate type coin" is one frequently encountered, especially in auctions where high-grade coins tend to be offered. This is an immaculate Morgan, and it displays every attribute the 1880-S is so well known for. The devices are heavily frosted, the fields are gleaming with strong a semiprooflike finish, and the devices display pinpoint striking definition. NGC ID# 2544, PCGS# 7118

**Premium Gem 1881 Morgan Dollar
Spectacular Multicolor Toning**

3773 1881 MS66 PCGS. CAC. Dark shades of gray, violet, and champagne-gold patina visit the surfaces of this spectacular Premium Gem. The design elements are well-detailed, with just the usual touch of softness on the hair above Liberty's ear, and vibrant mint luster shines through the toning. Population: 83 in 66 (1 in 66+), 2 finer (2/13). NGC ID# 2546, PCGS# 7124

**1881 Morgan Silver Dollar
MS65 Deep Mirror Prooflike**

- 3774 1881 MS65 Deep Mirror Prooflike PCGS.** Original, mottled gold and russet toning with crisply defined, frosted devices. The fields are extraordinarily deep in their mirrored reflectivity, and there are only two small peck marks on Liberty's face that are worthy of mention. This issue commands a higher premium in DMPL than it does in proof. No coins have been certified finer by either NGC or PCGS with the combined population a mere 19 coins in Gem condition (2/13).
Ex: FUN Signature (Heritage, 1/2003), lot 7850; ANA Signature (Heritage, 8/2012), lot 6612; Dallas Signature (Heritage, 10/2012), lot 4761. NGC ID# 2546, PCGS# 97125

- 3775 1881-CC MS66 PCGS.** The left one-third of the obverse has deep rainbow iridescence and the balance of the obverse, along with the entire reverse, displays untuned silver brilliance. A splendid Premium Gem specimen. NGC ID# 2547, PCGS# 7126
- 3776 1881-CC MS66+ PCGS. CAC.** Razor-sharp definition is apparent on all design elements and vibrant mint luster lights up the surfaces of this spectacular Morgan dollar from the popular Carson City Mint. Eye appeal is terrific. NGC ID# 2547, PCGS# 7126
- 3777 1881-CC MS66+ PCGS. CAC.** The 1881-CC Morgan dollar is always in demand because of its low mintage and charismatic mintmark. This high-end Premium Gem features frosty devices and vibrant mint luster, with brilliant fields that show a few hints of golden-tan toning and no mentionable distractions. NGC ID# 2547, PCGS# 7126
- 3778 1881-CC MS66+ PCGS. CAC.** A low-mintage issue from the popular Carson City Mint, this high-end Premium Gem displays well-detailed design elements and vibrant mint luster, with outstanding eye appeal. NGC ID# 2547, PCGS# 7126

- 3779 1881-CC MS66+ PCGS. CAC.** A high-end Premium Gem from the popular Carson City Mint, this coin displays vibrant mint luster and sharply detailed design elements, with a few wisps of golden-tan toning. NGC ID# 2547, PCGS# 7126
- 3780 1881-O MS65 NGC.** Both sides of this lovely Gem are frosty and highly lustrous without any evidence of toning. NGC has graded just 14 finer pieces (2/13). NGC ID# 2548, PCGS# 7128
- 3781 1881-O MS64 Deep Mirror Prooflike PCGS. CAC.** The well-detailed frosty design elements stand out boldly against the deeply mirrored fields of this attractive Choice Morgan dollar. A few minor contact marks and hairlines an even higher grade. PCGS has graded only 12 numerically finer specimens (2/13). NGC ID# 2548, PCGS# 97129
- 3782 1882 MS65+ PCGS.** This high-end Gem features sharply detailed design elements and vibrant cartwheel mint luster, with a few hints of golden-tan toning. The surfaces are free of mentionable distractions and overall eye appeal is outstanding. NGC ID# 254A, PCGS# 7132
- 3783 1882 MS65 PCGS. CAC.** An impressive Gem specimen, this 1882 Morgan dollar exhibits untuned surfaces with brilliant mint frosty and exceptional design definition. A highly appealing specimen. NGC ID# 254A, PCGS# 7132

**MS66+ 1882 Morgan Dollar
Delicate High-Point Frost**

- 3784 1882 MS66+ PCGS. CAC.** Excellent cartwheel luster with delicately frosted high points to the devices and a blush of rose on the obverse of an otherwise silver-white piece. The peripheries show hints of striking softness, but interior details such as the hair over Liberty's ear display better definition. NGC ID# 254A, PCGS# 7132
- 3785 1882-CC MS66 NGC.** One of the more available dates in the Treasury releases of the 1960s-70s, the 1882-CC is nonetheless seldom seen at higher grade levels than the present Premium Gem, which boasts effulgent luster over untuned silver-white surfaces that are frosty and fully struck. NGC has certified only 49 submissions numerically finer (2/13). NGC ID# 254B, PCGS# 7134

Colorful MS67 1882-CC Dollar

- 3786 1882-CC MS67 NGC.** The obverse is fully patinated in exquisite shades of cherry-red, sea-green, and honey-gold. The reverse is close to brilliant. This Carson City type coin provides potent luster and a good strike. The fields are smooth and the cheek exhibits only delicate marks. NGC ID# 254B, PCGS# 7134

- 3787 1883-CC MS66 PCGS. CAC. VAM-5A.** The N in IN is clearly clashed in front of Liberty's neck. Beautifully preserved with potent luster and a wisp or two of chestnut toning. Housed in a green label holder.
Ex: Long Beach Signature (Heritage, 2/2005), lot 10111, which realized \$874. NGC ID# 254H, PCGS# 7144
- 3788 1883-CC MS66+ PCGS. CAC.** The creamy surfaces of this high-end Premium Gem are free of significant contact marks and the well-detailed design elements show attractive mint frost. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 254H, PCGS# 7144
- 3789 1883-CC MS66+ PCGS. CAC.** Vibrant mint luster and sharply detailed design elements are the calling cards of this high-end Premium Gem from the famous Carson City Mint. The mostly brilliant surfaces show just a touch of light gold toning and no mentionable distractions. NGC ID# 254H, PCGS# 7144
- 3790 1883-CC MS66+ PCGS. CAC.** This high-end Premium Gem exhibits sharply detailed design elements and vibrant cartwheel mint luster, with unmarked brilliant surfaces and tremendous eye appeal. NGC ID# 254H, PCGS# 7144

**1883-CC Dollar, MS67
Rolling Cartwheel Luster**

- 3791 1883-CC MS67 PCGS.** A minimally toned Superb Gem with maximum eye appeal. Though not Prooflike in any respect, this piece has rolling cartwheel luster and a hint of frost visiting the uppermost parts of the devices. Decently detailed and smooth, though a stuttering luster graze passes over the top star at the bottom right obverse. NGC ID# 254H, PCGS# 7144

**Superb Gem 1883-CC Morgan Dollar
Only Four Numerically Finer Coins at PCGS**

- 3792 1883-CC MS67 PCGS. CAC.** An incredible Superb Gem Morgan dollar from the storied Carson City Mint, this coin displays sharply detailed design elements and vibrant cartwheel mint luster. The brilliant surfaces are impeccably preserved, adding to the terrific eye appeal. PCGS has graded only four numerically finer examples (2/13). NGC ID# 254H, PCGS# 7144

- 3793 1883-CC MS65 Deep Mirror Prooflike NGC.** A stone-white Gem that possesses dazzling field reflectivity and a precise strike. Only minor contact denies an even finer grade. Though the 1883-CC is available in Mint State due to its GSA appearances, examples with the present eye appeal are scarce. NGC ID# 254H, PCGS# 97145
- 3794 1883-O MS66 PCGS. CAC.** Streaks of dark golden-brown toning are barely visible on the brilliant silver surfaces of this highly lustrous Premium Gem. PCGS has only certified 36 finer examples (2/13). NGC ID# 254J, PCGS# 7146
- 3795 1883-O MS66+ PCGS. CAC.** The 1883-O is an available date in lower grades, but it becomes very scarce above the MS66 grade level. This high-end Premium Gem is sharply detailed and brightly lustrous, with outstanding eye appeal. NGC ID# 254J, PCGS# 7146
- 3796 1883-O MS66+ PCGS. CAC.** Razor-sharp definition is evident on all design elements and the pristine brilliant surfaces radiate vibrant mint luster. Visual appeal is extraordinary. PCGS has graded 36 numerically finer examples, with two in MS66+ (2/13). NGC ID# 254J, PCGS# 7146
- 3797 1884-CC MS66+ NGC. CAC. VAM-3.** The 1 in the date is nicely repunched. A highly lustrous and essentially brilliant Carson City silver dollar. Nicely struck and only lightly abraded. Traces of roller marks (as made) are confined to Liberty's jaw. NGC ID# 254M, PCGS# 7152
- 3798 1884-CC MS65 Deep Mirror Prooflike PCGS.** An impressive Deep Mirror Prooflike Gem, this Carson City Morgan dollar has extremely deep mirrors around frosty and highly lustrous devices with exceptional cameo contrast. NGC ID# 254M, PCGS# 97153

**1884-CC Morgan Silver Dollar
MS66 Deep Mirror Prooflike**

- 3799 1884-CC MS66 Deep Mirror Prooflike PCGS. CAC.** Although the 1884-CC Morgan dollar has the second highest combined certification population, examples such as this Premium Gem with its Deep Mirror Prooflike surfaces are quite rare. In fact, PCGS has only certified three finer examples. This amazing piece has fully and deeply mirrored fields around highly lustrous devices with brilliant and untuned silver surfaces. NGC ID# 254M, PCGS# 97153
- 3800 1884-S AU58 NGC.** An attractive near-Mint representative of this popular branch-mint issue, with just a trace of wear on the sharply impressed design elements. The lightly marked surfaces display cartwheel mint luster and a few hints of pale gold toning. NGC ID# 254P, PCGS# 7156
- 3801 1884-S AU58 NGC.** A well-detailed near-Mint example with just a trace of wear on the high points of the design, this coin retains much of its original mint luster, under wisps of pale gold and lavender toning. NGC ID# 254P, PCGS# 7156

**1884-S Morgan Dollar, MS61
Challenging Issue in Mint State**

- 3802 1884-S MS61 NGC.** An available date in lower grades, the 1884-S was not heavily saved by contemporary collectors and not well-represented in the Treasury releases of the 1960s. Accordingly, high grade specimens are quite elusive today. This lustrous Mint State example is well-detailed, with hints of golden-tan and crimson toning. The surfaces are lightly marked for the grade. NGC ID# 254P, PCGS# 7156

**1885 Silver Dollar, MS67
Exceptional Quality**

- 3803 1885 MS67 PCGS. CAC.** This incredible Superb Gem has highly lustrous silver surfaces with brilliant mint frost and no evidence of toning on either side. Although the 1885 is a common date in the Morgan dollar series, few examples are available as fine as this piece. Population: 91 in 67 (7 in 67+), 1 finer (2/13). NGC ID# 254R, PCGS# 7158

**MS67+ 1885 Silver Dollar
Peripherally Toned**

- 3804 1885 MS67+ PCGS. CAC.** Golden-brown, lavender, and navy-blue toning enriches the obverse margin, but the remainder of this highly lustrous Superb Gem is nearly brilliant. Both sides are splendidly void of abrasions, and the strike is above average, with only slight inexactness at the centers. Population: 91 in 67 (7 in 67+), 1 finer (2/13). NGC ID# 254R, PCGS# 7158

- 3805 1885-CC MS66 PCGS.** Butter-gold patina adorns the margins of this lustrous and low mintage Carson City Premium Gem. Nicely struck and flashy with a clean obverse field and only a few delicate grazes on the cheek. NGC ID# 254S, PCGS# 7160

White MS66+ 1885-CC Dollar

- 3806 1885-CC MS66+ PCGS. CAC.** A virtually brilliant and high grade example of the lowest mintage Carson City Morgan dollar. This lustrous Premium Gem is nicely struck and shows only trivial grazes on the left obverse. Faint parallel roller marks (as coined) are noted on the high points and the reverse field. NGC ID# 254S, PCGS# 7160

Silver-White 1885-CC Dollar, MS66+

- 3807 1885-CC MS66+ PCGS. CAC.** The 1885-CC Morgan dollar is a curious anomaly among the various issues in the series, in that most of the original mintage survived until the great Treasury releases of 1962 and afterward. Circulated examples are quite hard to find. The present MS66+ PCGS piece is replete with frosty luster over untuned, silver-white surfaces. There are few mentionable marks, although some light roller marks appear on the cheek. This is nonetheless an extremely nice coin. Population: 64 in 66+, 52 finer (2/13). NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS67
Lowest Mintage CC Morgan**

3808 1885-CC MS67 PCGS. CAC. The Carson City Mint produced 228,000 Morgan dollars in 1885, and that was the lowest annual production of these coins at that Mint. However, nearly all of those coins were stored in Treasury vaults for many decades, and today, the 1885-CC is one of the more available dates in the series. Today, the 1885-CC is the fifth most available CC Morgan, based on the total number of PCGS grading events, with more than 21,000 certified by that service alone. The four more plentiful dates are easy to guess: 1878, 1882, 1883, and 1884. Despite the large population, only one finer piece is PCGS certified. This Superb Gem has frosty surfaces with full brilliance and no evidence of toning. It is a virtually perfect specimen for the connoisseur. Population: 51 in 67 (1 in 67+), 1 finer (2/13). NGC ID# 254S, PCGS# 7160

3809 1885-CC MS63 Deep Mirror Prooflike PCGS. This fully brilliant Carson City Morgan exhibits ice-white designs and prominently mirrored fields. Cameo contrast is considerable as the grade suggests. The reverse is well preserved and the portrait displays wispy abrasions. NGC ID# 254S, PCGS# 97161

3810 1885-O MS66 PCGS. CAC. Razor-sharp detail shows on all design elements of this delightful Premium Gem, unusual for a New Orleans issue. The well-preserved surfaces are blanketed in shades of golden-tan and amber toning, with vibrant mint luster underneath. NGC ID# 254T, PCGS# 7162

3811 1886 MS64 PCGS Secure. Dramatic bands of powder-blue, cherry-red, forest-green, and orange-gold alternate across the obverse. The reverse is practically brilliant. Nicely struck and lustrous with well preserved fields and a few moderate marks on the cheek. NGC ID# 254V, PCGS# 7166

3812 1886 MS67 PCGS. CAC. The 1886 Morgan dollar claims a huge mintage of more than 19 million pieces, but the date is very rare above the MS67 level. This spectacular Superb Gem displays sharply detailed design elements and vibrant mint luster, with outstanding eye appeal. PCGS has graded only three coins in higher numeric grades (2/13). NGC ID# 254V, PCGS# 7166

**1886-S Morgan Dollar, MS66
Colorful and Conditionally Rare**

3813 1886-S MS66 PCGS Secure. CAC. This spectacular Morgan dollar is both a conditional rarity and a color enthusiast's dream coin. The surfaces are extremely well-preserved despite a pair of small marks on Liberty's lower jaw. The reverse is mostly silver-gray with a thin ring of iridescent color, but the obverse shows prevailing silver and pinkish-gray hues that deepen near the rim at 3 o'clock to violet, aqua, jade, and russet hues. PCGS has certified only 29 submissions of the 1886-S in the MS66 grade, with but four finer (2/13). NGC ID# 254X, PCGS# 7170

3814 1888-O MS66 PCGS. CAC. Sharply detailed and brightly lustrous, this delightful Morgan dollar possesses terrific eye appeal. The 1888-O is virtually unobtainable above the MS66 grade level. PCGS has certified no coins in higher numeric grades (1/13). NGC ID# 2556, PCGS# 7184

3815 1888-S MS64 PCGS. CAC. This impressive Choice specimen shows the sharply detailed design elements usually seen on San Francisco Mint issues, with vibrant frosty mint luster and outstanding eye appeal. NGC ID# 2557, PCGS# 7186

3816 1889-CC Fine 15 PCGS. Although it is well worn and has trivial handling marks, this 1889-CC Morgan dollar is entirely original with medium gray surfaces and deeper patina outlining the devices. NGC ID# 2559, PCGS# 7190

3817 1889-CC VF30 PCGS. CAC. This pleasing VF30 specimen retains much of its original design detail and the surfaces are lightly abraded for the grade. Shades of lavender, gray, and champagne-gold patina add to the visual appeal. The 1889-CC is an important key in the Morgan dollar series. NGC ID# 2559, PCGS# 7190

3818 1889-CC — Cleaning — PCGS Genuine. XF Details. Though mildly subdued and minutely granular from a cleaning, the present key date Carson City dollar will satisfy many collectors of the series subset. Toned stone-gray and almond-gold. There are no obtrusive marks. NGC ID# 2559, PCGS# 7190

3819 1889-CC — Hair Tooled — NGC Details. AU. A ring of champagne-gold and emerald-green toning surrounds the pale pink centers of this still-attractive Morgan dollar. Some minor hair detail has been strengthened on this piece, which shows prooflike reflectivity in sheltered areas. NGC ID# 2559, PCGS# 7190

3820 1889-CC — Damaged — ANACS. AU58 Details. Three dull but fairly deep pod-shaped marks are noted, located near the E in E PLURIBUS UNUM, the Y in LIBERTY, and the eagle's left (facing) wing. The peripheral light golden-brown toning is attractive, and the cartwheel luster is diminished only across the cheek and the open fields. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU58
Key Morgan Issue, Bright Shimmering Fields

- 3821 1889-CC AU58 PCGS.** With the advent of coin grading and encapsulation by NGC, PCGS, ANACS, and others, the coin-collecting community has bifurcated into two types: those who collect coins in “slabs,” and those who prefer their coins raw. While we do not recommend the practice, one subset of collectors is known to buy certified coins (with their various [and varying] assurances of grade and authenticity), crack them out, and put them “raw” into coin albums. This piece may be a candidate for such collectors, given the steep price differential between AU grades and Mint State for the 1889-CC Morgan dollar.

This coin provides many of the attractions of a Mint State piece, including bright reflective fields, minimal wear, and an overall attractive appearance, at a fraction of the price of an MS62 or finer coin. The surfaces are silver-gray with tinges of pink and gold, and Liberty’s cheek is exceptionally clean. Expect strong bidding to win this prize.

Ex: Long Beach Signature (Heritage, 2/2009), lot 1823. NGC ID# 2559, PCGS# 7190

- 3822 1889-O MS64+ PCGS. CAC.** This high-end Choice example is well-detailed, with just a hint of softness on the hair above Liberty’s ear. The brilliant surfaces radiate vibrant mint luster and show only minor signs of contact. NGC ID# 255A, PCGS# 7192

Border-Toned Gem 1889-O Dollar

- 3823 1889-O MS65 NGC.** Lightly frosted over the central portrait with blue and gold-orange peripheral toning around silver interiors. A few small, scattered marks affect each side, but the all-around eye appeal is strong for the issue, which generally is found unimpressive despite (or perhaps because of) a high mintage of more than 11.8 million pieces. Census: 50 in 65, 7 finer (2/13). NGC ID# 255A, PCGS# 7192

- 3824 1889-S MS63 Deep Mirror Prooflike PCGS.** The deeply reflective fields of this attractive Select example contrast dramatically with the sharply detailed design elements and the well-preserved surfaces show only minor contact marks and hairlines. Population: 16 in 63 Deep Mirror Prooflike, 24 finer (2/13). NGC ID# 255B, PCGS# 97195

Premium Gem 1890-O Morgan Dollar
Flashy Semireflective Luster

- 3825 1890-O MS66 PCGS. CAC.** Though not rated as a Prooflike by PCGS, this coin has undeniable flash to go with its generous cartwheel luster. The devices are well-defined for a New Orleans issue and have a skiff of contrasting frost. Faint yellow tints at the borders add a touch of color to otherwise silver surfaces. An important high-grade example for the date. Population: 20 in 66 (1 in 66+), 0 finer (2/13). NGC ID# 255E, PCGS# 7200

- 3826 1890-O MS64 Deep Mirror Prooflike NGC.** The well-detailed frosty design elements stand out dramatically against the mirrored fields of this attractive Choice example. A few hints of cobalt-blue and lime-green toning visit the peripheries. NGC has graded 10 numerically finer coins (2/13). NGC ID# 255E, PCGS# 97201

- 3827 1890-S MS65 PCGS. CAC.** This attractive Gem offers sharply detailed design elements and vibrant mint luster, with hints of pale gold and lavender toning on both sides. Eye appeal is outstanding. NGC ID# 255F, PCGS# 7202

- 3828 1891 MS64 PCGS. CAC.** Glimpses of orange-gold emerge from protected areas, but most of this coruscating near-Gem is rich steel-gray. Nicely struck and well preserved. The 1891 is plentiful in typical Mint State but Choice examples are surprisingly scarce. NGC ID# 255G, PCGS# 7204

- 3829 1891-CC MS64+ PCGS. VAM-3.** A Top 100 Variety. Although the mintage for the 1891-CC was fairly generous for a Carson City dollar, the issue was not as heavily represented in the GSA sales as some other dates. This high-end Choice example is sharply detailed, with vibrant mint luster. NGC ID# 255H, PCGS# 7206

- 3830 1891-CC MS64+ PCGS.** A splendid specimen, this near-Gem exhibits fully brilliant and untuned silver surfaces with frosty mint luster and exceptional eye appeal. NGC ID# 255H, PCGS# 7206

**Gem 1891-CC Morgan Dollar
'Spitting Eagle' Variety, VAM-3**

- 3831 1891-CC MS65 NGC. VAM-3.** A Top 100 Variety. The well-known "Spitting Eagle" constitutes a sizeable percentage of Uncirculated 1891-CC Morgans, since the variety was included in the GSA hoard. Advanced numismatists will instead pay attention to the beautiful toning of the present lustrous example, as it is draped in apricot-gold, lime-green, and cream-gray shades. NGC has graded 10 numerically finer coins (2/13). NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65
Pleasing Peripheral Toning**

- 3832 1891-CC MS65 PCGS.** Toning appears mostly at the borders, burnt-orange and crimson with lighter elements extending into otherwise silver-gray centers. This Gem is softly struck with a twinkle of frost across the highest points of the design but also roller marks (as produced) in the lower portrait area. NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65
Attractively Toned CC-Mint Issue**

- 3833 1891-CC MS65 PCGS.** The well-preserved lustrous surfaces of this impressive Gem are blanketed by shades of blue, green, and lavender-gray toning. The obverse design elements are sharply rendered, but the central reverse shows just a touch of softness. The 1891-CC Morgan dollar is quite rare in grades above MS65. PCGS has graded 29 numerically finer examples (2/13). NGC ID# 255H, PCGS# 7206

**High-Luster 1891-CC Dollar, MS65
Patinated but Shining**

- 3834 1891-CC MS65 PCGS. CAC.** The obverse of this late-date Carson City dollar has patches of antique-gold, green-blue, and gray, while the reverse has similar colors at the outer zones with a small silver interior. The strike is typically soft on the hair over Liberty's ear but better elsewhere. Generous cartwheel luster powers through the patina. NGC ID# 255H, PCGS# 7206
- 3835 1891-O MS64+ PCGS. CAC.** Typical central weakness fails to diminish the eye appeal of this impressive near-Gem. Both sides are mostly brilliant with peripheral gold and iridescent toning. NGC ID# 255J, PCGS# 7208

**1891-O Morgan Dollar, MS65
None Numerically Finer at PCGS**

- 3836 1891-O MS65 PCGS.** Despite the large mintage of 7.9 million pieces, the 1891-O Morgan dollar is scarce in Gem condition, and virtually unobtainable any finer. This impressive Gem displays especially vibrant mint luster, with well-preserved brilliant surfaces that show a few hints of pale gold toning. The design elements are well-detailed, with just a touch of softness on the hair above the ear and the eagle's breast. Population: 88 in 65 (1 in 65+), 0 finer (2/13). NGC ID# 255J, PCGS# 7208

- 3837 1892-CC MS63 PCGS.** A semiprooflike, boldly struck, and brilliant example of this decidedly better Carson City issue. The lustrous fields are well preserved, and the cheek displays only moderate grazes. NGC ID# 255M, PCGS# 7214

- 3838 1892-O MS64 PCGS.** Delicate caramel-gold toning visits this lustrous and unmarked Choice silver dollar. The centers display a typical New Orleans impression, but this is all that denies an even finer grade. NGC ID# 255N, PCGS# 7216

- 3839 1892-O MS64 NGC. CAC.** Like most examples of the 1892-O, this impressive Choice example shows a touch of softness on the centers, but no large or distracting contact marks are evident and both sides are brightly lustrous. NGC ID# 255N, PCGS# 7216

- 3840 1892-O MS64+ PCGS. CAC.** Typical weakness is noted over Liberty's ear, although this piece is sharper than most New Orleans dollars of the decade. Both sides have satin silver luster without toning. A splendid near-Gem. NGC ID# 255N, PCGS# 7216

- 3841 1892-O MS64+ PCGS. CAC.** This high-end Choice Morgan dollar exhibits well-detailed design elements, with a touch of the typical softness on the hair above the ear and the eagle's breast. Both sides display vibrant mint luster, with just a hint of lavender and gold toning. NGC ID# 255N, PCGS# 7216

**Smooth Uncirculated Details
1892-S Silver Dollar**

- 3842 1892-S — Artificial Toning — NGC Details. Unc.** The 1892-S is notoriously rare in Mint State, and is practically unheard of with unabraded surfaces. Those who inspect the obverse alone might conclude it is an 1892 proof from Philadelphia, despite the presence of faint roller marks (as made) at the center. Both sides exhibit similar and comprehensive deep apricot-gold and sea-green toning. NGC ID# 255P, PCGS# 7218

- 3843 1893-CC XF40 PCGS.** An attractive midrange example from the final year of the Carson City Mint, this lightly circulated specimen retains most of its original design detail and traces of mint luster. The surfaces are lightly abraded and display pleasing gray and pale gold patina. NGC ID# 255S, PCGS# 7222

- 3844 1893-CC AU50 PCGS.** The final Carson City silver dollar is popular in all grades. This lightly worn example has brilliant silver surfaces without toning, and enjoys nearly full mint luster. NGC ID# 255S, PCGS# 7222

**Mint State 1893-CC Dollar
Last of the Carson City Issues**

- 3845 1893-CC MS60 PCGS.** This key-date Morgan is encapsulated in an old small-size PCGS holder. Full mint luster occurs throughout, but Liberty's cheek in particular is the site of numerous scrapes and marks. The strike is markedly soft at the ear and hair above. The reverse shows a fairly brutal abrasion on the lower eagle's breast, in itself probably preventing a higher grade. NGC ID# 255S, PCGS# 7222

**Uncirculated 1893-CC Morgan Dollar
Lowest Total Certified Population**

- 3846 1893-CC MS61 NGC.** The 1893-CC has the lowest combined total population at NGC and PCGS with just 9,416 pieces certified. The key 1889-CC is next with 9,547 examples graded. In contrast, the 1883-CC has a certified population of more than 86,000 pieces. Myriad contact marks are expected at the lower Mint State grade. However, this piece has exceptional eye appeal for the grade with brilliant silver surfaces and satin luster. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62
Sharply Detailed and Lustrous**

- 3847 1893-CC MS62 NGC.** The 1893-CC Morgan dollar is prized by mintmark type collectors as the last date from the fabled Carson City Mint. This attractive MS62 example displays vibrant cartwheel mint luster and sharply detailed design elements. The brilliant surfaces are lightly abraded for the grade. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62
Final Carson City Dollar**

- 3848 1893-CC MS62 NGC.** From a modest mintage of 677,000 pieces, the 1893-CC Morgan dollar is the final issue from the famous Carson City Mint and an important date for type purposes. This well-detailed MS62 specimen shows the expected number of minor contact marks for the grade, with brilliant surfaces and vibrant mint luster. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS62

- 3849 1893-CC MS62 NGC.** The final year of operation for the Carson City Mint, with a modest silver dollar production of only 677,000 pieces. The 1893-CC is a key issue in the series. This pleasing Mint State specimen has brilliant silver luster with a hint of peripheral gold toning on otherwise completely untoned surfaces. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Low-Mintage Branch Mint Key

- 3850 1893-CC MS63 NGC.** An attractive Select example of this final Carson City issue, with vibrant mint luster and mostly brilliant surfaces that show a few hints of golden-tan toning. The design elements are sharply rendered and the fields show a scattering of minor grade-consistent contact marks. NGC ID# 255S, PCGS# 7222

- 3851 1893-S Fair 2 PCGS.** PCGS has developed special Registry sets for low grade coins with the idea to get the lowest possible grade for each issue. In the case of the 1893-S Morgan dollar, PCGS has certified 22 submissions as Fair 2, and they are all tied for the lowest possible grade, as none have received the grade of 1. This piece is quite attractive for the grade, with original pewter-gray surfaces and barely perceptible imperfections. NGC ID# 255U, PCGS# 7226

- 3852 1893-S AG3 PCGS.** The 1893-S is the key date in the Morgan dollar series and in demand in all grades. This example has natural light gray surfaces with hints of gold and only trivial marks for the grade. It is ideal for the budget-minded collector who lacks this issue. NGC ID# 255U, PCGS# 7226

- 3853 1893-S — Scratch — PCGS Genuine. VG Details.** Deep cream-gray toning encompasses this circulated key date Morgan dollar. A thin vertical obverse scratch is noted between the rim at 11 o'clock and Liberty's forehead. Both sides are hairlined. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Sharpness

- 3854 1893-S — Improperly Cleaned — NGC Details. AU.** A caramel-gold and slate-gray example of this famous key date. Both sides are somewhat glossy from cleaning, particularly on the eagle's belly, but there are no obvious areas of smoothing. One small spot is at 7:30 on the reverse rim. The well-known diagnostics on the RT in LIBERTY are present. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Brilliant AU55 Example
Significant Remaining Luster

- 3855 1893-S AU55 PCGS.** Most survivors of the 1893-S Morgan dollar appear to have circulated for a relatively brief period, judging by the appearance of the coins, long enough to have ended up with wear placing them somewhere in the VF20-VF35 grade range. Nonetheless, we at Heritage frequently see (and are glad to offer, such is their popularity) outliers on either side of that range, XF-and-higher examples as well as Fine-or-less survivors. All pieces find ready buyers, especially if they are free of major problems, as the Morgan dollar series is among the most widely collected in the entire U.S. series. This example saw very little handling in the channels of commerce. The luster is just thin in the fields and there is slight evidence of rub over the high points on each side. The surfaces are brilliant and in general lightly marked, except for two shallow, parallel scratches in the lower right obverse field. NGC ID# 255U, PCGS# 7226

- 3856 1894 — Improperly Cleaned — NGC Details. AU.** Though dipped at one time, this low mintage Philadelphia key date dollar now displays hints of golden toning on the reverse. There are no relevant abrasions and the eye appeal is attractive given its disclaimers. NGC ID# 255V, PCGS# 7228
- 3857 1894 AU55 PCGS.** An attractive specimen of this low-mintage date, with just a touch of wear on the high points of the design, this Choice AU example retains much of its original mint luster and the surfaces are lightly abraded. NGC ID# 255V, PCGS# 7228
- 3858 1894 AU55 NGC.** The sharply impressed design elements of this Choice AU Morgan dollar show just a touch of wear on the high points, and the surfaces are minimally abraded for the grade. Bright mint luster shines through a few hints of gold and lavender toning. NGC ID# 255V, PCGS# 7228
- 3859 1894 AU58 PCGS.** Pleasing shades of bluish-gray and lavender patina enhance the lightly abraded surfaces of this intriguing near-Mint specimen. The 1894 Morgan dollar claims one of the lowest mintages of the series. NGC ID# 255V, PCGS# 7228

1894 Dollar, Softly Frosted MS64 In-Demand Morgan Issue

- 3860 1894 MS64 PCGS. CAC.** The low-mintage 1894 Philadelphia Morgan dollar was struck in an amount of 110,000 pieces, only 10,000 more coins than the number reported for the fabled 1893-S. The small production makes the 1894 by far the lowest-mintage issue among the Philadelphia series. Nice Mint State examples are strongly contested at auction and eagerly pursued on the bourse floor at coin shows. This near-Gem displays softly frosted luster over silvery surfaces bounded with a thin ring of russet-gold and sky-blue around the periphery of each side. A few light marks on Liberty's cheek account for the grade, but this is a well-struck and extremely attractive example. PCGS has seen only 24 numerically finer (2/13). NGC ID# 255V, PCGS# 7228

- 3861 1894-O MS62 PCGS.** This lustrous, well-detailed MS62 specimen shows an extensive network of thin die cracks that nearly encircles the reverse. The surfaces are lightly marked for the grade and display attractive shades of pale gold toning. NGC ID# 255W, PCGS# 7230
- 3862 1895-O AU55 NGC.** A lovely example of the conditionally rare 1895-O Morgan dollar, and a representative that would fit nicely in an otherwise Mint State collection of these coins. This piece has considerable luster with brilliant silver surfaces and only a trace of high-point wear. NGC ID# 255Y, PCGS# 7236
- 3863 1895-O AU55 PCGS.** A lightly toned and moderately abraded Choice AU representative. Cartwheel luster is evident though subdued across exposed areas. The key to the New Orleans Morgan subset, scarcer than the 1893-O despite a higher mintage. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58

- 3864 1895-O AU58 PCGS.** The elusive nature of full Mint State examples of the 1895-O places strong demand on near-Mint examples like the piece offered here. This example has full, subdued luster beneath delicate light gray patina. Slightly darker toning appears on the reverse high points. A pleasing specimen for an advanced collection. NGC ID# 255Y, PCGS# 7236
- 3865 1896 MS66 PCGS. CAC.** This impressive Premium Gem displays sharply detailed design elements throughout, with creamy surfaces and vibrant cartwheel mint luster. PCGS has graded only 31 coins in higher numeric grades (2/13). NGC ID# 2562, PCGS# 7240
- 3866 1896 MS66+ PCGS. CAC.** The brilliant surfaces of this high-end Premium Gem show vibrant cartwheel mint luster and no mentionable distractions. Sharply detailed design elements add to the outstanding visual appeal. PCGS has graded 31 numerically finer examples (2/13). NGC ID# 2562, PCGS# 7240
- 3867 1896 MS65 Deep Mirror Prooflike PCGS.** A wonderful Gem with fully mirrored fields around satiny devices, creating light cameo contrast on both sides of this untuned beauty. Only 14 finer Deep Mirror Prooflike examples reside in PCGS holders (2/13). NGC ID# 2562, PCGS# 97241
- 3868 1897 MS66 PCGS.** A sharply detailed Premium Gem, with vibrant frosty mint luster, pristine surfaces, and a few accents of pale gold toning. Outstanding eye appeal. PCGS has graded 17 numerically finer examples (2/13). NGC ID# 2565, PCGS# 7246
- 3869 1897 MS66 PCGS.** A spectacular Premium Gem Morgan dollar, sharply detailed throughout, with an extensive network of die cracks on the upper reverse. Vibrant cartwheel mint luster adds to the exceptional eye appeal. PCGS has certified only 17 coins in higher numeric grades (2/13). NGC ID# 2565, PCGS# 7246

**Lustrous Superb Gem 1897 Dollar
Tied for Finest PCGS-Certified**

- 3870 1897 MS67 PCGS. VAM-2.** The 8 in the date is repunched south. This high grade silver dollar is close to brilliant, though the cheek displays a hint of olive-green toning. A lens locates only minor surface imperfections. Dynamic luster and a bold strike further attest to the quality. Population: 17 in 67, 0 finer (2/13). NGC ID# 2565, PCGS# 7246

**Deep Mirror Prooflike Gem
Stone-White 1897 Silver Dollar**

- 3871 1897 MS65 Deep Mirror Prooflike PCGS.** Though the 1897 is plentiful in Mint State, Deep Prooflike examples are very scarce and Gems with that finish are decidedly rare. The present brilliant representative has prominently reflective fields and an intricate strike. Beautifully preserved aside from a minor graze on the left obverse field. A strike-through near the P in PLURIBUS is of mint origin. Population: 26 in 65 Deep Mirror Prooflike, 2 finer (2/13). NGC ID# 2565, PCGS# 97247

**Select Mint State 1897-O Morgan Dollar
Light but Distinct Patina**

- 3872 1897-O MS63 NGC.** A modest but insistent peach-gold overtone settles across much of this Select example's surfaces. Cartwheel luster is warm rather than flashy but generous nonetheless and highly appealing. A few dots of deeper color are noted at the rims, most visibly above the N of UNUM, while a handful of wispy flaws across the portrait contribute to the assigned grade. NGC ID# 2566, PCGS# 7248

**1897-O Morgan Dollar, MS63
Above Average Strike and Luster**

- 3873 1897-O MS63 PCGS.** The 1897-O Morgan dollar is known for striking problems and subdued mint luster, but this coin is well above average in those departments. The design elements are sharply detailed in most areas, with just a touch of softness on the hair above the ear, and frosty cartwheel mint luster is apparent on both sides, although not quite as vibrant as seen on some other dates. An appealing, problem-free example of this challenging issue. NGC ID# 2566, PCGS# 7248

- 3874 1897-S MS66 NGC.** Semi-prooflike fields yield mild contrast with the exquisitely struck motifs of this S-mint Premium Gem dollar. Untoned surfaces are impeccably preserved. NGC has only certified 10 finer examples (2/13). NGC ID# 2567, PCGS# 7250

- 3875 1897-S MS66 PCGS. CAC.** Spectacular shades of golden-brown and ice-blue toning grace the pristine surfaces of this exceptional Premium Gem, with a few hints of violet and gray. Sharply detailed design elements and vibrant mint luster complete the attractive package. NGC ID# 2567, PCGS# 7250

1897-S Silver Dollar, MS66+ Prooflike

- 3876 1897-S MS66+ Prooflike PCGS. CAC.** The lack of mentionable marks extends throughout both sides but is particularly noticeable on the exposed cheek of Liberty. There is little evidence of other color, but ample prooflike contrast appears on the silver-white surfaces. Besides the high intrinsic appeal of this coin, the Premium Gem grade and CAC sticker further increase its desirability. Population: 23 in 66 (1 in 66+) Prooflike, 2 finer (2/13). NGC ID# 2567, PCGS# 7251

- 3877 1898 MS66 PCGS. CAC.** A wonderful Premium Gem, this 1898 Morgan dollar exhibits frosty silver brilliant on both sides. There is no evidence of toning on the lustrous surfaces. PCGS has only certified 37 finer examples (2/13). NGC ID# 2568, PCGS# 7252

- 3878 1898 MS66+ PCGS. CAC.** This high-end Premium Gem is attractively toned in shades of golden-brown, violet, and amber, with most of the color on the reverse. The design elements are sharply rendered and vibrant cartwheel mint luster is evident on both sides. NGC ID# 2568, PCGS# 7252

- 3879 1900 MS65 PCGS. CAC.** This turn-of-the-century Morgan dollar has frosty silver luster with faint lemon toning along the reverse border. The strike is slightly lacking at the center as usual. NGC ID# 256E, PCGS# 7264
- 3880 1900 MS65+ PCGS. CAC.** A fully brilliant and untoned Gem, this 1900 Morgan dollar has frosty silver luster and exceptional eye appeal. NGC ID# 256E, PCGS# 7264
- 3881 1900 MS66+ PCGS. CAC.** The obverse of this high-end Premium Gem Morgan dollar is darkly patinated in attractive shades of green and violet, while the color is limited to the peripheries on the reverse. A well-detailed, lustrous example. PCGS has graded 24 numerically finer examples (2/13). NGC ID# 256E, PCGS# 7264

**Superb Gem 1900 Morgan Dollar
Among the Finest Certified**

- 3882 1900 MS67 PCGS.** This magnificent Superb Gem is among the finest certified examples at PCGS. The design elements display razor-sharp definition throughout and the pristine surfaces show just a hint of gold and lavender toning. Vibrant cartwheel mint luster adds to the terrific eye appeal. Population: 24 in 67, 0 finer (2/13). NGC ID# 256E, PCGS# 7264
- 3883 1900-O MS66+ PCGS. CAC.** The design elements of this high-end Premium Gem are unusually sharp for a New Orleans issue and both sides radiate vibrant mint luster. The brilliant surfaces show no mentionable signs of contact and eye appeal is tremendous. NGC ID# 256F, PCGS# 7266

1900-O Dollar, Remarkably Toned MS67

- 3884 1900-O MS67 NGC.** A gorgeous, bag-toned example of this turn-of-the-century New Orleans issue, both sides of this well-defined coin display bright electric-blue iridescence over the right peripheries. Crimson, lavender, and orange-russet hues extend inward from the blue before terminating in silver-gray patina near the left rims. Census: 72 in 67, 0 finer (1/13).
Ex: *Long Beach Signature* (Heritage, 10/2000), lot 8454. NGC ID# 256F, PCGS# 7266

- 3885 1900-O/CC MS65 PCGS. VAM-8A.** A Top 100 Variety. Die rust near the mintmark distinguishes VAM-8A from VAM-8. This brilliant silver dollar is sharply struck and carefully preserved. Leftover Carson City dies were finally overmintmarked and shipped to New Orleans in 1900. NGC ID# 256G, PCGS# 7268
- 3886 1900-O/CC MS65 PCGS. CAC. VAM-11.** A Top 100 Variety. The undertype CC is visible on close inspection without a loupe. This attractive Gem displays vibrant mint luster and sharply detailed design elements throughout. For all 1900-O/CC VAMs, Population: 83 in 66, 2 finer (1/13). NGC ID# 256G, PCGS# 7268

**1901 Morgan Dollar, MS62
Beautiful Rim Toning**

- 3887 1901 MS62 PCGS. CAC.** The 1901 Morgan dollar is one of those "bifurcated" issues within the series such as the 1884-S, 1886-O, and 1896-O, quite common in circulated grades but seldom seen in the higher Mint State levels. This is a lightly frosted silver-gray example with a sprinkling of grade-consistent marks on the high points, but beautiful pastel rim toning including sky-blue and amber tones increases the appeal. NGC ID# 256J, PCGS# 7272
- 3888 1901-O MS66 PCGS. CAC.** A virtually brilliant and high grade New Orleans type coin that boasts smooth fields and an above average strike. The cheek exhibits only wispy grazes. Certified in a green label holder.
Ex: *Long Beach Bulletin* (Heritage, 9/2002), lot 1979, which realized \$948.75. NGC ID# 256K, PCGS# 7274
- 3889 1901-S MS64 PCGS.** The central obverse and reverse are poorly defined, typical of prooflike examples. Although undesignated, this brilliant and untoned Choice Mint State piece has mirrored obverse and reverse fields. NGC ID# 256L, PCGS# 7276
- 3890 1902 MS66 PCGS. CAC.** A snow-white high grade Morgan dollar whose booming luster and outstanding preservation combine to command specialist attention. Only the centers lack a precise strike. NGC ID# 256M, PCGS# 7278
- 3891 1902-O MS66+ PCGS. CAC.** A hint of champagne toning appears on the reverse of this otherwise untuned Premium Gem. Both sides are boldly defined with frosty silver luster. PCGS has only certified eight finer examples (2/13). NGC ID# 256N, PCGS# 7280
- 3892 1903-O MS66 PCGS. CAC.** The 1903-O was once considered a great rarity, before a number of sealed bags were shipped from Treasury vaults circa-1962. The present coin is much nicer than most as it is splendidly smooth and lustrous with a crisp strike and peripheral golden toning. Certified in an old green label holder. NGC ID# 256S, PCGS# 7286
- 3893 1904-O MS66 PCGS. CAC.** An impressive Premium Gem, this beauty has stark-white surfaces with satin luster. The obverse is prooflike with light cameo contrast and the reverse is satiny with faint field reflectivity. NGC ID# 256V, PCGS# 7292

1904-S Dollar, Brightly Lustrous MS64

- 3894 1904-S MS64 PCGS.** An elusive and in-demand S-mint issue in the Morgan series, the 1904-S's demand far outstrips the available supply, particularly in the higher Mint State grades. This piece offers a pale copper-gold reverse with the same hues along the obverse rim, and a silver obverse center. Bountiful luster is present, and a few stray abrasions on the cheek determine the grade. The reverse is rotated clockwise a few degrees with respect to the obverse. A nice near-Gem.
Ex: FUN Signature (Heritage, 1/2009), lot 4837. NGC ID# 256W, PCGS# 7294

- 3895 1921 MS66+ PCGS. CAC.** A stunning Premium Gem, this plentiful Morgan dollar issue is infrequently found so fine, and almost never in finer grades, with PCGS recording just seven better submissions (2/13). This example is brilliant and untuned with excellent eye appeal. NGC ID# 256X, PCGS# 7296

- 3896 1921-D MS66 PCGS. CAC.** Darkly patinated in shades of sea-green, gray, and violet-blue, this delightful Premium Gem displays vibrant mint luster and ample eye appeal. A sharply detailed specimen from the last year of the design. PCGS has graded only five numerically finer coins (2/13) NGC ID# 256Y, PCGS# 7298

- 3897 1921-D MS66 PCGS. CAC.** Vivid shades of violet, sea-green, and gray toning blanket the reverse of this Premium Gem Morgan dollar, while the toning is limited to the peripheries and one bisecting bar on the obverse. The design elements are well-detailed and vibrant mint luster adds to the outstanding eye appeal. PCGS has graded only five numerically finer coins (2/13). NGC ID# 256Y, PCGS# 7298

- 3898 1921-S MS65 PCGS.** The soft, frosty mint luster of this brilliant Gem is typical of the 1921-S Morgan dollars. Both sides are untuned and highly attractive. PCGS has only certified 32 finer examples (2/13). NGC ID# 256Z, PCGS# 7300

- 3899 1921-S MS65 PCGS.** Light almond-gold toning enriches this coruscating and minimally abraded Gem. Portions of the wreath are incompletely brought up, typical for the single-year design subtype. NGC ID# 256Z, PCGS# 7300

- 3900 1921-S MS65+ PCGS.** A high-end Gem example from the final year of the Morgan design, this attractive silver dollar displays well-detailed design elements and vibrant mint luster, with pristine brilliant surfaces. PCGS has certified 32 numerically finer coins (2/13). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1878 Morgan Dollar, PR64 Cameo 7 Tailfeathers, Reverse of 1878

- 3901 1878 7TF Reverse of 1878 PR64 Cameo NGC.** Especially popular with type collectors, the 1878, Reverse of 1878 Morgan dollar with seven tailfeathers represents the first year of the design. Approximately 250 proofs were struck using these dies, easily distinguished by the parallel arrow flething on the reverse. The fully struck frosty design elements of this delightful Choice example contrast boldly with the brilliant mirrored fields. Census: 5 in 64 Cameo, 10 finer (2/13). PCGS# 87312

1878 Morgan Dollar, PR65 Cameo Rare 7 Tailfeathers Proof

- 3902 1878 7TF Reverse of 1878 PR65 Cameo NGC.** Although 750 proof Morgan dollars were minted in 1878, 500 of those coins were from the 8 Tailfeathers reverse, and only 250 were from the 7 Tailfeathers reverse. As such, this variety is quite rare in proof format, and Gem proofs with Cameo contrast are extremely rare. This beauty exhibits black-and-white contrast with satiny devices and deeply mirrored fields, all beneath delicate champagne toning that is deeper near the borders. The design elements are boldly detailed as expected, and eye appeal is exceptional. Census: 9 in 65 Cameo, 1 finer (2/13). PCGS# 87312

**1880 Morgan Dollar, PR66 Cameo
Rare in Gem Proof or Finer Grades**

- 3903 1880 PR66 Cameo PCGS.** Lively eye appeal and appreciable contrast between fields and devices are two among many lures on this Premium Gem Cameo 1880 Morgan dollar proof. The mintage for this early issue was a generous 1,355 pieces. The proof 1880 Morgan dollars were a follow-on to the 1880 Trade dollar, which was a proof-only late-series issue subject to contemporary speculation and struck in a larger amount of 1,987 pieces. This PR66 Cameo Morgan shows fields that easily “fade to black” when rotated under a light, and generous mint frost coats the devices front and back. The surfaces are brilliant throughout. The excellent overall preservation puts this piece into a distinct minority, where likely less than 10% of the original mintage survives. Population: 18 in 66 (1 in 66+) Cameo, 10 finer (1/13). PCGS# 87315

- 3904 1883 PR62+ PCGS.** Although trivial hairlines are evident on both sides, this pleasing proof retains considerable eye appeal with untuned silver surfaces and light cameo contrast on the reverse. NGC ID# 27Z7, PCGS# 7318

**1888 Silver Dollar, PR66
Only One Finer PCGS Non-Cameo**

- 3905 1888 PR66 PCGS.** Both sides of this pristine Premium Gem exhibit deep mirrors around its lustrous devices, all beneath lovely rose and blue toning with splashes of silver brilliance. Although undesignated, light cameo contrast is evident on both sides. The result is exceptional eye appeal. Population: 4 in 66, 1 finer (2/13). NGC ID# 27ZH, PCGS# 7323

- 3906 1894 PR60 NGC.** From a proof mintage of 972 pieces, this sharply detailed specimen displays deeply mirrored fields and frosty devices, with a few hints of lime-green toning, and some minor hairlines in the fields that explain the grade. NGC ID# 2577, PCGS# 7329

**1897 Gem Cameo Proof Morgan Dollar
Pale Toning**

- 3907 1897 PR65 Cameo NGC.** This gorgeous Gem offers noticeable contrast, with lighter shadings across the moderately frosted, pleasingly detailed portrait and eagle. Powerfully mirrored through the light patina and a wonderful candidate for the toned proof enthusiast. Census: 8 in 65 Cameo, 26 finer (2/13). PCGS# 87332

**1899 Dollar Appealing and Popular Date
Impressively Toned PR67 Cameo**

3908 1899 PR67 Cameo PCGS. CAC. There is not much real variation in the yearly proof mintage figures of Morgan dollars. Each was struck in the extent of several hundred pieces to the low 1,000s, and any Gem proof Morgan dollar is more or less a rarity, the year notwithstanding (the 1895 being an extremely special case!). But due to this lack of distinction, collectors naturally think of their business strike counterparts in the case of proof Morgans — and there the 1899 has broad appeal. It, like its counterparts from 1893 and 1894, is one of those anomalies struck in low quantities, despite being a Philadelphia Mint issue. It is perhaps popular, as well, due to its turn-of-the-odometer date.

The present Superb Gem proof 1899 is, of course, far more conditionally elusive than any “mere” Gem proof. PCGS has seen only four in PR67 Cameo including the present piece, with one Cameo finer (2/13). The deep patina seen on this piece resolves under a light into a border ring of aqua and cobalt-blue framing the pinkish-rose centers, with noticeable mint frost on the devices, which retain a modicum of their original silver-white color. An appealing example of this popular issue. PCGS# 87334

1903 Morgan, Lightly Toned PR63 Cameo

3909 1903 PR63 Cameo PCGS. CAC. A light touch of pinkish-gold toning is perceptible in the fields of this Select proof Morgan dollar, but most of the devices are still untuned silver-white, providing good contrast. A couple of faint marks appear on the cheek and neck of Liberty, accounting for the grade. Population: 1 in 63 Cameo, 5 finer (2/13). PCGS# 87338

**1903 Dollar, PR64 Cameo
Rarely Seen Cameo of This Date**

3910 1903 PR64 Cameo PCGS. CAC. This coin's rarity lies in the contrast seen on each side. Beginning with the proofs in 1902, contrast was suppressed on most proof striking. This is a marvelously deep example that displays significant field-device contrast throughout. Most of each side is brilliant with just a hint of peripheral golden toning present. Population: 3 in 64 Cameo, 2 finer (2/13). PCGS# 87338

**1904 Silver Dollar, PR65
Limited Contrast**

3911 1904 PR65 PCGS. An impressive Gem proof with fully mirrored fields and reflective, satiny devices that feature bold design definition. This Gem is typical of the 1902 through 1904 proofs with little contrast. Both sides have splashes of iridescent toning with considerable silver brilliance on the obverse. Population: 30 in 65, 21 finer (2/13). NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 3912 1921 MS65 PCGS.** Like virtually all 1921 Peace dollars, this attractive Gem shows a touch of softness on Liberty's hair, due to the high relief of the design. The smooth surfaces are lightly toned in shades of gold and gray, with strong satiny mint luster. NGC ID# 2U4E, PCGS# 7356
- 3913 1921 MS65 NGC.** Splashes of russet toning appear on the obverse and over the entire reverse of this Gem. The strike shows central weakness that is typical of the high relief design. NGC ID# 2U4E, PCGS# 7356
- 3914 1921 MS65 PCGS.** Blended cream-gray and chestnut-gold shades embrace this lustrous and impressively unabraded first year Peace dollar. The centers show the moderate blending of detail characteristic of the high relief issue. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, MS65+

- 3915 1921 MS65+ PCGS. CAC.** This lovely Gem has above average design definition for the high relief issue, although the usual central obverse and reverse weakness is evident. Both sides are fully brilliant with frosty silver luster and faint champagne toning. A splendid specimen for a type set or specialized collection. NGC ID# 2U4E, PCGS# 7356

Premium Gem 1921 Peace Dollar First-Year High Relief Design

- 3916 1921 MS66 PCGS.** Dark shades of golden-brown, violet, lavender, and amber toning visit the surfaces of this spectacular Premium Gem. Like virtually all examples of this date, the details of Liberty's hair are a little soft, due to the high relief of the design. Vibrant mint luster is evident, under the patina. PCGS has graded only seven numerically finer specimens (2/13). NGC ID# 2U4E, PCGS# 7356
- 3917 1922-D MS66+ NGC. CAC.** Attractive golden-brown, navy-blue, and violet shades endow the peripheries of this crisply struck and thoroughly lustrous high grade silver dollar. The obverse has a matte texture, as made. NGC ID# 257D, PCGS# 7358
- 3918 1922-S MS65 PCGS.** Variegated dove-gray, lavender, and forest-green toning encompasses both sides of this lustrous and well struck Gem. Though the 1922-S has a high mintage, it is very scarce at the MS65 level, an observation consistent with other San Francisco issues of the widely collected series. NGC ID# 257E, PCGS# 7359

- 3919 1923 MS66 PCGS. CAC.** The design elements of this spectacular Premium Gem are well-detailed, with just a touch of softness on the eagle's feathers, and the pristine surfaces radiate vibrant mint luster. Eye appeal is extraordinary. NGC ID# 257F, PCGS# 7360
- 3920 1923 MS66+ PCGS. CAC.** This high-end Premium Gem possesses remarkable eye appeal, with sharply detailed design elements, vibrant mint luster, and well-preserved brilliant surfaces. A spot of reflective die polish is evident on G in GOD. NGC ID# 257F, PCGS# 7360

1923-D Peace Dollar, Top-Notch MS66+

- 3921 1923-D MS66+ PCGS. CAC.** The 1923-D Peace dollar is one of the more available mintmarked series issues at the Gem level, but Premium Gems are appreciably more elusive, and extremely attractive when found. Bagmarks are the usual culprit keeping coins out of the Gem or Premium Gem categories. This satiny silver-white MS66+ PCGS example is powerfully struck and virtually free of mentionable distractions, a top-notch coin in the eyes of both PCGS and CAC. Population: 78 in 66 (2 in 66+), 0 finer (2/13). NGC ID# 257G, PCGS# 7361
- 3922 1923-S MS65 ANACS.** Strong luster with broad gold-orange elements and additional peripheral gunmetal-blue and turquoise attributes. Well-defined with subtly frosty qualities and housed in a small-format holder.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1715. NGC ID# 257H, PCGS# 7362
- 3923 1925-S MS64+ NGC. CAC.** A well-detailed specimen, with just a trace of softness on Liberty's hair, this high-end Choice example displays bright mint luster under shades of pale gold toning. Eye appeal is quite strong. NGC ID# 257M, PCGS# 7366
- 3924 1927-D MS64 PCGS.** The obverse remains largely silver with a faint golden overtone. The reverse is more overtly yellow-tinged and has violet spots on the eagle's head and just to the right of the wing-fold. Housed in an old green label holder. NGC ID# 257T, PCGS# 7371
- 3925 1927-S MS64+ PCGS. CAC.** A high-end Choice specimen, with well-detailed design elements and vibrant mint luster, under shades of attractive pale gold toning. The 1927-S is very scarce in higher grades. NGC ID# 257U, PCGS# 7372
- 3926 1928 MS64 PCGS. CAC.** From a series-low mintage of 360,649 pieces, this impressive Choice example is sharply detailed and brightly lustrous, with outstanding eye appeal. The brilliant surfaces show only minor signs of contact. NGC ID# 257V, PCGS# 7373
- 3927 1928-S MS64+ PCGS.** This high-end Choice example is well-detailed, with a touch of softness on Liberty's hair. The lustrous surfaces are visited by shades of golden-tan toning, mixed with some spotty gray and lavender. NGC ID# 257W, PCGS# 7374
- 3928 1928-S MS64+ PCGS.** Dappled gunmetal-blue and almond-gold toning encompasses satiny and smooth surfaces. Given the five-figure cost of a Gem, the MS64+ grade provides ideal value. WE TRVST exhibits minor die doubling, as usually seen on this conditionally rare issue. NGC ID# 257W, PCGS# 7374

- 3929 1934-D MS65 NGC.** A better-than-average strike shows much emerging detail in Liberty's hair and cartwheel mint luster shines through a thin golden-brown patina. NGC has graded only 30 numerically finer examples (2/13). NGC ID# 257Y, PCGS# 7376

**1934-S Silver Dollar, MS64
A Key Peace Dollar Issue**

- 3930 1934-S MS64 NGC. CAC.** One of the key issues to a set of Peace dollars, the 1934-S is frequently found in circulated grades, infrequently in lower Mint State grades, and seldom in MS64 or finer grades. NGC has only certified 86 finer examples (1/13). This near-Gem is frosty and highly lustrous with brilliant silver surfaces and no toning on either side. The strike is above average with only a few trivial luster grazes. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS65
Important Key Issue**

- 3931 1934-S MS65 PCGS. CAC.** Considered one of two key issues in the Peace dollar series, the 1934-S enjoys strong demand in all grades, and Gem specimens are rarely encountered. This example is highly lustrous and fully brilliant with frosty surfaces and no toning on either side. NGC ID# 257Z, PCGS# 7377

**Gem 1934-S Peace Dollar
Rarely Found Finer**

- 3932 1934-S MS65 PCGS. CAC.** An impressive example of the key issue, this 1934-S Peace dollar exhibits bold design definition with pristine surfaces that show full mint brilliance and no evidence of toning on either side. PCGS has only certified 24 finer examples of this issue (2/13). NGC ID# 257Z, PCGS# 7377

- 3933 1935 MS66 NGC.** This spectacular Premium Gem possesses terrific eye appeal, with sharply detailed design elements and vibrant mint luster on both sides. Close inspection reveals no mentionable distractions. Census: 73 in 66, 4 finer (2/13). NGC ID# 2582, PCGS# 7378

- 3934 1935-S MS65 PCGS.** Three rays below ONE. A brilliant and beautiful Gem of this scarce final year issue. The strike is precise and there are no noticeable marks. A costly acquisition any finer. NGC ID# 2583, PCGS# 7379

SACAGAWEA DOLLARS

**Rare 'Cheerios' 2000-P Sacagawea
Superb Gem**

- 3935 2000-P Cheerios MS67 PCGS.** In early 2000, the U.S. Mint partnered with Cheerios to promote the new "golden dollar." Though most cereal boxes contained only a 2000 cent, a small percentage did include a new Sacagawea dollar. Many of those were spent or handled. A few years later, it became known that Sacagawea dollars had much greater tail feather definition than their regular counterparts. By then, the variety had become rare, though a number may still be lurking in dresser drawers. This lot includes a high grade example, along with an uncertified 2000 cent and its original Cheerios laminated "prize" packaging. Population: 20 in 67, 20 finer (2/13). PCGS# 147231

- 3936 2002-P MS69 PCGS.** Over the past decade since they were issued, PCGS has certified 20 examples of this issue in MS69 with none in MS70 (2/13). This piece has beautiful golden surfaces with splashes of deeper gold toning. Both sides have reflective fields and satin luster. NGC ID# 282R, PCGS# 15002

- 3937 2005-D MS68 NGC.** A stunning beauty, this example has reflective fields with satiny golden surfaces. Is tied for the finest certified, with just four PCGS and three NGC examples graded MS68 (2/13). NGC ID# 282Z, PCGS# 15021

COMMEMORATIVE SILVER

3938 1893 Isabella Quarter MS64 ★ NGC. Spectacularly toned in shades of golden-brown and violet, this sharply detailed Isabella quarter displays especially vibrant mint luster, under the patina. Incredible eye appeal. NGC ID# 28HR, PCGS# 9220

3939 1893 Isabella Quarter MS64 PCGS. CAC. Issued by the Board of Lady Managers at the Columbian Exposition, the obverse fittingly portrays Queen Isabella. Both sides of this Choice Mint State specimen exhibit deep gray-gold toning over lustrous surfaces. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter MS66 Prooflike

3940 1893 Isabella MS66 Prooflike NGC. A few proof examples of the Isabella quarter exist, and prooflike pieces such as this Premium Gem were likely the next pieces struck from the same polished dies, but on normal, unpolished planchets. This piece is sharply struck with fully mirrored fields beneath deep blue and iridescent toning. PCGS# 89220

Multicolor MS64+ Lafayette Dollar

3941 1900 Lafayette Dollar MS64+ NGC. DuVall 2-C. Deep steel-gray, autumn-gold, and forest-green envelops this satiny commemorative silver dollar. The obverse is close to pristine, since the trivial contact on Washington's cheek likely originated on the planchet prior to the strike. The reverse is equally smooth aside from wispy marks on the upper right reverse field. NGC ID# 28N8, PCGS# 9222

MS64+ 1900 Lafayette Dollar Exceptionally Smooth Surfaces

3942 1900 Lafayette Dollar MS64+ PCGS. CAC. DuVall 1-B. A blanket of deep dove-gray toning dominates, but the borders offer rose-gold, blue-green, and plum-mauve shades. Satiny and intricately struck with uncommonly mark-free surfaces. All Lafayette dollars were coined on a single day, the exact centennial of Washington's death. NGC ID# 28N8, PCGS# 9222

Smooth Gem Lafayette Dollar

3943 1900 Lafayette Dollar MS65 PCGS. DuVall 2-C. Most Lafayette dollars are either DuVall 1-B or DuVall 2-C, though three other rarer marriages are known. The attribution is relevant because the verbose legends were engraved on the working dies instead of the master hub, an unusual departure from late Victorian-era Mint practice. This almond-gold and cream-gray Gem displays satin sheen and an intricate strike. Both sides are close to pristine, with only a single hair-thin line visible above the statue pedestal. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS66
A Nicely Toned, Obviously Original Example

3944 1900 Lafayette Dollar MS66 NGC. DuVall 1-B. This is an awe inspiring example of this popular, crown-sized early commemorative. Commemoratives have long been one of the most popular series for collectors and the appearance of a premium quality Lafayette has always stirred excitement. Both sides are beautifully toned in scattered emerald-green and russet colors. The underlying surfaces exhibit a vibrant, satiny appearance, being remarkably free of coin-to-coin contact. The typical Lafayette dollar, an issue that was sold in great numbers to the non-collecting general public, is often found lightly circulated and all too often cleaned. Even a pleasing MS63 specimen can be difficult to find. High-end coins, above the grade of MS65, are of the utmost rarity and quickly absorbed by the serious commemorative collector. To this we add that the Lafayette dollar is one of the keys to the U.S. commemorative set in the finer Mint State grades; few coins display surfaces as smooth and blatantly original as those of the present MS66 specimen. Destined for the finest set. Census: 61 in 66 (3 in 66+), 8 finer (2/13). *Ex: Baltimore Signature (Heritage, 7/2003), lot 9114; Fort Worth Signature (Heritage, 3/2010), lot 1744.* NGC ID# 28N8, PCGS# 9222

3945 1921 Alabama 2x2 MS65 NGC. An attractive Gem specimen of the popular 2X2 variant of the Alabama commemorative half dollar, with well-detailed design elements and vibrant mint luster, under shades of lavender-gray, golden-brown, and amber patina. NGC ID# 28HS, PCGS# 9225

1921 Alabama Half Dollar, MS66
Scarce 2x2 Variant

3946 1921 Alabama 2x2 MS66 PCGS. The 2x2 variation of the Alabama design provided a second variety to boost sales among collectors at the time these half dollars were issued. Today, some collectors seek a single Alabama half dollar, while others want both. The present specimen, a wonderful Premium Gem, exhibits hints of heather and iridescent toning over brilliant and frosty silver surfaces. Population: 86 in 66 (5 in 66+), 5 finer (2/13). NGC ID# 28HS, PCGS# 9225

3947 1938 Arkansas MS66+ PCGS. CAC. Thin areas of deep toning largely frame the lustrous satin surfaces, particularly on the obverse. The color includes beautiful iridescent rainbow hues on this well-struck coin. Population: 96 in 66 (7 in 66+), 8 finer (2/13). NGC ID# 28J7, PCGS# 9245

3948 1936-S Bay Bridge MS67 NGC. CAC. The suspension bridge between Oakland and San Francisco was erected in the 1930s, and appears on the reverse of this commemorative half dollar. Groundbreaking for the public works project was held on July 9, 1933, and the bridge opened a little over three years later. This Superb Gem commemorates completion of the bridge. Rarely encountered any finer, this specimen has frosty silver luster with powder-blue and pale gold toning at the obverse periphery. Census: 88 in 67 (3 in 67+), 6 finer (2/13). NGC ID# 28JD, PCGS# 9254

3949 1936-S Bay Bridge MS67 PCGS. CAC. This stunning Superb Gem has deep peripheral iridescence with subtle blue and gold toning on both sides. An impressive Superb Gem, this Bay Bridge half dollar has frosty silver luster and strong design definition. PCGS has only certified nine finer examples (2/13). NGC ID# 28JD, PCGS# 9254

3950 1937-D Boone MS67+ PCGS. CAC. Here is an incredible example of the Boone commemorative design, approaching the finest certified. This Superb Gem exhibits brilliant silver luster with delicate peripheral iridescence on the obverse and faint splashes of champagne toning on the reverse. Population: 43 in 67 (1 in 67+), 3 finer (2/13). NGC ID# 28JS, PCGS# 9271

3951 1936 Bridgeport MS67 PCGS. A magnificent Superb Gem, with sharply detailed design elements and vibrant satiny mint luster, the centers remain mostly brilliant, but the peripheries are illuminated by shades of golden-brown toning. NGC ID# 28JX, PCGS# 9279

3952 1936 Columbia MS67 PCGS. CAC. This magnificent Superb Gem is sharply detailed throughout, with frosty cartwheel mint luster and light shades of lavender and pale gold toning. From a small distribution of 9,007 pieces. Population: 65 in 67 (5 in 67+), 0 finer (2/13). NGC ID# 28K5, PCGS# 9291

3953 1936 Columbia PDS Set MS67 PCGS. CAC. Each of the three coins has identical grades and CAC seals. Housed in separate holders with consecutive serial numbers. The set includes: **1936**, principally powder-blue and cream but with peripheral multicolor toning; **1936-D**, similarly patinated, a single tick above the O in GOD; and a **1936-S**, rose-red and autumn-gold margins cede to lightly toned centers. (Total: 3 coins) PCGS# 9294

**1892 PR64 Columbian Half Dollar
Only 100 Proofs Struck**

- 3954 1892 Columbian PR64 NGC.** Only 100 proof 1892 Columbian halves were reportedly struck. There are many prooflike examples known, but proofs can be distinguished not only by the depth of mirroring in the fields, but the complete, rounded beading around the rims and the fullness of strike on Columbus' hair and the ship's rigging and planks. This is a mostly brilliant example that has light golden and blue peripheral color around the margins of each side. Housed in a former generation holder. Census: 16 in 64, 11 finer (2/13). PCGS# 9295

1935 Connecticut Half Dollar, MS67

- 3955 1935 Connecticut MS67 PCGS.** This stunning Superb Gem has brilliant silver surfaces with full mint frost beneath vibrant lemon-yellow and pale blue toning. A sharp strike and pristine surfaces enhance its eye appeal. PCGS and NGC have each graded a single submission finer (2/13). NGC ID# 28K8, PCGS# 9299

**1935 Connecticut Half Dollar
Attractively Toned Superb Gem**

- 3956 1935 Connecticut MS67 PCGS.** A well-detailed Superb Gem, with splashes of emerald-green and ice-blue toning and vibrant mint luster on both sides. Eye appeal is quite strong. The 1935 Connecticut commemorative half dollar claims a distribution figure of 25,018 pieces. Population: 53 in 67 (3 in 67+), 1 finer (2/13). NGC ID# 28K8, PCGS# 9299

- 3957 1936 Gettysburg MS66+ PCGS.** Intended to commemorate the 75th anniversary of the Gettysburg battle, this half dollar was issued two years early. Both sides of this Premium Gem are brilliant and lustrous with iridescent peripheral toning on the obverse. NGC ID# 28KB, PCGS# 9305

**1922 Grant Half Dollar, MS64
With Star Obverse**

- 3958 1922 Grant With Star MS64 NGC. CAC.** Heavy die polish in the fields is characteristic of the Grant With Star half dollars, creating a somewhat reflective appearance, especially on the obverse. This near-Gem has satin surfaces with full luster and no evidence of toning. A wonderful representative. NGC ID# 28KC, PCGS# 9307

**1922 Grant Half Dollar, MS65
Popular With Star Variant**

- 3959 1922 Grant With Star MS65 NGC.** Identical designs were used for the Grant half dollars and gold dollars, including the two varieties with or without a star on the obverse. The Grant Star half dollars are considerably rarer than those without the star. This piece has the usual satin surfaces with delicate champagne toning and peripheral iridescence. NGC ID# 28KC, PCGS# 9307

1928 Hawaiian Half Dollar, MS64

- 3960 1928 Hawaiian MS64 PCGS.** This satiny near-Gem is highly lustrous with brilliant silver surfaces beneath delicate champagne toning. The Hawaiian half dollar is one of the key issues in the classic commemorative series of 1892 to 1954. This issue commemorates Captain James Cook who discovered the islands 150 years earlier. NGC ID# 28KE, PCGS# 9309

Gem 1928 Hawaiian Half Dollar

3961 1928 Hawaiian MS65 NGC. The key silver commemorative type, much of the Hawaiian Sesquicentennial issue was distributed to residents of the islands, including many non-collectors. Gems have always been in demand, particularly when encountered with the potent luster and minimally abraded surfaces of the present chestnut-gold and gunmetal-blue example. NGC ID# 28KE, PCGS# 9309

3962 1935 Hudson MS65 NGC. A well-detailed Gem example, from a distribution of just 10,008 pieces, this coin displays bright mint luster under a patina of pale gold and dark amber colors. Only minor signs of contact are evident. NGC ID# 28KF, PCGS# 9312

3963 1935 Hudson MS65 PCGS. CAC. Medium olive-gold shades enrich both sides of this lustrous and nicely struck Gem. The Hudson ranks among the lowest mintage silver commemorative types, tied with the Spanish Trail and trailing only the 1928 Hawaiian. NGC ID# 28KF, PCGS# 9312

3964 1935 Hudson MS66+ PCGS. CAC. This high-end Premium Gem features sharply detailed devices and vibrant satiny mint luster under shades of pale gold toning. PCGS has graded only seven numerically finer examples (1/13). NGC ID# 28KF, PCGS# 9312

3965 1925 Lexington MS66 PCGS. This attractive Lexington half dollar displays sharply detailed design elements throughout, with especially vibrant mint luster and few signs of contact. PCGS has graded only 10 numerically finer examples (2/13). NGC ID# 28KK, PCGS# 9318

3966 1918 Lincoln MS67 PCGS. A magnificent Superb Gem, with razor-sharp detail on all design elements and vibrant mint luster. Both sides are patinated in attractive shades of champagne-gold and lavender. Population: 93 in 67 (3 in 67+), 2 finer (1/13). PCGS# 9320

3967 1936 Long Island MS66 PCGS. CAC. Dark green and light crimson toning visits the obverse peripheries, with the centers remaining mostly brilliant. The effect is similar, but less dramatic on the reverse. The design elements are well-detailed and vibrant mint luster shines through the patina. NGC ID# 28KL, PCGS# 9322

3968 1921 Missouri MS65 NGC. Accents of lavender, gray, and pale gold toning enliven the unmarked surfaces of this attractive Gem. The design elements are well-detailed and only the most insignificant signs of contact are evident. NGC ID# 28KS, PCGS# 9330

3969 1921 Missouri MS65 NGC. Original deep golden-brown and powder-blue patina enriches this satiny Gem. Intense scrutiny of the surfaces fails to reveal even a single remotely relevant abrasion, and the strike is bold aside from the frontiersman's cheek. The mintage of 20,428 pieces is relatively low for an early silver commemorative type, and nearly half of those coins had 2x4 in the field, constituting a separate issue. Many examples were spent or otherwise abused, and Gems are far more elusive than commemorative issues from the thirties with similar mintages. NGC ID# 28KS, PCGS# 9330

3970 1921 Missouri 2x4 MS65 NGC. Toned in attractive shades of lavender-gray and golden-brown, this sharply detailed Missouri half dollar displays vibrant mint luster under the toning. The popular 2x4 variant. NGC ID# 28KR, PCGS# 9331

1921 Missouri Half Dollar, MS65 2x4 in Field

3971 1921 Missouri 2x4 MS65 PCGS. CAC. The Missouri ranks among the scarcest silver commemorative types, and the 2x4 variety is more elusive than its Plain counterpart. Mintmark varieties did not exist within the series until the Oregon Trail was introduced in 1926. However, in 1921, distributors for the Missouri and Alabama state centennial issues came up with the idea of field symbol varieties to increase sales. This is a satiny and well preserved Gem with medium olive-gold toning. NGC ID# 28KR, PCGS# 9331

3972 1923-S Monroe MS65 PCGS. Rich autumn-gold, lavender, and powder-blue grace this coruscating and minimally marked Monroe half dollar. Though borderline Uncirculated examples of the type are fairly plentiful, true Gems remain elusive. NGC ID# 28KT, PCGS# 9333

3973 1923-S Monroe MS65 NGC. This impressive Gem 1923-S Monroe half dollar displays well-detailed design elements and satiny mint luster under a mottled patina of pale gold, gray, and amber. From a distribution figure of 274,077 pieces. NGC ID# 28KT, PCGS# 9333

1938 New Rochelle Half Dollar Specimen MS66

3974 1938 New Rochelle Specimen MS66 NGC. Both Prooflike and Specimen strikings are known and certified for the New Rochelle. The Specimen coins, such as this one, are only graded by NGC. Such pieces are presumably from the 50 coins presented to various dignitaries, members of the Coinage Committee, and selected members of the Westchester County Coin Club. This is a deeply mirrored example with only slight contrast evident between the fields and devices. There are no obvious contact marks present, and each side is primarily brilliant with a slight reddish tinge evident. NGC has only certified 10 coins as Specimen strikings, and three others have been graded the same as this coin with five finer, minus possible resubmissions (2/13). NGC ID# 28KU, PCGS# 9335

3975 1938 New Rochelle MS67 PCGS. CAC. This exceptional Superb Gem exhibits grayish-silver fields with deep gold and iridescent toning limited to the outer margins. Here is an excellent opportunity for the Registry collector, as PCGS has only certified three finer pieces (2/13). NGC ID# 28KU, PCGS# 9335

3976 1938 New Rochelle MS67+ PCGS. CAC. An amazing Superb Gem, this piece has frosty mint luster with ivory surfaces exhibiting faint peripheral gold toning. PCGS has only certified three submissions finer than this piece (2/13). NGC ID# 28KU, PCGS# 9335

**1938 New Rochelle Half Dollar, MS68
None Certified Finer**

3977 1938 New Rochelle MS68 NGC. CAC. The 1938 New Rochelle half dollar claims a distribution figure of 15,266 pieces, but only a handful of survivors can match the quality of the present coin. This magnificent MS68 specimen shows spectacular tab toning on the obverse, while the reverse remains mostly brilliant, with a few hints of greenish-gold at the peripheries. The design elements show razor-sharp definition and the surfaces radiate satiny mint luster. Census: 15 in 68, 0 finer (2/13). NGC ID# 28KU, PCGS# 9335

3978 1934-D Oregon MS67 PCGS. CAC. Wisps of iridescent toning are barely visible on the brilliant surfaces of this Superb Gem Oregon half dollar. It is tied for the finest that PCGS or NGC have certified (2/13). NGC ID# 28L2, PCGS# 9344

3979 1936 Oregon MS67+ NGC. CAC. Both sides of this fully original Superb Gem exhibit gray-gold toning with peripheral iridescence. Pristine surfaces accompany bold design motifs. NGC has only certified two finer examples (2/13). NGC ID# 28L3, PCGS# 9345

3980 1938 Oregon MS66+ ★ NGC. CAC. This lustrous high grade Oregon half is primarily olive-gold though the left border displays rose-red tints. The strike is sharp aside from flatness on the upper right border of the ox. Census: 2 in 66+ ★, 2 finer with a Star designation (2/13). NGC ID# 28L6, PCGS# 9348

3981 1938 Oregon MS67+ PCGS. CAC. Ex: Gutttag Family. According to Q. David Bowers, Julius Gutttag acquired "most of the original mintage" of 1938 Oregon Trail sets directly from the distributor, which allowed him to sell sets at a sizeable profit. Light straw-gold toning adorns satiny and unmarked surfaces. NGC ID# 28L6, PCGS# 9348

3982 1938-D Oregon MS68 NGC. An essentially immaculate example from the penultimate date of this well designed and long-lived commemorative type. The lustrous surfaces display delicate powder-blue and caramel-gold toning. Census: 23 in 68 (1 in 68+), 0 finer (2/13).
Ex: Long Beach Signature (Heritage, 9/2006), lot 2791. NGC ID# 28L7, PCGS# 9349

3983 1938-S Oregon MS67+ PCGS. CAC. This impressive Superb Gem is fully brilliant with frosty mint luster and a complete absence of toning. An exceptional example with few in finer grades. PCGS has only certified 10 submissions better than this piece (2/13). NGC ID# 28L8, PCGS# 9350

3984 1938 Oregon PDS Set MS66 PCGS. CAC. All three holders display the CAC seal and have consecutive serial numbers. The set includes: **1938**, golden-russet toning near the margins, the back of the oxen is incompletely brought up; **1938-D**, only a hint of tan patina, well struck; and a **1938-S**, chestnut-gold toning at the borders, sharply struck. (Total: 3 coins) PCGS# 9351

3985 1915-S Panama-Pacific MS64 PCGS. CAC. FS-501. The mintmark is repunched east. A golden-brown and stone-gray near-Gem with well struck and satiny surfaces. One tick beneath Columbia's shoulder, but otherwise void of contact. NGC ID# 26H7, PCGS# 9357

**MS66 1915-S Panama-Pacific Half Dollar
Scarce Any Finer**

3986 1915-S Panama-Pacific MS66 PCGS. While the 1915-S Panama-Pacific half dollar is readily available in Gem and lesser grades, at the MS66 level such availability comes at a price and anything finer is scarce. This Premium Gem has gauzy toning overall with hints of peach and gold adding color. Definition is softer than usual, preservation above-average. NGC ID# 26H7, PCGS# 9357

**1915-S Half Dollar, MS66
Panama-Pacific Commemorative**

3987 1915-S Panama-Pacific MS66 PCGS. CAC. Pink, sage, and aqua-olive hues compete for territory on this Premium Gem 1915-S Pan-Pac half dollar, with considerable luster apparent despite the moderately intense coloration. The surfaces show a typical satiny appearance, and a loupe reveals few marks other than a tiny tick on one of the cherub's buttocks. The softness on the eagle feathers on the reverse is a universal design flaw rather than strike weakness. NGC ID# 26H7, PCGS# 9357

3988 1936-D Rhode Island MS67 NGC. Dramatic crescents of gold and amber toning grace the peripheries of this Sharply detailed Superb Gem. The virtually pristine surfaces and vibrant mint luster add to the outstanding visual appeal. Census: 36 in 67, 2 finer (2/13). NGC ID# 28LF, PCGS# 9364

3989 1936-D San Diego MS67+ PCGS. CAC. A spectacular high-end Superb Gem, with dark green toning at the peripheries and pale pink centers. Sharply detailed design elements complement the vibrant satiny mint luster. Population: 78 in 67 (3 in 67+), 0 finer (1/13). NGC ID# 28LL, PCGS# 9372

3990 1926 Sesquicentennial MS65 NGC. This Gem 1926 Sesquicentennial half dollar displays well-detailed design elements and vibrant mint luster, under mottled shades of green, gray, and amber toning. NGC has certified 12 numerically finer examples (2/13). NGC ID# 28LM, PCGS# 9374

- 3991 1935 Spanish Trail MS66 NGC.** Vibrant mint luster shines through a vivid patina of lavender, gray, green, and amber colors on this spectacular Premium Gem. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 28LN, PCGS# 9376

1936-S Texas Half Dollar, MS67+

- 3992 1936-S Texas MS67+ PCGS. CAC.** Offered here is a gorgeous Superb Gem example from the Texas Centennial series issued from 1934 to 1938. For the entire series, PCGS has only certified 40 finer examples. This beauty exhibits delicate iridescent toning over brilliant, satiny silver luster. Population: 71 in 67 (6 in 67+), 1 finer (2/13). NGC ID# 28LW, PCGS# 9388

- 3993 1938-S Texas MS67 PCGS. CAC.** Attractive shades of pale green and lavender toning visit the pristine surfaces of this well-detailed Superb Gem. Satiny mint luster adds to the visual appeal. Population: 58 in 67 (2 in 67+), 1 finer (1/13). NGC ID# 28M4, PCGS# 9396

- 3994 1925 Vancouver MS66 PCGS.** The 1925 Vancouver half dollar is very scarce above the MS66 grade level. This delightful Premium Gem is sharply detailed and lustrous, with attractive shades of gold and amber toning. NGC ID# 28M5, PCGS# 9399

**1948-D Booker T. Washington Half, MS67
Among the Finest Certified**

- 3995 1948-D Booker T. Washington MS67 PCGS. CAC.** Following a substantial mintage of 1946 Booker T. Washington half dollars, the series continued on for five more years with low mintage issues each year from the three operating mints at the time. Just 8,005 examples were produced at each mint in 1948, for example. This Superb Gem, one of the finest of its kind, has frosty silver luster and bold design definition with splashes of iridescent toning. Population: 16 in 67, 0 finer (2/13). NGC ID# 28ME, PCGS# 9413

**Superb Gem 1949 Booker T. Washington Half
Beautifully Preserved Surfaces**

- 3996 1949 Booker T. Washington MS67 PCGS.** This Superb Gem 1949 Booker T. Washington is among the finest few survivors from the original distribution of 6,004 pieces. The only three high-distribution issues in the series are the 1946, 1946-D, the 1946-S, and the 1951. This frosty silver-white example shows just a trace of pink patina over beautifully preserved surfaces. Population: 13 in 67, 0 finer (2/13). NGC ID# 28MG, PCGS# 9416

**1949 Booker T. Washington Half, MS67
None Finer at PCGS**

- 3997 1949 Booker T. Washington MS67 PCGS. CAC.** From a small distribution of 6,004 pieces, the 1949 Booker T. Washington commemorative half dollar is seldom encountered in Superb Gem condition. This sharply detailed MS67 example displays vibrant mint luster and sharply detailed design elements, with a few wisps of pale gold and pink toning. Population: 13 in 67, 0 finer (2/13). NGC ID# 28MG, PCGS# 9416

- 3998 1950-S Booker T. Washington MS67 PCGS.** The four most frequently encountered dates in the Booker T. Washington series, in order, are 1946, 1946-S, 1951, and 1950-S. Fourth on that list, this piece makes an excellent type candidate. Both sides of this Superb Gem are fully brilliant and untuned with frosty silver luster. Population: 29 in 67 (2 in 67+), 0 finer (2/13). NGC ID# 28MM, PCGS# 9422

- 3999 1951-S Booker T. Washington MS67 PCGS.** Just 7,004 examples of the Denver and San Francisco Mint Booker T. Washington half dollars were coined in 1951, and examples are rarely encountered today. This remarkable example is sharply defined with fully brilliant and untuned silver surfaces. Population: 33 in 67 (1 in 67+), 0 finer (2/13). NGC ID# 28MR, PCGS# 9426

- 4000 1951-D Washington-Carver MS66+ PCGS. CAC.** Tied for the finest at PCGS or NGC, this amazing Washington-Carver half dollar is one of the top examples of the type. Both sides of this Premium Gem are fully brilliant with faint traces of champagne toning. PCGS has only certified 27 finer examples of the Washington-Carver design in higher grades, all in MS67 (2/13). NGC ID# 28MT, PCGS# 9431

- 4001 1951-S Washington-Carver MS67 PCGS. CAC.** A magnificent Superb Gem with vibrant mint luster, well-detailed design elements, and a few hints of pale gold and lavender toning. Population: 2 in 67 (1 in 67+), 0 finer (1/13). NGC ID# 28MU, PCGS# 9432

COMMEMORATIVE GOLD

- 4002 1903 Louisiana Purchase/Jefferson MS64 PCGS. CAC.** Thomas Jefferson was the President who made the Louisiana Purchase and this commemorative gold dollar is a fitting tribute to his forward thinking. Both sides have faint bluish patina over brilliant yellow surfaces with bold design definition. NGC ID# 26HA, PCGS# 7443
- 4003 1903 Louisiana Purchase/Jefferson MS66 PCGS.** This commemorative gold dollar was issued to commemorate the Louisiana Purchase and made its appearance at the St. Louis World's Fair, otherwise known as the Louisiana Purchase Centennial Exposition. Both sides of this Premium Gem are fully brilliant and boldly detailed with lustrous yellow-gold surfaces. NGC ID# 26HA, PCGS# 7443
- 4004 1903 Louisiana Purchase/Jefferson MS66 NGC.** Strongly lustrous yellow surfaces show occasional sun-gold overtones. A well-defined Premium Gem example of this Jefferson gold dollar issue, from a distribution of 17,500 pieces. NGC ID# 26HA, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS67 Jefferson Portrait

- 4005 1903 Louisiana Purchase/Jefferson MS67 PCGS.** This boldly detailed Superb Gem has exceptional eye appeal with brilliant yellow surfaces and lovely mint frost. Both sides exhibit splashes of dusky patina. This piece is tied for the finest certified at PCGS or NGC. Population: 78 in 67, 0 finer (2/13). NGC ID# 26HA, PCGS# 7443
- 4006 1903 Louisiana Purchase/McKinley MS66 NGC.** A crisply struck apricot-gold Premium Gem whose exemplary luster and outstanding preservation provide imposing eye appeal. Recently martyred President McKinley appears on the obverse despite no direct link to the 1904 Louisiana Purchase Exposition. NGC ID# 26HB, PCGS# 7444
- 4007 1903 Louisiana Purchase/McKinley MS66 PCGS. CAC.** The recently assassinated President McKinley appears on the obverse of this gold commemorative issued for the St. Louis World's Fair. Both sides of this Premium Gem are highly lustrous with brilliant surfaces and excellent eye appeal. NGC ID# 26HB, PCGS# 7444
- 4008 1903 Louisiana Purchase/McKinley MS66 PCGS. CAC.** The peach-gold centers are framed by lime-green borders. This crisply struck Gem is thoroughly lustrous and appears pristine save for delicate grazes on the left obverse field. Housed in a green label holder. NGC ID# 26HB, PCGS# 7444

1905 Lewis and Clark Gold Dollar, MS65

- 4009 1905 Lewis and Clark MS65 NGC.** The sole doubled-headed U.S. type, the Lewis and Clark gold dollar has also caused confusion over the years concerning the identity of the portraits. Lewis is on the side with the date, while Clark is on the denomination side. The present Gem has moderately prooflike fields and is boldly struck except for the dentils. NGC ID# 26HD, PCGS# 7448

Gem 1905 Lewis and Clark Dollar Rare with CAC Bean

- 4010 1905 Lewis and Clark MS65 PCGS. CAC.** The 1905 Lewis and Clark gold dollar is considerably scarcer than its 1904 predecessor, since those who collected by type had already purchased an example. The present green-gold Gem displays dynamic luster and only inconsequential field grazes. One of only eight MS65 examples acknowledged by CAC. Housed in a green label holder. NGC ID# 26HD, PCGS# 7448
- 4011 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** From a distribution of 15,000 pieces, this Premium Gem Panama Pacific gold dollar displays razor-sharp design elements and vibrant mint luster, with virtually pristine yellow-gold surfaces. NGC ID# 26HE, PCGS# 7449
- 4012 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** Lemon-gold high points and powder-blue fields ensure the originality of this boldly struck high grade gold dollar. Pristine except for a solitary graze on the cheek of the miner. NGC ID# 26HE, PCGS# 7449
- 4013 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** A fully struck green-gold high grade example of this scarce gold issue. The coruscating surfaces are pristine aside from a trivial lint mark on each side. Certified in a green label holder. NGC ID# 26HE, PCGS# 7449

**1915-S Pan-Pac Two and a Half, MS67
Sharply Struck and Virtually Unmarked**

4014 1915-S Panama-Pacific Quarter Eagle MS67 NGC. CAC. The 1915-S Panama-Pacific quarter eagles were a Charles Barber-George T. Morgan dual-design piece, but for once Barber outdid Morgan in artistry, in this cataloger's opinion. These pieces are the largest "affordable" Pan-Pac gold commemoratives for the vast majority of collectors, and this Superb Gem is among the finest survivors at either service. This orange-gold piece displays excellent eye appeal with a sharp strike and virtually none of the tiny marks that many lower-graded examples show. NGC ID# 26HK, PCGS# 7450

4015 1917 McKinley MS64 NGC. A delightful Choice example of the 1917 McKinley gold dollar, with well-detailed design elements and smooth, partially prooflike lemon-yellow surfaces. Only 10,000 examples were distributed. NGC ID# 26HG, PCGS# 7455

4016 1917 McKinley MS65 PCGS. A lustrous orange-red Gem. The strike is precise aside from slight blending on each side near 9 o'clock. A couple of tiny spots are noted on the McKinley Memorial. McKinley's final appearance on a U.S. coin until the Presidential dollar of the present year. NGC ID# 26HG, PCGS# 7455

4017 1917 McKinley MS66 NGC. This impressive Premium Gem exhibits razor-sharp definition on all design elements, with vibrant mint luster and appealing orange-gold surfaces with hints of rose. NGC ID# 26HG, PCGS# 7455

**1917 Gold Dollar, MS66
McKinley Commemorative**

4018 1917 McKinley MS66 PCGS. CAC. This diminutive commemorative gold piece exhibits exceptional surfaces with brilliant yellow-gold luster and full mint frost. Wisps of lilac toning appear along the borders, with small splashes of mirrored finish on the reverse. PCGS has only certified 57 finer examples (2/13). NGC ID# 26HG, PCGS# 7455

4019 1917 McKinley MS66 PCGS. CAC. Pinpoint definition is evident on all design elements of this charming Premium Gem, with vibrant satiny mint luster and well-preserved yellow-gold surfaces. Eye appeal is terrific. NGC ID# 26HG, PCGS# 7455

4020 1922 Grant No Star AU55 NGC. A lightly circulated example of the No Star variant, from a distribution of just 5,000 pieces. This coin retains much of its original design detail and mint luster, with pleasing yellow-gold surfaces. NGC ID# 26HJ, PCGS# 7458

4021 1922 Grant No Star MS65 PCGS. A beautiful honey-gold Gem that has satin luster and a pristine appearance. The strike is intricate aside from the usual softness on the tree trunk near the window. The With Star and No Star varieties have comparable mintages and command similar values. NGC ID# 26HJ, PCGS# 7458

4022 1922 Grant No Star MS65 PCGS. This impressive Gem shows sharply detailed design elements and vibrant mint luster on the unmarked yellow-gold surfaces. A few hints of rose enhance the considerable appeal. NGC ID# 26HJ, PCGS# 7458

1922 Grant No Star Gold Dollar, MS66

4023 1922 Grant No Star MS66 PCGS. The Grant gold dollar, marking the centennial of the late President's birth, exists in two variants, with or without a star on the obverse. This Premium Gem is the No Star variety. Both sides have brilliant light yellow surfaces with satin luster and exceptional eye appeal. NGC ID# 26HJ, PCGS# 7458

**1922 Grant Gold Dollar, MS66+
No Star Obverse**

4024 1922 Grant No Star MS66+ PCGS. CAC. The variety without the star on the obverse, this Premium Gem is an exceptional specimen for the connoisseur, featuring brilliant yellow luster and bold design motifs. Heavy die polish appears in the fields on both sides, contributing to the usual satin appearance. NGC ID# 26HJ, PCGS# 7458

- 4025 1922 Grant With Star MS62 NGC.** Above-average detail is most notable on Grant's hair. The strongly lustrous obverse has a touch of peach-gold to it, while the reverse is paler and almost brassy. NGC ID# 26HH, PCGS# 7459
- 4026 1926 Sesquicentennial MS64 PCGS.** The final gold commemorative of the classic era (1892-1954) was issued for the sesquicentennial of the Declaration of Independence. This Choice Mint State specimen is highly lustrous with brilliant yellow surfaces and excellent eye appeal. NGC ID# 26HL, PCGS# 7466
- 4027 1926 Sesquicentennial MS65 PCGS.** This pleasing Gem example is well-detailed, with vibrant mint luster and attractive greenish-gold surfaces. No mentionable distractions are evident and eye appeal is outstanding. NGC ID# 26HL, PCGS# 7466
- 4028 1926 Sesquicentennial MS65 PCGS.** An attractive Gem, with well-detailed design elements and vibrant frosty mint luster. The light orange-gold surfaces show a few hints of lilac, with outstanding eye appeal. NGC ID# 26HL, PCGS# 7466
- 4029 1926 Sesquicentennial MS65 PCGS.** Predominantly peach-gold though a glimpses of gunmetal-blue is along the obverse margin near 3 o'clock. Sharply struck and lightly marked. The final gold commemorative issue prior to 1984. NGC ID# 26HL, PCGS# 7466
- 4030 1926 Sesquicentennial MS65 PCGS.** Sea-green and pumpkin-gold compete for territory across this thoroughly lustrous, precisely struck, and well preserved Gem. An excellent value relative to higher grades. Encapsulated in a green label holder. NGC ID# 26HL, PCGS# 7466

MODERN BULLION COINS

Ultimate Grade MS70 1987 Silver Eagle

- 4031 1987 Silver Eagle MS70 PCGS.** More than 11 million Uncirculated finish silver eagles were struck in 1987, but most went into tubes, were lightly handled, had production flaws, or simply came into contact with another coin while at the Mint. Immaculate examples, such as the present fully struck pearl-gray piece, are surprisingly rare. Population: 10 in 70 (2/13). NGC ID# 26J6, PCGS# 9808
- 4032 1987 Silver Eagle MS70 NGC.** This 1987 Silver Eagle is a coin of surpassing quality, with no observable surface flaws, sharply detailed design elements, and incredibly vibrant mint luster. Eye appeal is overwhelming. NGC ID# 26J6, PCGS# 9808
- 4033 1987-S Silver Eagle PR70 Ultra Cameo NGC.** A technically perfect specimen of this second-year proof silver one-ounce American Eagle issue. Only a handful of tiny toning spots and mint-made variations are visible on close examination. NGC ID# 26J7, PCGS# 9809
- 4034 1990 Half-Ounce Gold Eagle MS66 PCGS.** Investor demand for American gold eagles declined annually after the 1986 program introduction through 1991. Investors also preferred the one-ounce variety, since it was offered at a lower premium over bullion. Thus the 1990 half-ounce mintage was just 31,000 pieces. The present honey-gold example is well struck and lustrous with only minor marks. NGC ID# 26NB, PCGS# 9842

1993-P Silver Eagle Flawless PR70 Deep Cameo

- 4035 1993-P Silver Eagle PR70 Deep Cameo PCGS.** Prior to 1993, all proof silver Eagles were coined in San Francisco, carrying the S mintmark. In 1993, the P mintmark first appeared on the silver Eagles of the "Philadelphia Set" commemorating the 200th anniversary of coinage operations in that city. This fully brilliant and perfect proof has untuned silver surfaces with exceptional contrast. NGC ID# 26JK, PCGS# 9867

Deep Cameo PR70 1993-P Silver Eagle

- 4036 1993-P Silver Eagle PR70 Deep Cameo PCGS.** The 1993-P and 1994-P American Silver Eagles are keys to the set in the ultimate PR70 Deep Cameo grade, if not in the same league as the vaunted 1995-W. The certified PCGS populations of the three coins in that grade cannot meet the demand, given the immense popularity of the series at every show we attend and every auction we conduct. This beaming silver-white 1993-P proof is perfect in every regard to our eyes. NGC ID# 26JK, PCGS# 9867
- 4037 1994-P Silver Eagle PR70 Ultra Cameo NGC.** A faultless and exquisite specimen of this popular silver American Eagle proof issue. Fantastic eye appeal and a great addition to a collection of the series. NGC ID# 26JM, PCGS# 9877

Flawless MS70 2000 Silver Eagle

- 4038 2000 Silver Eagle MS70 NGC.** This flawless silver eagle has a bold strike with brilliant, pure white silver surfaces and exceptional frosty mint luster. As only one PCGS submission has been graded MS70, collectors who seek a perfect example should give this NGC certified specimen serious consideration. NGC ID# 26JZ, PCGS# 9949

4039 2001 Silver Eagle MS70 PCGS. Perfection prevails throughout both sides on this 2001 American Silver Eagle, one of only 24 submissions in this ultimate grade at PCGS (2/13). The popularity of these coins has only intensified since the notoriously ill-planned 2011 “five-piece sets” debacle. NGC ID# 26K3, PCGS# 9954

4040 2002 Quarter-Ounce Gold Eagle MS70 PCGS. A perfect Mint State example of the quarter-ounce American Eagle gold coin, this piece has brilliant light yellow luster and bold design motifs. This is one of only four MS70 examples that PCGS has certified (2/13). NGC ID# 26MK, PCGS# 9961

COINS OF HAWAII

1883 Hawaii Dollar, Deeply Toned MS61 Scarce Type in Uncirculated

4041 1883 Hawaii Dollar MS61 NGC. Scarcest of the various 1883 denominations, hundreds of thousands of these pieces were melted, leaving a net distribution of 46,348 pieces. Rarely are the dollars found in mint condition. This bright example is covered with deep purple, blue, and rose iridescence on each side. The strike is strong throughout, and the grade-defining abrasions are well concealed by the depth of the color. Census: 12 in 61, 54 finer (2/13). PCGS# 10995

GSA DOLLARS

4042 1881-CC MS65 NGC. Frosty silver with a moderate cartwheel effect and a touch of cream toning. This eye-appealing Gem is band-certified in the black GSA holder of issue and offered alone (no box or paperwork). PCGS# 407126

4043 1885-CC MS66 NGC. Frost-kissed on the high design elements with broad silver luster and a substantial cartwheel effect. This low-mintage but high-availability issue starts to become elusive at the MS66 level. Band-certified in the black GSA holder of issue and offered alone (no box or paperwork). PCGS# 407160

1885-CC Morgan Dollar, MS66+ GSA Holder Specimen

4044 1885-CC MS66+ NGC. Housed in the black GSA distribution holder from the 1970s. The obverse of this Premium Gem Carson City Morgan dollar is fully brilliant with frosty mint luster and exceptional design definition. The reverse is similar, with delicate golden toning. NGC has only certified nine finer examples (2/13). PCGS# 407160

CIVIL WAR TOKEN

Very Rare G.G. Sawtell Sutler Token 8th Virginia Regiment, Choice VF, S-H5B

4045 (1861-65) G.G. Sawtell, 8th Virginia Regiment Sutler Token VF35 NGC. VA S-H5B. The left obverse bears the counterstamp “15.” The counterstamp is deep and visible on the reverse. The counterstamp causes a moderate bend. The obverse legends are G. G. SAWTELL / 8TH VIR. REG / 5 / CENTS IN GOODS. The reverse inscription is JOHN STANTON / STAMP / BRAND / CUTTER / CINCINNATI within a beaded circle. The brassy surfaces are toned olive-brown and show a slender thin mark on the central reverse. The only auction record we can find for any Sawtell sutler token is a VF20 VA S-M5B that realized \$5,750 in a Stack’s January 2011 sale. PCGS# 661125

ERRORS

1924 Buffalo Nickel on a Cent Planchet, MS62 Brown

4046 1924 Buffalo Nickel — Struck on a Cent Planchet — MS62 Brown NGC. 3.2 gm. Aligned with the collar die near 12 o’clock, this off metal Buffalo nickel displays most of the design, though the designer’s initial is off the flan, as is the top half of UNITED STATES OF AMERICA. The date and mintmark area are intact. LIBERTY exhibits the spreading toward the rim characteristic of an undersized flan. Toned jade-green and plum-red with smooth, glossy surfaces. NGC ID# 22RX, PCGS# 3951

MS63 Uniface D-Mint Quarter, on a Silver Dime Planchet

- 4047 Undated Denver Mint Washington Quarter — Struck on a Silver Dime Planchet, Uniface Obverse — MS63 PCGS.** A silver dime planchet and a silver quarter planchet were simultaneously fed between quarter dies. The dime planchet faced the reverse die, and the quarter planchet faced the obverse die. The dime planchet was well centered, and thus the reverse legends are nearly complete, with the bottom of OLLA missing. The strike stretched the dime flan so thin that a weak, ghostly image of the reverse is faintly apparent on the side that was indented into the quarter planchet, which is not included in the lot.

Ex: Long Beach Signature (Heritage, 9/2009), lot 1340, which realized \$575. NGC ID# 2447, PCGS# 5790

Broadstruck 1880-S Morgan Dollar, MS63

- 4048 1880-S Morgan Dollar — Broadstruck Out of Collar — MS63 PCGS.** Medium S. Moderately uncentered with a fairly broad peripheral arc of unstruck surface widest at 10:30. The peripheral letters and dentils exhibit spreading toward the rim where the rim is narrow. Satiny and intricately struck with surprisingly smooth surfaces and a rich blanket of apple-green and autumn-gold toning. NGC ID# 2544, PCGS# 7118

INGOT

Undated S-Mint (1942) 5.16-Ounce Silver Ingot

- 4049 Undated (1942) San Francisco Mint 5.16-Ounce Silver Ingot.** While an undated ingot, this small bar was part of a much larger consignment of silver by an employee of the *San Francisco Examiner* in 1942. In all 258.40 ounces of scrap silverware were turned into the Mint before melting, yielding 253.75 ounces of almost pure silver in the form of 37 small-sized ingots, ranging from four to six ounces each. This piece has the oval imprint of the San Francisco Mint at the top with the ingot number 1015 stamped over the bottom of the mint imprint, followed by 999.75, with FINE below. The back displays the weight: 5.16 with OZS seen faintly below. The ingot measures 30 x 49 mm. The surfaces are bright throughout and there is remarkably little rippling of the surfaces on either side. PCGS# 661000

MINT SETS

- 4050 Uncertified 1947 Double Mint Set.** 1947 PDS double mint set in the original cardboard holders. The coins are lightly to moderately toned. The typical example grades MS63 to MS64. No 1947-S halves were struck. Personal inspection suggested, since no returns will be accepted for this lot. (Total: 28 coins) NGC ID# 22EN, PCGS# 2751
- 4051 Uncertified 1947 Double Mint Set.** The coins are lightly to moderately toned and housed in their issued cardboard holders. The typical piece grades MS63 to MS64. The 1947-S nickels are circulated and not original to the set. No 1947-S halves were issued. Personal inspection suggested, since no returns will be accepted for this lot. (Total: 28 coins) NGC ID# 22EN, PCGS# 2751
- 4052 Two Uncertified 1948 Double Mint Sets.** A lustrous group with light to medium toning, still housed in their cardboard holders of issue. The typical coin grades MS64 or so. No 1948-S halves were struck. Personal inspection suggested, since no returns will be accepted for this lot. (Total: 56 coins) NGC ID# 22ES, PCGS# 2761
- 4053 Uncertified 1949 and 1951 Double Mint Sets.** The two sets remain in their issued cardboard holders. The coins are moderately toned and the typical piece grades MS63 to MS64. No 1949-S half dollars were issued. Personal inspection is suggested, since no returns will be accepted for this lot. (Total: 58 coins) NGC ID# 22EV, PCGS# 2769
- 4054 Uncertified 1952 and 1953 Double Mint Sets.** One PDS double set each for 1952 and 1953, housed in their issued cardboard holders. The typical coin is moderately toned and grades MS64, though several grade between MS60 and MS62. The 1953 set retains its outer mailing envelope with cancelled 18 cent stamp, postmarked April 6, 1954. Personal inspection is suggested, since no returns will be accepted for this lot. (Total: 60 coins) NGC ID# 22F6, PCGS# 2797
- 4055 Nine Uncertified Double Mint Sets.** The lot includes (2) 1954, (2) 1955, (2) 1956, (1) 1957, and (2) 1958 double mint sets, each housed in its issue cardboard holder. The coins are moderately toned and the typical example grades MS65 though some are spotted. One of the 1958 mint sets retains its outer mailing envelope, postmarked June 4, 1959. Personal inspection suggested, since no returns will be accepted for this lot. (Total: 180 coins) NGC ID# 22FC, PCGS# 2815

PATTERNS

Judd-125 1850 Cap and Rays
Proof Three Cent Silver Pattern

- 4056** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR61 NGC. The obverse features a Liberty cap surrounded by rays. LIBERTY is on the bottom part of the cap and the date is below. A palm branch encircles the entire reverse to form a wreath, enclosing the numeral III. UNITED STATES OF AMERICA rings the rim. Struck in silver with a plain edge. The design is similar to Judd-67, the well known 1836 gold dollar pattern. Delicate powder-blue and almond-gold toning adorns this satiny example. The overall strike is good though a few letters in LIBERTY are incomplete. PCGS# 11536

Very Rare Paquet 1859 Half Dollar
Judd-249, Silver, PR63

- 4057** 1859 Half Dollar, Judd-249, Pollock-288, High R.7, PR63 NGC. The Paquet Liberty Seated obverse. She supports a fasces and a legend-free shield. An olive branch and three arrowheads rest near the base of the shield. Thirteen stars encircle the rim. The reverse depicts the cereal wreath from issued Seated coinage with the denomination inside the wreath expressed in the tall, thin letters typical of Paquet's style. Struck in silver with a reeded edge. Like all known examples, the reverse displays extensive speckles of die rust, as made. Well struck and nicely mirrored with attractive peripheral ocean-blue and tan-gold toning. PCGS# 12000

Gem Proof 1868 Three Cent Nickel
Judd-615, Plain Roman Numerals

- 4058** 1868 Three Cent Nickel, Judd-615, Pollock-680, R.5, PR65 PCGS. A regular issue obverse die is paired with a pattern reverse, which borrows the agricultural wreath from the gold dollar and three dollar piece and uses three non-ribbed columns to display the denomination. Struck in nickel with a plain edge. Light chestnut-gold toning visits satiny surfaces. Nicely struck and devoid of contact. A lens locates infrequent tiny gray flecks. PCGS# 60827

Choice Proof Red Judd-627 1868 Nickel
Struck on a Broad Planchet

- 4059** 1868 Five Cents, Judd-627, Pollock-696, R.7, PR64 Red PCGS. The obverse closely resembles the contemporary three cent nickel. The reverse is a pattern design, and has a laurel branch with ribbon framing a large 5 and CENTS in curved letters. IN GOD WE TRUST is at the the upper border. Struck in copper with a plain edge. The planchet has the diameter of a silver quarter and the rims are very broad, usual for Judd-627. A well struck rose-red near-Gem with scattered minor obverse carbon. Though designated as Low R.7 in the 10th edition of Judd, this is the first example we have offered at auction since 1996, and we feel more comfortable with the uspatterns.com estimate of "about a half dozen known." PCGS# 80844

**Very Rare 1868 Five Cent Pattern
Judd-634, PR64 ★ Brown**

- 4060** 1868 Five Cents, Judd-634, Pollock-706, High R.7, PR64 ★ Brown NGC. CAC. The overall design is similar to the circulating three cent nickel, in larger format and with a V in the central reverse to indicate a five cent piece. But Liberty has a small star on her coronet, and the date 1868 is in exergue. The reverse has a wreath with small Maltese cross atop, surrounded by a scroll bearing IN GOD WE TRUST. Struck in copper with a plain edge. This is a flashy Choice proof with a precise strike and parallel hairlines on the central reverse field. Attractively toned with aquamarine fields and cherry-red borders. PCGS# 60852

**Patinated PR66 Judd-727
1869 Standard Silver Quarter**

- 4061** 1869 Standard Silver Quarter Dollar, Judd-727, Pollock-808, R.5, PR66 PCGS. CAC. The obverse features a head of Liberty, with hair bound and no stars on the tiara. UNITED STATES OF AMERICA encircles the obverse, with a ribbon bearing the motto IN GOD WE TRUST below. The reverse displays a centered denomination surrounded by a wreath, with STANDARD SILVER and the date at the peripheries. Struck in silver with a reeded edge. A well struck, flashy, and virtually flawless specimen. Rich golden-brown toning dominates the fields and motifs though the margins offer ocean-blue and violet-red. PCGS# 60954

**Cameo Gem Proof Judd-943 Aluminum
1870 'Standard Silver' Half**

- 4062** 1870 Standard Silver Half Dollar, Judd-943, Pollock-1071, High R.7, PR65 Cameo PCGS. CAC. Standard Silver reverse paired with a Liberty cap-and-stars portrait on the obverse. The Pollock subvariety with the tip of the cap beneath the ES in STATES. Struck in aluminum with a reeded edge. The experts at uspatterns.com suggest "at least 3 known" for this aluminum delicacy. This is the single finest example certified by PCGS (2/13), though of course it has little competition for the title. Well-preserved aluminum surfaces are minimally toned and exhibit excellent contrast. Struck from moderately rotated dies. PCGS# 61189

**PR66 1870 Standard Silver Half
Judd-952, Silver, Plain Edge**

- 4063** 1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR66 NGC. The obverse shows a bust right of Liberty. She wears a diadem inscribed LIBERTY, with the hair tied in a bun. The peripheral legends include UNITED STATES OF AMERICA and IN GOD WE TRUST, the latter within a scroll. The reverse displays the denomination 50 CENTS and the date 1870 within a wreath of cotton and corn. STANDARD is centered on the upper border. Struck in silver with a plain edge. Richly patinated in apricot-gold, stone-gray, navy-blue, and olive-green. The centers show minor inexactness of strike but there are no detractors. PCGS# 61198

**Delicately Toned Judd-965 Half Dollar in Copper
Standard Silver Reverse PR66 Red and Brown**

- 4064** 1870 Standard Silver Half Dollar, Judd-965, Pollock-1061, High R.7, PR66 Red and Brown NGC. The obverse with Liberty in exaggerated Phrygian cap with two stars visible, UNITED STATES OF AMERICA around above, IN GOD WE TRUST on scroll below. The reverse has the usual Standard Silver appearance with wreath, 50 / CENTS within, date below. Struck in copper with a reeded edge. This specimen is satiny and intricately struck with no indication of carbon or contact. Considerable copper-pink and peach color remains, though washes of lavender, blue, and violet grant this well-preserved Standard Silver pattern additional eye appeal. PCGS# 71211

**1870 Standard Silver Half in Copper
Judd-978, PR64 Red and Brown**

- 4065** 1870 Standard Silver Half Dollar, Judd-978, Pollock-1090, Low R.7, PR64 Red and Brown PCGS. CAC. A bust of Liberty faces right on the obverse with the motto IN GOD WE TRUST on a scroll below. Liberty wears a cap that is ornamented with two stars, and a ribbon that crosses her shoulder is inscribed with LIBERTY in raised letters. The initial B is seen within the folds of the ribbon behind Liberty's cap, and the legend UNITED STATES OF AMERICA is at the upper periphery. On the reverse, the denomination 50 CENTS is expressed within a wreath of oak and laurel. The date 1870 is below, the word STANDARD is above. Struck in copper with a plain edge. This is a scarce Standard Silver series with only a half dozen or so believed known. The obverse is deep orange-red while the reverse displays jade-green, rose-red, and apricot-gold toning. We note a few small spots on the portrait and delicate hairlines on the reverse. PCGS# 71224

**Gem Cameo Proof Judd-980
Aluminum 1870 Standard Silver Half**

- 4066** 1870 Standard Silver Half Dollar, Judd-980, Pollock-1093, R.8, PR65 Cameo PCGS. CAC. A bust of Liberty faces right on the obverse with the motto IN GOD WE TRUST on a scroll below. Liberty wears a cap that is ornamented with two stars, and a ribbon that crosses her shoulder is inscribed with LIBERTY in raised letters. The initial B is seen within the folds of the ribbon behind Liberty's cap, and the legend UNITED STATES OF AMERICA is at the upper periphery. On the reverse, the denomination 50 CENTS is expressed within a wreath of oak and laurel. The date 1870 is below, the word STANDARD is above. Struck in aluminum with a plain edge. Two variants are known of this design. This piece is from the second set of obverse dies and shows the tip of the cap below the E in STATES and Barber's initial in the folds of the ribbon. This is a lovely aluminum striking that shows no oxidation. The surfaces are nearly defect-free and the reverse fields display pronounced die striations. Judd-980 is extremely rare and once this specimen is sold to a collector it could be many years before another example emerges. PCGS# 61226

**1870 William Barber Seated Liberty Dollar
Judd-996, PR62 Cameo**

- 4067** 1870 Standard Silver Dollar, Judd-996, Pollock-1127, High R.7, PR62 Cameo NGC. CAC. William Barber's Seated Liberty faces left, with 13 stars ringing the rim and the date 1870 in exergue. A shield is in her right hand and an olive branch in her left. A cap rests atop a Liberty pole, and a scroll crosses the shield with LIBERTY. On the reverse a wreath of corn and cotton encloses 1/ DOLLAR, the latter in an upcurving arc, with STANDARD in tiny letters at the upper rim. Struck in silver with a reeded edge. This popular and artistically accomplished pattern was also struck in copper and aluminum, reeded and plain edge variants. This is a brilliant example with significant mint frost over the devices. A few light contact marks on each side explain the PR62 grade. PCGS# 61243

1870 Longacre Standard Silver Dollar
Judd-1010, PR63 Brown
Evidence of Rotated Double Striking

4068 1870 Standard Silver Dollar, Judd-1010, Pollock-1143, High R.7, PR63 Brown PCGS. James Longacre's posthumously released Indian Princess design features Liberty seated beside a globe, wearing an Indian headdress. The word LIBERTY is inscribed across the center of the globe and Liberty is holding a pole topped with Phrygian cap. The reverse features the word STANDARD at the top with 1 DOLLAR encompassed by a wreath of cotton and corn. This design was apparently based on a sketch Longacre made prior to 1852, but it was not until 1870 that William Barber made use of it a year after Longacre's death, and he adapted it on a number of different pattern coins. Struck in copper with a reeded edge. Each side displays subtle multicolored iridescence with noticeable original mint red still in evidence within the folds of Liberty's gown and other recessed motifs on the obverse. A few spots of carbon are seen on the obverse.

In our 2011 FUN Signature we sold a doublestruck Judd-1010. This piece also shows evidence of rotated double striking on each side. On the obverse it is most noticeable in the date and the L in LONGACRE. On the reverse it is most prominent on DOLLAR and the bow on the lower part of that side. PCGS# 61258

1871 Longacre Obverse Aluminum Dollar
Judd-1149, PR63

4069 1871 Dollar, Judd-1149, Pollock-1291, Low R.7, PR63 PCGS. On the obverse Liberty wears an Indian headdress and supports a liberty pole with her right hand facing left. Her left hand rests on a globe inscribed LIBERTY. Behind her is a flag ornamented with 22 stars. Thirteen stars surround and the date 1871 is at the bottom. The reverse is the die used for regular issue Liberty Seated dollars. Struck in aluminum with a reeded edge. This was apparently a leftover Longacre design that was implemented by William Barber as Longacre died in 1869. The brilliant surfaces show the usual (but unacknowledged) contrast on each side. A few faint pinscratches are noted near STATES. PCGS# 61411

**1878 Goloid Metric Dollar, PR62
Judd-1563, Deeply Mirrored Fields**

- 4070** 1878 Goloid Metric Dollar, Judd-1563, Pollock-1754, Low R.6, PR62 PCGS. Liberty faces left, with cap adorned with wheat ears, cotton leaves and bolls, eponymously inscribed in incuse letters. There are 13 stars ringing the rim, with the Latin motto above and date below. On the reverse the center reads GOLOID / METRIC / 1—G. / 16.1—S. / 1.9—C. / GRAMS 14.25. within a circle of 38 stars. UNITED STATES OF AMERICA is above, 100 CENTS below. Allegedly struck in goloid alloy, but possibly silver as metallurgical analysis has not been conducted on these pieces, with a reeded edge. This boldly struck and lightly toned specimen has a few faint hairlines that explain the grade. Deeply reflective fields. PCGS# 61925

**Aluminum 1896 Cent Pattern
Judd-1769, PR63**

- 4071** 1896 One Cent, Judd-1769, Pollock-1985, High R.6, PR63 PCGS. The obverse displays a shield with 13 stripes, having the motto E PLURIBUS UNUM above and the date 1896 below. There are 13 stars at the border arranged seven left and six right, and the border is beaded. On the reverse, the denomination 1 CENT is centered within a curved olive sprig, with the legend UNITED STATES OF AMERICA surrounding both. The reverse also has a beaded border. Struck in an aluminum alloy with a plain edge. Medium steel-gray toning visits this satiny and precisely struck specimen. The surfaces are mildly subdued but the sole contact mark is a minor tick on the upper right portion of the shield. PCGS# 62223

**'1759' Martha Washington 'Half Dollar'
MS63, Judd-2132, Clad Composition
Likely Struck Circa-1965**

- 4072** "1759" Martha Washington "Half Dollar," Judd-2132, Pollock-2083, R.8, MS63 NGC. The obverse has a bust of Martha Washington with the date 1759, while the reverse shows Mount Vernon. The Mint calls these "nonsense dies" because they lack reference to the current date and the denomination. This piece was struck with a reeded edge in multilateral cupronickel-copper to test the composition in preparation for the clad coins of 1965. The Martha Washington design would later be used to test other alloys and denominations. This example is smooth and lustrous and displays light to medium almond-gold toning. Struck from prominently clashed dies. PCGS# 62401

GOLD DOLLARS

**1849-O Gold Dollar, MS64
Variety 2, Thick Mint Luster and Strong Strike**

- 4073** 1849-O Open Wreath MS64 PCGS. Variety 2. This is one of three known varieties for the issue, seen here with the mintmark placed lower than Variety 1 and before the reverse was heavily lapped as seen on Variety 3. The 1849-O was generously minted and Uncirculated examples are widely available, although they are increasingly difficult in MS64 and especially finer condition. This is a sharply struck, rich orange-gold coin that shows only the smallest abrasions when closely examined. Population: 24 in 64 (1 in 64+), 5 finer (1/13). NGC ID# 25BE, PCGS# 7508
- 4074** 1850 MS64 PCGS. Light apricot-gold luster is generous on this second-year gold dollar. The strike has blended detail on the hair below the coronet, but the overall eye appeal is solid. NGC ID# 25BF, PCGS# 7509

**MS65 ★ 1850 Gold Dollar
Only Star-Designated Example**

- 4075 1850 MS65 ★ NGC.** The (2/13) NGC Census lists only a single 1850 gold dollar with a Star designation, the present lot. Sans Star, 12 pieces have been certified MS65 with 3 finer. None have been certified Prooflike in any grade, but this fully struck and well preserved Gem is semiprooflike, and that may explain why it received the elusive NGC Star. NGC ID# 25BF, PCGS# 7509

**1850-O Gold Dollar, MS62
Rarest New Orleans Issue**

- 4076 1850-O MS62 NGC.** The 1850-O is the rarest New Orleans gold dollar issue, though it is typically more affordable than the 1855-O, which is a single-year O-mint type coin. The 1850-O has a mintage of just 14,000 pieces and is underappreciated in Uncirculated grades. The present honey-gold representative is fully struck and only lightly abraded.
Ex: Long Beach Signature (Heritage, 2/2002), lot 6649, which realized \$2,426.50. NGC ID# 25BJ, PCGS# 7512

- 4077 1851 MS63 NGC.** Mintages of gold dollars crested between 1851 and 1853, a period when old tenor Seated coins were hoarded from circulation. The present satiny and smooth olive-gold representative has a good strike despite minor blending at the centers. NGC ID# 25BK, PCGS# 7513

**1851 Gold Dollar, Brightly Lustrous MS66
Excellent Type One Representative**

- 4078 1851 MS66 PCGS. CAC.** A lustrous green-gold Premium Gem of this available Type One issue. The hair near the ear is well defined though just shy of complete. Peripheral details are sharp except for the two stars near the bust tip. Though Type Three dates are regularly seen in high grades, the 1851 is rare at the lofty MS66 level. Certified in a green label holder. Population: 25 in 66, 9 finer (2/13). NGC ID# 25BK, PCGS# 7513

- 4079 1851-C AU53 PCGS. Variety 1.** A luminous honey-gold Charlotte type coin with pleasing sharpness and ample traces of remaining luster. Mentionable marks are confined to faint lines beneath the hairbun and the second L in DOLLAR. NGC ID# 25BL, PCGS# 7514

Select Mint State 1851-C Gold Dollar

- 4080 1851-C MS63 PCGS. Variety 1.** A precisely struck and uncommonly unabraded butter-gold Charlotte type coin. The eye appeal is exceptional. The two die varieties for the 1851-C are best distinguished by die cracks. Variety 1 almost always has a crack between the F in OF and the AM in AMERICA. Population: 12 in 63, 17 finer (2/13). NGC ID# 25BL, PCGS# 7514

1851-D Gold Dollar, MS63, Variety 3-D
One of the Better Coins Known

- 4081 1851-D MS63 NGC. Variety 3-D.** This is a later die state of this scarce die pairing, as seen by the advanced die crack above and below the first S in STATES and the heavy die clashing on the reverse. This already interesting coin has even more collector appeal as the reverse is rotated approximately 90 degrees from its normal alignment. While the 1851-D is one of the more frequently encountered D-mint Type One dollars, it is conditionally challenging with the finest coins listed on Doug Winter's Condition Census MS64. This is a bright, lustrous example that shows rich orange-gold color. There are no obvious or mentionable abrasions and the strike is strong throughout. Census: 4 in 63, 5 finer (2/13). NGC ID# 25BM, PCGS# 7515

Near-Mint 1853-C Gold Dollar

- 4082 1853-C AU58 NGC. Variety 1.** Rotation beneath a light reveals flashes of luster within the legends and designs of this better date Charlotte gold dollar. The mintage of 11,515 pieces ensures a shortage of quality survivors. The present representative has nearly imperceptible obverse field strike-throughs (as coined) but is only minimally abraded. The strike is even aside from the 18 in the date. Census: 35 in 58, 47 finer (2/13). NGC ID# 25BV, PCGS# 7522

1853-C Gold Dollar, MS62
Mintage of 11,515 Pieces

- 4083 1853-C MS62 NGC. Variety 1.** This gently shimmering straw-gold Charlotte Mint gold dollar has the expected moderate incompleteness of strike in the centers, but the remainder of the designs are sharp. Essentially unabraded, although the obverse field possesses mint-made strike-throughs. A mere 11,515 pieces were produced. Census: 15 in 62 (1 in 62+), 17 finer (2/13). Ex: Long Beach Signature (Heritage, 6/2006), lot 2921. NGC ID# 25BV, PCGS# 7522

Type Two 1854 Gold Dollar, MS62

- 4084 1854 Type Two MS62 PCGS.** Longacre's Small Head design was struck for only two years at Philadelphia. Each of the four branch mints also coined the type, but in limited quantity. High relief on the portrait caused softness on the LL in DOLLARS opposite, which led to the 1856 introduction of the Type Three design. The present orange-gold example has a good strike and minimal marks. Luster dominates the legends and motifs. NGC ID# 25C3, PCGS# 7531

**1854 Gold Dollar, MS63
Scarce Type Two Variant**

- 4085 1854 Type Two MS63 NGC.** Even though the 1854 and/or 1855 Type Two gold dollar issues are usually pursued for type purposes — that is, collecting one of each major design type within a given series — the two P-mint issues could also be collected by numismatists pursuing a *complete date and mintmark* collection of Type Two gold dollars. Beside comprising a mere six issues, such a set would also include at least one example produced at each of America's mints functioning at the time: Philadelphia; Charlotte, North Carolina; Dahlonega, Georgia; New Orleans; and San Francisco. The 1854 and 1855 Philadelphia issues are conditionally elusive only in the highest grades, with the mintmarked issues, especially the rare 1855-D, seldom seen even in the higher circulated grades. For such an ambitious collector, this Select 1854 gives the collector a solid Uncirculated example with strong mint luster and an equally strong strike throughout. Slightly abraded, as one would expect. NGC ID# 25C3, PCGS# 7531

- 4086 1855-O AU50 PCGS. Variety 2.** The sole New Orleans Type Two issue, and thus requisite for many collectors. The mintage of 55,000 pieces makes it scarcer than either of the two Philadelphia issues of the design. An unblemished straw-gold coin with a pair of small bright areas on the reverse field. NGC ID# 25C7, PCGS# 7535

**1858 Gold Dollar, MS66
Underrated Early Series Date**

- 4087 1858 MS66 PCGS. CAC.** The 1858 gold dollar is an underrated issue when compared to later dates in the series, and examples in MS66 condition are very rare. This spectacular Premium Gem is well-detailed, with vibrant mint luster and well-preserved yellow and rose-gold surfaces. Population: 2 in 66, 6 finer (2/13). NGC ID# 25CH, PCGS# 7548
- 4088 1858-S AU50 PCGS.** The 1858-S has a low mintage of 10,000 pieces and, unlike Philadelphia gold dollars with similar emissions, few if any were set aside by collectors. The present coin is primarily sea-green with ample peach-gold where luster persists. The fields display wispy abrasions. NGC ID# 25CK, PCGS# 7550

- 4089 1858-S AU55 NGC.** The San Francisco Mint opened in 1854 and began issuing gold dollars right away. Through the remaining part of the decade, that Mint issued gold dollars every year except 1855. This Choice AU specimen is a pleasing representative that survives from a mintage of just 10,000 coins. Both sides have satiny yellow luster with delicate pinkish overtones. Census: 21 in 55, 43 finer (2/13). NGC ID# 25CK, PCGS# 7550

**Mint State 1860-S Gold Dollar
Partially Prooflike Example**

- 4090 1860-S MS61 NGC.** From a mintage of 13,000 pieces, the 1860-S gold dollar is seldom encountered in Mint State grades. This attractive MS61 example is sharply detailed in some areas, with just a touch of softness on the centers. The light greenish-gold surfaces display prooflike reflectivity in sheltered areas. Census: 21 in 61, 16 finer (2/13). NGC ID# 25CT, PCGS# 7557

**1860-S Gold Dollar, MS62
Only 13,000 Minted**

- 4091 1860-S MS62 NGC.** A representative from the last issue of gold dollars at the San Francisco Mint for a decade, this piece is one of only 13,000 coins struck. Brilliant luster and attractive yellow-gold color combine for nice eye appeal on this example. Census: 7 in 62, 9 finer (2/13). NGC ID# 25CT, PCGS# 7557
- 4092 1864 MS62 NGC.** This is an important low-mintage Civil War era issue that is rarely encountered in any grade. This pleasing Mint State specimen exhibits light yellow surfaces and bold design motifs with minimal, grade-consistent marks. Census: 12 in 62, 30 finer (2/13). NGC ID# 25CY, PCGS# 7563
- 4093 1869 MS61 NGC.** Gold dollar mintages plunged after Federal specie payments ended in 1862. The 1869 has a production of only 5,900 pieces and is elusive (though affordable) in Mint State. A crisply struck and unmarked sun-gold specimen. Ex: *Richmond Collection, Part I* (David Lawrence, 7/2004), lot 1059, which realized \$1,035. NGC ID# 25D5, PCGS# 7568

**1870-S Gold Dollar, MS61
Last Branch Mint Issue**

4094 1870-S MS61 NGC. The 1870-S is the last gold dollar struck at a branch mint. With a mintage of 3,000 pieces, this is a popular issue and a true rarity. Only about 125 to 170 specimens are estimated to have survived to the present day, 35 to 50 of which are Mint State. Most of the latter are in the MS60 to MS62 range. Deep orange-gold patina blushed with lavender and sky-blue graces the lustrous surfaces of this MS61 example, and the strike is sharp throughout. A series of moderate-size contact marks in the right obverse field are all that stand in the way of a higher grade. Census: 11 in 61, 20 finer (2/13). NGC ID# 25D7, PCGS# 7570

4095 1874 MS64 NGC. A lustrous apricot-gold near-Gem that has well struck devices and moderate incompleteness on the reverse legends. Unmarked and attractive. Each side displays a partial wire rim. NGC ID# 25DC, PCGS# 7575

**1878 Gold Dollar, MS66
Rarest Post-1876 Issue**

4096 1878 MS66 NGC. An issue that is seldom offered as a Gem, let alone a Premium Gem. The 1878 (3,000 business strikes) is the rarest post-1876 gold dollar. The finish is expectedly semiprooflike for a low mintage gold dollar from the late 1870s, and the devices display pinpoint striking definition in all areas. The smooth, virtually distraction-free reddish-gold surfaces show a few degrees of counterclockwise die rotation. Census: 6 in 66 (1 in 66+), 1 finer (2/13). NGC ID# 25DG, PCGS# 7579

**1880 Gold Dollar, MS67
Fully Mirrored Fields**

4097 1880 MS67 PCGS. CAC. An amazing Superb Gem, this 1880 gold dollar resembles a proof at first glance. Both sides have fully mirrored fields serving as a backdrop to the brilliant and highly lustrous devices. The design elements are boldly defined. An exceptional example. PCGS has only certified 25 finer pieces (2/13). NGC ID# 25DJ, PCGS# 7581

**1881 Gold Dollar, MS67
Prooflike Surfaces**

4098 1881 MS67 PCGS. This piece exhibits many characteristics of proof gold dollars although lacks the depth of the mirrored fields that are expected on proof strikes. However, the fields are mirrored and frame boldly detailed devices, with straw-gold surfaces showing hints of pale rose and light green toning. NGC ID# 25DK, PCGS# 7582

4099 1883 MS64 PCGS. CAC. Gold dollar mintages throughout the 1880s were generally quite small, although survival rates were larger than for previous decades. This Choice Mint State specimen has frosty yellow luster with lemon overtones creating excellent eye appeal. NGC ID# 25DM, PCGS# 7584

4100 1889 MS65 PCGS. This beautiful Gem is predominantly peach-gold, though blushes of lime-green and powder-blue are also evident. Precisely struck and devoid of marks. The lower wreath is die doubled, as always on business strikes of this final year issue. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLARS

1882 Gold Dollar, PR66 Cameo
Numerically Finest at PCGS

- 4101 1882 PR66 Cameo PCGS.** This lovely Premium Gem Cameo proof has beautifully mirrored fields showing honey-gold tints, around lustrous devices with sharp details and frosty texture. The mintage of 1882 proof gold dollars was halted after just 125 pieces were struck, and estimates range from 60 to 80 pieces surviving today. In all grades, PCGS has certified 60 proofs and NGC has examined 51 pieces. The finest PCGS pieces include four graded PR66, this coin and one other called PR66 Cameo, and three certified as PR66 Deep Cameo (2/13). The finest NGC certified example grades PR68 Ultra Cameo. NGC ID# 25ES, PCGS# 87632

Choice Proof 1882 Gold Dollar
Rare Deep Cameo Example

- 4102 1882 PR64 Deep Cameo PCGS. CAC.** Only 125 proof gold dollars were struck in 1882, and few examples have survived with Deep Cameo surfaces. This impressive Choice specimen displays richly frosted design elements that stand out dramatically against the deeply mirrored fields. The light yellow-gold surfaces show a few highlights of green, with outstanding eye appeal. Population: 4 in 64 Deep Cameo, 5 finer (1/13). NGC ID# 25ES, PCGS# 97632

EARLY QUARTER EAGLES

Near-Mint 1802/1 Two and a Half, BD-3

- 4103 1802/1 AU58 NGC. BD-3, R.5.** All three die varieties of 1802-dated quarter eagles share the same obverse die. BD-3 is midway in rarity among the three reverses, and is distinguished by clear repunching on the leftmost reverse star. This minimally abraded Borderline Uncirculated example displays minor adjustment marks (as issued) above Liberty's ear and on the left obverse rim, but the only remotely mentionable post-strike contact is a single inconspicuous line along the cap beneath the L in LIBERTY. The centers show softness typical of the type, but the eagle's wings and other design details are bold. Census: 21 in 58, 26 finer (2/13). NGC ID# 25F6, PCGS# 7650

Rare AU Sharpness BD-1
1833 Two and a Half

- 4104 1833 — Rim Filing — NGC Details. AU. BD-1, R.5.** The sole dies for this rare, low mintage date. The rims are lightly filed, most noticeably near 10:30 on the reverse. Otherwise, this is an attractive sun-gold example with substantial peripheral luster and only minor to moderate marks. The eagle's shield is lightly brought up, usual for the issue. NGC ID# 25FP, PCGS# 7673

CLASSIC QUARTER EAGLE

1836 Classic Head Two and a Half, MS61
Scarce Script 8 Variety-13

- 4105** 1836 Script 8 MS61 NGC. CAC. Variety-13, R.4. The design elements of this attractive Mint State example are well-struck, with some of the typical softness on the centers. The obverse has a diagonal bisecting crack with a secondary crack down to the left. This piece has faint field reflectivity beneath its light green and rose-gold coloration. A splendid representative of a scarce variety. NGC ID# 25FU, PCGS# 7694

LIBERTY QUARTER EAGLES

- 4106** 1840 XF45 NGC. This Choice XF specimen has trivial surface marks on each side that are expected for the grade, with faint greenish patina over its light yellow surfaces. A scarce early Liberty quarter eagle from the opening year of production for the design on this denomination. NGC ID# 25GA, PCGS# 7717

Repunched Date Choice AU
1842-D Two and a Half

- 4107** 1842-D AU55 NGC. Variety 3-F. The date is clearly repunched south, as seen only on early die states of this very low mintage Dahlonga issue. The present straw-gold Choice AU representative is only lightly abraded. The stars and wings are well struck though the motifs show moderate incompleteness. Census: 8 in 55, 12 finer (2/13). NGC ID# 25GJ, PCGS# 7725

Mint State 1843-C Two and a Half
Large Date, Plain 4

- 4108** 1843-C Large Date, Plain 4 MS60 NGC. Variety 1. The mintmark is repunched along its curve, characteristic of the Large Date variety. This is a sharply struck example with rose-red toning in design recesses. The fields and motifs are caramel-gold. One small strike-through, as coined, on Liberty's cheek, but post-strike contact is refreshingly trivial. Census: 2 in 60, 16 finer (12/12). NGC ID# 25GN, PCGS# 7728

- 4109** 1843-C Small Date, Crosslet 4 — Mount Removed — PCGS Genuine. XF Details. Traces of blue solder are noted in crevices throughout much of the reverse. Those areas are tooled with pinscratches from an attempt to remove the solder. Both sides are cleaned but the canary-gold obverse remains attractive. PCGS# 7729

1843-D Small D Two and a Half, AU55
An Obtainable Dahlonga Issue

- 4110** 1843-D Small D AU55 NGC. Variety 4-F. The 1843-D is one of the more readily obtainable Dahlonga quarter eagles and examples can even be located in AU, making this an excellent choice for type purposes. This appears to be an original coin that just has a bit of high-point rub. The surfaces are deep yellow-gold with light reddish accents surrounding the devices. Light abrasions are peppered over each side, none of which are individually detracting. NGC ID# 25GP, PCGS# 7730

- 4111** 1844 AU50 NGC. A meager mintage of 6,784 pieces accounts for the rarity of the 1844 quarter eagle. This sun-gold example displays pockets of bright luster. Only trivial abrasions are present aside from a few wispy field marks on the lower obverse. NGC ID# 25GT, PCGS# 7734

**1846 Quarter Eagle, MS61
Condition Scarcity**

4112 1846 MS61 NGC. The 1846 is surprisingly scarce, especially in mint condition. This is a bright yellow-gold example that is peppered with numerous small abrasions on each side, but the fields are bright and semireflective, adding an extra element of appeal. The strike is sharper than usually seen with only minor softness noted on the eagle's plumage. Census: 14 in 61, 3 finer (2/13). NGC ID# 25GZ, PCGS# 7740

4113 1849 MS61 NGC. This low mintage sun-gold two and a half is mildly bright and has refreshingly unabraded surfaces. Flashes of luster outline all design elements. Census: 9 in 61, 7 finer (2/13). NGC ID# 25HD, PCGS# 7752

4114 1850-O AU50 NGC. Variety 1. Most '50-O quarter eagles display the mintmark over the numerator half of the fraction, but the very scarce Variety 1 shows the mintmark over the denominator. This straw-gold AU example lacks relevant abrasions and shows the expected incompleteness on the central motifs. NGC ID# 25HK, PCGS# 7758

4115 1850-O AU53 NGC. Variety 1. An almond-gold example of this underappreciated New Orleans issue. Free from detrimental marks and well struck on the shield and upper curls, though the eagle's left (facing) leg shows softness. NGC ID# 25HK, PCGS# 7758

4116 1852-O AU55 NGC. Variety 1. The scarcer of the two '52-O die varieties, though Variety 2 is better known as it has an unusual donut-shaped mintmark. This unmarked example has pleasing lime-green and orange-gold toning. Selected portions of the eagle lack a complete strike. NGC ID# 25HU, PCGS# 7766

4117 1852-O AU55 NGC. Variety 2. Breen's "extra heavy O" variety, which he called "very rare" though it appears to be the more available of the two mintmark varieties for the 1852-O. This is a smooth olive-gold piece with mildly subdued surfaces and a typical strike on the lower half of the eagle. NGC ID# 25HU, PCGS# 7766

4118 1852-O AU55 NGC. Variety 2. Reminiscent of the 1854-O Huge O quarter, the mintmark on the present representative is oversized and has high relief. Presumably, Philadelphia shipped the reverse die without a mintmark, forcing New Orleans to improvise and engrave the mintmark by hand on the die. This is an olive-gold Choice AU piece with an above-average strike and a couple of faint thin marks above star 13. NGC ID# 25HU, PCGS# 7766

**1853 Quarter Eagle, MS65+
Only One Certified Finer at PCGS**

4119 1853 MS65+ PCGS. CAC. From a large mintage of 1.4 million pieces, the 1853 Liberty quarter eagle is surprisingly difficult to locate in high grade. This high-end Gem is sharply detailed on the obverse, but the central reverse shows some of the typical softness associated with this issue. Vibrant mint luster adds to the intense eye appeal. Population: 5 in 65 (1 in 65+), 1 finer (2/13). NGC ID# 25HV, PCGS# 7767

4120 1854 MS64 PCGS. A lustrous orange-gold near-Gem. The strike is intricate and surface imperfections are minimal. Struck from prominently clashed dies, and encapsulated in a green label holder. Population: 30 in 64 (2 in 64+), 6 finer (2/13). NGC ID# 25HX, PCGS# 7769

Rare 1854-C Quarter Eagle, MS61

4121 1854-C MS61 NGC. Variety 1. An apricot-gold example of this low mintage Charlotte issue. A minimal mintage of 7,295 pieces suggests bullion depositor preference for the half eagle denomination. This piece is unabraded and displays the usual C-mint incompleteness of strike on the central reverse. The obverse has a railroad rim between 9 and 4 o'clock, as struck. Shallow strike-throughs (as made) cause a slightly granular surface on the fields near the bust tip and behind the eagle's neck. Census: 8 in 61, 10 finer (2/13). NGC ID# 25HY, PCGS# 7770

**1855 Quarter Eagle, MS64
Rare Date in High Grade**

4122 1855 MS64 NGC. CAC. Despite the mintage of 235,480 pieces, the 1855 Liberty quarter eagle is surprisingly difficult to locate in high grade. This impressive Choice specimen is well-detailed, with just a touch of the typical softness on the eagle's leg. The pleasing peach-gold surfaces display vibrant satiny mint luster. Census: 19 in 64, 5 finer (2/13). NGC ID# 25J4, PCGS# 7774

Smooth 1856-C Two and a Half, AU53

4123 1856-C AU53 NGC. Variety 1. A wheat-gold representative that has an above average strike and only minimal marks. The mint-made field strike-throughs near the arrowheads, Liberty's chin, and the eagle's head are usual for this low mintage and very scarce Charlotte issue. Census: 12 in 53, 42 finer (2/13). NGC ID# 25J8, PCGS# 7778

4124 1857-O AU55 NGC. Variety 1. The rare late die state with a vertical crack east of the mintmark. This caramel-gold Choice AU quarter eagle is generally well struck though the lovelock and the eagle's legs are incomplete. A scarce New Orleans issue with a low mintage of 34,000 pieces. NGC ID# 25JE, PCGS# 7784

1860-C Two and a Half, XF45
Low-Mintage Charlotte Issue

4125 1860-C XF45 NGC. Variety 1. The final Charlotte issue of the denomination, the 1860-C has a miserly mintage of 7,469 pieces and is desired in all grades. The present straw-gold Choice XF example lacks any mentionable marks. The strike is incomplete on the eagle but Liberty's curls provide pleasing definition. NGC ID# 25JT, PCGS# 7792

1861 New Reverse Quarter Eagle
Boldly Struck Gem

4126 1861 New Reverse, Type Two MS65 PCGS. CAC. The 1861 New Reverse quarter eagles are popular as a Civil War memento and also because they are usually well-struck. In any case they are conditionally elusive at the Gem level, despite the large mintage exceeding 1.2 million pieces. This example displays a strike that is all but full, complementing bright yellow-gold color. Population: 24 in 65, 10 finer (2/13). NGC ID# 25JX, PCGS# 7794

Choice XF 1863-S Quarter Eagle
Mid-Civil War S-Mint Memento

4127 1863-S XF45 PCGS. This mid-Civil War S-mint is a favorite among the low-mintage collectors, struck in the extent of a meager 10,800 pieces. Gold did not circulate by this time in the East, but it was a staple of the far-off Western economy. This Choice XF piece is slightly better than most certified examples. Despite 15 points of wear, muted luster remains over lightly abraded orange-gold surfaces that host good eye appeal and a decent strike. NGC ID# 25K3, PCGS# 7799

1873 Quarter Eagle, MS65
Closed 3, Rare in High Grade

4128 1873 Closed 3 MS65 PCGS. Although scarce, the 1873 Closed 3 is not a rare coin in an absolute sense, and even Mint State examples can be obtained. We caution bidders, however, that most Uncirculated survivors grade no finer than MS62, and Gem examples are quite rare. The richly frosted luster of this piece certainly qualifies for an MS65 designation, and the surfaces are uncommonly smooth for the issue with no mentionable blemishes. Well struck in almost all areas with pleasing reddish-gold color. Population: 7 in 65, 2 finer (2/13). NGC ID# 25KM, PCGS# 7818

Bold VF30 1875 Two and a Half
Just 400 Pieces Coined

4129 1875 VF30 PCGS. Mintages of gold coins at Philadelphia reached a nadir in 1875. The eagle (mintage 100 pieces) and half eagle (mintage 200 pieces) are legendary rarities. The quarter eagle and gold dollar each have a production of just 400 pieces but have not captured numismatic attention commensurate with their rarity. The present quarter eagle is sharper than expected for the VF30 level and displays noticeable glimpses of mint luster. The orange and green-gold surfaces exhibit scattered small abrasions. Encapsulated in an old green label holder. NGC ID# 25KS, PCGS# 7822

4130 1877-S MS62 PCGS. An important issue, and highly attractive with light yellow surfaces and considerable field reflectivity on both sides. Wisps of powder-blue patina add to the eye appeal. Population: 32 in 62, 33 finer (2/13). NGC ID# 25KX, PCGS# 7827

**Choice 1878-S Quarter Eagle
Only One Finer Coin at PCGS**

4131 1878-S MS64 PCGS. Despite a reported mintage of 178,000 pieces, the 1878-S Liberty quarter eagle is an elusive issue in MS64 condition, and finer examples are extremely rare. This well-detailed Choice example displays vibrant mint luster and bright yellow-gold surfaces, with a few highlights of green. Population: 13 in 64, 1 finer (2/13). NGC ID# 25KZ, PCGS# 7829

**1879-S Quarter Eagle, MS62
Last San Francisco Issue**

4132 1879-S MS62 PCGS. The final branch mint issue of the type, the 1879-S has a mintage of only 43,500 pieces and is typically found in XF or AU grades. This caramel-gold example is fully struck and minimally abraded. Luster is especially vibrant at the reverse border. Population: 4 in 62, 3 finer (2/13). NGC ID# 25L3, PCGS# 7831

4133 1886 MS62 PCGS. An exceptional Mint State specimen despite trivial contact marks on each side. The strike is bold and the brilliant yellow-gold surfaces exhibit fully mirrored, prooflike fields and satiny devices. Population: 17 in 62, 19 finer (2/13). NGC ID# 25LA, PCGS# 7838

4134 1888 MS64 PCGS. CAC. A sharply detailed Choice Mint State specimen, this 1888 quarter eagle has fully brilliant surfaces with frosty mint luster and exceptional eye appeal. Population: 53 in 64 (4 in 64+), 14 finer (2/13). NGC ID# 25LC, PCGS# 7840

4135 1888 MS64+ PCGS. CAC. Faint traces of greenish patina appear near the borders of this frosty and fully lustrous Choice Mint State quarter eagle. A low mintage issue and rarely found in higher grades. Population: 53 in 64 (4 in 64+), 14 finer (2/13). NGC ID# 25LC, PCGS# 7840

4136 1893 MS64 PCGS. This amazing Choice Mint State specimen is a lovely representative of the date with brilliant yellow luster. A few scattered marks prevent a higher grade. PCGS has only certified 64 finer submissions (2/13). NGC ID# 25LH, PCGS# 7845

**Premium Gem 1893 Quarter Eagle
None Finer at PCGS**

4137 1893 MS66 PCGS. The 1893 Liberty quarter eagle claims a mintage of 30,000 pieces, a small total in absolute terms but fairly generous in the context of the series. This sharply detailed Premium Gem exhibits vibrant mint luster and pristine rose-gold surfaces. Population: 20 in 66, 0 finer (2/13). NGC ID# 25LH, PCGS# 7845

**1895 Two and a Half, MS66
Exceptional, Highly Lustrous Type Coin**

4138 1895 MS66 PCGS. Yearly mintage figures for the Liberty quarter eagle failed to top 1 million coins from 1862 through the end of the series in 1907. The 1895 (6,119 pieces produced) is generally regarded as the last of the rare dates (although the 1896-1907 issues are scarce to one degree or another in the finer Mint State grades). There are only four finer examples of this issue certified. A glorious representative, both sides are intensely lustrous with a frosty sheen that yields to modest brightness in the fields at direct angles. Needle sharp striking definition is seen throughout, but not a single area reveals an abrasion of note. Worthy of inclusion in the finest 19th century gold collection. Population: 11 in 66, 0 finer (2/13). Ex: FUN Signature (Heritage, 1/2004), lot 7427. NGC ID# 25LK, PCGS# 7847

**Superb Gem 1896 Quarter Eagle
Only One Finer Coin at NGC**

- 4139 1896 MS67 NGC.** The 1896 Liberty quarter eagle claims a mintage of just 19,000 pieces, a small total in absolute terms, but above average in the context of the series. This spectacular Superb Gem offers sharply detailed design elements and lustrous yellow and rose-gold surfaces, with no mentionable distractions. Census: 8 in 67, 1 finer (1/13). NGC ID# 25LL, PCGS# 7848
- 4140 1898 MS65 NGC.** Delightful rose overtones grade the highly lustrous surfaces of this brilliant yellow-gold Gem. Both sides have bold design definition. An exceptional example for the type collector or advanced specialist. NGC ID# 25LN, PCGS# 7850
- 4141 1898 MS65 PCGS. CAC.** Excellent detail is on best display in the tiny feathers of the eagle's neck. Apricot luster has occasional orange overtones and light patina with a satiny underlying texture. A lovely type coin. NGC ID# 25LN, PCGS# 7850
- 4142 1898 MS66 NGC. CAC.** An extraordinary Premium Gem, this beauty exhibits reflective fields that possible deserve a Prooflike designation, with brilliant yellow luster and delicate pale emerald overtones. Census: 50 in 66 (2 in 66+), 32 finer (2/13). NGC ID# 25LN, PCGS# 7850
- 4143 1905 MS65 PCGS. CAC.** Rich orange-gold patina appears near the borders of this satiny yellow-gold Gem. Both sides have bold design elements with trivial, grade-consistent surface marks. NGC ID# 25LW, PCGS# 7857
- 4144 1907 MS66 NGC.** This razor-sharp Liberty type coin exhibits booming luster and lovely khaki-gold toning. Rotation beneath a loupe reveals only inconsequential field grazes and a small obverse alloy spot at 1 o'clock. NGC ID# 25LY, PCGS# 7859
- 4145 1907 MS66+ NGC. CAC.** An exceptional Premium Gem of the final Liberty quarter eagle, this example has hints of rose toning over brilliant yellow surfaces with bold design motifs. NGC ID# 25LY, PCGS# 7859

PROOF LIBERTY QUARTER EAGLES

**1872 Quarter Eagle
PR65 ★ Cameo**

- 4146 1872 PR65 ★ Cameo NGC.** There were only 30 proof 1872 quarter eagles produced, according to contemporary mint records. The combined NGC and PCGS population records show that 22 examples of this issue have been certified in grades from PR58 to PR66 Ultra Cameo. That total population is likely a good indication of the number of survivors today. This lovely Gem exhibits excellent contrast and borders on an Ultra Cameo designation. Both sides are rich yellow with deeply mirrored fields and lustrous devices. A tiny field nick close to the final S in STATES should aid pedigree research. Census: 1 in 65 ★ Cameo, 1 finer (2/13). NGC ID# 287T, PCGS# 87898
-

Choice Cameo Proof 1887 Two and a Half

- 4147 1887 PR64 Cameo PCGS. CAC.** A scant 122 proof quarter eagles were issued in 1887. Those are distinguished from the 6,160 business strikes by the high placement of the date, which nearly touches the bust. In addition, this lot features smooth mirrored fields and razor-sharp definition throughout the motifs, obtainable only on proof impressions. The peach-gold fields contrast with the luminous green-gold legends and devices. Careful rotation reveals a few delicate hairlines on the left obverse field. Proofs of this date typically appear at auction only once or twice per year at Heritage. Population: 3 in 64 Cameo, 1 finer as Cameo, 6 finer as Deep Cameo (2/13). NGC ID# 288A, PCGS# 87913

1900 Quarter Eagle, PR62 205 Examples Struck

- 4148 1900 PR62 NGC.** Of the 205 proof Liberty quarter eagles struck in 1900, probably just over 100 examples are still extant in all grades and conditions. This sharply detailed PR62 specimen exhibits deeply reflective fields, with just a few minor hairlines and contact marks. Census: 5 in 62, 3 finer (2/13). NGC ID# 288P, PCGS# 7926

INDIAN QUARTER EAGLES

- 4149 1908 MS64 NGC.** Lemon-gold luster is bright and eye-catching for this first-year near-Gem. Minimally marked for the grade, though a deep copper spot appears at the line between the portrait's chin and the nearby field. NGC ID# 288Y, PCGS# 7939
- 4150 1909 MS63 NGC.** A mix of faint orange and green overtones adds appeal to the yellow base of this lustrous second-year Pratt quarter eagle. Generally well-defined, though the lowest pendant of the necklace is weak. NGC ID# 288Z, PCGS# 7940
- 4151 1909 MS64 PCGS. CAC.** The 1909 is the third rarest Indian quarter eagle in absolute terms. This attractive MS64 example is well-detailed and brightly lustrous, with pleasing green and rose-gold surfaces. NGC ID# 288Z, PCGS# 7940
- 4152 1910 MS63 NGC.** Lustrous peach-gold with a touch of butter-yellow on each side. This Select example has scattered light to moderate marks, but the reverse's appearance is far from scuffy. NGC ID# 2892, PCGS# 7941
- 4153 1910 MS64 NGC.** Bright sun-yellow with only a touch of striking softness. The 1910 quarter eagle is available for a price in near-Gem but is borderline scarce any better. NGC ID# 2892, PCGS# 7941
- 4154 1910 MS64 PCGS.** Sun-yellow surfaces have a touch of orange and generous, if understated luster. Excellent inner detail with just a few light and scattered abrasions combining to preclude Gem status. NGC ID# 2892, PCGS# 7941

1911 Quarter Eagle, MS65 Elusive in High Grades

- 4155 1911 MS65 NGC.** The 1911 Indian quarter eagle is the sixth-rarest issue of the series in high grade. This delightful Gem is sharply detailed throughout and the pleasing greenish-gold surfaces are lustrous and free of mentionable distractions. Eye appeal is quite strong. NGC has graded only six coins in higher numeric grades (2/13). NGC ID# 2893, PCGS# 7942

Gem 1911 Quarter Eagle Conditionally Very Rare in Finer Grades

- 4156 1911 MS65 PCGS.** The 1911 Indian quarter eagle is an elusive date in Gem condition, and a prime condition rarity in any finer grade. This attractive Gem displays well-detailed design elements and subtle mint luster, with orange-gold surfaces that show few signs of contact. Eye appeal is outstanding. PCGS has graded only one numerically finer example, with eight coins in MS65+ (2/13). NGC ID# 2893, PCGS# 7942

- 4157 1911-D Weak D — Cleaning — PCGS Genuine. XF Details.** An unabraded but polished caramel-gold key date example with moderate wear on the high points and no readily evident portions of the all-important mintmark. PCGS# 7954

**1911-D Weak Mintmark Quarter Eagle
Bright AU58 Example**

- 4158 1911-D Weak D AU58 NGC.** As the undisputed key to the Indian quarter eagle series, examples of the 1911-D are eagerly sought out in all grades. Likewise, examples with a weak mintmark find their way into collections as well. This piece shows just the faintest trace of the D under magnification. However, the diagnostic wire rim around the right side of the obverse is reliably present. Otherwise, the surfaces are bright yellow-gold with a hint of orange. Slight friction is seen over the high points on each side, and there are grade-consistent abrasions present (mostly on the reverse). PCGS# 7954

**1911-D Indian Quarter Eagle, Choice AU
Light, Even Friction**

- 4159 1911-D AU55 NGC.** The mintmark lacks a Weak or Strong designation, but this piece has a softly defined D but it is completely outlined. The surfaces are bright throughout and mostly yellow-gold. The only marks of note are a couple that are well concealed toward the bottom of the headdress. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, AU58
Highly Sought Issue**

- 4160 1911-D AU58 NGC.** The 1911-D is the most sought-after issue of the Indian quarter eagle series, and collectors prize this date in all grades. This lightly circulated example is well-detailed, with just a touch of high-point wear on the devices. The yellow and rose-gold surfaces show a few spots of amber color, NGC ID# 2894, PCGS# 7943

Orange-Gold 1911-D Quarter Eagle, MS61

- 4161 1911-D Strong D MS61 PCGS.** A well-defined mintmark and Mint State surface quality make this 1911-D quarter eagle a great candidate to fill the key slot in a date set. While the strongly orange-gold surfaces show a number of abrasions, wispy and otherwise, this piece is sure to attract considerable bidder interest. Ex: *Houston Signature* (Heritage, 10/2010), lot 4354. NGC ID# 2894, PCGS# 7943

**1911-D Two and a Half Indian, MS62
Strong Mintmark**

- 4162 1911-D Strong D MS62 PCGS.** The strongly defined mintmark is only the beginning of this coin's attributes of quality. Each side is draped in deep reddish tinged orange-gold color and the mint luster is strongly evident throughout. The only mark of note is a long, arcing abrasion in the field above the eagle's wing. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS64
Strong D Mintmark**

4163 1911-D Strong D MS64 PCGS. CAC. A bold D mintmark is evident on the reverse of this near-Gem key-date Indian quarter eagle. Other clearly visible characteristics of the 1911-D two-and-a-half include a wire rim at the upper right obverse and a tiny vertical die line at the arrow points next to the mintmark. Both sides of this satiny specimen exhibit faint green overtones on its lustrous yellow-gold surfaces. The strike is sharp and the surfaces are exceptional for the grade. PCGS has only certified 21 submissions in finer grades than this piece (2/13). NGC ID# 2894, PCGS# 7943

4164 1913 MS63+ PCGS. CAC. Uncommonly well-defined for the issue with a subtle shimmer to its orange-tinged yellow-gold luster. Despite wispy abrasions, this coin has solid quality and eye appeal for the Select range. NGC ID# 2897, PCGS# 7945

4165 1913 MS64 NGC. A sun-yellow overtone grants this luminous near-Gem considerable eye appeal. Well-defined in general with complete, if soft, pendants on the necklace. NGC ID# 2897, PCGS# 7945

4166 1913 MS64 PCGS. Strong interior detail, though the lower obverse is a trifle soft. Low-key luster is luminous and pleasing. A scrape on the low feathers of the headdress and into the date accounts for the grade. NGC ID# 2897, PCGS# 7945

4167 1914 MS62 PCGS. Strong sun-yellow at the interiors with a trend toward orange at the margins. The portrait's cheek shows several horizontal marks, while the fields show grade-defining wispy abrasions. The eye appeal is solid nonetheless. NGC ID# 2898, PCGS# 7946

4168 1914 MS62 NGC. A satiny Mint State example, this quarter eagle shows hints of rose toning over its lustrous light yellow surfaces. NGC ID# 2898, PCGS# 7946

**Near-Gem 1914 Quarter Eagle
Condition Rarity**

4169 1914 MS64 PCGS. CAC. Series-savvy collectors of the Indian Head quarter eagles are becoming increasingly aware of the 1914 and 1914-D issues as rarity runners-up to the better-known 1911-D. This near-Gem is surpassed in grade by only 54 submissions at PCGS (2/13). The warm peach-gold color complements excellent luster and a good strike, and the few scattered tiny marks, mostly in the fields, are in concert with the grade. The Indian's cheek is free of all but a single small tick. NGC ID# 2898, PCGS# 7946

4170 1914-D MS63 PCGS. A lovely Select Mint State example of this scarcer date D-mint Indian, this coin has a pleasing appearance on both sides. Distinctive rims are a characteristic of all 1914-D quarter eagles. NGC ID# 2899, PCGS# 7947

4171 1914-D MS63 PCGS. CAC. Rich orange-gold luster is subtly sparkling on the obverse with a more traditional shine to the reverse. Well-defined with full outlines on the pendants of the necklace. NGC ID# 2899, PCGS# 7947

**1914-D Two and a Half Indian, MS64
Bright Yellow-Gold Surfaces**

4172 1914-D MS64 PCGS. Now recognized as a better date in this short, collectible series, the 1914-D still represents good value in near-Gem condition. This is a bright, lustrous, yellow-gold example that is minimally abraded. Slight strike softness is noted on each side in the usual places. NGC ID# 2899, PCGS# 7947

**Choice 1914-D Quarter Eagle
Very Scarce in Higher Grades**

4173 1914-D MS64 PCGS. The 1914-D Indian quarter eagle is not difficult to locate in MS64 condition, but the population drops off sharply at the Gem level. This attractive Choice example exhibits well-detailed design elements, with vibrant mint luster and vivid greenish-gold surfaces. Visual appeal is quite strong. NGC ID# 2899, PCGS# 7947

**1914-D Indian Quarter Eagle, MS64
Prime Condition Rarity in Higher Grades**

4174 1914-D MS64 PCGS. CAC. The 1914-D Indian quarter eagle is the leading condition rarity in the series in MS65 condition or above. This charming Choice example offers well-detailed design elements and vibrant mint luster, with pleasing greenish-gold surfaces that show few signs of contact. Visual appeal is quite strong. NGC ID# 2899, PCGS# 7947

4175 1915 MS63 PCGS. Pale straw-gold is the norm on this Select piece, the subtly frosted reverse trending a touch toward orange. A bold copper spot appears just off the portrait's chin on the obverse, but the reverse is attractive. NGC ID# 289A, PCGS# 7948

4176 1915 MS63 NGC. Yellow-gold overall with deepening to copper-orange at parts of the upper and lower right obverse. Shallow abrasions in the fields contribute to the grade, though few stand out on their own. NGC ID# 289A, PCGS# 7948

4177 1915 MS63 PCGS. CAC. Apricot-gold and sun-yellow with occasional glints of peach. Brighter than usually seen and a touch frosty, though lightly abraded as expected for the grade. NGC ID# 289A, PCGS# 7948

4178 1915 MS64+ PCGS. CAC. Bright mint luster characterizes this upper-end MS64. Additionally, the strike details are strong throughout and there are minimal marks present. NGC ID# 289A, PCGS# 7948

4179 1915 MS64+ PCGS. CAC. This apricot-gold example has well-defined centers and generous luster, though the peripheries are a trifle soft on detail. Subtly frosted with surfaces that remain smooth by near-Gem standards. NGC ID# 289A, PCGS# 7948

4180 1925-D MS64 NGC. CAC. Subtly frosted luster is largely yellow-gold with occasional touches of apricot. Central detail is excellent, though the necklace is soft and the obverse shows a degree of the shadow-sunkenness so prevalent on examples bearing the Pratt design. NGC ID# 289B, PCGS# 7949

MS65+ 1925-D Two and a Half

4181 1925-D MS65+ NGC. Only the Denver Mint struck quarter eagles in 1925, the sole such occurrence within the history of the denomination. Given the advanced cost of an MS66 example, most specialists of the series will settle for the present piece, especially given its smooth surfaces and original apricot-gold toning. NGC ID# 289B, PCGS# 7949

4182 1926 MS64 NGC. Bright yellow-gold color covers each side of this sharply struck near-Gem example. This would make an excellent type representative. NGC ID# 289C, PCGS# 7950

4183 1926 MS65 NGC. The mint luster on this piece is exceptionally thick and virtually unfazed by post-striking impairments. The strike is also notably strong on each side. NGC ID# 289C, PCGS# 7950

4184 1927 MS64 PCGS. CAC. Peach and olive-gold shades enrich this satiny and lightly marked near-Gem. The strike is uncommonly crisp for the type, without any indistinct areas within the headdress or plumage. NGC ID# 289D, PCGS# 7951

**Premium Gem 1927 Quarter Eagle
Splendid Type Coin, None Graded Finer**

4185 1927 MS66 PCGS. Type coin collectors often flock to the 1927 Indian quarter eagle along with such issues as the 1925-D and 1926, which are among the most easily found at the Gem level. Anything in higher grade, such as this Premium Gem 1927, is nonetheless elusive, and none are graded finer at either service. Ample golden-orange luster complements surfaces that are free from mentionable distractions of any sort. Be sure to notice how well-struck even the lower headdress feathers are on the obverse, as well as the clean cheek on the Indian. The minor weakness on the lowest claw is typical, but this is a splendid type coin. Population: 19 in 66, 0 finer (2/13). NGC ID# 289D, PCGS# 7951

4186 1928 MS64 NGC. CAC. The 1928 is one of the most popular dates for type purposes and this coin demonstrates why. The mint luster is thick and tinted a rich reddish-gold. Only a few small marks on each side prevent an even higher grade. NGC ID# 289E, PCGS# 7952

**1929 Indian Quarter Eagle, MS65
Final Year of Denomination**

- 4187 1929 MS65 PCGS.** A popular final-year type coin, the 1929 Indian quarter eagle is scarce in MS65 condition and virtually unobtainable in higher grades. This delightful Gem displays well-detailed design elements and vibrant mint luster, with pleasing greenish-gold surfaces. PCGS has graded three numerically finer examples (2/13). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

- 4188 1854 AU50 PCGS.** The first year of issue three dollar gold piece combines the importance of the opening issue and the affordability of a high mintage issue into the ideal type coin for the denomination. This one has considerable bright yellow luster with faint orange toning that is especially visible on the reverse. NGC ID# 25M3, PCGS# 7969

**1854 Three Dollar Gold, MS64+
First-Year Type Issue**

- 4189 1854 MS64+ PCGS. CAC.** The three dollar gold denomination was struck for the first time in 1854, with a large mintage of 138,618 pieces. This high-end Choice example displays well-detailed design elements and vibrant satiny mint luster. The light peach-gold surfaces show only minor signs of contact. PCGS has graded 29 numerically finer coins (2/13). NGC ID# 25M3, PCGS# 7969

**Choice VF 1854-D Three Dollar
Gold CAC Seal**

- 4190 1854-D VF35 PCGS. Gold CAC.** The 1854-D is the sole Dahlonega issue of the denomination and as such is key to a type set from the legendary Southern facility. A mere 1,120 pieces were struck, and PCGS has certified a total of 121 pieces in all grades, with an unknown number since removed from their holders and resubmitted. Just 12 pieces are recognized by CAC.

This is a primarily olive-gold example with orange toning where traces of luster persist. The portrait and wreath are surprisingly sharp, particularly on the cotton leaves. No marks are remotely relevant, though delicate hairlines from circulation and handling are present. Housed in an old green label holder. NGC ID# 25M4, PCGS# 7970

**Choice XF 1854-O Three Dollar
Lapped Reverse Die**

- 4191 1854-O XF45 PCGS. Variety 2.** Moderate wear, a weak strike through the centers of each side, and the usually seen lapped state of the reverse die all conspire to dampen some of the details on this Choice XF 1854-O three dollar. The unlapped reverse is far scarcer. Portions of the 85 in the date are weak, as are parts of LA in DOLLAR, above, and the top of the bowknot, below. Each side shows deep brownish-gold patina near the rims, on the obverse complemented by lilac high points. There are few marks for the grade. The 1854-O three dollar issue is perennially popular as the only O-mint of the series, and this example still shows much appeal. NGC ID# 25M5, PCGS# 7971

**Scarce 1854-O Three Dollar, AU53
Lapped Late Die State**

- 4192 1854-O AU53 NGC. Variety 2.** The lapped dies variant of the 1854-O, a latter die state of Variety 1 which has identical date and mintmark locations. The sole New Orleans issue of the denomination and scarce due to a production of just 24,000 pieces. This is an almond-gold representative with moderate high point wear and only a single visible mark, found near the D in UNITED. NGC ID# 25M5, PCGS# 7971

- 4193 1856 AU55 NGC.** Subtle peach overtones settle over parts of otherwise canary-gold surfaces. A lightly worn representative from the third year of three dollar strikings. An abrasion is noted to the left of the truncation of the bust. NGC ID# 25M8, PCGS# 7974

- 4194 1856-S XF45 NGC.** Medium S. A sun-gold San Francisco three dollar piece with radiant luster near the legends and motifs. No marks are of any interest, and the devices show only moderate wear. NGC ID# 25M9, PCGS# 7975

- 4195 1856-S XF45 NGC.** Medium S. This tan-gold San Francisco type coin is only lightly abraded aside from a tick near the upper serif of the mintmark. Liberty's curls exhibit wear commensurate with the grade. NGC ID# 25M9, PCGS# 7975

- 4196 1856-S AU53 NGC.** Medium S. The San Francisco Mint produced 34,500 three dollar pieces in 1856, small by the double eagle standards, though more than any other S-mint three. The present smooth peach-gold example shows moderate wear on the curls but luster illuminates the legends, wreath, and headdress. NGC ID# 25M9, PCGS# 7975

**Mint State 1856-S Three Dollar
Conditionally Rare Old West Memento**

- 4197 1856-S MS61 NGC.** Medium S, one of two such die pairings, the reverse die here showing an extra small arc of metal curving down and left from the bottom of the second L in DOLLARS. The 1856-S three dollar gold is an odd duck in more ways than one, as it is one of only four collectible S-mint issues in the series, along with the 1855-S, 1857-S, and 1860-S. It is, however, by far the highest-mintage of that quartet, at 34,500 coins — nearly as much as the 1874 Philadelphia issue at 41,800 pieces, usually collected as a type coin. But far fewer pieces of the 1856-S survive in high grade; they saw heavy circulation in the Old West of the 1850s and 1860s, and today the average graded coin is about Choice XF. This Mint State specimen displays generous luster over yellow-gold surfaces that show fewer marks than expected for the grade, producing strong eye appeal. Some mild strike weakness on the bowknot is typical for the issue, but overall the devices are well brought-up. Census: 10 in 61, 12 finer (2/13). NGC ID# 25M9, PCGS# 7975

Semiprooflike MS61 1857 Three Dollar

- 4198 1857 MS61 NGC.** Remarkably few of the substantial mintage of 20,891 pieces have survived in Uncirculated grades. This is a well-struck example that has uniform, bright yellow-gold surfaces with noticeably semireflective fields. A few small abrasions are scattered over each side, as one would expect, but there are none worthy of individual mention. NGC ID# 25MA, PCGS# 7976

**1857 Three Dollar, MS65
Important Condition Rarity**

- 4199 1857 MS65 NGC. CAC.** The antebellum production figure for the 1857 three dollar gold issue was 20,891 pieces, but issues from early in the series appear not to have been saved in any significant way, and the few collectors of the time preferred proofs to business strikes. Bowers wrote in his 2005 series reference that only 45 to 60 Mint State coin survive today, although changing grading standards may make that estimate outdated. PCGS shows 65 submissions in all Mint State grades, while NGC shows 106 grading events — but both figures are certainly rife with duplications.

The present piece in Gem condition and certified by NGC is certainly among the few finest survivors of this issue, the sole NGC example in this grade and surpassed by a single MS66 NGC coin. The finest at PCGS are one each in MS65 and MS65+ (2/13). This orange-gold piece is remarkably free of even small signs of contact, and the minor strike softness that appears on the hair at the ear is typical for the issue. Generous luster liberally coats both sides with orange-gold coloration accented by deeper glints of amber near the rims. Note that *this piece is a rare variety as well*, missing the upper-left serifs on the I's in UNITED and AMERICA on the obverse, and the date on the reverse is higher. Bowers notes that "this variety is much scarcer" than the variety with normal legends. More importantly, this Gem appears to be the finest example we have offered at auction since 1998. Astute collectors will act accordingly. Census: 1 in 65, 1 finer (2/13). NGC ID# 25MA, PCGS# 7976

**1860-S Three Dollar, XF45
Low 7,000-Coin Mintage**

- 4200 1860-S XF45 PCGS.** With the exception of the unique 1870-S three dollar gold piece, the 1860-S is the final branch-Mint issue of the denomination. Previously, the California Mint coined this denomination in 1855, 1856, and 1857. This Choice XF specimen has reddish-orange patina near the borders on otherwise light yellow surfaces. Scattered marks are consistent with the grade. Population: 28 in 45, 41 finer (2/13). NGC ID# 25MF, PCGS# 7981

**1862 Three Dollar, AU53
Popular, Lower-Mintage Date**

- 4201 1862 AU53 PCGS.** The 1862 is scarce in all grades with a mintage of only 5,750 pieces. This bright yellow-gold example shows a trace of red over each side. The fields are bright and the die striations that created the brightness are still evident. Moderately abraded with good portions of mint luster surrounding the devices. NGC ID# 25MH, PCGS# 7983

- 4202 1864 — Cleaning — PCGS Genuine. AU Details.** This Civil War date has a scant mintage of 2,600 pieces, since unbacked paper money drove out specie from East Coast and Midwest commerce. A lightly circulated wheat-gold example with mildly glossy surfaces. NGC ID# 25MK, PCGS# 7985

**1869 Three Dollar Gold, MS62
Only 2,500 Pieces Struck**

- 4203 1869 MS62 PCGS.** Only 2,500 three dollar gold pieces were struck in 1869, making the issue quite rare in Mint State grades. This attractive MS62 example displays partially prooflike yellow-gold surfaces and well-detailed design elements, with just a touch of softness on the curls. Population: 10 in 62, 9 finer (2/13). NGC ID# 25MR, PCGS# 7990

Choice 1880 Three Dollar Gold
Only 1,000 Pieces Struck

4204 1880 MS64 PCGS. The 1880 three dollar gold piece boasts an extremely low business-strike mintage of 1,000 pieces, making the issue scarce-to-rare in all grades. Fortunately, contemporary collectors recognized the elusive nature of the date and saved a number of high-quality examples for posterity. In the early 20th century, coin dealer Thomas Elder handled many of these coins, and was especially instrumental in preserving this issue for present-day numismatists.

The present coin is an attractive Choice example, with well-detailed design elements and partially prooflike yellow-gold surfaces. Only minor signs of contact are evident, the worst being a short horizontal scratch on Liberty's cheek. Visual appeal is quite strong. Population: 59 in 64 (1 in 64+), 19 finer (2/13). NGC ID# 25N3, PCGS# 8002

4205 1887 — Improperly Cleaned — NGC Details. AU. From a tiny mintage of 6,000 pieces, the 1887 is considerable scarcer than its 1888 successor. Patient rotation of the obverse beneath a light finally reveals wispy hairlines, as often seen on briefly circulated examples of the type. LIBERTY is lightly die doubled. NGC ID# 25NA, PCGS# 8009

4206 1888 — Damage — PCGS Genuine. Unc Details. A small roundish dig affects the upper loop of the third 8 in the date. A faint pinscratch is noted near the R in DOLLARS. Otherwise a pleasing, smooth example, ideal for obverse display. As is the case with all business strike examples of this low mintage (5,000 pieces) date, the obverse is die doubled, most clearly on UNITED. NGC ID# 25NB, PCGS# 8010

PROOF THREE DOLLAR GOLD PIECES

1882 Three Dollar, PR64 Cameo
Sharply Contrasted Example

4207 1882 PR64 Cameo PCGS. The lack of repunching on the 2 in the date is among the chief ways to distinguish the true proofs, as here, from the business strikes, some of which are extensively prooflike, but all circulation strikes show repunching on that digit. This near-Gem proof is well-contrasted with fields that easily "fade to black" when the coin is tilted under a light, complementing the frosty high points of the devices. The fields show a moderate orange-peel effect. Only 76 proofs were struck of the issue, although more business strikes survive than the mintage of 1,500 pieces might suggest. Moderate orange-gold color and abundant eye appeal prevail throughout. Population: 6 in 64 (1 in 64+) Cameo, 3 finer (2/13). NGC ID# 28AR, PCGS# 88046

1887 Three Dollar, PR64 Deep Cameo
Profound Surface Contrast

- 4208** 1887 PR64 Deep Cameo PCGS. CAC. In the third calendar year before the unusual three dollar gold series terminated for good in 1889, the Philadelphia Mint struck 160 proofs to complement the 6,000 business strikes for the year 1887. That amount would turn out to be the largest for the business strikes through the series' end, although the 1888 proof total, at 291 pieces, would be nearly twice as large as that of 1887. In 1889 both formats would be down, 129 proofs and 2,300 circulation strikes, but both were likely saved in greater quantity due to their last-year status. Profound field-device contrast dominates both sides of this orange-gold near-Gem proof 1887, with reflective fields that fade to black against the frosted devices. It takes a loupe to see the few minuscule contact marks in the fields that determine the grade, but they are far from overt and detract little from the obvious eye appeal. Population: 4 in 64 Deep Cameo, 5 finer (2/13). NGC ID# 28AW, PCGS# 98051

EARLY HALF EAGLES

AU 1798 Heraldic Eagle Five
Large 8, 13 Star Reverse, BD-4

- 4209** 1798 Large Eagle, Large 8, 13 Star Reverse AU50 NGC. BD-4, High R.4. Bass-Dannreuther Die State c/d with cuds and crumbling near STATES OF. The die state is similar to the Bass plate coin in the Dannreuther reference, but the cuds are more advanced than seen on lot 2706 from our 2009 Cincinnati Central States Signature. This is a lightly circulated almond-gold representative with minimally abraded surfaces. Two faint vertical adjustment marks, as made, are on the portrait, but the sole mentionable post-strike contact is a small obverse edge nick at 4:30. The strike is incomplete on the upper half of the eagle's shield but the remainder of the design is crisp. NGC ID# 25NN, PCGS# 8078

Choice XF 1798 Half Eagle
Heraldic Eagle, Rare BD-6 Variety

4210 1798 Large Eagle, Small 8 XF45 PCGS. BD-6, R.6. Bass-Dannreuther Die State b/b. The 1798 Capped Bust Right half eagle claims a mintage of 24,867 pieces, with eight die varieties known for the date. The BD-1 variety features the Small Eagle reverse and is a famous rarity in the series. The other seven varieties utilize the Heraldic Eagle motif. This coin represents the rare BD-6 variety, easily recognized by the regular sized 8 (earlier called Small 8) in the date that touches the bust. The BD-6 has a surviving population of just 30-40 examples in all grades and probably accounted for 2,250-3,250 pieces of the reported mintage. This is the only use of the obverse die, while the reverse was used again on the 1799 BD-9 variety.

This Choice XF specimen retains much of its original design detail and traces of mint luster. From a late state of the dies, both sides show extensive die cracks. The vivid green and orange-gold surfaces are lightly abraded, with some light adjustment marks showing on the central obverse. An attractive example of this rare early gold variety. Population: 3 in 45, 7 finer (2/13).

Ex: Philadelphia Signature (Heritage, 8/2000), lot 7206. NGC ID# 25NP, PCGS# 8079

1802/1 'High Overdate' Five, BD-7, MS61
Rare Variant With 'Broken T's' Reverse

4211 1802/1 MS61 NGC. BD-7, R.5. Bass-Dannreuther Die State c/b. This is one of the two so-called "High Overdate" variants of the 1802/1 half eagle, showing the 1 high and to the left of where it is on the "Centered Overdate" variants. But the key diagnostic needed for attribution of the BD-7 is solely the reverse, as this is the only such that show broken T's; all of the other six die pairings, both High Overdate (BD-6) and Centered Overdate (BD-1 through BD-5) have complete T's on the reverse. This Mint State example shows a few scattered marks on each side, consistent with the grade, with some minor planchet adjustment marks near the lower obverse rim. Small die cracks run from the rim to stars 3 and 5 on the obverse, the latter continuing into the left obverse field. The reverse also shows some more advanced die cracks as outlined in Bass-Dannreuther. The surfaces are yellow-gold overall with good luster and eye appeal, despite the distributed small marks. NGC ID# 25NX, PCGS# 8083

Gem 1806 Half Eagle, BD-6
7x6 Stars, Round Top 6

4212 1806 Round Top 6, 7x6 Stars MS65 PCGS. BD-6, R.2. Bass-Dannreuther Die State c/d with a light diagonal die crack through the eagle's neck. BD-6 is the sole die marriage of the Capped Bust Right type with a 7x6 obverse star arrangement. The obverse appears unbalanced, with the right-side legend and stars crowded while the left-side stars leave considerably more open space. Though the other five die varieties of 1806 half eagles have a pointed 6, the round top 6 is less unusual, since cents and half dollars from 1806 also exhibit that style.

Less discussed than either the obverse star count or the date logotype is the incorrect arrow count. The Heraldic Eagle type should feature 13 arrows, but the BD-6 has just 11 arrows, one of which is faint and has only a partial shaft. In defense of early Mint workers, it must have been painstaking work to enter the legends, stars, arrows, berries, and branch stem by hand on every working die.

The present Gem displays consistent wheat-gold color and lacks any noticeable abrasions. Minor mint-made adjustment marks are confined to the reverse at the left border and on the shield. Those areas, along with the left-side stars, are incompletely brought up though the remainder of the strike is crisp.

BD-6 is among the most often encountered early gold varieties, but a majority of examples certified by PCGS are in circulated grades. The third party population falls precipitously above the MS64 level, with only two each at PCGS and NGC attaining MS65 with none finer. The other MS65 PCGS piece appeared in our January 2010 FUN Signature as lot 2158, where it brought \$126,500. One of the MS65 NGC examples realized \$80,500 as lot 3354 in a September 2009 Ira & Larry Goldberg auction. The other MS65 NGC example last appeared in an April 2012 Heritage auction but has since crossed over to PCGS and is in fact the present coin. Thus between the two leading grading services, as of (2/13), there are only three MS65 pieces with none finer. NGC ID# 25P5, PCGS# 8089

**1808 Capped Bust Left Five, MS63
BD-4, First Year of the New Type**

- 4213 1808 MS63 NGC. BD-4, High R.3.** The Normal Date BD-4 die pairing is the most frequently seen of the year. It is unusual that only one die state is known for the estimated 15,000 to 30,000 pieces struck. John Dannreuther makes the comment that Harry Bass only owned two examples of this variety. That fact is apparently explained by an estimate of only a couple of hundred pieces believed extant today in all grades today. Some of the survivors are in relatively high grade, as are most first-year type coins. This piece displays an exceptional strike, and the frosty yellow-gold surfaces shimmer with an intense satiny sheen over both sides, and are primarily limited in grade by expected scuffiness in the obverse fields and on the cheek of Liberty. Census: 19 in 63, 7 finer (1/13).
Ex: Philadelphia 2000 Signature (Heritage, 8/2000), lot 7214; Long Beach Signature (Heritage, 2/2002), lot 6776. NGC ID# 25PA, PCGS# 8102

**AU55 Sharpness Large Date, Large 5
1810 Five Dollar, BD-4**

- 4214 1810 Large Date, Large 5 — Scratched — ANACS. AU55 Details. BD-4, R.2.** A shallow but relatively broad vertical scratch extends intermittently across the portrait. A pair of diagonal pin scratches extend from the E in STATES to the M in AMERICA. Otherwise, this is a well-defined olive-gold example that exhibits substantial luster. NGC ID# 25PG, PCGS# 8108

CLASSIC HALF EAGLES

- 4215 1837 XF40 PCGS. Breen-6511, McCloskey 1-A, R.4.** The scarce Large Date, Small 5 die variety of this Classic type issue. A charming wheat-gold example with moderately circulated but minimally abraded surfaces. NGC ID# 25RZ, PCGS# 8175

**1838 Classic Half Eagle, MS62
Very Scarce in Higher Grades**

- 4216 1838 MS62 PCGS. McCloskey 1-A, R.2.** The D in the denomination is positioned to the left of the branch stem, identifying the McCloskey 1-A variety. The 1838 Classic Head half eagle claims a substantial mintage of 286,588 pieces, but Mint State specimens are elusive. This attractive MS62 example is sharply detailed and brightly lustrous, with green and rose-gold surfaces that show minimal signs of contact for the grade. Population: 12 in 62, 38 finer (2/13). NGC ID# 25S4, PCGS# 8176
- 4217 1838-C — Cleaned — ANACS. VF Details, Net Fine 15. Breen-6517, Variety 1, R.4.** The introductory Charlotte Mint half eagle is very scarce in all grades. This collectible apricot-gold example is somewhat bright and displays a slight bend near 3 o'clock and a small obverse rim ding at 12 o'clock. NGC ID# 25S5, PCGS# 8177

LIBERTY HALF EAGLES

1840 Liberty Five, MS61 Narrow Mill

- 4218 1840 Narrow Mill MS61 PCGS. CAC.** From a reported mintage of 137,382 pieces, the 1840 Liberty half eagle is known in both Broad Mill and Narrow Mill varieties. The present coin represents the more available Narrow Mill type, but examples in Mint State condition are still quite rare. This well-detailed MS61 specimen displays partially prooflike orange-gold surfaces that show only minor contact marks. Population: 4 in 61, 9 finer (2/13). NGC ID# 25SA, PCGS# 8194

1840-O Half Eagle, AU53 First O-Mint Liberty Five

- 4219 1840-O AU53 PCGS. Variety 3.** The 1840-O Liberty half eagle claims a mintage of just 40,120 pieces and probably no more than 150-175 examples survive in all grades today. This attractive AU53 specimen represents Variety 3, with the mintmark over the V in FIVE. The centers appear a little soft, as usually seen on this issue, but the antique-gold surfaces are lightly abraded. Population: 10 in 53, 22 finer (2/13). NGC ID# 25SK, PCGS# 8200
- 4220 1844-D XF40 NGC. Variety 12-G (formerly 11-H).** This straw-gold Dahlonega type coin exhibits glimmers of its initial luster, especially within the reverse legends. Scattered moderate marks include a slender cut on the reverse rim at 2 o'clock and a depression on the rim on that side near 4:30. NGC ID# 25T9, PCGS# 8221

1845-D Half Eagle, AU53 Excellent Mintmark Type Coin

- 4221 1845-D AU53 PCGS. CAC. Variety 14-H (formerly 12-I)** From a mintage of 90,629 pieces, the 1845-D Liberty half eagle is one of the more available D-mint issues, with a surviving population of 225-250 examples in all grades. This well-struck AU53 specimen retains much of its original design detail and mint luster, with lightly abraded greenish-gold surfaces. Population: 30 in 53, 65 finer (2/13). NGC ID# 25TC, PCGS# 8224

Borderline Uncirculated 1845-D Five

- 4222 1845-D AU58 NGC. Variety 14-H (formerly 12-I).** This well struck Dahlonega type coin is surprisingly void of abrasions. The reverse displays peach toning in protected areas but most of the coin is sun-gold. The 1845-D is rare in Mint State but collectible at the near-Mint level. Census: 62 in 58 (1 in 58+), 22 finer (2/13). Ex: *Denver Signature (Heritage, 8/2006)*, lot 1832, which realized \$4,370. NGC ID# 25TC, PCGS# 8224
- 4223 1846 Small Date AU58 NGC. CAC.** An attractive olive-gold and apricot Borderline Uncirculated No Motto representative. Sharply struck and unmarked with lustrous legends and motifs. PCGS# 88226
- 4224 1846-O XF45 NGC. Variety 1.** A straw-gold New Orleans representative with moderate bluntness of strike on the portrait, but the stars and the eagle have pleasing sharpness. No marks are remotely of interest aside from a thin line between the first two vertical shield stripes. Ex: *Long Beach Signature (Heritage, 2/2006)*, lot 2880. NGC ID# 25TK, PCGS# 8230

1847 Half Eagle, MS63
Remarkably Clean and Lustrous

4225 1847 MS63 PCGS. From a substantial mintage of 915, 981 pieces, but infrequently offered in mint condition. This is an extremely attractive MS63 example exhibiting full, pleasing mint luster, an excellent strike, and far below the average number of normally-seen abrasions. Only wispy pincatches, in the obverse and reverse fields, prevent a higher grade assessment. This coin has a lot of eye appeal. Population: 19 in 63 (1 in 63+), 5 finer (2/13).
Ex: Denver Signature (Heritage, 8/2006), lot 5503. NGC ID# 25TL, PCGS# 8231

4226 1847-C VF35 PCGS. CAC. Variety 1. A tan-gold Charlotte type coin without any noticeable abrasions. The curls display wear but considerable plumage definition persists. Only one die pair is known despite a reasonable mintage by C-mint standards. NGC ID# 25TN, PCGS# 8233

4227 1849-C XF45 PCGS. CAC. Variety 2. The scarcer of the two die marriages for this Charlotte type issue. Original pumpkin-orange luster fills design recesses while the open fields and motifs are wheat-gold. There are no noticeable marks. NGC ID# 25TW, PCGS# 8241

Choice AU 1850-D Five

4228 1850-D AU55 PCGS. Variety 28-S (formerly 24-P). The '50-D is conditionally rare, given its median grade of XF45 at PCGS. The present Choice AU Dahlonega example has lemon-gold surfaces with portions of mint luster surrounding the devices on each side. An above average strike is seen on each side, and no marks are noticeable aside from a single diagonal line on the cheek. Population: 15 in 55, 10 finer (2/13).
Ex: Central States Signature (Heritage, 4/2006), lot 2703; Long Beach Signature (Heritage, 9/2009), lot 1576. NGC ID# 25U3, PCGS# 8245

4229 1852 MS61 NGC. CAC. The 1852 is plentiful in AU but Uncirculated examples are rare. The present well struck No Motto five is minimally abraded and displays orange-gold luster across the margins and motifs. NGC ID# 25UA, PCGS# 8250

4230 1853 MS61 NGC. The 1853 is a No Motto type issue but is usually encountered in XF or AU grades. Uncirculated examples are scarce. The present piece has a bold strike and is free from visible marks, though an area of wispy abrasions is above the eagle's head. NGC ID# 25UD, PCGS# 8253

4231 1854 — Scratch — PCGS Genuine. Unc Details. Upon first glance, this lustrous, nicely struck, and original caramel-gold No Motto half eagle appears to be merit a grade as high as MS64, but magnification reveals a wispy pincatch from star 5 to the back of the neck. NGC ID# 25UG, PCGS# 8256

Doubled Die Obverse FS-101
1854 Five Dollar, MS62

4232 1854 MS62 PCGS. CAC. FS-101. The so-called "Earring" variety with strong die doubling at the obverse center. Many No Motto issues that are readily collected in XF or AU are surprisingly rare in Uncirculated grades. Such is the case with the 1854. The present khaki-gold example is only faintly abraded and is well struck except on the claws and fletchings. Population: 25 in 62, 9 finer (2/13). NGC ID# 25UG, PCGS# 8256

4233 1855 AU58 NGC. CAC. Warm orange-gold luster is largely intact in the fields. The high points of the devices show a touch of wear over a naturally soft strike. Census: 54 in 58, 25 finer (2/13). NGC ID# 25UP, PCGS# 8261

1857-C Five Dollar, AU58
Bright, Well-Struck Surfaces

4234 1857-C AU58 PCGS. Variety 1. This sole die pairing struck all of the 31,360 pieces. This example shows the die line by star 11 that is diagnostic. The reverse die crack to the right of the upper part of the first T in STATES is very faint, being mostly lost in a confusion of tiny abrasions. The devices are well struck, as usual, and each side is peppered with small bagmarks. NGC ID# 25V3, PCGS# 8272

Well-Struck 1858-C Five Dollar, AU55

4235 1858-C AU55 NGC. Variety 1. Better struck than the typical Charlotte half eagle, since the curls, feathers, and stars show bold definition. The wheat-gold surfaces display only distributed small marks, though small rim ticks are noted at 9 o'clock on the obverse and 1 o'clock on the reverse. Scarce, since only 38,856 pieces were struck. Census: 33 in 55, 58 finer (2/13). NGC ID# 25V8, PCGS# 8277

- 4236 1859-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** Rose-red luster visits protected areas but both sides are mildly glossy from cleaning and display a few shallow mint-made strike-throughs. Indistinct definition on the eagle is characteristic of the issue, even on the highest grade examples. NGC ID# 25VC, PCGS# 8281

Smooth AU 1859-C Half Eagle

- 4237 1859-C AU50 NGC. Variety 1.** A lightly circulated straw-gold example of this scarce Southern branch issue. The surfaces are luminous and minimally marked. All 1859-C fives, regardless of grade, show blurry definition on a majority of the eagle, due to an improperly annealed reverse die. It is curious that Charlotte continued to use the lower quality reverse die when others from prior years were presumably available. NGC ID# 25VC, PCGS# 8281

**1861 Half Eagle, MS62
No Motto Reverse**

- 4238 1861 MS62 PCGS.** With a mintage of 688,000 pieces the 1861 Liberty five had the second highest production in the No Motto series from 1839 to 1866. Surviving examples are generally encountered in XF or AU grades, and rarely in MS60 or finer grades. This piece has lustrous light yellow surfaces with trivial marks. A hint of rose toning appears near the borders. NGC ID# 25VK, PCGS# 8288

Low Mintage AU 1875-CC Five

- 4239 1875-CC AU50 PCGS. Variety 1-B.** Rusty Goe notes that as double eagle Carson City production increased, the other gold denominations were struck in lesser quantity. The 1875-CC half eagle has a production of just 11,828 pieces. Those went into Western commerce, since PCGS has certified only one coin as Mint State. A minimally abraded wheat-gold example with moderate blending of detail on Liberty's curls. Population: 7 in 50, 12 finer (2/13). Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 4767, which realized \$8,337.50. NGC ID# 25WU, PCGS# 8337

**1876 Liberty Half Eagle, MS63
Only 1,432 Pieces Struck**

- 4240 1876 MS63 PCGS.** The 1876 Liberty half eagle boasts an extraordinarily low business-strike mintage of 1,432 pieces, making the date rare in all grades and conditions. A few high-quality examples are extant, possibly saved by contemporary collectors as souvenirs of the national centennial celebration. The present coin is an attractive Select specimen, with light orange-gold surfaces that show a mixture of vibrant satiny mint luster and prooflike reflectivity. The design elements are well-detailed, with a touch of softness on the central reverse. Only minor contact marks are evident. Population: 2 in 63, 6 finer (2/13). NGC ID# 25WW, PCGS# 8339

**Choice 1879 Liberty Half Eagle
Underrated Condition Rarity**

- 4241 1879 MS64 PCGS.** Despite a mintage of 301,950 pieces, the 1879 Liberty half eagle is quite rare in MS64 condition. This attractive Choice example displays strong satiny mint luster and well-detailed design elements, with just a touch of softness on the eagle's feathers. The peach-gold surfaces show only minor signs of contact. Population: 9 in 64, 4 finer (2/13). NGC ID# 25X7, PCGS# 8348
- 4242 1880-S MS63 PCGS.** Pale yellow at the interiors with deeper sun-gold and rose-gold hues at parts of the margins. Faintly abraded with a scrape on the cheek but generally pleasing, a quality type coin for the grade. NGC ID# 25XC, PCGS# 8353

Rare 1881-CC Half Eagle, XF45

- 4243 1881-CC XF45 PCGS. Variety 1-A.** A challenging Carson City issue with a mintage of only 13,886 pieces. The present yellow-gold representative has greater luster extent than is usual for the XF45 grade, though the eagle's neck and the hairbun lack a complete strike. Thin marks are noted on near star 10 and Liberty's cheek and chin. Population: 13 in 45, 25 finer (2/13). NGC ID# 25XE, PCGS# 8356

**Near-Mint 1881-CC Half Eagle
Low Carson City Mintage**

- 4244 1881-CC AU58 NGC. Variety 1-A.** This crisply struck caramel-gold Borderline Uncirculated example is refreshingly free from visible marks. Luster dominates the margins and motifs. Considerably rarer than its 1880-CC predecessor, the 1881-CC is an elusive Carson City issue from a meager mintage of 13,886 pieces. A single die pair is known, identified by a rising die line through the ER in LIBERTY and another die line above the C in AMERICA. The AU58 grade provides an ideal combination of value and quality for the challenging issue. Census: 6 in 58, 6 finer (2/13). NGC ID# 25XE, PCGS# 8356

**1882-CC Half Eagle, MS61
Very Rare in Higher Grades**

- 4245 1882-CC MS61 NGC. Variety 1-A.** From a mintage of 82,817 pieces, the 1882-CC Liberty half eagle is an available date in the series, with perhaps 350-400 examples surviving in all grades. However, the issue is quite rare in MS61 condition. This attractive Mint State example is well-detailed and lustrous, with surprisingly few contact marks for the grade. Census: 18 in 61, 6 finer (1/13). NGC ID# 25XH, PCGS# 8359

**1882-CC Half Eagle, MS61
Variety 1-A, the Only Dies**

- 4246 1882-CC MS61 PCGS. CAC. Variety 1-A.** The only known dies for the 1882-CC half eagle, with the mintmark centered over the V in FIVE. Comparing the mintmark position suggests that the reverse die was only used for this issue, and in no other years. This lustrous example has light yellow surfaces with a small pedigree mark in the hair over the coronet, and slight striking weakness at the upper obverse. Population: 8 in 61, 5 finer (2/13). NGC ID# 25XH, PCGS# 8359

Gem 1882-S Five Dollar

- 4247 1882-S MS65 NGC.** This lustrous peach-gold Gem has a nearly pristine appearance save for a single brief hair-thin line above the eagle's right (facing) shoulder. Though a common issue in typical Mint State grades, the 1882-S becomes an important conditional rarity at the MS65 level. Census: 26 in 65, 3 finer (2/13). NGC ID# 25XJ, PCGS# 8360
- 4248 1883 MS63 PCGS.** A coruscating Select representative of a conditionally scarce and lower mintage Philly issue. Peach-tinged centers are framed by a band of lime-green near the rims. Population: 72 in 63 (3 in 63+), 23 finer (2/13). NGC ID# 25XK, PCGS# 8361
- 4249 1885 MS64 PCGS.** The 1885 Liberty half eagle is scarce in MS64 condition and the date is very rare in finer grades. This attractive Choice example displays well-detailed design elements and vibrant mint luster, with strong eye appeal. Population: 74 in 64 (5 in 64+), 2 finer (2/13). NGC ID# 25XS, PCGS# 8367

**1885-S Liberty Five, MS65
Very Rare in Finer Grades**

- 4250 1885-S MS65 NGC.** The 1885-S Liberty half eagle is readily available in lower grades, but examples in MS65 condition are very scarce. This well-detailed Gem exhibits vibrant cartwheel mint luster and pleasing orange-gold surfaces, with a few highlights of rose. Census: 94 in 65 (1 in 65+), 13 finer (2/13). NGC ID# 25XT, PCGS# 8368

- 4251 1886-S MS64 NGC. CAC.** A high-end near-Gem with apple-green margins and flashy peach-gold fields. Boldly struck and unmarked. The 1886-S is a common date with the Liberty series but examples of the present quality are always in demand. NGC ID# 25XV, PCGS# 8370

- 4252 1890-CC MS61 PCGS. Variety 1-A.** A sun-gold Carson City type coin. Marks are fewer than expected for the grade, and the traces of dirt throughout confirm original surfaces. A good strike aside from softness on the eagle's neck. NGC ID# 25Y3, PCGS# 8376

- 4253 1893-CC AU58 NGC. Variety 1-A.** A sharply struck and moderately abraded apricot-gold near-Mint example of this scarce Carson City issue. Only 60,000 pieces were issued, and a majority of survivors are in lightly circulated grades. NGC ID# 25YB, PCGS# 8384

- 4254 1893-CC AU58 PCGS. Variety 2-A.** The low date variant of this final year and low mintage Carson City emission. Crisply struck and minimally abraded with ample luster throughout the margins and motifs. NGC ID# 25YB, PCGS# 8384

**Gem 1897 Liberty Half Eagle
Rare in High Grade**

- 4255 1897 MS65 PCGS.** The 1897 Liberty half eagle claims a large business-strike mintage of 867,800 pieces, but examples in MS65 condition are not seen as often as Gems of later years. This sharply detailed specimen offers satiny mint luster and well-preserved peach-gold surfaces. Population: 22 in 65 (1 in 65+), 2 finer (2/13). NGC ID# 25YM, PCGS# 8394
- 4256 1898 MS64 PCGS. CAC.** Excellent detail on the high points with a twinkle to the understated wheat-gold luster. A skiff of patina has settled across each side of this smooth near-Gem. Population: 46 in 64, 6 finer (2/13). NGC ID# 25YP, PCGS# 8396
- 4257 1901-S MS64 PCGS. CAC.** A pleasing butter-gold near-Gem. Well struck and impressively unabraded with exemplary luster. A plentiful issue overall but a good value relative to higher grades. NGC ID# 25YX, PCGS# 8404

**1901-S Liberty Five, MS66+
Very Rare Any Finer**

- 4258 1901-S MS66+ PCGS. CAC.** The 1901-S Liberty half eagle claims a huge mintage of 3.6 million pieces, and the issue is readily available in grades up to the Gem level. Premium Gems are very scarce and finer examples are conditionally very rare. This high-end Premium Gem is well-detailed, with vibrant mint luster and outstanding eye appeal. Population: 50 in 66 (2 in 66+), 2 finer (2/13). NGC ID# 25YX, PCGS# 8404

**1902 Five Dollar Liberty, MS66+
Upper-End for the Already High Grade**

- 4259 1902 MS66+ PCGS. CAC.** Amazing luster is the hallmark of this high-grade type coin. Additionally, the strike is complete in all areas and there are no noticeable marks on either side. It is always surprising to see a gold coin as clean and well-preserved as this piece is. Population: 7 in 66 (1 in 66+), 1 finer (2/13). NGC ID# 25YY, PCGS# 8405

**1904 Half Eagle, MS66
Conditionally Rare**

- 4260 1904 MS66 PCGS. CAC.** An extremely important condition rarity, this Premium Gem is highly lustrous with satin surfaces, brilliant lemon-yellow color, and bold design features. The mintage of 392,000 suggests an issue that is available in all grades. However, the average certified grade is only MS62. Population: 17 in 66, 5 finer (2/13). NGC ID# 25Z4, PCGS# 8409

**Premium Gem 1905 Liberty Half Eagle
None Certified Finer at PCGS**

- 4261 1905 MS66 PCGS.** Sharply detailed in most areas, this impressive Premium Gem shows just a touch of softness on the lower stars. The pristine green and rose-gold surfaces display vibrant satiny mint luster, with ample eye appeal. The 1905 Liberty half eagle is available in lower Mint State grades, but the issue is quite rare at the MS66 level. Population: 13 in 66, 0 finer (1/13). NGC ID# 25Z6, PCGS# 8411
-
- 4262 1905-S MS63 PCGS.** The 1905-S has a fairly high mintage and does exist in quantity but most pieces are in AU55 to MS62 grades. Select examples with unbroken cartwheel luster and no obvious marks are seldom encountered. A radiant and well struck butter-gold piece. Population: 31 in 63, 30 finer (2/13). NGC ID# 25Z7, PCGS# 8412

- 4263 1908 MS65 NGC.** Delicate apple-green and caramel-gold shades encompass this thoroughly lustrous and precisely struck final-year Gem. Well preserved and a good candidate for the advanced gold type collector. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

**First-Year 1908 Five Dollar Indian
High-End MS64**

- 4264 1908 MS64+ PCGS. CAC.** The Plus and the CAC endorsement on this coin says a lot about the overall quality one can expect. Many would call this a Gem. The surfaces are bright yellow-gold and noticeably frosted. The strike details are well-defined with only localized weakness on the lowest feather of the headdress and the top of the eagle's wing. Remarkably free from the usual marks. NGC ID# 28DE, PCGS# 8510

**1908 Indian Half Eagle, MS64+
Excellent Type Coin**

- 4265 1908 MS64+ PCGS. CAC.** The 1908 half eagle is always popular as the first year of the unusual incuse Indian design, and this high-end Choice example would make an ideal selection for a type set. This coin features well-detailed design elements and lustrous orange-gold surfaces, with attractive highlights of rose. NGC ID# 28DE, PCGS# 8510
-
- 4266 1908-D MS63 PCGS.** Popular as a first year of the type but with a mintmark, this piece has much the same appearance as many 1909-D fives. The fields show rich olive accents over the otherwise reddish-gold surfaces. Minimally abraded and remarkably sharp strike details. NGC ID# 28DF, PCGS# 8511

Choice 1909 Indian Half Eagle

4267 1909 MS64 PCGS. The 1909 Indian half eagle enjoyed a large mintage of 627,060 pieces in the second year of the innovative incuse design. This impressive Choice example displays well-detailed design elements and lustrous greenish-gold surfaces, with accents of rose color. The 1909 is very scarce in higher grades. NGC ID# 28DH, PCGS# 8513

4268 1909-D MS63 PCGS. Color is often an attribute for the 1909-D five, but this one is different. Each side is covered with an almost cherry-red gold with surprisingly deep lilac interspersed. Sharply struck. NGC ID# 28DJ, PCGS# 8514

4269 1909-D MS64 PCGS. A sharp strike is seen over both sides with minimally abraded faces. The color is almost tan-gold and, of course, the luster is satiny. NGC ID# 28DJ, PCGS# 8514

1909-D Indian Half Eagle, MS64+ Vivid Color, Vibrant Mint Luster

4270 1909-D MS64+ PCGS. CAC. The vivid orange and greenish-gold surfaces of this high-end Choice specimen radiate vibrant mint luster and the incuse design elements are sharply detailed throughout. Only a few minor contact marks are evident and eye appeal is outstanding. The 1909-D becomes scarce in higher grades. NGC ID# 28DJ, PCGS# 8514

1909-D Indian Five, MS64+ Lustrous and Well-Detailed

4271 1909-D MS64+ PCGS. CAC. The 1909-D Indian half eagle is one of the most available issues of the series in MS64 condition, but the population drops off considerably at the Gem level, making this well-detailed MS64+ specimen a good balance of quality and value. Vibrant frosty mint luster illuminates the pleasing greenish-gold surfaces. NGC ID# 28DJ, PCGS# 8514

1909-O Indian Half Eagle, AU58 Remarkably Attractive Example of This Key

4272 1909-O AU58 PCGS. The last gold coin issued by the New Orleans Mint would be the curious 1909-O half eagle, struck in the small extent of 34,200 pieces and thus doubly popular, due to the small mintage and its singleton status as the only O-mint half eagle of the new Bela Lyon Pratt design. Even though their mintages may be similar, grade-for-grade the 1909-O half eagle is far rarer and more expensive than the 1911-D quarter eagle; even upper-end AU examples trade in the five-figure range. This is a remarkably bright example with even orange-gold color. The strike is strong throughout with especially well-defined feather detail on the lower portion of the headdress, and the mintmark is also well-formed. Each side is minimally abraded. This is one of those upper-end AU coins that is actually nicer in appearance than many lower-end Unc pieces. We anticipate quite a bit of interest in this piece. NGC ID# 25ZK, PCGS# 8515

Near-Mint 1909-O Five Dollar
Still-Lustrous and Minimally Abraded

4273 1909-O AU58 PCGS. The 1909-O half eagle is a standout rarity within the Indian Head series, due to its low production of 34,200 pieces. The next-lowest mintage within the series was more than double that, the 1911-D half eagle at 72,500 coins. The 1909-O half eagle's small mintage nonetheless pales beside some of the 19th century O-mint issues, such as the 1879-O double eagle (2,325 minted); the 1879-O eagle, even lower at 1,500 coins struck; or the 1883-O ten dollar, at 800 pieces made. Even though the 1909-O half eagle's production looks generous alongside some of those notable rarities, it is a conditional rarity as well, and for all practical purposes most collectors will have to make do with a nice XF-AU or low-Mint State example. This is a bright near-Mint piece that retains generous amounts of satiny luster. The strike details are just a little soft on the lowest part of the headdress. Minimally abraded. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU58
Problem-Free Example
Of This 20th Century Rarity

4274 1909-O AU58 PCGS. CAC. "Feverish demand" is how Jeff Garrett and Ron Guth characterize the numismatic fervor for the 1909-O half eagle, an anachronism as the last (and only) Indian Head five produced at the New Orleans Mint, which would close for coinage forever in the same year. The 1909-O holds a number of records. It is:

- the last gold coin of any denomination struck in New Orleans;
- the only O-mint Indian Head gold issue of any denomination;
- the only 20th century O-mint half eagle of any design;
- the last half eagle struck in New Orleans since 1894;
- the lowest-mintage Indian Head five, at 34,200 pieces; and
- a key to the Indian Head half eagles in all grades, even though a couple of other issues are rarer in high Mint State levels.

All of the foregoing factors make the 1909-O popular among a multitude of collectors. This upper-end AU gives the collector excellent value in this major 20th century rarity. Only the slightest high-point friction is seen on each side, the strike details are strong overall including a well-formed mintmark, and abrasions are small and widely scattered. NGC ID# 25ZK, PCGS# 8515

4275 1909-S AU58 PCGS. Just the slightest brightness is evident from light handling. Even light reddish-gold color and a few small marks. NGC ID# 25ZL, PCGS# 8516

**1910-D Indian Five, MS64
Bright Luster and Color**

4276 1910-D MS64 PCGS. CAC. The 1910-D was a rare issue in all Mint State grades before a number of coins came to light in a hoard that surfaced in 1979. Most of those coins were in lower Uncirculated grades and the 1910-D remains rare at the MS64 level. This impressive Choice specimen is sharply detailed and lustrous, with pleasing orange-gold surfaces. Population: 38 in 64 (3 in 64+), 10 finer (2/13). NGC ID# 28DL, PCGS# 8518

4277 1910-S MS61 NGC. A coppery orange-gold piece with substantial violet overtones and a few areas of deep hue. A dig to the left of E (PLURIBUS UNUM) and scattered abrasions account for the grade. NGC ID# 28DM, PCGS# 8519

**1911-D Half Eagle, AU58
Generous Eye Appeal**

4278 1911-D AU58 PCGS. CAC. The 1911-D half eagle had a low mintage within the Indian Head series just as its 1911-D quarter eagle counterpart did — 72,500 coins versus 55,680 pieces — but the 1911-D is overshadowed by the 1909-O and the 1929 among the half eagles. This near-Mint State example shows generous eye appeal over the khaki-gold surfaces that display a mere trace of high-point rub, along with a couple of marks on the Indian chief's jawline and one in the headdress. NGC ID# 28DR, PCGS# 8521

4279 1911-S MS61 PCGS. Yellow-orange luster with several coppery areas at the obverse margins. While this piece shows a number of moderate-to-small marks, particularly in the reverse fields, it has solid arm's-length eye appeal. NGC ID# 25ZM, PCGS# 8522

4280 1911-S MS62 NGC. A scarce Indian half eagle, especially in higher grades, despite a mintage of nearly 1.5 million pieces. In fact, that production was second highest in the series, and one of only two issues that had a coinage of 1 million or more coins. This piece has splashes of olive patina over light yellow surfaces with full satin luster and scattered, grade-consistent marks. NGC ID# 25ZM, PCGS# 8522

**1911-S Indian Five, MS62+
Elusive Issue in High Grade**

4281 1911-S MS62+ PCGS. Despite a substantial mintage of 1.4 million pieces, the 1911-S Indian half eagle is an elusive, underrated issue in high grade. This high-end MS62 example exhibits pleasing orange-gold surfaces, with highlights of rose color and a few dark amber alloy spots. The coin is well-detailed and lustrous. NGC ID# 25ZM, PCGS# 8522

1912 Indian Half Eagle, MS64+

4282 1912 MS64+ NGC. The pleasing green and rose-gold surfaces of this delightful high-end Choice specimen display strong mint luster, with sharply detailed incuse design elements. The 1912 Indian half eagle becomes scarce in MS65, so this attractive MS64+ example is a good blend of quality and value. NGC ID# 28DS, PCGS# 8523

**1912 Indian Half Eagle, MS64
Scarce Issue in Higher Grades**

4283 1912 MS64 PCGS. CAC. The 1912 Indian half eagle can be located in MS64 condition without much difficulty, but the date becomes very scarce at the Gem level. This attractive Choice example exhibits sharply detailed design elements and frosty mint luster, with pleasing rose-gold surfaces. PCGS has graded 47 numerically finer examples (2/13). NGC ID# 28DS, PCGS# 8523

**1913-S Half Eagle, Eye-Appealing MS63
Very Scarce at This Grade Level**

4284 1913-S MS63 PCGS. The 1913-S half eagle is scarce at this grade level, as witnessed by the meager 49 submissions at PCGS with but 16 finer (1/13). Even though more than 408,000 pieces were struck, the average grade of certified examples is only Choice AU. This is a splendid-looking example of the issue, boasting excellent luster over bright orange-gold surfaces. A few stray marks include one on the Indian's cheek, one hidden in the lower headdress feathers, and a third in the obverse field that account for the grade, but they are hardly distracting. The reverse is well-preserved and both sides display a sharp strike, lending excellent eye appeal. NGC ID# 25ZP, PCGS# 8526

**1913-S Five Dollar Indian, MS63
Borderline Condition Rarity**

4285 1913-S MS63 PCGS. CAC. In theory (at least according to the *Guide Book*), the 1913-S half eagle prices close to type in VF and XF condition. In practice — the AU to Mint State grades where most collectors are active with this series — the premium on the 1913-S date ranges from tens to thousands of dollars. At the MS63 level, the 1913-S half eagle is a borderline condition rarity, and in MS64 and better grades, the major grading services have certified just 27 pieces between them (2/13). While this Select example is lightly abraded with a few copper spots and a mushy mintmark, its gleaming orange-laced luster redeems the eye appeal. NGC ID# 25ZP, PCGS# 8526

Near-Gem 1914 Half Eagle

4286 1914 MS64 PCGS. Deep peach-gold toning confirms the originality of this coruscating and crisply struck Choice gold type coin. Minimally abraded aside from a single hair-thin vertical mark on the field near the profile. The 1914 returned in quantity from European holdings after World War II, but such pieces are usually in AU58 to MS62 grades. Near-Gems remain scarce relative to demand. NGC ID# 28DU, PCGS# 8527

1915 Five Dollar Indian, MS64 Bright Mint Luster

4287 1915 MS64 NGC. While the 1915 is considered a “common” date in the series, it is certainly a better issue than others and would make a distinctive type coin. The mint luster seen on this example is sparkling bright, and each side has light reddish tinted gold patina. Minimally abraded, especially so on the obverse. NGC ID# 28DX, PCGS# 8530

4288 1916-S MS61 NGC. Mottled olive toning appears over butter-yellow surfaces on this Mint State half eagle, the final issue of the decade and the last until 1929. Myriad surface marks account for the grade. NGC ID# 28DY, PCGS# 8532

Bela Lyon Pratt

1929 Half Eagle, MS63
Rarest Series Issue Overall

4289 1929 MS63 PCGS. CAC. The 1929 half eagle is the overall rarest date in its series. It was the first issue struck in the Indian Head five dollar series since the singleton San Francisco striking of 13 years previous, the 1916-S. The 1929 half eagle would also constitute the *last* issue in the series, as later in the year the horrid stock market crash culminating on Black Tuesday, October 29, 1929, would usher in the Great Depression. It is noteworthy that the peak level that the Dow Jones Industrial Average achieved on September 3, 1929, of 381.17, would not be seen again after the crash for a quarter-century — until November 23, 1954.

The mintage of the 1929 half eagles was large for the era, at 662,000 pieces, but a far smaller, yet unknown number were ever actually released from Treasury vaults, where the majority languished until being melted after the Gold Recall of 1933. Only a handful of coins are certified below the MS60 level, and most of the survivors grade somewhere between MS60 and MS64. There are also only a handful of Gem survivors, and anything finer than MS65 is unknown.

The present Select Mint State example, certified by PCGS, is in the median grade for the issue, although there are also quite a number of near-Gem coins. This piece shows overall antique-gold color with some smoke-gray accents and scattered small marks on the Indian's cheek and jawline and before the profile, none overly distracting and in line with the grade. The strike is a bit soft on the high points of the headdress and on the lowest bear claw on the necklace. The reverse is both better-struck and relatively less abraded. NGC ID# 2800, PCGS# 8533

EARLY EAGLES

Choice AU 1801 Ten Dollar
Much Better BD-1 Variety

- 4290 1801 AU55 PCGS. BD-1, R.5. Bass-Dannreuther Die State a-b/d. A die crack exists between the 01 in the date, but the arc-shaped crack from the bust to star 13 is absent. This intermediate die state was unknown to Bass and is unlisted in the Dannreuther reference. There are two die varieties of 1801 tens, but more than 90% of survivors are BD-2. BD-1 is rare but can often be acquired for little premium over the "common" BD-2. The present butter-gold Choice AU representative is mildly bright, and is richly defined except for softness on the two uppermost reverse stars. Minimally abraded aside from wispy field marks near obverse star 2. NGC ID# 2627, PCGS# 8564

1801 Eagle, AU58
Large Spindly Stars, BD-2 Variety

- 4291 1801 AU58 NGC. BD-2, R.2. Bass-Dannreuther Die State b/b. The 1801 Capped Bust Right eagle boasts a substantial mintage of 44,344 pieces, but some of those coins may have been dated 1800, or even 1799. Only two die varieties are known for the date. The present coin is a representative of the more available BD-2 variety, with star 8 positioned near Liberty's cap. The BD-2 accounted for as much as 30,000-40,000 pieces of the reported mintage, and John Dannreuther estimates 600-800 examples remain extant in all grades. The obverse star punch was modified on this variety, as the star points are longer and spindlier than on the earlier punch. This was the only use of the obverse die, but the reverse was used again on the 1803 BD-3 variety.

This coin retains most of its original design detail and mint luster, with just the slightest trace of high-point wear on the devices. The greenish-gold surfaces are lightly abraded, with no individually mentionable distractions. The cap shows the unexplained nine vertical spikes that appear to be clash marks at first glance, but do not match up with the shield stripes on the reverse. NGC ID# 2627, PCGS# 8564

Choice 1801 Capped Bust Right Eagle
Stunning Prooflike Surfaces
Popular BD-2 Variety

4292 1801 MS64 NGC. BD-2, R.2. Bass-Dannreuther Die State b/b. A reported mintage of 44,344 Capped Bust Right eagles was accomplished in 1801, but die evidence indicates some of these coins were actually dated 1800, and possibly some 1799-dated specimens are also included in the total. Two die varieties are known for the date, with this coin representing the more available BD-2 variety, identified by the position of obverse star 8 near the cap. The BD-2 variety probably accounted for 30,000-40,000 pieces of the reported mintage and the surviving population is estimated at 600-800 examples in all grades.

The BD-1 variety for 1801 is very scarce, and it seems that the old large star punch used on the obverse stars must have broken when preparing that die because the BD-2 obverse employs a different device, with longer, more spindly spines than the old punch. This was the only use of the obverse die, but the reverse was used again in 1803 to strike the BD-3 variety of that year.

The early eagles were avidly collected by numismatists from the earliest days of the hobby. An example of the 1801 appeared in lot 2740 of the Sixth Semi-Annual Sale (W. Elliot Woodward, 3/1865), which sounds like it could be an early appearance of the present piece:

"1801 Splendid, perfectly uncirculated, almost proof; very scarce."

The lot realized \$17, to John F. McCoy. Like all early eagles, the 1801 has increased in price steadily over the years. Recent sales include the remarkable MS64 PCGS example in lot 2104 of the Summer FUN Signature (Heritage, 6/2008), which realized \$126,500.

The coin offered here is a spectacular Choice specimen, with stunning prooflike yellow-gold surfaces. The design elements are sharply detailed in most areas, but a few of the stars are flat, probably due to lapping. Some die-polish lines are evident in the obverse field, but no mentionable distractions are present, and there is no trace of adjustment marks. Eye appeal is incredible. Census: 27 in 64, 2 finer (2/13). NGC ID# 2627, PCGS# 8564

LIBERTY EAGLES

- 4293 1844-O AU53 PCGS. Variety 1.** A green-gold New Orleans representative with pleasing sharpness and the expected number of distributed small marks. Luster emerges from the borders and motifs. Population: 23 in 53, 20 finer (2/13). NGC ID# 262T, PCGS# 8591

1846 Liberty Ten, AU50 Low-Mintage Scarcity

- 4294 1846 AU50 NGC.** A scarce date in the early Liberty eagle series, rarely seen in grades above AU55. The mintage was only 20,095 coins, and only a slender percentage of that production has survived. Although the surfaces are a bit abraded, this AU example is nicely defined and displays hints of its original luster. Census: 15 in 50, 29 finer (2/13). NGC ID# 262W, PCGS# 8594

- 4295 1847-O AU58 NGC. Variety 4.** The base of the 18 is repunched and the mintmark is right of the N in TEN. This mintmark location is unlisted in the standard Winter reference. A nicely struck and mildly bright sun-gold New Orleans No Motto type coin with lightly abraded and moderately prooflike fields. NGC ID# 2632, PCGS# 8598

Better Date 1848-O No Motto Ten AU53, Only 35,850 Pieces Struck

- 4296 1848-O AU53 NGC. CAC. Variety 2.** Far scarcer than its 1847-O predecessor, since the mintage was just 38,850 pieces. The present apricot-gold New Orleans representative has a typical strike and is free from any noticeable abrasions. Ample luster illuminates design crevices.
Ex: Houston Signature (Heritage, 12/2008), lot 2114, which realized \$3,220. NGC ID# 2634, PCGS# 8600

- 4297 1851 AU58 NGC.** A peach-gold No Motto ten that boasts ample bright luster and an absence of distracting marks. The strike is bold except on the stars. Census: 35 in 58, 21 finer (2/13). NGC ID# 263A, PCGS# 8606

1852 Liberty Eagle, MS60

- 4298 1852 MS60 NGC.** A substantial mintage of 263,106 coins does little to tell of the importance of this piece. Gold coinage was obviously needed in commerce at the time — silver coinage scarcely circulated — and the average grade of survivors falls in the XF range. Mint State pieces are rarely seen. This lustrous example has sharp details with light yellow mint frost. Trivial marks on each side are consistent with the grade. Census: 7 in 60, 28 finer (8/12). NGC ID# 263C, PCGS# 8608

Rare XF 1855-O Eagle Only 18,000 Pieces Struck

- 4299 1855-O XF40 PCGS. CAC. Variety 2.** A much better New Orleans No Motto issue, far scarcer than the 1851-O. The present yellow-gold example displays pockets of luster and is free from any obtrusive marks. Only 18,000 pieces were struck. CAC has affixed their seal on just four examples, all between the grades of XF40 and AU50. Population: 18 in 40, 40 finer (2/13). NGC ID# 263M, PCGS# 8617

Choice XF 1855-O Ten
Difficult New Orleans Issue

- 4300 1855-O XF45 NGC. Variety 2.** Douglas Winter (2006) identifies two die varieties from the mintage of just 18,000 pieces, but his repunched date listing turned out to be strike doubling on the only confirmed die pair. The present Choice XF New Orleans No Motto example displays pockets of bright luster and shows only moderate wear. The straw-gold surfaces are mildly bright and display the expected number of scattered small marks. NGC ID# 263M, PCGS# 8617

1855-O Eagle, AU53, Slanted 5's in Date
Attractive and Relatively Unmarked

- 4301 1855-O AU53 NGC. Variety 2.** The Slanted 5's in the date are the first of many lures on this AU53 1855-O eagle, a numeral style that would virtually disappear after the 1850s. The New Orleans Mint would wane in importance after the 1850s as the new San Francisco facility got up to speed (beginning in 1854), as shown by the respective mintages of the 1855-O and 1855-S eagles, 18,000 and 9,000 coins, respectively. This AU53 piece is in better shape than most survivors, showing a good deal of luster remaining on medium yellow-gold surfaces that are attractive and relatively unabraded. Census: 18 in 53, 25 finer (2/13). NGC ID# 263M, PCGS# 8617
- 4302 1856-S AU53 NGC. CAC. Medium S.** The 1854-S and 1856-S are the only San Francisco issues prior to 1879 that can be described as merely scarce. The other S-mint dates from that 15-year period range from rare to very rare. The present yellow-gold piece has pleasing luster extent and moderate marks on the upper reverse field. NGC ID# 263S, PCGS# 8621

About Uncirculated 1859-S Eagle
Seldom Offered at This Grade Level

- 4303 1859-S AU50 PCGS.** Many of the early gold coin emissions from the San Francisco Mint, which opened for production in 1854, are either unknown — or virtually so — in Mint State. It took years for San Francisco to produce a sufficient quantity of gold coins to sate the demand created by a booming California economy, a region of America accustomed to “hard money” and leery of any substitutes. Most gold coins struck in the region, whether privately or federally issued, saw extensive circulation. The 1859-S eagle, struck in the amount of 7,000 pieces, is unknown in Mint State save for a single MS60 coin at NGC; most certified survivors average no more than XF40 to XF45. This AU50 PCGS example shows antique-gold surfaces with a scattering of small- to medium-sized marks, none particularly overt and fewer than expected. The large S mintmark is startling but typical for the issue. Population: 5 in 50, 3 finer (1/13). NGC ID# 2643, PCGS# 8630
- 4304 1860-O XF45 PCGS. Variety 2.** The low date variant of this much better New Orleans issue. Only 11,100 pieces were struck. The present apricot-gold representative is evenly defined and is without any singularly mentionable abrasions. NGC ID# 2645, PCGS# 98631
- 4305 1861 AU55+ NGC. Rounded bun subtype.** The 1861 is the only readily collectible issue of the series from its decade. This example has a band of luster at both borders, and though marks are distributed, none merit individual mention. NGC ID# 2647, PCGS# 8633
- 4306 1867-S VG10 PCGS.** Among the many unheralded rarities within the Liberty eagle series, the 1867-S has a miserly mintage of 9,000 pieces and is unknown in Mint State. PCGS has certified just 33 examples in all grades. The present orange-gold ten is lightly abraded for the VG level and, despite its rarity, can likely be acquired for only a modest premium over bullion. NGC ID# 264M, PCGS# 8652

- 4307 1871-S VF30 PCGS.** The 1871-S has a lower PCGS population than its Carson City cousin, and also trades at a much lower price. The present yellow-gold representative has a small obverse rim ding at 1 o'clock but is otherwise ideal for the VF30 grade. NGC ID# 264Y, PCGS# 8662

**1873-S Liberty Eagle, AU53
Rare Low-Mintage Date**

- 4308 1873-S AU53 PCGS.** Only 12,000 Liberty eagles were struck at the San Francisco Mint in 1873 and the issue is quite rare in AU53 condition. This well-detailed specimen retains traces of mint luster on lightly abraded orange-gold surfaces. Most original design detail remains intact. Population: 8 in 53, 2 finer (2/13). NGC ID# 2656, PCGS# 8668

- 4309 1874 AU58 NGC.** Bookended by two major Philadelphia rarities, the 1873 and 1875, the 1874 is nonetheless merely scarce at the AU58 level. The present honey-gold Motto ten has a good strike, substantial luster, and distributed minor marks. NGC ID# 2657, PCGS# 8669

**Choice 1880 Liberty Eagle
None Finer at PCGS**

- 4310 1880 MS64 PCGS.** The 1880 Liberty eagle boasts a landmark mintage of 1.6 million pieces, but the issue is a condition rarity in MS64. This impressive Choice specimen displays sharply detailed design elements and vibrant mint luster, with well-preserved peach-gold surfaces. Population: 19 in 64, 0 finer (2/13). NGC ID# 265S, PCGS# 8687

- 4311 1888 MS62 NGC. CAC.** A lower mintage issue, the 1888 is usually encountered in AU condition. MS62 examples are very scarce, and none are known in MS64 or finer grades. This almond-gold example is well struck and only moderately abraded. Census: 50 in 62, 4 finer (2/13). NGC ID# 266K, PCGS# 8712

- 4312 1888 MS62 PCGS. CAC.** The 1888 Liberty eagle is seldom encountered in Mint State grades. This attractive MS62 example displays well-detailed design elements and lustrous surfaces, with a scattering of minor contact marks. Population: 37 in 62, 7 finer (1/13). NGC ID# 266K, PCGS# 8712

- 4313 1891-CC MS61 PCGS. CAC. Variety 3-C, FS-501.** The mintmark is clearly repunched, though undesignated as such on the PCGS insert. Sharply struck and lustrous with the expected number of distributed small abrasions. NGC ID# 266U, PCGS# 8720

**1891-CC Eagle, MS62
Ideal Mintmark Type Coin**

- 4314 1891-CC MS62 PCGS. CAC. Variety 1-A.** The 1891-CC is the most available eagle from the Carson City Mint, with a reported mintage of 103,732 pieces. This impressive MS62 specimen displays sharply detailed design elements and vibrant frosty mint luster, with lightly abraded surfaces and outstanding eye appeal. NGC ID# 266U, PCGS# 8720

**1892-S Liberty Ten, Select
Challenging Issue in High Grade**

- 4315 1892-S MS63 NGC. CAC.** Despite the mintage of 115,500 pieces, the 1892-S Liberty eagle is a challenge to locate in high grade. The date has not turned up in foreign holdings in large numbers, perhaps explaining its elusive nature. This attractive Select example is well-detailed and lustrous, with peach-gold surfaces that show only moderate signs of contact. Census: 20 in 63, 1 finer (2/13). NGC ID# 266Y, PCGS# 8724

- 4316 1897-O MS62 NGC. Variety 2.** An attractive and lightly abraded honey-gold New Orleans representative. From a low mintage of 42,500 pieces. The issue is merely very scarce in the present grade but is nearly unobtainable above the MS64 grade. Ex: *Milwaukee Sale (Heritage, 8/1986)*, lot 819. NGC ID# 267E, PCGS# 8738

1897-O Ten Dollar, Boldly Lustrous MS63

- 4317 1897-O MS63 PCGS. CAC. Variety 2.** This boldly lustrous Select 1897-O eagle shows a few scattered, tiny marks on beautiful orange-gold surfaces that are fairly well-struck, even if not fully so. The 1897-O was struck to the extent of 42,500 pieces in the sporadic O-mint Liberty Head issues that would conclude the series. A nice example for the grade. Population: 18 in 63, 12 finer (2/13). NGC ID# 267E, PCGS# 8738

4318 1898 MS64+ NGC. CAC. A yellow-gold near-Gem with vibrant cartwheel sheen and an exemplary strike. Only delicate field grazes and a trace of struck-in grease on Liberty's neck combine to deny a finer grade. NGC ID# 267G, PCGS# 8740

4319 1899 MS65 NGC. A magnificent Gem type coin whose lustrous green-gold fields and devices are beautifully preserved and sharply struck. Though the 1899 is regarded as a common date, it is at least six times scarcer in the present quality than the 1901-S. NGC ID# 267J, PCGS# 8742

**Select 1899-O Liberty Eagle
Underrated Low-Mintage Issue**

4320 1899-O MS63 PCGS. Variety 2. From a low mintage of 37,047 pieces, the 1899-O is the scarcest New Orleans eagle minted after 1883. No more than 250-350 examples survive in all grades, and MS63 specimens are very rare. This attractive Select example exhibits well-detailed design elements and vibrant mint luster, with lightly marked yellow and orange-gold surfaces. Population: 13 in 63 (1 in 63+), 4 finer (2/13). NGC ID# 267K, PCGS# 8743

Conditionally Rare MS63 1899-S Ten

4321 1899-S MS63 PCGS. CAC. While the 1899 is a common date, its San Francisco cousin is surprisingly elusive above the MS62 level. Here is an impressive Select example that has unbroken cartwheel sheen and rich honey-gold toning. The strike is precise and only unimportant grazes are present. Population: 53 in 63, 16 finer (2/13). NGC ID# 267L, PCGS# 8744

4322 1900 MS64+ PCGS. Well-defined on the interior devices and most of the obverse stars. Cartwheel luster rolls across apricot-gold surfaces with occasional variations in the color. PCGS has graded just 17 examples as MS65 or better (2/13). NGC ID# 267M, PCGS# 8745

**Gem 1901-S Liberty Ten
Ideal Type Coin**

4323 1901-S MS65 PCGS. CAC. The 1901-S Liberty eagle is one of the most available dates of the series in high grade. As a result, this issue is a favorite choice of type collectors. This delightful Gem is sharply detailed, with frosty mint luster and pleasing orange-gold surfaces that show few signs of contact. NGC ID# 267S, PCGS# 8749

4324 1905 MS64 PCGS. A scarce issue in the short 20th century Liberty head series. This Choice Mint State specimen exhibits brilliant yellow luster with frosty surfaces and a hint of green color. Highly appealing with a few small copper toning spots proving its originality. NGC ID# 2682, PCGS# 8757

4325 1906-D MS64 PCGS. This Choice first-year Denver Mint ten has sea-green toning about the peripheries and apricot-gold shades at the centers. The strike is precise and only unimportant marks are evident. NGC ID# 2685, PCGS# 8760

4326 1907 MS64 PCGS. A coruscating and crisply struck Liberty type coin from the last year of the long-lived Gobrecht design. Minimally abraded save for moderate marks on the chin and the field near the profile. NGC ID# 2688, PCGS# 8763

**Gem 1907 Liberty Eagle
Final-Year Type Coin**

4327 1907 MS65 NGC. The 1907 Liberty eagle is much more difficult to locate in high grade than the large mintage of 1.2 million pieces would suggest. This delightful Gem exhibits sharply detailed design elements and satiny mint luster, with pleasing peach-gold surfaces that show few signs of contact. Census: 88 in 65 (2 in 65+), 5 finer (2/13). NGC ID# 2688, PCGS# 8763

PROOF LIBERTY EAGLE

1861 Eagle, PR64 Cameo, Ex: Trompeter One of Perhaps 10 Survivors

4328 1861 PR64 Cameo PCGS. CAC. Ex: Trompeter. The bombardment of Fort Sumter in Charleston Harbor, South Carolina, that marked the beginning of the Civil War commenced on April 12, 1861, although the drumbeats of impending war had already been heard for months with the election of Abraham Lincoln as president in 1860 and the secession of seven Southern states by the time the war began (four more would secede after the Sumter engagement).

It is no accident that this rare proof eagle shares the same date, 1861. Despite a reported mintage of 69 pieces, the 1861 proof eagles are extremely rare today. David Akers wrote in his gold reference from 1980:

“In direct contrast to the comparatively high mintage which is greater than for any other Eagle prior to 1887, proofs of 1861 are extraordinarily rare, at least as rare as any of the proofs with mintages of only 20-25 pieces. Therefore either the proofs of 1861 suffered an unusually high attrition rate or (more likely) most of the proofs were not sold and later were melted.”

However, Akers did not have access in 1980 to the mintage for the 1859 proof ten, which is slightly larger at an estimated 80 pieces.

As we wrote when cataloging the PR65 Cameo NGC example of the 1861 eagle that appeared in our Orlando FUN Signature (Heritage, 1/2013, lot 5907) but failed to meet its reserve:

“When Jeff Garrett and Ron Guth wrote the first edition of their popular *Encyclopedia of U.S. Gold Coins 1795-1933*, they stated that the 1859, 1860, and 1861 proof eagles all appeared to have ‘identical’ survival rates, i.e., far lower than their recorded mintages of 80, 50, and 69 pieces, respectively. It is likely that only around 10 examples survive of each issue, including examples in the Smithsonian and the ANS collections.

“Perhaps that figure, 10, marks the number of active proof gold collectors in America around 1860. The rest of the mintage may have been melted as unsold, common Mint practice at the time.”

America was about far-weightier matters in 1861 than collecting examples of what were, at the time, modern proof gold issues. And those numismatists who could focus on their sets were more apt to be pursuing the “early coppers,” Colonial coins, Washingtonia, or ancient coins, all of which were fashionable at the time.

This PR64 Cameo piece is one of a number of coins certified at the PR64 level, but this example comes from the remarkable proof gold collection of Ed Trompeter, among the finest ever assembled. The fields on each side are jet-black and highly reflective, contrasting nicely with the medium yellow-gold, well-frosted devices. A moderate orange-peel effect occurs on each side. Some light hairlines in the fields are not at all distracting but account for the grade, along with a single small contact mark on Liberty’s chin. The overall eye appeal is quite high.

PCGS has seen three grading events in PR64, but this is the only Cameo or Deep Cameo example of the 1861 eagle in any grade at PCGS (2/13). NGC has seen one PR64, four PR64 Cameo, and one PR65 Cameo, for a total of 10 submissions in all. We suspect duplications in these figures. NGC ID# 28EX, PCGS# 88797

INDIAN EAGLES

1907 No Motto Ten Dollar Indian, MS63 Bright Mint Luster, Well-Defined

- 4329 1907 No Periods MS63 NGC.** Grade for grade, the 1907 No Motto ten represents one of the best buys among type coins. After the experimental strikings, the regular production coins were well-suited to high-speed coining requirements. This is a sharply defined example that displays the usual bright mint luster and relatively obvious few marks for the grade. NGC ID# 28GF, PCGS# 8852

Choice 1907 No Motto Eagle

- 4330 1907 No Periods MS64 PCGS.** A lovely apricot-gold and olive-green near-Gem. Cartwheel luster dominates both sides. A lens reveals only minor abrasions. The No Periods variety is technically a misnomer, since four periods are present within the reverse legends. The absence of periods within E PLURIBUS UNUM distinguishes the variety from the rare Wire Rim and Rounded Rim patterns. NGC ID# 28GF, PCGS# 8852

MS64+ 1907 No Motto Ten

- 4331 1907 No Periods MS64+ PCGS. CAC.** The first-year 1907 Indian ten is relatively plentiful in AU58 through MS62 grades, but high end near-Gems are very scarce. The present green-gold representative displays coruscating luster and a good strike. Marks are uncommonly elusive, even when viewed under a glass. Though it is possible to purchase a Gem, and pay a commensurate price, this example will satisfy nearly any collector of the series. NGC ID# 28GF, PCGS# 8852
- 4332 1908-D No Motto AU58 PCGS. CAC.** Wheat-gold and richer yellow colors enrich this luminous and faintly frosted No Motto ten. Softly struck even by the standards of the issue, though actual wear is minimal. NGC ID# 28GH, PCGS# 8854

1908-D No Motto Ten, MS62 Golden-Orange Surfaces

- 4333 1908-D No Motto MS62 PCGS.** By 1908, the novelty of the new Saint-Gaudens design had worn off, and few examples of the 1908-D No Motto were put back for posterity. This MS62 PCGS example displays better-than-average luster over golden-orange surfaces. Scattered marks appear on the cheek and jaw of Liberty, in concert with the grade. NGC ID# 28GH, PCGS# 8854

1908-D Indian Eagle, MS64 Elusive No Motto Variant

- 4334 1908-D No Motto MS64 PCGS.** The 1908-D No Motto Indian eagle is an underrated issue, from a small mintage of 210,000 pieces. The 1908-D also represents the only issue of the short-lived No Motto design from the Denver Mint, an important consideration for mintmark type collectors. The 1908-D is scarce in lower Mint State grades and very rare above the MS64 grade level.
- This attractive Choice example is well-detailed, with just a touch of the typical softness on the central obverse. The vivid orange-gold surfaces show a few hints of rose, with unusually vibrant mint luster. Eye appeal is terrific. Population: 45 in 64 (4 in 64+), 8 finer (2/13). NGC ID# 28GH, PCGS# 8854

1908 Motto Ten Dollar, Exemplary MS66

- 4335 1908 Motto MS66 NGC.** The 1908 Motto eagle was among the first of this new type, produced over the objections of President Theodore Roosevelt. The 1908 Motto ten is sometimes found with a full strike and excellent preservation as on the present piece, leading both to their popularity and availability in high grades, such as this MS66 NGC example. Superlative eye appeal flows from the bright peach-orange surfaces on each side. Abrasions are minuscule throughout, as are a couple of tiny toning flecks, mentioned but completely undistracting. Census: 36 in 66, 7 finer (2/13). NGC ID# 28GJ, PCGS# 8859

1908-S Indian Eagle, AU58 Low-Mintage Early Series Issue

- 4336 1908-S AU58 PCGS. CAC.** The 1908-S Indian eagle is always in demand because of its low mintage of 59,850 pieces. Mint State examples are seldom encountered, making attractive near-Mint specimens, like the present coin, doubly appealing. This coin shows just a trace of wear on the high points of the sharply impressed design elements, with lustrous greenish-gold surfaces that are free of large or distracting abrasions. NGC ID# 28GL, PCGS# 8861

Select 1909-D Indian Ten Condition Rarity in High Grade

- 4337 1909-D MS63 PCGS.** The 1909-D Indian eagle is an underrated issue, and a prime condition rarity in high grade. Even at the MS63 level, the issue is very scarce. This attractive Select example is well-detailed and lustrous, with pleasing orange-gold surfaces that show only scattered minor contact marks. NGC ID# 28GN, PCGS# 8863

Select Mint State 1909-S Ten

- 4338 1909-S MS63 NGC.** A refreshingly unabraded representative with attractive lime-green and apricot toning. The mintmark is lightly repunched. All San Francisco Mint Indian eagles are difficult to locate in better Uncirculated grades, perhaps because they circulated to a limited extent on the West coast. NGC ID# 28GP, PCGS# 8864

- 4339 1910 MS64 NGC.** Swirling luster has hints of frost on the high points. A few shallow marks appear on each side, most visibly at the leading edge of the eagle's foreground leg, but the orange-tinged yellow-gold surfaces retain considerable eye appeal. NGC ID# 28GR, PCGS# 8865

1910-D Indian Ten, MS64+ Excellent Mintmark Type Coin

- 4340 1910-D MS64+ NGC. CAC.** From a large mintage of 2.3 million pieces, the 1910-D Indian eagle is easy to locate in most Mint State grades, making it a prime choice for mintmark type collectors. This high-end Choice specimen is well-detailed and brightly lustrous, with pleasing green and rose-gold surfaces. NGC ID# 28GS, PCGS# 8866

1910-D Eagle, MS65
Conditionally Elusive

- 4341 1910-D MS65 PCGS.** A gorgeous Gem, this piece exhibits vibrant light yellow luster with frosty surfaces that display delicate lemon toning splashes. A plentiful, high-mintage date, the 1910-D is usually seen at the lowest Mint State grade levels and rarely finer than this example. PCGS has certified just 36 finer pieces (2/13). NGC ID# 28GS, PCGS# 8866

1910-S Indian Ten, MS62
Scarce Any Finer

- 4342 1910-S MS62 NGC.** The 1910-S Indian eagle was produced in large numbers, but the issue is surprisingly difficult to locate in high grade. This impressive MS62 example is well-detailed, with lightly marked copper and rose-gold surfaces that show a few spots of amber. Slightly subdued mint luster is evident on both sides. NGC ID# 268D, PCGS# 8867

1910-S Indian Eagle, MS62
Challenging Issue in High Grade

- 4343 1910-S MS62 PCGS.** The 1910-S Indian eagle claims a mintage of 811,000 pieces, but the issue is surprisingly scarce in Mint State grades. This attractive MS62 specimen displays well-detailed design elements and bright mint luster, with pleasing copper and rose-gold surfaces. A few minor contact marks on the cheek explain the grade. NGC ID# 268D, PCGS# 8867

Conditionally Scarce 1910-S Ten, MS62
Repunched Mintmark

- 4344 1910-S MS62 NGC. Breen-7114.** The mintmark is clearly repunched. Described as "extremely rare" in Breen's 1988 *Encyclopedia*, though a number undoubtedly lurk unidentified within collections. The present khaki-gold example has vibrant luster and minimal marks. The 1910-S has a relatively high mintage but is scarce in Mint State due to the pre-World War Western tradition of using "hard money" in place of currency. NGC ID# 268D, PCGS# 8867

Gem 1911 Indian Eagle
Sharply Detailed and Lustrous

- 4345 1911 MS65 NGC.** The pleasing orange-gold surfaces of this delightful Gem show a few highlights of rose color, with no mentionable distractions. The design elements exhibit razor-sharp definition throughout and vibrant mint luster is evident on both sides. The 1911 Indian eagle is available in lower grades, but the issue is very scarce above the MS65 level. NGC ID# 28GT, PCGS# 8868

Still-Lustrous AU55+ 1911-D Ten Dollar

- 4346 1911-D AU55+ NGC.** This lightly circulated yet still-attractive example comes from an issue of only 30,100 pieces. Liberty's portrait shows a few light abrasions, while the reverse has three clear reed marks in the field just above the eagle's tailfeathers. Peach-accented yellow-gold luster remains generous. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, AU58
Low-Mintage Issue**

- 4347 1911-D AU58 NGC.** The 1911-D is a low-mintage issue in the ten dollar Indian series, but few collectors seem to recognize it as such since so few collectors actually assemble date and mintmark collections of this series. This piece shows much remaining mint luster with just a touch of high-point friction. The only mentionable mark is a long, diagonal abrasion at the back of the face of the Indian. NGC ID# 28GU, PCGS# 8869

**1911-D Eagle, AU58
Well-Struck Khaki-Gold Example**

- 4348 1911-D AU58 NGC.** This near-Mint State 1911-D eagle would make a nice accompaniment to a 1911-D quarter and 1911-D half eagle in the same grades, a "key date type set" of the Indian Head issues. The mintage of the 1911-D eagle was the lowest of the three, at 30,100 pieces. The khaki-gold surfaces are well-struck and free of all but a few minor abrasions. NGC ID# 28GU, PCGS# 8869

**1911-D Indian Eagle, AU58
Prime Condition Rarity in High Grade**

- 4349 1911-D AU58 PCGS. CAC.** Although not as rare as some dates in the series in absolute terms, the 1911-D is the rarest Indian eagle in high grade, from a tiny mintage of 30,100 pieces. This lightly circulated specimen displays just a trace of wear on the devices and retains much of its original mint luster. The pleasing orange-gold surfaces show no large or distracting surface marks. NGC ID# 28GU, PCGS# 8869

-
- 4350 1912-S AU58 NGC.** A well-detailed near-Mint example, with just a touch of wear on the high points of the devices, this coin retains much of its original mint luster and the orange and rose-gold surfaces show only minor signs of contact. The 1912-S is a challenging date in high grade. NGC ID# 28GX, PCGS# 8872

**1913 Indian Ten, MS64
High-Quality Type Issue**

- 4351 1913 MS64 PCGS. CAC.** The 1913 Indian eagle is known as a high-quality issue. This attractive Choice specimen exhibits a typically sharp strike, and the pleasing rose-gold surfaces show only a few insignificant contact marks. Vibrant frosty mint luster adds to the considerable visual appeal. NGC ID# 28GY, PCGS# 8873

**Choice 1913 Indian Eagle
Excellent Type Coin**

- 4352 1913 MS64 PCGS. CAC.** The 1913 Indian eagle is an available date in high grade, and quite popular with type collectors. This attractive Choice specimen exhibits sharply detailed design elements and frosty mint luster, with smooth yellow and rose-gold surfaces. Only minor signs of contact are evident. NGC ID# 28GY, PCGS# 8873

**1914-S Eagle, Appealing MS62
Bright Yellow-Gold Surfaces**

- 4353 1914-S MS62 NGC.** A few small, scattered marks on the cheek and chin of Liberty and among the headdress feathers determine the grade but fail to defeat the good eye appeal. Generous luster radiates from bright yellow-gold surfaces that show a typical strike for the issue. The 1914-S is scarce in Mint State. NGC ID# 28H4, PCGS# 8877
-

- 4354 1915 MS63 NGC.** An impressive Select Mint State Indian ten, this piece exhibits brilliant lemon-yellow surfaces with frosty luster and exceptional eye appeal. NGC ID# 28H5, PCGS# 8878
- 4355 1915 MS63+ NGC.** This high-end Select specimen displays well-detailed design elements, with frosty mint luster and greenish-gold surfaces that show strong highlights of rose color. Only minor signs of contact are evident. The 1915 is a popular type issue. NGC ID# 28H5, PCGS# 8878

**1915 Indian Ten, MS64+
Scarce in Higher Grades**

- 4356 1915 MS64+ NGC.** The 1915 Indian eagle is a plentiful date in the series, but it becomes very scarce in grades above the MS64 level. This high-end Choice example exhibits sharply detailed design elements and vibrant mint luster, with well-preserved green and rose-gold surfaces. Eye appeal is terrific. NGC ID# 28H5, PCGS# 8878

Eye-Appealing 1915-S Eagle, AU58

- 4357 1915-S AU58 PCGS.** Glowing golden-yellow luster radiates from each side of this near-Mint State 1915-S eagle, from a mintage of only 59,000 pieces, third-lowest in the entire series (the 1911-D and 1911-S are lower). The 1915-S is elusive even in the higher circulated grades, as here. The few scattered marks on this piece are of little importance and do not detract from the strong eye appeal. NGC ID# 28H6, PCGS# 8879
- 4358 1916-S MS61+ NGC.** Like other San Francisco Indian tens, the 1916-S is scarce in Uncirculated grades. The present khaki-gold representative has cartwheel luster and no obtrusive abrasions. NGC ID# 28H7, PCGS# 8880
- 4359 1932 MS64 NGC.** The well-preserved surfaces of this pleasing Choice example show attractive highlights of green and rose-gold color, with sharply detailed design elements and bright frosty mint luster. NGC ID# 28HB, PCGS# 8884
- 4360 1932 MS64 NGC.** The 1932 Indian eagle is an available date and a popular type coin. This delightful Choice example is sharply detailed and brightly lustrous, with no mentionable distractions and outstanding eye appeal. NGC ID# 28HB, PCGS# 8884
- 4361 1932 MS64 NGC.** This well-detailed 1932 Indian eagle shows just a touch of softness on the eagle's leg, with vibrant frosty mint luster and ample eye appeal. The pleasing green and rose-gold surfaces are free of mentionable distractions. NGC ID# 28HB, PCGS# 8884

- 4362 1932 MS64 NGC.** This attractive Indian eagle displays sharply detailed design elements and vibrant mint luster, with pleasing orange-gold surfaces that show highlights of green and rose, and only minor signs of contact. NGC ID# 28HB, PCGS# 8884
- 4363 1932 MS64+ PCGS.** From pale silver-blue to rich orange, this penultimate-issue Saint-Gaudens eagle has bold colors and luster to match. If not for a few small ticks in the portrait area, this coin would lock up a full Gem grade. NGC ID# 28HB, PCGS# 8884
- 4364 1932 MS64 PCGS. CAC.** Apple-green and pumpkin-gold alternate across this lustrous and precisely struck Indian type coin. Minor field grazes and a small tick on the cheekbone preclude a finer third party assessment. NGC ID# 28HB, PCGS# 8884
- 4365 1932 MS65 NGC.** A lemon-gold Gem whose booming luster and precise strike combine with clean surfaces for pleasing eye appeal. One small mark noted on the reverse rim at 4:30. The only readily collected gold issue of any denomination from the 1930s. Certified in a prior generation holder. NGC ID# 28HB, PCGS# 8884

**1932 Indian Eagle, MS65+
Late-Series Type Coin**

- 4366 1932 MS65+ PCGS. CAC.** Even at the Gem level, the 1932 Indian eagle is easy to locate. Accordingly, this issue is quite popular with type and date collectors alike. This high-end Gem displays well-detailed design elements and vibrant mint luster, with bright greenish-gold surfaces that show a few accents of rose. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

**1850 Liberty Double Eagle, XF45
Popular First-Year Type Coin**

- 4367 1850 XF45 PCGS. CAC.** The 1850 Liberty double eagle is always popular as the first year of the denomination. This attractive Choice XF specimen shows light wear on the design elements and only minor abrasions on the light orange-gold surfaces. Traces of mint luster remain in sheltered areas. NGC ID# 268F, PCGS# 8902

**1850 Twenty Dollar, AU53
Good Remaining Mint Luster**

- 4368 1850 AU53 PCGS.** More than 1.1 million 1850 twenties were struck, and a relatively substantial number of survivors were set aside, some in AU and a few even in Uncirculated. This is a weakly struck example that displays significant mint luster in the protected areas and a slightly reflective finish in the obverse fields. NGC ID# 268F, PCGS# 8902

**Choice AU 1850 Liberty Twenty
Partially Prooflike Surfaces**

- 4369 1850 AU55 PCGS.** A Choice AU representative from the first year of the denomination, this lightly circulated specimen displays just a touch of wear on the sharply impressed design elements. The vivid greenish-gold surfaces are partially prooflike and show a scattering of minor abrasions. Eye appeal is quite strong for the grade. NGC ID# 268F, PCGS# 8902

- 4370 1851 AU50 PCGS.** This radiant honey-gold early Type One twenty has a few small tan spots but is much less abraded than is usual for the grade and denomination. For the 1851, most certified examples are XF or AU with no Gems known. NGC ID# 268H, PCGS# 8904

**Borderline Uncirculated 1852 Double Eagle
Elusive Any Finer**

- 4371 1852 AU58 NGC. CAC.** A pleasing near-Mint example of this early double eagle, with lightly abraded yellow-gold surfaces that show highlights of green. This coin displays well-detailed design elements and retains much of its original mint luster, with traces of prooflike reflectivity. The 1852 is scarce-to-rare in any higher grade. NGC ID# 268K, PCGS# 8906

**Near-Mint 1852 Double Eagle
Prooflike Reflectivity in Some Areas**

- 4372 1852 AU58 PCGS. CAC.** The pleasing orange and greenish-gold surfaces of this near-Mint early double eagle show areas of prooflike reflectivity and only minor abrasions. The design elements are well-detailed, with just a trace of wear on the high points. Population: 86 in 58, 72 finer (2/13). NGC ID# 268K, PCGS# 8906

**1852-O Double Eagle, AU53
Vivid Color**

- 4373 1852-O AU53 PCGS.** From a mintage of 190,000 pieces, the 1852-O Liberty double eagle is a scarce issue in AU53 condition. This attractive specimen displays partially prooflike greenish-gold surfaces, with a scattering of minor abrasions that defines the grade. The well-detailed design elements show a few traces of wear on the high points. Population: 50 in 53, 82 finer (2/13). NGC ID# 268L, PCGS# 8907

**1853 Liberty Double Eagle, AU55
Lightly Abraded for the Grade**

- 4374 1853 AU55 PCGS Secure.** The mintage for the 1853 double eagle dropped considerably from the prior two years, but still topped 1 million pieces. The issue is slightly scarce in AU55, despite some recent shipwreck finds. This coin displays well-detailed design elements and lustrous orange-gold surfaces that show only scattered minor abrasions. Population: 80 in 55, 96 finer (2/13). NGC ID# 268M, PCGS# 8908

1854 Large Date Double Eagle, AU58
Widely Collected *Guide Book* Variety

- 4375 1854 Large Date AU58 PCGS. CAC.** The Large Date variant of 1854 is scarcer than the Small Date, but besides the obvious difference in date sizes, another telltale is the small extra blob of metal on Liberty's lower neck, just left of the lowest and leftmost curl of hair. The inclusion of this variety in the *Guide Book* makes it far more popular among that segment of collectors, and the price differential between the Small Date and Large Date types escalates dramatically as the Mint State levels are approached. This near-Mint State example shows generous luster remaining on the apricot-gold surfaces. A scattering of small marks appears, but there are no singular abrasions on either side. The sharp strike contributes further to the excellent eye appeal. This piece is one of only three (with one finer) at this grade level bearing the CAC green label. Population: 13 in 58, 1 finer (1/13). PCGS# 98911

1855-S Liberty Twenty, AU53
Nice Color

- 4376 1855-S AU53 PCGS Secure.** Medium S. The 1855-S was well-represented in recent shipwreck finds, but high-grade specimens are still somewhat scarce in today's market. This attractive AU53 example displays well-detailed design elements and bright mint luster, with lightly abraded orange and greenish-gold surfaces. NGC ID# 268X, PCGS# 8916

- 4377 1856-S AU50 PCGS.** Luster remains strong and even flashy on this lightly worn S-mint double eagle. Moderately abraded yellow-orange fields show a few lines of reed marks, most notably behind Liberty's head. Partial patina. NGC ID# 2692, PCGS# 8919

Choice AU 1856-S Double Eagle
Most Popular Type One Issue

- 4378 1856-S AU55 PCGS Secure.** Before the recovery of the S.S. *Central America*, the 1856-S double eagle was a rare issue in high grade. More than 1,000 examples surfaced in that famous find, making the 1856-S the most popular Type One double eagle with type collectors. This Choice AU specimen is well-detailed and lustrous, with peach-gold surfaces that show remarkably few abrasions. NGC ID# 2692, PCGS# 8919

Choice 'Spiked Shield' 1857-S Twenty
Ex: S.S. *Central America*

- 4379 1857-S MS64 PCGS. CAC. Variety 20A.** Ex: S.S. *Central America*. SSCA 3472. Crippled by a hurricane, the S.S. *Central America* slipped into the Atlantic Ocean on September 12, 1857, taking with it a hoard of recently coined 1857-S double eagles. Those were recovered circa-1988 and have marveled collectors since their distribution a dozen years later. This is an orange-gold near-Gem that boasts a precise strike and a nearly pristine reverse. The cheek displays a few faint grazes. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

**1859-S Double Eagle, AU53
Lightly Abraded and Lustrous**

- 4380 1859-S AU53 NGC.** The 1859-S Liberty double eagle is much more difficult to locate in high grade than its mintage of 636,445 pieces would suggest. This attractive AU53 specimen offers well-detailed design elements and lightly abraded greenish-gold surfaces with bright mint luster. Eye appeal is strong for the grade. NGC ID# 269C, PCGS# 8928

**AU55+ 1859-S Double Eagle
Doubled Die Obverse**

- 4381 1859-S AU55+ NGC. CAC. FS-101.** The letters in LIBERTY are die doubled, with the spread increasing from left to right. Portions of the portrait also exhibit doubling. The variety is undesignated on the holder. The cheek has light wear but luster is plentiful and no abrasions are of singular significance. The 1859-S can be located in AU but none have been certified by NGC any finer than MS62. NGC ID# 269C, PCGS# 8928

Near-Mint 1860 Double Eagle

- 4382 1860 AU58 NGC. CAC.** A lovely near-Mint example from the year of the Pony Express and Lincoln's first Presidential election. The strike is sharp throughout, the cartwheel luster is nearly complete, and the surfaces are smooth aside from a small tick on Liberty's cheekbone. The recovery of the S.S. *Republic* contributed only a modest number of examples, and the issue remains highly elusive in Uncirculated grades. NGC ID# 269D, PCGS# 8929

**Select Mint State 1861 Twenty
Gorgeous Reverse**

- 4383 1861 MS63 PCGS.** The 1861 double eagle enjoyed a generous mintage of almost 3 million pieces and is one of the most accessible Type One twenties in circulated grades. The date is more challenging in Mint State, however, particularly as a Select or better piece where it is a borderline condition rarity. This MS63 example has strong and generous yellow-gold luster with a hint of apricot. Though a single sizable abrasion is squarely in the center of Liberty's cheek, the reverse is remarkably well-preserved and would merit a finer grade on its own. Population: 31 in 63 (2 in 63+), 15 finer (2/13). NGC ID# 269G, PCGS# 8932

- 4384 1861-S XF45 PCGS.** This Choice XF double eagle from San Francisco was struck either shortly before or during the Civil War and it likely circulated in the West, well away from the fighting. Still-lustrous yellow surfaces have coppery elements along the margins and next to the devices. NGC ID# 269K, PCGS# 8935

1862-S Liberty Twenty, AU50
Lightly Circulated Type One Example

4385 1862-S AU50 PCGS. The 1862-S Liberty double eagle was produced in large numbers but most coins show the results of heavy circulation today. The date would be rare in high grade, but a number of specimens grading AU or better were recovered from recent shipwreck finds. This lightly circulated example retains most of its original design detail and a significant amount of mint luster. The light greenish-gold surfaces are lightly abraded. NGC ID# 269N, PCGS# 8938

4386 1865 AU53 NGC. An attractive, lightly circulated, Liberty double eagle from the final year of the Civil War, this coin offers well-detailed design elements and frosty mint luster, over minimally abraded green and orange-gold surfaces. NGC ID# 269U, PCGS# 8943

S.S. Republic MS62 1865 Twenty
Misplaced Date Variety

4387 1865 — Date in Rim — MS62 NGC. Ex: S.S. Republic. The S.S. Republic encountered a devastating hurricane and sank in the Atlantic Ocean on October 25, 1865. The wreck was recovered in recent years, and many double eagles bearing S.S. Republic pedigrees entered the numismatic market in 2006. The 1865, formerly very rare in Uncirculated grades, is now collectible in Mint State, but is subject to greater demand than ever before. The present lustrous example is nearly pristine aside from a single narrow mark on Liberty's cheek. The tops of two date digits are obvious in the dentils beneath the 65 in the date. NGC ID# 269U, PCGS# 8943

**1865 Double Eagle, MS62+
Likely an S.S. Republic Recovery Coin**

- 4388 1865 MS62+ NGC.** Although not specifically provenanced to the *S.S. Republic*, we would be surprised if this piece did not ultimately have that shipwreck as its source, as more than 300 examples of the 1865 twenty were recovered from it in 2003 off the coast of Georgia. This piece shows ample luster over orange-gold surfaces that are relatively free of contact for the grade, although a couple of dark flecks appear on the upper coronet area. Like many examples of the issue, the 1 in the date shows minor repunching. This sharply struck coin offers excellent eye appeal for the grade. NGC ID# 269U, PCGS# 8943

**1865-S Double Eagle, Stunning MS64
Small S, From the Brother Jonathan**

- 4389 1865-S MS64 PCGS. Breen-7221.** Small S. *Brother Jonathan* 547. The year 1865 was unfortunate in that the United States saw two disastrous shipwrecks. The *S.S. Republic* sank on October 25, 1865, in a hurricane off the Georgia coast; part of its treasure was recovered in 2003, including several hundred examples each of the 1865 and 1865-S double eagles, mostly Mint State pieces. The *S.S. Brother Jonathan*, plying the Pacific Ocean routes between San Francisco and Portland, Oregon, crashed into an uncharted rock near Crescent City, California, and sank on July 30, 1865. When recovered in the 1990s, the *Brother Jonathan* wreck included about 250 examples of the 1865-S twenty, again largely Uncirculated coins (expectedly so). This piece is specifically provenanced to the *Brother Jonathan*, as noted above. Deep, even reddish-gold surfaces show engaging, bountiful luster, a stunning coin. The blue-label PCGS holder with seven-digit certification number and *Brother Jonathan* inscription date this slab to the late 1990s-early 2000s era. NGC ID# 269V, PCGS# 8944
- 4390 1867-S XF40 PCGS.** Large S. A moderately abraded orange-gold twenty with one small reverse rim nick at 4 o'clock. Struck too late to participate in any of the various shipwreck hoards, the 1867-S is a rarity in Mint State, though XF examples are collectible. Encased in a green label holder. NGC ID# 26A2, PCGS# 8952
- 4391 1867-S AU53 PCGS.** Orange-gold luster remains prominent on this Type Two twenty from San Francisco. A small copper spot appears at the tip of the eagle's right (facing) wing. NGC ID# 26A2, PCGS# 8952

**1867-S Twenty, AU58
Finer Than Usually Seen**

- 4392 1867-S AU58 PCGS.** This near-Mint State 1867-S twenty is considerably better than the average survivor, which tends to grade only AU or so. This piece boasts generous remaining luster and a sharp strike over medium yellow-gold surfaces. A few scattered marks fail to defeat the eye appeal. The only singular contact is a linear scrape on the lower reverse, to the right of the mintmark. Population: 43 in 58, 15 finer (2/13). NGC ID# 26A2, PCGS# 8952

**Near-Mint 1869 Liberty Twenty
Elusive Issue in High Grade**

- 4393 1869 AU58 PCGS.** From a modest mintage of 175,130 pieces, the 1869 Liberty double eagle is rarely encountered in high grade. This lightly circulated specimen displays well-detailed design elements, with just a hint of wear on the high points. The lustrous green and orange-gold surfaces show a scattering of minor contact marks, consistent with the grade. Population: 18 in 58, 29 finer (2/13). NGC ID# 26A5, PCGS# 8955

**1870-S Double Eagle, AU58
Type Two Example With Prooflike Surfaces**

- 4394 1870-S AU58 NGC.** Despite a substantial mintage of 982,000 pieces, the 1870-S double eagle is rare in Mint State condition. This well-detailed near-Mint example shows a touch of softness on the obverse stars and the pleasing surfaces display prooflike reflectivity in sheltered areas. NGC has graded 51 numerically finer coins (2/13). NGC ID# 26A9, PCGS# 8959

- 4395 1871-S AU55 NGC.** Softly struck on the hair below the coronet, as often seen, but with generous straw-gold luster despite light wear. Modestly abraded with a coppery area at the right obverse rim. NGC ID# 26AC, PCGS# 8962

**Closed 3 1873 Double Eagle, Mint State
Scarce at This Level**

- 4396 1873 Closed 3 MS60 PCGS.** Myriad small- to medium-sized marks occur throughout both sides, accounting for the grade. The luster is full with attractive orange-gold color, and the strike is well-defined for a Type Two. The Closed 3 variety is far more elusive than the Open 3, due in part to the difficulty of identifying the two varieties properly. Scarce at this grade level. Population: 15 in 60, 9 finer (2/13). NGC ID# 26AG, PCGS# 8966

**1873 Liberty Double Eagle, MS61
Underrated Closed 3 Variant**

- 4397 1873 Closed 3 MS61 NGC.** The 1873 Liberty double eagle with a Closed 3 in the date is much rarer than its Open 3 counterpart, and the variety has been largely overlooked and underrated, outside of series specialists. The light yellow and rose-gold surfaces of this attractive Mint State example show frosty mint luster and an average number of minor contact marks for the grade. Census: 17 in 61, 8 finer (2/13). NGC ID# 26AG, PCGS# 8966

- 4398 1873 Open 3 AU55 PCGS.** Type Two double eagles are conditionally scarce since there were no shipwreck hoards or sizeable foreign bank holdings for the period. This lightly circulated caramel-gold example has a smooth reverse and moderate marks on the cheek. NGC ID# 26AH, PCGS# 8967

- 4399 1873 Open 3 AU58 NGC.** Cartwheel sheen is evident across both sides though the fields and portrait possess the number of marks associated with the grade and denomination. Light yellow-gold overall with hints of lime-green in design recesses. NGC ID# 26AH, PCGS# 8967

- 4400 1873 Open 3 AU58 NGC.** The Philadelphia double eagle mintage of more than 1.7 million pieces was the largest since 1852. Oddly enough, however, the Philadelphia eagle mintage was just 800 pieces, the lowest mintage (at that time) since ten dollar production resumed in 1838. The present caramel-gold example is well struck and displays expected moderate marks. NGC ID# 26AH, PCGS# 8967

**1873 Liberty Double Eagle, MS62
Popular Open 3 Variety**

- 4401 1873 Open 3 MS62 PCGS.** The 1873 Liberty double eagle with an Open 3 in the date is probably the most available Type Two twenty, and a favorite choice of type collectors. This impressive MS62 example is well-detailed and lustrous, with light orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26AH, PCGS# 8967

**Mint State 1874 Double Eagle
Attractive Type Two Example**

- 4402 1874 MS61 PCGS. CAC.** A well-detailed Mint State example of this popular Type Two double eagle, with vivid orange-gold surfaces that retain much of their original mint luster. The fields show the expected number of minor imperfections for the grade. PCGS has graded 34 numerically finer specimens (2/13). NGC ID# 26AN, PCGS# 8970

**1874-CC Double Eagle, XF40
Reflective in Protected Areas**

- 4403 1874-CC XF40 PCGS. Variety 1-A.** The 1874-CC double eagle boasts a substantial mintage of 115,085 pieces, making it one of the more available Carson City issues and a popular choice of mintmark type collectors. This lemon-yellow example is lightly abraded and retains most of its original design detail. The surfaces display prooflike reflectivity in sheltered areas. Housed in a green label holder. NGC ID# 26AP, PCGS# 8971

**1874-S Liberty Double Eagle, MS61
Partially Prooflike Type Two Twenty**

- 4404 1874-S MS61 PCGS. CAC. Block S.** Like most Type Two double eagles, the 1874-S is very scarce in MS62 condition. This impressive MS61 example is a good balance of quality and value, with well-detailed design elements and partially prooflike greenish-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26AR, PCGS# 8972

- 4405 1875 MS62+ NGC.** Mint State Type Two double eagles are elusive and especially prized by type collectors. This well-detailed MS62+ example displays vibrant mint luster and a scattering of minor contact marks that explains the grade. NGC ID# 26AS, PCGS# 8973

- 4406 1875 MS62+ NGC.** The 1875 Type Two double eagle is the only readily collectible gold issue of the year from the Philadelphia Mint, as the other denominations had extremely limited mintages. This high-end MS62 example displays well-detailed design elements and frosty mint luster, with a scattering of minor contact marks that explain the grade. NGC has graded 32 numerically finer specimens (2/13). NGC ID# 26AS, PCGS# 8973

Near-Mint 1876-CC Double Eagle

- 4407 1876-CC AU58 PCGS. CAC. Variety 4-A.** A lustrous butter-gold Borderline Uncirculated Carson City type coin that exhibits greater eye appeal than many examples certified as Mint State. A trace of friction on the eyebrow and shoulder curl denies a finer grade, but alloy spots are absent and no marks are remotely consequential. NGC ID# 26AW, PCGS# 8977

- 4408 1876-S MS61 PCGS.** Strong straw-gold luster with aspects of wheat. Both sides have minor to moderate abrasions in abundance, but the overall eye appeal is decent for an MS61 example. Small coppery areas are noted at the rims. NGC ID# 26AX, PCGS# 8978

1876-S Double Eagle, MS62
Nice Color and Luster

4409 1876-S MS62 PCGS. The 1876-S Liberty double eagle represents the last year of the Type Two design, an important consideration for type purposes. This well-detailed MS62 specimen offers frosty mint luster and pleasing orange-gold surfaces that show only minor signs of contact. Eye appeal is quite strong for the grade. NGC ID# 26AX, PCGS# 8978

4410 1877 MS61 PCGS. Yellow-gold cartwheel luster is excellent on this first-year Type Three double eagle. The obverse has several scuffs on the portrait but the reverse is relatively clean. NGC ID# 26AY, PCGS# 8982

Uncirculated 1879-S Double Eagle

4411 1879-S MS61 PCGS. This lustrous honey-gold Uncirculated twenty has its share of small abrasions but none merit singular description except for a thin line near the eagle's left (facing) wing. Two unimportant alloy spots are at the mintmark and the C in AMERICA. Surprisingly rare any finer. NGC ID# 26B9, PCGS# 8991

Mint State 1879-S Double Eagle
Partially Prooflike Surfaces

4412 1879-S MS61 PCGS Secure. The 1879-S Liberty double eagle claims a large mintage of 1.2 million pieces, but high-grade examples are surprisingly difficult to locate. This attractive Mint State specimen is well-detailed, with partially prooflike green and orange-gold surfaces that show the expected number of minor contact marks. Eye appeal is quite strong for the grade. NGC ID# 26B9, PCGS# 8991

1880-S Twenty, Apricot-Gold MS63
Sharp and Relatively Unmarked

4413 1880-S MS63 PCGS. The 1880-S double eagle is one of the many Type Three S-mint issues in the Liberty Head series that show a sharp line of demarcation between the range of pieces available in circulated grades, with a smaller number obtainable in the lower Mint State grades, MS60 to MS62 — yet virtually nonexistent in MS63 and finer grades. In the case of the 1880-S, some 836,000 pieces were struck, yet PCGS and NGC combined have seen only 11 submissions in MS63. The Select grade is achieved here due to the relative lack of heavy abrasions that these large, soft gold coins usually exhibit. Generous luster proceeds from well-struck apricot-gold surfaces. Population: 5 in 63, 1 finer (2/13). NGC ID# 26BB, PCGS# 8993

**1882-CC Liberty Twenty, AU58
Elusive Variety 1-A**

- 4414** 1882-CC AU58 NGC. **Variety 1-A.** The 1882-CC Liberty double eagle claims a mintage of 39,140 pieces. Probably 800-900 examples survive in all grades, but the issue does become rare in Mint State. This attractive near-Mint specimen is well-detailed and lustrous, with areas of prooflike reflectivity on the reverse. The first C in the Mintmark is higher than the second, identifying the rare Variety 1-A. NGC ID# 26BF, PCGS# 8997

**1884-CC Double Eagle, AU58
Vivid Color**

- 4415** 1884-CC AU58 NGC. **CAC. Variety 1-A.** The 1884-CC Liberty double eagle boasts a mintage of 81,139 pieces, making it one of the more available issues from this popular mint. This borderline Uncirculated example displays well-detailed design elements and lustrous orange-gold surfaces with rose highlights and only minor abrasions. NGC ID# 26BK, PCGS# 9001

**Select 1885-S Double Eagle
Nice Color and Luster**

- 4416** 1885-S MS63 PCGS. The 1885-S Liberty double eagle claims a substantial mintage of 683,500 pieces, but coins in MS63 condition are quite scarce, despite a large number of submissions recorded by the grading services. This delightful Select specimen offers well-detailed design elements and vibrant mint luster with pleasing greenish-gold surfaces. PCGS has graded 33 numerically finer examples (2/13). NGC ID# 26BP, PCGS# 9005

-
- 4417** 1889-S MS62 NGC. A mildly prooflike caramel-gold double eagle whose coruscating luster and moderately bagmarked surfaces provide good eye appeal for the designated grade. NGC ID# 26BW, PCGS# 9012

**Lustrous MS62 1890 Twenty
Lower-Mintage Philly Issue**

- 4418** 1890 MS62 PCGS. Dazzling luster and a bold strike confirm the quality of this sun-gold double eagle. The obverse displays fewer marks that is customary for the MS62 grade, and the reverse is minimally abraded. A relatively low mintage Philadelphia issue that is difficult and costly to acquire any finer. NGC ID# 26BX, PCGS# 9013

**1890-CC Twenty Dollar, AU53
Popular Carson City Issue**

- 4419** 1890-CC AU53 NGC. **Variety 1-A.** This honey-gold Carson City representative retains a considerable portion of its initial mint luster. Small abrasions are distributed but none are distracting. The 1890-CC is collectible in XF and AU but has less than one-eighth the mintage of its San Francisco counterpart. Variety 1-A is most notable for minor die doubling on PLURIBUS. NGC ID# 26BY, PCGS# 9014

**Choice AU 1890-CC Liberty Twenty
Lightly Abraded Surfaces**

- 4420** 1890-CC AU55 NGC. **CAC. Variety 1-A.** The 1890-CC is one of the more available issues from this popular Western mint and the issue is especially popular with mintmark type collectors. This attractive Choice AU specimen displays frosty mint luster and well-detailed design elements, with pleasing green and orange-gold surfaces. Surprisingly few abrasions are evident for the issue. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty, AU58
Late Reverse Die State**

4421 1890-CC AU58 PCGS. Variety 1-A. Here in the late die state, showing noticeable lapping on the right-side tail feathers of the eagle. There is also a peripheral die break through all of the reverse letters from 8 o'clock to 3:30. Bright peach-gold color complements abundant luster on this scarcely circulated 1890-CC twenty, the largest-mintage double eagle issue from Carson City from this point to the end of the series in 1893. NGC ID# 26BY, PCGS# 9014

4422 1896 MS61 Prooflike NGC. Moderately abraded but decidedly reflective in yellow-gold fields. Detail on the portrait is complete, though shallow in areas such as the hair below the coronet. Census: 7 in 61 Prooflike, 6 finer (2/13). PCGS# 79029

4423 1897-S MS64+ PCGS. Strong central detail with a light golden hue that lights up with cartwheel luster. Luster scrapes on the portrait and a degree of peripheral flatness contribute to the grade but have surprisingly little impact on the all-around visual appeal. PCGS has graded just 10 pieces as MS65 or better (1/13). NGC ID# 26CJ, PCGS# 9032

4424 1903 MS64 NGC. A popular type coin, the 1903 Liberty double eagle is an available issue in high grade. This attractive MS64 specimen displays sharply detailed design elements and vibrant mint luster, with remarkably few signs of contact. NGC ID# 26CW, PCGS# 9043

4425 1903-S MS63+ PCGS. CAC. A high-end Select Liberty double eagle with vivid greenish-gold surfaces and vibrant mint luster. A few minor contact marks in the obverse fields preclude an even higher grade. NGC ID# 26CX, PCGS# 9044

4426 1904 MS64 NGC. An attractive peach-gold representative of this popular date, with well-preserved surfaces, sharply detailed design elements, and vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 26CY, PCGS# 9045

**Gem 1904 Liberty Double Eagle
Well-Produced Type Issue**

4427 1904 MS65 NGC. Ex: Depression '3 Bag' Hoard. The vivid orange-gold surfaces of this impressive Gem show a few highlights of lilac color and vibrant cartwheel mint luster. The design elements are sharply detailed throughout and only a few minor contact marks and luster grazes are evident. Eye appeal is outstanding. NGC ID# 26CY, PCGS# 9045

**Premium Gem 1904 Double Eagle
Ideal for Type Purposes**

4428 1904 MS66 PCGS. The 1904 Liberty double eagle was produced in large numbers and examples are readily available in high grade, making the issue quite popular for type purposes. The 1904 is extremely rare above the MS66 level, however. This spectacular Premium Gem is sharply detailed throughout, with vibrant mint luster on both sides and terrific eye appeal. PCGS has graded only two numerically finer examples (2/13). NGC ID# 26CY, PCGS# 9045

**Choice 1904 Liberty Double Eagle
Elusive Prooflike Specimen**

4429 1904 MS64 Prooflike NGC. A sharply detailed near-Gem example of this popular type issue, seldom encountered with the Prooflike designation. The bright yellow-gold fields show hazy reflectivity, with a few highlights of green and only minor signs of contact. Census: 49 in 64 Prooflike, 11 finer (2/13). PCGS# 79045

4430 1904-S MS64 NGC. CAC. Swirling cartwheel luster has a satin-frost appearance. Apricot-gold surfaces are smooth overall and interior detail is solid, though some of the stars around the portrait are mushy. NGC ID# 26CZ, PCGS# 9046

4431 1906-D MS62 NGC. A lustrous and crisply struck green-gold double eagle that has a smooth reverse and only moderate obverse abrasions. One of only two Denver issues of the type, since the facility served strictly as an assay office prior to 1906. NGC ID# 26D5, PCGS# 9050

4432 1907 MS64 PCGS. Bright luster cartwheels across pale canary-gold surfaces. A well-defined final-year Coronet Philadelphia eagle with few abrasions aside from a stuttering line of reed marks on Liberty's cheek. NGC ID# 26D7, PCGS# 9052

4433 1907-S MS62 PCGS. Light peach-gold luster swirls softly on each side. Scattered light to moderate abrasions affect the central devices, and a few digs are noted on the cheek. A copper spot appears at the top of the reverse. NGC ID# 26D9, PCGS# 9054

1907-S Double Eagle, MS64+
Conditionally Rare in Higher Grades

- 4434** 1907-S MS64+ NGC. Despite its large mintage, the 1907-S Liberty double eagle is a condition rarity in grades above the Choice level. This high-end Choice example exhibits well-detailed design elements and vibrant mint luster, with light yellow and rose-gold surfaces that show few signs of contact. NGC has graded 16 numerically finer examples (2/13). NGC ID# 26D9, PCGS# 9054

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, AU55
Wire Rim Around the Entire Obverse

- 4435** 1907 High Relief, Wire Rim AU55 PCGS. CAC. The strike details on this High Relief are remarkably strong, as seen by the complete wire rim that encircles the obverse. This wire rim, or "fin" as it was called by Mint personnel was seen as a defect and deterrent to stacking of the coins by banks. Very few High Reliefs were produced with no evidence of the wire rim, though. This Choice AU example shows significant brightness and good portions of remaining satiny mint luster, and there are no obvious or mentionable contact marks on either side. Just a bit of friction can be seen on the highest points, leaving the full three-dimensionality of the design fully evident at a fraction of the cost of a Gem coin. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, Wire Rim
Satiny MS65+

4436 1907 High Relief, Wire Rim MS65+ PCGS Secure. CAC.

It is an interesting and curious paradox that the best-known work of Augustus Saint-Gaudens, in terms of the sheer number of people who are familiar with it, is his design for the 1907 High Relief twenty dollar. The paradox is the sculptor produced dozens of low-relief or bas-relief plaques from the 1870s until the end of his life. One of his best-known bas-reliefs is of Boston financier Samuel Gray Ward. Saint-Gaudens' expert John Dryfhout states that the Ward is "one of the lowest reliefs he executed. Astonishingly, the overall depth of the portrait against the background is no more than one-eighth of an inch. While the figure is intimately conjoined with the background, there remains a convincing sense of depth. ... the clay appears drawn rather than sculpted. When Saint-Gaudens began to undertake the design for the twenty dollar, he chose high relief rather than the bas-relief he was so familiar with. While his bas-reliefs give a sense of having been drawn rather than sculpted, Saint-Gaudens knew the effect of using high relief would best communicate the drama and vibrancy of the figure of Liberty he adapted from Ancient Greece.

Even AU examples of the High Relief display the three-dimensionality of Saint-Gaudens' concept for the figure of American Liberty. At the Gem level, the high relief is not only an impressive feature, but the surfaces display the bright, satiny surfaces just as the coins were struck in 1907. This high-end Gem is fully struck in all areas and shows no obvious contact marks on either side.

NGC ID# 26F2, PCGS# 9135

MCMVII Wire Rim High Relief Twenty, MS66
Exceptional Satiny Surfaces

4437 1907 High Relief, Wire Rim MS66 NGC. One consistent working trait of Augustus Saint-Gaudens was his tendency to labor over sculptural commissions as long as possible. This perfectionism led him to want to revisit and revise certain works years later. He was less than pleased with certain design elements of the Garfield Monument, and offered to make alterations at his own expense. However, the Park authorities did not respond to his offer to improve the monument since the statue had been installed ten years previously. The ten and twenty dollar coins were designed relatively quickly by Saint-Gaudens' standards, with the concept first addressed in December 1904 over dinner with President Roosevelt, and production of the High Relief twenties commencing in the fall of 1907. The basic design elements were already known to him and the figure of Liberty was self-referencing, as it was an adaptation of the striding figure of Liberty taken from his Shaw Memorial located at the entrance to Central Park. Nevertheless, even when adapting a known sculptural figure from three dimensions and reducing it to two dimensions on the coin still took two and a half years of various models and trial strikings.

The High Relief twenty certainly has the appearance of a coin that was labored over for years. It is a startling of Realism, a genre Saint-Gaudens consistently adhered to throughout his career. This particular coin is bright yellow-gold with thick, satiny mint luster. Only the tiniest contact marks are evident, and it will require magnification to find them. The wire rim encircles almost all of each side, a trait usually reserved for the obverse only. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1907 Saint-Gaudens Double Eagle, MS64+ Popular First-Year Type Issue

- 4438** 1907 Arabic Numerals MS64+ PCGS. CAC. The 1907 Saint-Gaudens double eagle is always popular as the first year of this widely acclaimed design and the first year of the short-lived No Motto type. This high-end Choice example exhibits well-detailed design elements, with just a touch of softness on the eagle's belly. The lustrous greenish-gold surfaces show only a few minor contact marks. NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, MS68 Wells Fargo Hoard Specimen

- 4439** 1908 No Motto, Wells Fargo Nevada MS68 PCGS. Any numismatist who is interested in hoards of forgotten and recovered treasure would do well to read the accounts of the fabulous Wells Fargo Nevada hoard of 1908 No Motto double eagles, a gathering of thousands of examples of legendary quality. The hoard did for the 1908 No Motto what the S.S. *Central America* shipwreck did for the 1857-S double eagles, except that the later Saint-Gaudens coins were in even finer condition. This MS68 example boasts exceptionally clean, virtually perfect surfaces that show the typical slightly granular, mattelike surfaces. PCGS has certified only 10 finer (2/13). PCGS# 99142

1908 No Motto Twenty, MS68 Ex: Wells Fargo Hoard

- 4440** 1908 No Motto, Wells Fargo Nevada MS68 PCGS. The fabled hoard of 1908 No Motto double eagles found in the fabled Wells Fargo Nevada hoard is a thrice-told tale, but collectors still today get to enjoy the many pleasures of these incredibly high-grade coins, one of the most technically perfect modern-day treasure troves ever to surface. This MS68 PCGS boasts a panoply of virtues, including pristine preservation, a strike that is razor-sharp, and rich, mellow golden-orange patina. PCGS has certified precisely 10 examples of the hoard finer than this piece (2/13). A fantastic type coin. PCGS# 99142
- 4441** 1908-D Motto MS64+ PCGS. CAC. Light, even reddish-gold color is seen over each side of this softly frosted early twenty. The strike details are strong overall and there are no objectionable or mentionable abrasions. NGC ID# 26F9, PCGS# 9148
- 4442** 1908-D Motto MS64+ PCGS. CAC. Largely pale yellow with a few tan elements and occasional coppery areas at high points such as the top of the torch and Liberty's knee. A shallow horizontal cut on Liberty's right (facing) leg precludes full Gem status but the overall eye appeal is solid. NGC ID# 26F9, PCGS# 9148

1908-D Motto Twenty, Boldly Struck MS66

4443 1908-D Motto MS66 PCGS. CAC. The 1908-D Motto double eagles are today mostly found around the Select grade. Gems are rare. The present Premium Gem is one of only about two dozen such at PCGS, which has seen but three finer (2/13). The 1908-D Motto in the Duckor Collection was one of only three MS67 PCGS examples. David Akers wrote in the Duckor catalog that both the 1908-D No Motto and the 1908-D With Motto were elusive in any grade higher than MS63 until around 1983, even though the With Motto was a touch more available. The present Premium Gem Motto coin displays radiant luster over boldly struck surfaces that show a range of color from orange-gold to lilac. Marks are at an absolute minimum. An excellent coin for a type set. NGC ID# 26F9, PCGS# 9148

**1908-S Saint-Gaudens Twenty, AU58
Low-Mintage With Motto Issue**

4444 1908-S AU58 NGC. With a memorably low mintage of 22,000 pieces, the 1908-S also enjoys great demand from mintmark type collectors as the first year of the Motto design. This well-detailed near-Mint specimen shows just a trace of wear on the high points of the design and a minor obverse rim bruise at 6 o'clock is the only mentionable distraction. NGC ID# 26FA, PCGS# 9149

**1909-D Twenty, MS64
Low-Mintage Condition Rarity**

4445 1909-D MS64 PCGS. CAC. Despite the low mintage of 52,500 coins — lowest among all of the Denver Mint issues in the series — the 1909-D double eagle is an issue that was exported in goodly numbers only to be repatriated decades later, a serendipity for collectors of today. Gem examples are still highly elusive, however, giving the present near-Gem broad collector appeal. It stands on its own aesthetically, though, with lovely even reddish-orange color, an above-average strike, and only a few scattered, light marks that determine the grade. PCGS has graded only 22 pieces numerically finer (2/13). NGC ID# 26FD, PCGS# 9152

**1909-D Twenty, MS64
Better Date, Rarely Found Finer**

- 4446 1909-D MS64 PCGS. CAC.** One of the semikeys in the series, and difficult to find in a finer grade than this specimen. The surfaces are satiny, and Liberty reveals few abrasions under a loupe, save for a couple on her torso and the extended right (facing) arm. There are also a couple of small hits in the left obverse field, and a nick on the eagle's forward wingtip. Delightful straw-gold surfaces are lustrous and well struck, save for a hint of softness on the obverse rim at the flora beneath Liberty's feet. Between NGC and PCGS, only 29 examples grade finer (2/13).
Ex: Central States Signature (Heritage, 4/2006), lot 4581. NGC ID# 26FD, PCGS# 9152

MS65+ 1909-S Double Eagle

- 4447 1909-S MS65+ PCGS.** Orange and olive shades intermingle across this lustrous and precisely struck Gem. The preservation is decidedly above average for the issue, despite a pair of hair-thin marks on Liberty's chest. Although a handful of examples are certified finer, the price shock associated with those pieces will make the present lot more obtainable. NGC ID# 26FE, PCGS# 9153

**1910-D Double Eagle, MS66
Lustrous and Well-Preserved**

- 4448 1910-D MS66 PCGS. CAC.** Sea-green margins encompass peach-gold fields and devices. This Premium Gem is lustrous and exceptionally well-preserved with a good strike and outstanding eye appeal. The 1910-D returned in quantity from foreign bank hoards, but most such pieces grade between MS61 and MS64. PCGS has seen only four finer, two each in MS66+ and MS67 (2/13). NGC ID# 26FG, PCGS# 9155

**Gem 1910-S Saint-Gaudens Twenty
Vivid Color, Vibrant Mint Luster**

- 4449 1910-S MS65 NGC.** An available issue in lower Mint State grades, the 1910-S Saint-Gaudens double eagle is very scarce at the MS65 level. This delightful Gem displays vivid yellow and rose-gold surfaces, with vibrant mint luster and well-detailed design elements. Census: 69 in 65 (1 in 65+), 8 finer (2/13). NGC ID# 26FH, PCGS# 9156

- 4450 1911 MS63 PCGS.** Subtle rose-gold and lilac coloration is seen over each side of this remarkably clean coin for the grade. Just a bit of softness is seen over the high points. NGC ID# 26FJ, PCGS# 9157

**Near-Gem 1911 Twenty Dollar
Uncommonly Smooth Surfaces**

- 4451 1911 MS64 PCGS.** Philadelphia mintages of double eagles were comparatively low between 1911 and 1915, though branch mint issues from those years were fairly high mintage, with the exception of the 1913-S. The present caramel-gold 1911 twenty is refreshingly void of marks and shows only slight blending on Liberty's raised knee and the eagle's breast feathers. NGC ID# 26FJ, PCGS# 9157

- 4452 1911-D MS66 NGC.** Uncommonly clean surfaces characterize this high-grade 1911-D. The satiny mint luster accents the matte-like texture and each side displays even reddish patina. NGC ID# 26FK, PCGS# 9158

**Peach-Gold MS66+ 1911-D Twenty
Smooth Obverse**

- 4453 1911-D MS66+ NGC. CAC.** A warmly lustrous and carefully preserved peach-gold example of this popular and relatively plentiful Denver issue. The obverse is beautifully smooth with a single shallow mark just below Liberty's waist, while the reverse with its beveled rim shows a few nicks that preclude Superb Gem status. NGC has graded just 32 examples as MS67 or finer (2/13). NGC ID# 26FK, PCGS# 9158

**Gem 1911-S Saint-Gaudens Twenty
Nice Color and Luster**

- 4457 1911-S MS65 NGC.** An available date in lower grades, the 1911-S Saint-Gaudens double eagle is surprisingly difficult to locate above the Gem level. Sharply detailed in most areas, this impressive Gem shows just a touch of softness on the lower stars. The light orange-gold surfaces display vibrant mint luster and few signs of contact. PCGS has graded 28 numerically finer examples (2/13). NGC ID# 26FL, PCGS# 9159

**1911-D/D Saint-Gaudens Twenty, MS66
Interesting Repunched Mintmark, FS-501**

- 4454 1911-D/D RPM FS-501 MS66 PCGS. CAC.** The undertype D is readily apparent to the right of the primary mintmark on this well-known and popular variety. This delightful Premium Gem is sharply detailed throughout, with remarkably clean orange-gold surfaces and vibrant mint luster. Outstanding eye appeal complements the high technical grade. Population: 30 in 66 (1 in 66+), 0 finer (2/13). PCGS# 145010

- 4455 1911-S MS64+ PCGS. CAC.** The finely granular surfaces are nicely frosted and minimally abraded. Much nicer than the usually seen 1911-S twenty. NGC ID# 26FL, PCGS# 9159

- 4456 1911-S MS64+ PCGS. CAC.** Dynamic cartwheel luster sweeps the well preserved green-gold surfaces. The strike is crisp and the eye appeal is imposing for the designated grade. A "spike" or thick die line through the L in LIBERTY may be of interest to the specialist and is certainly unusual for the era. NGC ID# 26FL, PCGS# 9159

**Fully Struck 1911-S Double Eagle, MS66
One of the Best-Produced Series Issues**

- 4458 1911-S MS66 NGC. CAC.** The Saint-Gaudens double eagles of the 1911-S vintage are among the best-produced of the early mintmarked issues in the series, as this Premium Gem example readily attests. The strike is full throughout both sides. Generous, softly frosted luster complements surfaces that not only show few marks of any consequence (a few small ones on the lower reverse), but also display lovely orange-gold color prevailing throughout. NGC and PCGS have each seen only a couple of dozen submissions in the Premium Gem grade, but such coins are well worth seeking out (2/13). The Duckor Collection example was an MS66 PCGS example. This MS66 NGC piece, in addition to its inherent appeal, carries the CAC designation. NGC ID# 26FL, PCGS# 9159

**1912 Double Eagle, MS65
Only Eight Certified Finer**

4459 1912 MS65 PCGS. The 1912 enjoys great demand due to its small mintage and the absence of double eagles at the branch mints throughout the year. Slightly fewer than 150,000 double eagles were minted in Philadelphia during that year. Gem examples are extremely rare, and finer coins are practically non-existent. This lovely specimen has frosty yellow-gold luster with splendid surfaces showing a few minuscule marks on each side. A generally bold strike shows a trifle weak at the centers. However, this coin retains excellent eye appeal. Population: 32 in 65, 5 finer (2/13). NGC ID# 26FM, PCGS# 9160

4460 1913 MS62 NGC. Bright, even yellow-gold mint frost with minimal marks for the grade are the primary attributes of this always-popular, low-mintage issue. NGC ID# 26FN, PCGS# 9161

**1913-S Double Eagle, MS61
In-Demand Low-Mintage Issue**

4461 1913-S MS61 PCGS Secure. The enticingly low mintage of 34,000 pieces makes the 1913-S quite popular with collectors, but the date is not difficult to obtain in most Mint State grades. This well-detailed MS61 specimen exhibits vivid orange-gold surfaces, with highlights of rose and vibrant mint luster. NGC ID# 26FR, PCGS# 9163

Low-Mintage 1913-S Double Eagle, MS62

4462 1913-S MS62 PCGS Secure. A tiny mintage of 34,000 pieces makes the 1913-S stand out among early Motto issues. The present nicely struck representative has satin luster and rich green-gold toning. Though small abrasions are scattered, none provide a singular distraction. The borders display a few small freckles of deep russet patina. NGC ID# 26FR, PCGS# 9163

**Near-Gem 1913-S Double Eagle
Seldom Seen in MS65**

4463 1913-S MS64 NGC. CAC. Deep orange-gold color complements surfaces that are well-struck throughout each side of this near-Gem 1913-S twenty. A few scattered, minor marks are in line with the grade but not at all severe or distracting. Gem specimens of this issue are few and far between, but this is a coin with many appealing attributes. NGC ID# 26FR, PCGS# 9163

**Near-Gem 1914 Double Eagle
Rich Even Color, Rare Any Better**

- 4464 1914 MS64 NGC. CAC.** The 1914 double eagle saw a mintage of only 95,200 pieces but is more available today than many post-World War I issues, which were released in smaller quantities if at all. Gem examples of the 1914 are nonetheless elusive. The present near-Gem offers even, rich orange color on both sides amid a few scattered ticks in the right obverse field and on Liberty's exposed right knee that constitute the grade. The strike is bold, even if less than full. NGC has seen only 25 finer, including one in MS65 ★ (2/13). NGC ID# 26FS, PCGS# 9164

**1914-S Saint-Gaudens Twenty, MS66
Extremely Rare in Finer Grades**

- 4465 1914-S MS66 PCGS. CAC.** A plentiful issue in lower grades, the 1914-S Saint-Gaudens double eagle is quite scarce in MS66 condition, and virtually unobtainable any finer. This impressive Premium Gem features well-detailed design elements and vibrant mint luster, with vivid green and orange-gold surfaces. PCGS has certified no coins in higher numeric grades, with a single example in MS66+ (2/13). NGC ID# 26FU, PCGS# 9166

**Gem 1916-S Saint-Gaudens Twenty
Excellent Type Coin**

- 4466 1916-S MS65 PCGS. CAC.** The 1916-S Saint-Gaudens double eagle is an available date in Gem condition, making the issue quite popular with mintmark type collectors. This delightful Gem is sharply detailed in most areas, with just a touch of softness on the Capitol. The light orange-gold surfaces radiate vibrant mint luster and show few signs of contact. NGC ID# 26FX, PCGS# 9169

**1916-S Saint-Gaudens Double Eagle, MS66
No Numerically Higher Coins at PCGS**

- 4467 1916-S MS66 PCGS.** The 1916-S Saint-Gaudens double eagle is only scarce at the MS66 level, but finer grades are almost unobtainable. This spectacular Premium Gem is sharply detailed and exhibits vibrant frosty mint luster on both sides. The well-preserved orange-gold surfaces show a few hints of rose and lilac. PCGS has graded no coins in higher numeric grades, with a single example in MS66+ (2/13). NGC ID# 26FX, PCGS# 9169

**Premium Gem 1916-S Double Eagle
Only Three Numerically Finer at NGC**

- 4468 1916-S MS66 NGC. CAC.** Even in MS66 condition, the 1916-S Saint-Gaudens double eagle can be located with some patience, but the issue is extremely rare in higher grades. This spectacular Premium Gem is well-detailed, with vibrant mint luster and smooth orange-gold surfaces. NGC has graded only three numerically finer examples (2/13). NGC ID# 26FX, PCGS# 9169

- 4469 1922 MS64+ NGC. CAC.** The design elements of this high-end Choice example are sharply detailed in most areas, but a touch of softness shows on the eagle's belly. The light yellow and rose-gold surfaces are free of serious distractions and vibrant mint luster is present on both sides. NGC ID# 26G3, PCGS# 9173

**1922 Double Eagle, MS65
Conditionally Rare in Better Grades**

- 4470 1922 MS65 PCGS.** The 1922 Saint-Gaudens double eagle is a prime condition rarity in grades above the Gem level. This sharply detailed specimen offers well-preserved yellow and rose-gold surfaces, with vibrant mint luster on both sides. PCGS has graded only seven numerically finer examples (2/13). NGC ID# 26G3, PCGS# 9173

**1922 Twenty Dollar, MS65
Slightly Better P-Mint From the 1920s**

- 4471 1922 MS65 PCGS.** The Philadelphia Mint double eagles from 1924 to 1928 are recognized as the common dates in the series, although the 1922 is frequently encountered as well. However, rarely are examples found in grades finer than this piece. In fact, PCGS has only certified seven coins better than MS65 (2/13). A highly lustrous Gem, both sides have frosty yellow-gold surfaces with minimal marks and exceptional eye appeal. NGC ID# 26G3, PCGS# 9173

Gem 1922 Twenty Dollar

- 4472 1922 MS65 PCGS. CAC.** A lovely khaki-gold double eagle. The 1922 is an available postwar issue although it is seen far less often than the 1924, particularly in quality Mint State. Above the MS65 level, the 1922 becomes a formidable condition rarity, which causes most collectors to settle for the next highest grade. CAC has certified only 18 pieces as MS65 with just two finer (2/13). NGC ID# 26G3, PCGS# 9173

1923 Double Eagle, Highly Lustrous MS65

- 4473 1923 MS65 PCGS.** While not rare, the 1923 is certainly a scarcer P-mint from the 1920s. This is a well-struck Gem that exhibits even, deep orange-gold color with a pale intermixture of pinkish patina. Close examination shows a couple of alloy specks and a couple of barely noticeable marks and luster grazes. NGC ID# 26G5, PCGS# 9175

**1923-D Saint-Gaudens Double Eagle, MS66+
Popular Mintmark Type Issue**

- 4474 1923-D MS66+ NGC. CAC.** Especially vibrant mint luster radiates from the well-preserved yellow and rose-gold surfaces of this high-end Premium Gem. The design elements are well-detailed and the only mark of note is a slight dent on Liberty's foot. Visual appeal is outstanding for this popular mintmark type coin. NGC ID# 26G6, PCGS# 9176

**1923-D Saint-Gaudens Twenty, MS66+
Highly Lustrous, Even Color**

- 4475 1923-D MS66+ PCGS. CAC.** The mint luster is thick and frosted, as usually seen on 1923-D Saints, and we might add an unusual finish for most Denver products which tend more to the satiny range. The surfaces are exceptionally clean, the only exception is a small mark over several of Liberty's toes. Even, orange-gold color throughout. NGC ID# 26G6, PCGS# 9176

- 4476 1924 MS65 PCGS.** Saturated yellow-orange luster overall with a few areas that show pink and silver-green overtones. A quality Gem example of this famous type issue. NGC ID# 26G7, PCGS# 9177

- 4477 1924 MS65 NGC.** A sharply detailed Gem example of this popular Saint-Gaudens double eagle, with light greenish-gold surfaces that show highlights of rose color. No mentionable distractions are noted and eye appeal is quite strong. NGC ID# 26G7, PCGS# 9177

- 4478 1924 MS65 NGC.** This sharply detailed Gem would make an ideal selection for a type collector seeking a high-grade example of the Saint-Gaudens double eagle. No mentionable distractions are evident on either side and vibrant mint luster adds to the ample eye appeal. NGC ID# 26G7, PCGS# 9177

- 4479 1924 MS65 NGC.** A lovely peach-gold Gem, with sharply detailed design elements and vibrant mint luster on both sides. This coin possesses outstanding eye appeal and shows no mentionable distractions. NGC ID# 26G7, PCGS# 9177

- 4480 1924 MS65 NGC.** The 1924 is probably the most available Saint-Gaudens double eagle, and the date most often chosen by type collectors. This impressive Gem features sharply detailed design elements and frosty mint luster. The yellow and rose-gold surfaces are well-preserved, with a short scratch in the left obverse field the only mark of note. NGC ID# 26G7, PCGS# 9177

**1924 Saint-Gaudens Twenty, MS66+
High-Quality Type Coin**

4481 1924 MS66+ NGC. CAC. The 1924 Saint-Gaudens double eagle is the most available date of the series and the coin most often selected by type collectors. This high-end Premium Gem is sharply detailed throughout, with vivid green and rose-gold surfaces and vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 26G7, PCGS# 9177

**1924-D Twenty Dollar, MS63
Scarce Issue, Variegated Color**

4482 1924-D MS63 PCGS. CAC. The 1924-D is a difficult date to find in mint condition, and this one shows strong mint luster and a fairly sharp strike. A couple of the peripheral letters are shallow, but this is standard issue for this date and mint. We note a couple of horizontal scuffs in the left obverse through the rays, and a few more near the top of the sun on the reverse. The color on the reverse is variegated deep orange-gold with occasional streaks of lilac. NGC ID# 26G8, PCGS# 9178

**Rare 1924-S Twenty Dollar, MS63
Mass-Melted Issue**

4483 1924-S MS63 PCGS. The mintage of the 1924-S approached 3,000,000 pieces. However, all but a thousand or so examples remained in Treasury vaults at the time of the 1933 gold recall, and ended up constituting some of the gold bricks lining the walls of Fort Knox. The present lot is among the survivors, and is a lustrous sun-gold Select coin with a good strike and only moderate marks. NGC ID# 26G9, PCGS# 9179

**Select 1924-S Double Eagle
Difficult to Locate in High Grade**

4484 1924-S MS63 PCGS. Before the 1924-S surfaced in some European holdings in the late 1940s and 1950s, the issue was considered a great rarity in the Saint-Gaudens series. High-grade specimens are still elusive. This attractive MS63 example displays pleasing orange-gold surfaces, with vibrant mint luster and well-detailed design elements. A few thin scratches in the left obverse field define the grade. NGC ID# 26G9, PCGS# 9179

**MS64+ 1924-S Double Eagle
Elusive Mass-Melted Issue**

4485 1924-S MS64+ PCGS. CAC. Luster is primarily pale copper-gold with faint peach accents and a skiff of patina. The luster has a strong cartwheel effect, and the obverse's abrasions are generally small and away from the central devices. The reverse has marks on the trailing ends of the wing feathers and the sun below. Though numerous Philadelphia double eagles dated 1924 survived the 1930s gold recall overseas, their San Francisco counterparts were not so fortunate and survivors are elusive. PCGS has graded only three examples of the 1924-S twenty as MS65 or finer (2/13). NGC ID# 26G9, PCGS# 9179

4486 1925 MS66 NGC. A high grade green-gold Saint-Gaudens double eagle whose sweeping cartwheel luster illuminates crisply struck and lightly abraded surfaces. Though available at the MS66 level, the 1925 is surprisingly rare any finer. NGC ID# 26GA, PCGS# 9180

4487 1925-D — Scratches, Cleaned — NGC Details. AU. Aside from the 1923-D, all postwar branch mint double eagles are rare due to the 1933 Federal gold recall. The present 1925-D survivor has satin luster despite light wear and a mild cleaning. Careful inspection is required to locate a couple of minor pinscratches on the eagle's plumage. NGC ID# 26GB, PCGS# 9181

1925-S Double Eagle, MS63

4488 1925-S MS63 PCGS. In the middle 20th century, the 1925-S was ranked among the rarest issues in the Saint-Gaudens double eagle series, with only a handful of pieces known to the numismatic community at that time. The last three decades of the century saw a large number of pieces, once stored in overseas vaults, entering the American numismatic arena. Lacking a prior pedigree, it is impossible to know if this piece was one of those from overseas, or if it remained in an American collection since its production. Regardless, this Select Mint State piece exhibits splendid surfaces and brilliant, frosty yellow-gold luster that is slightly mellowed on the reverse. PCGS has only certified 27 finer examples (2/13). NGC ID# 26GC, PCGS# 9182

Near-Gem 1926-S Double Eagle Excellent Eye Appeal

4489 1926-S MS64 PCGS. CAC. The 1926-S Saint-Gaudens twenty is a former great rarity in the series, now more available due to repatriations of overseas hoards. The issue remains quite popular, however, and Gems or finer coins are seldom seen. This near-Gem displays excellent luster radiating from frosty orange-red surfaces that are well-struck. The eye appeal is top-notch, despite the scattered small marks on Liberty's face, breast, and torso that account for the grade. PCGS has seen only 24 submissions numerically finer (2/13). NGC ID# 26GF, PCGS# 9185

4490 1927 MS65+ PCGS. Bold luster with just a hint of frost. Though a few small marks appear on Liberty's figure, the combination of sharp detail and generally smooth fields makes for an appealing type piece. NGC ID# 26GG, PCGS# 9186

4491 1927 MS65+ PCGS. CAC. Light apricot-gold luster is strong on this appealing type coin, which comes in a cut above the typical Gem. Just a few small luster scrapes at the right obverse and lower reverse determine the grade. NGC ID# 26GG, PCGS# 9186

1927 Saint-Gaudens Twenty, MS66+ Incredibly Clean Surfaces

4492 1927 MS66+ PCGS. CAC. The 1927 Saint-Gaudens double eagle is easy to locate in MS66 condition, but finer grades are seldom encountered. This high-end Premium Gem exhibits well-detailed design elements and vibrant mint luster, with remarkably clean greenish-gold surfaces. PCGS has graded only 14 finer examples (2/13). NGC ID# 26GG, PCGS# 9186

4493 1928 MS66 PCGS. Mostly pale yellow-gold but with areas of orange that are most visible at the upper obverse fields. Above-average detail and solid luster make for a quality type coin. NGC ID# 26GK, PCGS# 9189

**1928 Twenty, MS66+
Excellent Type Representative**

4494 1928 MS66+ PCGS. CAC. Wondrously preserved surfaces, each side glows with softly frosted mint luster. The strike details are strong throughout with noticeably sharp definition on the Capitol building. As one would expect, there are no noticeable abrasions on the obverse or reverse. Even orange-gold color throughout. NGC ID# 26GK, PCGS# 9189

TERRITORIAL GOLD

**Very Rare C. Bechtler Quarter Eagle, MS62
K-11, 64 Grains, Uneven '22'**

4495 (1837-42) C. Bechtler Quarter Eagle, 64G. 22C. MS62 NGC. K-11, R.6. While Georgia-based Templeton Reid was the first notable private gold coiner of the Piedmont Gold Rush, the Bechtler family were metallurgical pioneers in North Carolina. As described in Donald Kagin's *Private Gold Coins and Patterns of the United States*, Christopher Bechtler, Sr. was born in Phorzheim, Baden, in 1782. (Kagin refers to Baden, in present-day Germany, as a "Grand Duchy." While this was true at the time of the Bechtler family's immigration to the United States in 1829, at the time of Bechtler Sr.'s birth, Baden was a margraviate within the decaying Holy Roman Empire.) Bechtler Sr., an expert metallurgist, brought along his sons Charles and Augustus, as well as a nephew also named Christopher. Though they initially settled in the north — the family arrived in New York City and applied for citizenship and set up shop in Philadelphia — within a year of arrival, they bought land in Rutherford County in North Carolina and moved down there, where they began a coinage dynasty.

This 64-grain C. Bechtler quarter eagle is undated but was struck either just before or contemporaneously to the Charlotte Mint's earliest years of operation. Its orange-gold surfaces are lightly abraded but unworn and considerably reflective, especially on the denomination side. The uneven placement of the paired "2" symbols (for 22 carats) underscores what must have been rough coinage conditions, though slightly rarer "Even 22" coins were struck at the same weight limit. Listed on page 373 of the 2013 *Guide Book*. PCGS# 10073

Very Rare Kagin-21 Colon
128 G, Five Dollar, AU55

4496 (1837-42) C. Bechtler Five Dollar, Colons Obverse AU55
PCGS. K-21, R.7. A very rare Christopher Bechtler variety, distinguished from other 128 G(rain) issues by a colon instead of a period after the G. This is a problem-free piece with bright luster about the legends and an absence of noticeable abrasions. A brief lint mark (as struck) beneath the H in BECHTLER serves as an identifier.

The 1981 Don Kagin standard reference for the pioneer gold series lists K-21 as R.8, which suggests two known. However, as of (2/13), PCGS has a population of six pieces in all grades (2 in 55, 1 finer), and NGC has a total census of two examples, which suggests Rarity-7 may be more appropriate. The following examples have appeared at auction in recent decades:

1. **MS61 NGC.** FUN Signature (Heritage, 1/2011), lot 5713, which realized \$92,000.
2. **AU58 PCGS.** Dr. Jack Adams Collection (Superior, 5/1992), lot 3097; Americana Sale (Stack's, 1/2008), lot 9389, which realized \$115,000.
3. **AU55 PCGS.** The present lot. Provenance unknown.
4. **About Uncirculated.** Emerson Gaylord (Mayflower, 5/1963); Gibson Collection (Stack's, 11/1974), lot 162; Raymond J. Wayman Collection (Stack's, 9/1981), lot 413.
5. **XF45 PCGS.** Baltimore ANA Signature (Heritage, 9/2008), lot 1835, which realized \$46,000.
6. **Very Fine to Extremely Fine.** Kreisberg-Schulman, 2/1960, lot 2297; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 1242, which realized \$26,400.

Note: Walter Breen in his 1988 Encyclopedia (under entry 7758) listed Walton:2256 as an example of K-21, but that lot was the K-23 variety. Listed on page 374 of the 2013 *Guide Book*. PCGS# 10106

Christopher Bechtler Five Dollar, K-19
RUTHERF. Variant, 20 Distant, AU Details

- 4497 (1834-37) C. Bechtler Five Dollar, 20 Distant, RUTHERF — Improperly Cleaned — NGC Details. AU. K-19, High R.6. The five dollar issues of Christopher Bechtler provide interesting variety study for the territorial specialist. Variants include RUTHERFORD COUNTY spelled out, AT RUTHERFORD, and RUTHERF. as seen here, and various GEORGIA GOLD varieties. Among the two RUTHERF. varieties, this one has 20 positioned further away from CARATS. This example displays brightness from an unfortunate cleaning. Otherwise, the surfaces are lightly marked except for a scratch HER in RUTHERF. and a couple of larger marks around the date. Light reddish patina surrounds the devices. Listed on page 374 of the 2013 *Guide Book*. PCGS# 10115

1861 Kagin-7 Ten Dollar Gold Piece, AU58
Clark, Gruber & Co.

- 4498 1861 Clark, Gruber & Co. Ten Dollar AU58 NGC. Kagin-7, R.4. Following the depiction of Pikes Peak on the 1860 Clark, Gruber & Co. 10 and 20 dollar gold pieces, the 1861 issues resembled the federal gold coins of that era. Golden-brown and greenish-gold colors grace this briefly circulated example. Traces of delicate orange patina appear near the borders. A scratch passes through the third star, and the obverse has a couple of other lesser marks. The strike is decent for the type. The 1 in the date is lightly repunched, and slender die cracks connect the date to the left side stars. Listed on page 391 of the 2013 *Guide Book*. Census: 33 in 58, 14 finer (2/13). PCGS# 10141

**1853 Assay Office Twenty, K-18, MS63
Popular Territorial Gold Type**

- 4499** 1853 Assay Office Twenty Dollar, 900 Thous. MS63 PCGS. K-18, R.2. The U.S. Assay Office produced twenty dollar coins dated 1853 with both the 884 THOUS. and 900 THOUS. finenesses. The K-17 884 THOUS. coins are very rare, however, while the 900 THOUS. pieces are far more available — although quite popular as Territorial type coins to represent the Humbert / U.S. Assay Office pieces. All of the 900 THOUS. coins are technically “overfinenesses,” 900 over 880, but the underdigits faded from the dies with continued striking. This Select example boasts lovely orange-gold color over surfaces that show few abrasions and a bold strike. Portions of the 880 are clear with a loupe. Listed on page 380 of the 2013 *Guide Book*. Population: 31 in 63, 28 finer (2/13). PCGS# 10013

CALIFORNIA FRACTIONAL GOLD

- 4500** 1855/4 Liberty Octagonal 1 Dollar, BG-511, High R.4, AU58 NGC. This Period One Gold Rush wheat-gold octagonal dollar is devoid of marks and shows only slight wear on the curls and legends. BG-511 actually circulated, since PCGS has certified at least two pieces in every grade between XF40 and AU58. Census: 4 in 58, 10 finer (2/13). PCGS# 10488

**1868 Liberty Octagonal Quarter, BG-711, MS67
Splendid Eye Appeal**

- 4501** 1868 Liberty Octagonal 25 Cents, BG-711, R.4, MS67 NGC. This variety was one of the many similarly designed Frontier, Deviercy & Co. issues, although more available than many of the others. This piece displays splendid eye appeal over highly lustrous yellow-gold surfaces that are essentially mark-free. Census: 3 in 67, 0 finer (2/13). PCGS# 10538
- 4502** 1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS66 PCGS. Attractively toned in golden-brown and sea-green shades. Well struck, though portions of the legends are absent due to die lapping, as issued. Population: 26 in 66, 1 finer (2/13). PCGS# 10541

**1868 Indian Octagonal Quarter
BG-799T, MS66 Prooflike, Sole Finest**

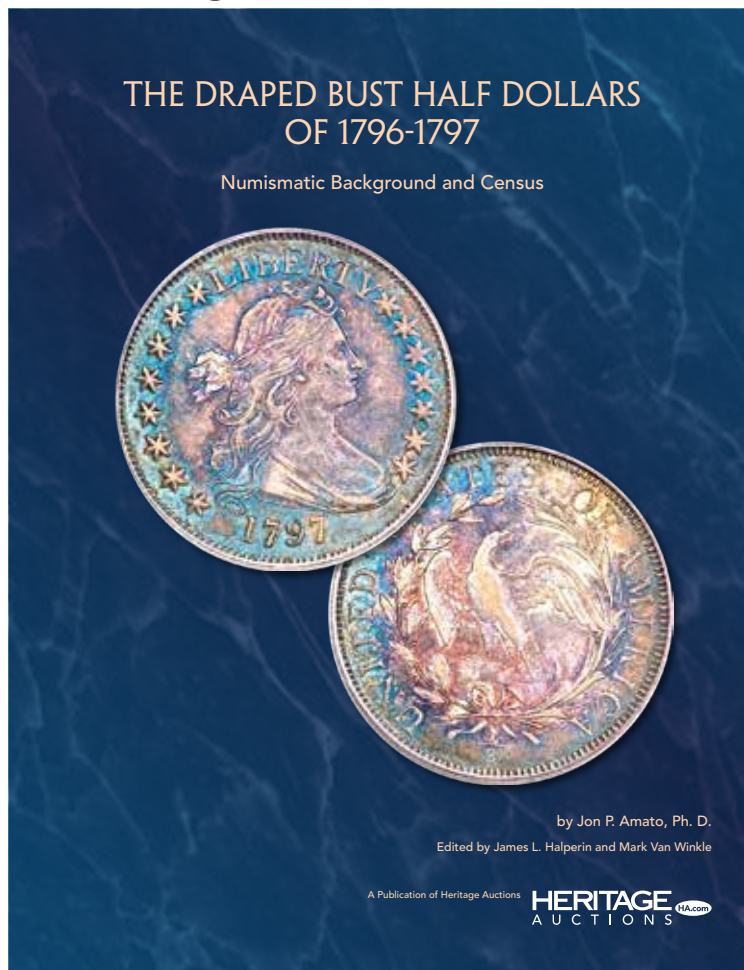

- 4503** 1868 Indian Octagonal 25 Cents, BG-799T, High R.5, MS66 Prooflike NGC. The BG-799T is one of a long series of octagonal quarters by Christopher Ferdinand Mohrig. This deep orange-gold piece offers superb eye appeal. Earlier auction appearances of this variety at Heritage showed only two MS65 Prooflike NGC pieces as the finest, then three in MS65 Prooflike, and now there are four in MS65 Prooflike, but this piece is the sole finest example (2/13). The Jay Roe Collection example (Bowers and Merena, 9/2003), lot 267, was an MS64 PCGS piece. PCGS# 710646
- 4504** 1870 Liberty Round 50 Cents, BG-1010, R.3, MS66 PCGS. A magnificent representative with pristine canary-gold fields and a good strike. The A in DOLLAR overlaps the right end of the second L, and the base of the 2 is lapped, which makes the denomination appear to be 1/7 DOLLAR. Population: 2 in 66, 1 finer (2/13). PCGS# 10839

The Draped Bust Half Dollars of 1796-1797 by Jon Amato is the culmination of more than 10 years of research into the Draped Bust Small Eagle half dollar series, one of the most coveted type coins in American numismatics and one about which remarkably little has been written.

The book includes a profusely illustrated discourse of the four Overton varieties and one major die state of this two-year design type. Additionally, it features a census of 270 Draped Bust Small Eagle half dollar specimens. A full page is devoted to each coin, including an obverse and reverse image, a description of key identification markers, and the provenance for each.

This work will be the premier reference for 1796-1797 half dollars for years to come. Institutions having an extensive numismatic library or coin cabinet will find it a valuable complement to their holdings, and catalogers charged with writing up specimens for auction can now have an indispensable source of background and pedigree information. Likewise, coin dealers seeking to purchase one or more '96 or '97 half dollars for a client or for inventory, and collectors who own, have owned, or desire to own one will want this important reference work for their libraries.

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through HERITAGE Live®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Americana & Political, Arms & Armor, Civil War & Militaria, Comic, Manuscript, Movie Poster, Space Exploration, Sports Collectibles, Texana, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, twenty-five percent (25%) on the first \$50,000 (minimum \$14), twenty percent (20%) of any amount between \$50,000 and \$1,000,000, and twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid.....	Bid Increment	Current Bid.....	Bid Increment
<\$10	\$1	\$20,000 - \$29,999	\$2,000
\$10 - \$29	\$2	\$30,000 - \$49,999	\$2,500
\$30 - \$49	\$3	\$50,000 - \$99,999	\$5,000
\$50 - \$99	\$5	\$100,000 - \$199,999	\$10,000
\$100 - \$199	\$10	\$200,000 - \$299,999	\$20,000
\$200 - \$299	\$20	\$300,000 - \$499,999	\$25,000
\$300 - \$499	\$25	\$500,000 - \$999,999	\$50,000
\$500 - \$999	\$50	\$1,000,000 - \$1,999,999	\$100,000
\$1,000 - \$1,999	\$100	\$2,000,000 - \$2,999,999	\$200,000
\$2,000 - \$2,999	\$200	\$3,000,000 - \$4,999,999	\$250,000
\$3,000 - \$4,999	\$250	\$5,000,000 - \$9,999,999	\$500,000
\$5,000 - \$9,999	\$500	>\$10,000,000	\$1,000,000
\$10,000 - \$19,999	\$1,000		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and in Texas on invoices under \$1000. Check the Web site at: <http://coins.ha.com/c/ref/sales-tax.zx> for more details.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.

Terms and Conditions of Auction

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Dispute Resolution for Consumers and Non-Consumers: Any claim, dispute, or controversy in connection with, relating to and/or arising out of the Auction, participation in the Auction, award of lots, damages of claims to lots, descriptions, condition reports, provenance, estimates, return and warranty rights, any interpretation of these Terms and Conditions, any alleged verbal modification of these Terms and Conditions and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation shall or any other matter: a) if presented by a consumer, be exclusively heard by, and the parties consent to, exclusive in personam jurisdiction in the State District Courts of Dallas County, Texas. THE PARTIES EXPRESSLY WAIVE ANY RIGHT TO TRIAL BY JURY. Any appeals shall be solely pursued in the appellate courts of the State of Texas; or b) for any claimant other than a consumer, the claim shall be presented in confidential binding arbitration before a single arbitrator, that the parties may agree upon, selected from the JAMS list of Texas arbitrators. The case is not to be administrated by JAMS; however, if the parties cannot agree on an arbitrator, then JAMS shall appoint the arbitrator and it shall be conducted under JAMS rules. The locale shall be Dallas Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. Any party on any claim involving the purchase or sale of numismatic or related items may elect arbitration through binding PNG arbitration. Any claim must be brought within one (1) year of the alleged breach, default or misrepresentation or the claim is waived. This agreement and any claims shall be determined and construed under Texas law. The prevailing party (party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM O: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 1-800-872-6467 or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. HERITAGE

FINE & RARE WINE AUCTION

MARCH 29, 2013 | BEVERLY HILLS | LIVE & ONLINE

From the world-renowned Massandra Winery, vineyards of the Tsars

In our March Signature auction, Heritage is making available a wide range of wines from virtually every vintage going back to the 20's, including a few of the last remaining examples that were owned by Tsar Nicholas II himself.

Finding quality wines from meaningful vintages to celebrate milestone birthdays and anniversaries can be challenging, but every wine on offer has been tasted and selected for the sale based on their incredible quality. Celebrating your special occasion with a special wine has never been easier.

Available Vintages:

1901	1944	1969	1986
1905	1945	1971	1987
1915	1946	1972	1988 - 25th anniversary
1923 - 80th birthdays	1947	1973 - 40th birthdays	1989
1929	1948	1974	1990
1931	1949	1975	1991
1933	1950	1976	1994
1936	1951	1977	1997
1938 - 75th birthdays	1952	1978	2000
1939	1953 - 60th birthdays	1983 - 30th birthdays	2001

LONG BEACH EXPO

Long Beach Expo • June 6-8, 2013 Save the Date!

The Long Beach Expo is the top coin and collectibles venue on the West Coast. Here are just a few reasons why:

- Hundreds of dealers and collectors are on-hand buying and selling
- Some amazing collectibles are always on display
- Multi-million dollar auction held by Heritage Auctions
- Onsite Grading by PCGS

HERITAGE
AUCTIONS HA.com

- Numerous youth activities including the kids Treasure Hunt
- FREE grading consultations with PCGS founder David Hall
- Great weather and a business climate to match

Dealers – it's never too early to reserve your booth space. For more information, visit longbeachexpo.com or call 888-743-9316.
